

AGRICULTURE

COLLEGE OF AGRICULTURE

Wayne R. Bidlack, Dean
 John E. Trei, Associate Dean
 Robert R. Stein, Director of Development
 Rhonda L. Ostrowski, Recruitment Coordinator

The agri-food industry serves the State by generating food for the U.S. and the world. While less than two percent of California's population now lives and works on the farm, it produces food worth \$26.8 billion and over \$100 billion in processing, packaging and distribution of the food supply. Opportunities are tremendous for careers in national and international agri-food programs, especially for individuals with dual language skills. Agriculture graduates can expect challenging opportunities in agriculturally-related occupations in business, industry, specialized services, education, conservation, and recreation, as well as production. Additionally, the College offers challenging programs that will prepare graduates for careers in nutrition/dietetics and the apparel industry. These expanding careers provide opportunities for men and women with a broad spectrum of interests and abilities. Hundreds of careers, many relatively unknown a few years ago, are attracting men and women from both urban and rural communities.

Instruction in the College of Agriculture is offered in 10 majors and 16 options leading to the bachelor of science degree. There are five Master of Science options offered in Agricultural Science, Animal Science, and Nutrition and Food Science, Plant Science, and Sports Nutrition.

Animal production flocks and herds are maintained for undergraduate instruction and graduate research programs.

Facilities on or near the campus make possible practical laboratories for the various majors. The university farm consists of fertile soils typical of the Southern California area with enough variation in soil type and climate to give students broad experience. Over 700 acres of university-owned land are available for pastures, crops, groves, and ornamental plantings.

To assure each student of occupational competence, the university provides an opportunity to learn the fundamental skills involved in the care, maintenance, and operation of equipment and facilities. All departments offer employment for student assistants.

The College of Agriculture is involved in a wide variety of continuing education programs. They range from workshops in equine management to cultural food classes, from agricultural leadership conferences, food distribution seminars, and pest management. Industry and agricultural faculty work cooperatively together in planning and presenting conferences to satisfy the needs of the agribusiness industry. A unique conference, Agricultural Business Management, has been presented for the past several years for Japanese supermarket operators on food distribution in the United States. Short courses are provided by the agricultural education faculty in the newly emerging technical areas. Faculty stand ready to assist industry, government and others in sponsoring programs to meet the needs of the community at large.

Because of the commitment of the College of Agriculture to contributing to the total lifestyle of handicapped persons, special education concerns are incorporated into appropriate courses within the College.

Gamma Sigma Delta, an honorary society in agriculture, is open to all students in agriculture. Information concerning requirements for membership can be obtained from the Dean's Office in the College of Agriculture.

ACADEMIC PROGRAMS

Majors

Agricultural Biology B.S.
 Agricultural Science (Education) B.S.
 Agronomy B.S.
 with options in Crop Production and Crop Science
 Animal Science B.S.
 with options in Animal Health Science, Animal Industries/Business Management, Equine Science, and Pre-Veterinary Science/Graduate School
 Apparel Merchandising and Management B.S.
 with options in Apparel Manufacturing and Fashion Retailing
 Food Marketing and Agribusiness Management B.S.
 Food, Nutrition and Consumer Science B.S.
 with options in Consumer Science, Dietetics, Food Science and Foods in Business
 Food Science and Technology B.S.
 Horticulture B.S.
 with options in Fruit Industries and Ornamental Horticulture
 Landscape Irrigation Science B.S.
 Soil Science B.S.

Minors

Agricultural Biology
 Agricultural Business Management
 Agronomy
 Animal Science
 Environmental Health Specialist
 Fashion Merchandising
 Foods and Nutrition
 International Agribusiness Management
 Landscape Irrigation Design
 Ornamental Horticulture
 Pest Management
 Soil Science

Certificates

Landscape Irrigation Design

Credentials

Adult and Vocational Education
 Agricultural Specialist
 Home Economics

Master of Science in Agriculture

with options in Agricultural Science, Animal Science, Nutrition and Food Science, Plant Science, and Sports Nutrition

 Building 45, Room 104
 (909) 869-2220
 Eudell Vis, Chair
 Apparel Merchandising and Management
 Betty Tracy, Program Coordinator

CENTERS

AGRIScapes

AGRIScapes is an education and demonstration center devoted to food, agriculture, and the urban environment. Currently under construction, this 40-acre complex will house a visitor's center, recycling education center, farm store, and new ornamental horticulture unit. The building complex will be surrounded by theme gardens, landscapes, agricultural research projects, and demonstrations designed to be utilized by students and the general public. All aspects of the AGRIScapes project are designed to promote an increased awareness of the importance of agriculture and its associated industries to our daily life.

Apparel Technology and Research Center (ATRC)

The Apparel Technology and Research Center conducts research, outreach education, and demonstration activities for the apparel industry. The Center houses a model manufacturing plant featuring state-of-the-art equipment and advanced manufacturing systems. The ATRC is the only recipient on the West Coast of both a research and demonstration contract from the Department of Defense Logistics Agency. These contracts provide over \$13 million in funding to expand the capabilities of the ATRC to work with industry. Students in the Apparel Merchandising and Management degree, as well as various Engineering and Business programs, benefit from ATRC activities.

Center for Antimicrobial Research (CAR)

CAR was established to maintain academic excellence in the rapidly changing areas of biotechnology related to food safety and public health. CAR conducts basic and applied research on novel antimicrobial agents and explores the potential application of such systems in medicine, oral health, animal sciences, food safety, and water quality/public health. CAR will provide research-training opportunities for students in corporate-related R&D applied projects integrated with a Masters Degree program.

Center for Turf, Irrigation and Landscape Technology (CTILT)

CTILT provides a focal point for teaching, research and testing, and industry outreach in the areas of turfgrass, ornamental plant materials, landscape irrigation technology, water management, landscape operations, sports turf and golf course management. Industry sponsored research projects on irrigation system component development, PVC pipe systems, WICK irrigation, water management, and fertilizer trials are on going. Industry sponsored short courses on landscape irrigation design, water management and landscape management are offered.

Equine Research Center

The Equine Research Center, founded in 1980, complements the programs of the W.K. Kellogg Arabian Horse Center. The Research Center, unlike the Kellogg Center, deals with all horse breeds and not only the Arabian. The Research Center conducts investigations in the areas of equine nutrition, physiology, and management. The Research Center is a self-supported center funded through private donations with the major contributor being the Oak Tree Racing Association.

Natural Color Resource Center

The Natural Color Resource Center is unique in the world as a repository of all the available information on Natural Colors. It makes this data available to anyone working with or requiring the state of the art on any aspect of natural colors. The Center is responding to a world wide industry need to satisfy the current strong consumer trend for an all natural ingredient makeup of their foods, cosmetics and pharmaceuticals. Natural colors have been known from antiquity and the reported research is scattered throughout the world. The Center collects and maintains a core data base in support of, and as a catalyst for, research at the Center, as well as throughout the world. The Center encourages students to select Natural Colors as a study area for advanced degrees.

Raymond Burr Orchid Collection

The collection consists of over 50,000 specimens of orchids, primarily of the Cattleya alliance, housed in the Horticulture Department nursery facilities. Primarily used for teaching and research purposes in horticulture courses, the orchids are used for instruction in propagation, including plant breeding. The collection is also utilized by community groups interested in orchid culture, and for continuing education.

Reproductive Physiology Center

The mission of the Reproductive Physiology Center is to provide an undergraduate teaching and graduate student research laboratory for the investigation of physiological events responsible for reproduction in domestic farm animals. The primary emphasis of the Center is to utilize new biotechnology procedures to manipulate and preserve male and female gametes collected from ruminant and nonruminant animals. The Center is equipped to collect, analyze and freeze spermatozoa for improving the procedures associated with artificial insemination.

W.K. Kellogg Arabian Horse Center

The Center continues the tradition of the Kellogg Ranch, which has been one of the world's outstanding Arabian horse breeding farms, perpetuating the Arabian and making valuable blood lines available to the public. The Arabians are utilized in the animal science courses related to the ever-expanding field of light horse production, research and training. Public performances are given on the first Sunday of the month, October through June, at 2p.m. In July 1989, the University established an equine outreach program to serve the interest of all breeds and horse audiences. The primary objective of this program was to develop educational opportunities and programs that would address the needs and challenges of the horse industry.

Responsibilities of the equine educational program include providing educational programs to the horse public and addressing the specialized needs of the commercial equine industry. Programs are also developed to meet the needs of specialized clientele.

SPECIAL PROGRAMS**Recruitment**

The College of Agriculture has developed an ongoing outreach program for prospective students from both high schools and community colleges. Students, faculty and staff regularly visit southern California schools to talk to students, parents and teachers about attending college, studying a wide range of programs offered by the College and attending Cal Poly Pomona. Our Ag Recruitment Office also provides campus tours and pre-admission counseling, as well as serving as a contact point for new and prospective students. For assistance, please call Ag Recruitment at (909) 869-3718.

Agricultural Educational Enhancement Services (AGREES)

AGREES is a college-based program designed to improve the retention and graduation rate of students enrolled in the College of Agriculture. AGREES provides faculty and peer interaction as well as a variety of support services to assist students in their academic pursuits at Cal Poly Pomona.

California Agricultural Leadership Program

Cal Poly Pomona, through the College of Agriculture, is one of four universities in the state which participate in the California Agricultural Leadership Program. Under the auspices of the Agricultural Education Foundation, the Program consists of a series of seminars and travel experiences designed to broaden the perspectives of selected mid-career agricultural professionals who have demonstrated leadership potential. Participants complete the program with a greater capacity to accept leadership responsibility in any part of society. For more information, contact the Dean of the College of Agriculture.

Cooperative Education

The College of Agriculture commenced a cooperative education program with industry, business and government during the fall quarter, 1978. This program is designed to provide alternating periods of full-time study and full-time work. It is expected that each student in the co-op education program will spend a total of four quarters over a three-year period gaining work experience. For these four quarters of experience the student will receive 16 units of academic credit.

The co-op education program will:

1. Provide the opportunity for the student to gain experience in agri-food, agribusiness, agricultural production and/or government. This experience should stimulate the student's interest in those areas of academic instruction that relate to the newly acquired experience.

2. Provide students with the opportunity to evaluate alternative careers.
3. Provide an opportunity for students to earn a salary which will enable them to attend school full-time during alternating quarters.
4. Provide an opportunity for prospective employers to get acquainted with co-op students.

More information may be obtained from the Office of the Dean of Agriculture and/or the University's Career Center.

Interdisciplinary General Education (IGE)

Students majoring in the various programs in Agriculture are encouraged to take part of their General Education requirements through IGE. This IGE program is specially designed to meet the needs of Agriculture students particularly in the areas of writing, critical thinking, humanities and the social sciences.

Student Enterprise Projects

Students in the College of Agriculture are provided an opportunity to learn the interrelated skills involved in the production of a crop or animal project by means of the Student Enterprise Project experience. This supervised work program allows the student to utilize College of Agriculture facilities and equipment, along with financing provided through the Cal Poly Pomona Foundation. All aspects of project design, initiation and completion are developed by the student in consultation with the supervising faculty member. In addition to valuable experiential learning, the student is able to share in the profits generated by the project. Interested students should see their department chair for further information.

STUDENT ORGANIZATIONS AND ACTIVITIES

Students in the College of Agriculture have the opportunity to become involved with many different types of student organizations, whether it be for a specific major or for a team that competes intercollegiately. Organizations offer students the opportunity to meet informally with students and faculty outside of the class room and to network with alumni and industry representatives. Students are encouraged to broaden their college experience by joining one of the following student organizations: Agricultural Biology Club, Agricultural Council, Agricultural Education Club, Agricultural Engineering Club, Animal Health Science and Technology Association, Animal Science Academic Quadrathlon Team, Apparel Merchandising & Management Association, Block and Bridle, Equine Drill Team, Foods and Nutrition Forum, Intercollegiate Equestrian Team, Landscape Irrigation Science Club, Crops, Livestock, and Soils Judging Teams, Livestock Show Teams, Los Rancheros, Los Robles, National Agri-Marketing Association, Phi, Upsilon Omicron, Pre-Vet Club and Rodeo Club. In addition to student organizations, there are many opportunities for students to work or volunteer for the farm, livestock units, nursery, farm store and horse center.

COURSE DESCRIPTIONS**AG 100 Orientation to the College of Agriculture (1)**

An orientation course to acquaint students with the academic opportunities within the College of Agriculture and in the individual majors. Strategies to assist students with the successful completion of their college career will be introduced. Resources available to students both on and off campus will be reviewed. Open to non-majors. 1 lecture. Graded only on a credit/no credit basis.

AG 101 Agriculture and the Modern World (4)

An introduction to the history of modern agriculture, its integration into social, economic and political institutions, the biological systems of which it is a part, the causes and impact of world hunger, and the implications of future changes and innovations in the production of food and fiber. The course will emphasize critical analysis of current agriculture and food issues. 4 lectures. Open to all majors. Required of all agriculture majors.

AG 128/128L Computer Applications in Agriculture (2/1)

A course requiring the student to utilize computer applications such as word processing, spreadsheet, database management systems, presentation managers, and communications to solve problems and increase productivity in their professional career. The transfer of data between applications and computer platforms will be explored. The students will learn to search the Internet for information and use e-mail for communication. 2 lectures, 1 three-hour laboratory. Concurrent enrollment required.

AG 200 Special Study for Lower Division Students (1-2)

Individual or group investigation, research, studies or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

AG 400 Special Study for Upper Division Students (1-2)

Individual or group investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

AG 401 Ethical Issues in Agriculture (4)

The examination of current issues related to majors in the College of Agriculture within a framework of ethical reasoning. Students will participate in investigation and discussion of selected topics and will be encouraged to explore a personal ethical stance as a professional. 4 lectures/problem-solving. Prerequisite: senior standing.

AG 464 Development of Leadership Skills (3)

The exploration of professional growth and leadership development in the context of food and agriculture careers. 2 seminar-discussions. Prerequisite: senior standing.

AG 470, 471, 472, 473 Cooperative Education (2-4) (2-4) (2-4) (2-4)

On-the-job experience for all majors in the College of Agriculture. Students alternate one or more quarters of full-time studies in their major with an equal number of quarters of relevant full-time work for pay. Prerequisite: consent of instructor and junior standing. (Courses must be taken in ascending sequence.)

AGRICULTURAL BIOLOGY

Daniel Hostetler, Chair, Horticulture/Plant and Soil Science
Lester C. Young, Coordinator, Agricultural Biology

Rex O. Baker
Richard S. Kaae
Gregory Partida

Agricultural Biology combines the areas of agriculture, technology, and biological sciences. Protection of food, plants, animals and humans is emphasized through the management of the environment and its organisms. Agricultural biologists are involved in programs of protection that are environmentally compatible and socially responsible. These programs include the management of populations of insects, mites, nematodes, plant diseases, weeds, vertebrate pests and environmentally hazardous materials.

Professional careers with county, state and federal Departments of Agriculture, Public Health Services and allied governmental agencies protecting and promoting agriculture, consumer services and environmental protection are very challenging and rewarding. Positions in sales, advisory services, and consultants with numerous pest management and related commercial organizations, agricultural production enterprises, and international and domestic public health service organizations are available. Research, teaching and graduate studies are other interesting pursuits.

A new area of emphasis is Environmental Health Science. Health sanitarians play an important role in the administration and regulatory enforcement of environmental and public health laws. Some activities environmental health professionals are involved in include:

- Drinking water sanitation and enforcement
- Vector control and public health concerns
- Prevention of atmospheric pollution
- Sanitation in production of meat, milk, and foods
- Hazardous and toxic substance control
- Housing and institutional sanitation
- Solid and liquid waste management
- Review of legislation regarding environmental health

The marketing of agricultural products presents many opportunities for individuals with a knowledge of quality standards, environmental factors, and organisms affecting food, fiber and health.

Summer employment, cooperative education placement, and internships are encouraged because they provide both valuable experience and income for students.

Opportunities are expanding and are abundant for graduates. There is an increased demand for qualified graduates because of growing public awareness of environmental, consumer and public health issues. Many governmental agencies are recruiting qualified individuals. In addition to the development of knowledge necessary for occupational proficiencies, this program emphasizes sources of information. This enables the graduate to increase professional competence and to cope with the constantly growing volume of new information. Thus graduates are prepared for immediate employment in a wide range of positions and are prepared to enhance their careers after graduation.

A recent survey of alumni indicates that careers are plentiful. A recent graduate can expect a starting salary in the \$25-\$30,000 range and reach \$60-70,000 within 10 years.

PEST MANAGEMENT AND AGRICULTURAL BIOLOGY MINORS

The Pest Management minor combines key courses in order to prepare students for the many careers which partially encompass areas of pest control. This minor is ideally suited to those majoring in Food Marketing and Agribusiness, Agronomy, Animal Science, and Fruit Industries. The Agricultural Biology minor is especially suited to individuals majoring in Biology or many areas of agriculture, and to those interested in working in careers with the county, state or federal departments of agriculture dealing with consumer and environmental protection.

ENVIRONMENTAL HEALTH SPECIALIST MINOR

The Environmental Health Specialist Minor is an interdisciplinary program which may be pursued by majors in any field. Its purpose is to prepare students for careers in Environmental Health by meeting the standards for the state internship program. State-employed specialists enforce and administer laws governing water, food, and air contamination, noise, land use planning, occupational health hazards, and animal vectors of disease. The minor is particularly suitable for students majoring in Biology.

A full description of the minor is in the "University Programs" section of this catalog.

CORE COURSES FOR MAJOR

Required of all students. A 2.0 cumulative GPA is required in core courses including option courses for the major in order to receive a degree in the major.

Students majoring in Agricultural Biology must complete 42 units of directed electives (listed on the reverse side of the curriculum sheet) by selecting a career emphasis track in Agricultural Biology or Environmental Health. Students are encouraged to work closely with their advisors when selecting these career tracks.

GENERAL EDUCATION COURSES

A total of 68 quarter units of General Education courses are required for all majors in the College of Agriculture. A new GE program will be adopted beginning fall 2001 with full implementation targeted for fall 2002. Unless specific courses are stated below, see the list of approved courses under General Education Requirements, Areas A through E, in this catalog.

Area A:

- 1. Select one course (4)
- 2. Select one course (4)
- 3. Select one course (4)

COURSE DESCRIPTIONS

All courses offered in Agricultural Biology may be taken on a CR/NC basis except for students who are majors or minors. AGB 165 may not be taken on a CR/NC basis.

AGB 165/165L Introduction to Arthropods (3/1)

Arthropods and certain relatives affecting food, plants, animals, humans and their buildings. Emphasizing insects, mites, ticks, spiders, snails, and slugs; their morphological and phylogenetic relationships; habits and habitats; important characteristics affecting the well-being of human beings. 3 lectures, 1 three-hour laboratory. Corequisite: AGB 165/165L.

AGB 200 Special Study for Lower Division Students (1-2)

Individual or group investigation, research, studies or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

AGB 224/224L Plant Identification (3/1)

Identification of ornamental, orchard, and crop plants by contrast of odors, leaf shapes, and arrangements; fruit and flower types, growth habits; coloration of plant parts, and environmental variations. Consideration of scientific, common, and family name; general propagation and most serious pests. 3 lectures, 1 three-hour laboratory. Prerequisite: BOT 124/124L. Corequisites: ABG 224/224L.

AGB 228/228L Agricultural Insect Pests (3/1)

Recognition and distribution of important insects and mites attacking agricultural crops such as the major field, cereal, and truck crops, and citrus, avocados, deciduous fruit, small fruit, berries, grapes and nut trees. Host preference and identification of damage to plant parts. Seasonal history, habits and problems relating to pest management programs. 3 lectures, 1 three-hour laboratory. Prerequisite: AGB 165/165L or equivalent. Corequisites: AGB 228/228L.

AGB 231 Integrated Pest Management (3)

Concepts of pest management in agricultural, industrial, urban and structural situations. Pesticide categorization, toxicology, safety and formulation. Mechanical, physical, cultural and biological control in pest management systems. 3 lectures.

AGB 299/299L/299A Special Topics for Lower Division Students (1-4)/(1-4)/(1-4)

Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units, with a maximum of 4 units per quarter. Instruction is by lecture, laboratory, activity, or a combination. Prerequisite: permission of instructor. Corequisites: AGB 299/299L/299A individually or in combination.

AGB 300 Insects and Civilization (4)

An analysis of insects and their relationship to man which ranges from everyday life to the development of civilization. A survey of insects and their relatives as to their importance in disease, health, everyday life and as pests of structures, fabric, stored products and crops; beneficial aspects. Analysis of need for pesticides and their side effects on human and the environment. 4 lectures.

AGB 301 Pesticide and Hazardous Material Laws (3)

Federal and California laws and regulations affecting individuals, corporations, and agencies providing for the public health, safety and welfare; and protecting the environment including our natural

resources. Emphasis on hazardous materials, ground water protection, pesticides, and pest control laws and regulations. Pesticide safety included. Function and structure of pertinent federal, state and county agencies and their enforcement practices as they relate to agribusiness, public health and pest control operations, including case studies. 3 one-hour lectures.

AGB 321 Urban Wildlife Pests and Civilization (3)

The symbiotic relationship and resulting conflicts between human and wildlife in urban, residential, recreational and industrial environments. Biology, ecology and management principles of animal pests (commensal rodents, birds and other small vertebrate animals) transmitting disease, damaging structures and landscaping, and influencing land stability. Analysis of damage leading to written recommendations. 3 lecture.

AGB 322/322L Regulatory Exclusion and Detection of Pests (3/1)

Programs of regulatory exclusion and detection of injurious pests including: survey, detection, eradication and quarantine. Purpose and application of United States and California plant quarantine laws and regulations, including biological, economic, and administrative aspects. Identification, habits, seasonal history and hosts of potential pests and diseases. 3 lectures, 1 three-hour laboratory. Prerequisite: AGB 165/165L. Corequisites: AGB 322/322L.

AGB 323/323L Vertebrate Pest Management (3/1)

Diagnosis, analysis and management of vertebrate pest damage in plant and animal production settings. Identification, biology, and ecology of vertebrate pests (small animals and birds to large predators). Evaluation of damage, control measures, non-target wildlife hazards and computer modeling. Program development and laws and regulations. 3 lectures, 1 three-hour laboratory. Corequisites: AGB 323/323L.

AGB 325/325L Produce Quality and Protection (2/1)

The marketing of quality fruits and vegetables from growers to consumers. Identification, cause and analysis of defect factors resulting from insects, mites, nematodes, birds, mammals, plant diseases and nonparasitic disorders on marketing of fruits and vegetables. Written analytical reports required. 2 lectures, 1 three-hour laboratory. Prerequisite: BOT 323/323L. Corequisites: AGB 325/325L.

AGB 336/336L Bee Science (2/1)

Care, management, and manipulation of bees. Practical application of principles for effective establishment and maintenance of apiaries. Pollination and value of bees to agriculture. Recognition and control of bee diseases. Laws and regulations pertaining to beekeeping. 2 lectures, 1 three-hour laboratory. Corequisites: AGB 336/336L.

AGB 342/342L Invertebrate Vector Control (3/1)

Major invertebrate pests attacking structures, wood, and stored products; recognition of stages and damage; life histories and means of control; related laws and regulations. 3 lectures, 1 three-hour laboratory. Prerequisite: AGB 165 or equivalent. Corequisites: AGB 342/342L.

AGB 377/377L Insect Population Ecology (2/1)

The study of pest populations in crop ecosystems in relation to chemical, biological, cultural, physical, and integrated control practices. Relationships among host, pest population, related biotic agents, soil, climate and management practices. 2 lectures, 1 three-hour laboratory. Corequisites: AGB 377/377L.

AGB 400 Special Study for Upper Division Students (1-2)

Individual or group investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

AGB 401/401L Field Entomology (2/2)

Collection, classification and study of insects and other arthropods from ecological zones, animals, crop plants, or other habitat situations. 2 lectures, 2 three-hour laboratories. Prerequisite: AGB 165 or a course in general entomology and consent of instructor. Corequisites: AGB 401/401L.

AGB 403/403L Biological Control (3/1)

Natural and induced control of insect, mite, and weed pests using agents other than toxicants; collection, production and liberation of control agents; habits and identification of major groups of parasites and predators; recent developments in pest inhibition. 3 lectures, 1 three-hour laboratory. Prerequisite: AGB 165/165L and advanced standing and consent of instructor. Corequisites: AGB 403/403L.

AGB 411 Environmental Toxicology (4)

Survey and analyses of the effects of civilization on the environment. Emphasis will be placed on the effects of agriculture and other forms of commerce on food, water, air and soil. 4 lecture discussions. Prerequisite: CHM 121/121L; SS 231/231L and senior standing.

AGB 413 Inspection Procedure (2)

Practical application of inspection techniques in the fields of vertebrate, insect, disease and weed pest management; pesticide use enforcement; nursery and seed regulation; plant quarantine and pest detection; and fruit and egg quality control. Development of public relations programs; legal cases (collection, preparation and presentation of evidence); and program analysis. 2 lectures. Prerequisite: Senior standing and consent of instructor.

AGB 424/424L Pest Control Methodology (2/1)

Summation of entomology courses through field observation and analysis of pest levels leading to written recommendations for control. Weekly field trips to agricultural areas required with written reports on trips. 2 lectures, 1 three-hour laboratory. Prerequisite: AGB 165/165L and AGB 228, AGB 231, senior standing and consent of instructor. Corequisites: AGB 424/424L.

AGB 426/426L Fruit and Vegetable Standards (3/1)

Analysis and interpretation of quality provisions of the Agricultural Code relating to fruits, nuts, vegetables, eggs and honey. Analysis of minimum standards for marketing, including maturity, containers, marketing and size requirements. Written reports required. 3 lectures, 1 three-hour laboratory. Prerequisite: AGB 325/325L. Corequisites: AGB 426/426L.

AGB 441, 442 Internship in Agricultural Biology (1-3) (1-3)

On the job experience with public and private agencies for advanced students. Professional-type experience new to the student so that a valuable contribution toward career development results. Written and oral reports necessary. Approval before enrolling required. Each course can be repeated for a total of 12 units.

AGB 455/455L Immature Insects (1/2)

The identification of immature arthropods through analysis and interpretation of dichotomous keys. Emphasis on those orders of insects with complete metamorphosis. 1 lecture/analysis, 2 three-hour laboratories. Prerequisite: AGB 165/165L and consent of instructor. Corequisites: AGB 455/455L.

AGB 461, 462 Senior Project (2) (2)

Selection and completion of a project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report. Minimum 120 hours total time.

AGB 470/470L Plant Growth Regulators (2/1)

The natural and synthetic substances used to control the growth of economic plants and their products. Emphasizes chemical characteristics, physiological plant responses, uses, and modes of application. Related laws and regulations. 2 lectures, 1 three-hour laboratory. Prerequisite: BOT 124/124L. Corequisites: AGB 470/470L.

AGB 499/499L/499A Special Topics for Upper Division Students (1-4)/(1-4)/(1-4)

Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units, with a maximum of 4 units per quarter. Instruction is by lecture, laboratory, activity, or a combination. Prerequisite: permission of instructor. Corequisites: AGB 499/499L/499A individually or in combination.

HPS 463 Undergraduate Seminar (2)

Critical reviews of contemporary research in the field of Agricultural Biology. The student will analyze, critique and advocate by inductive and deductive methods, that inferences in contemporary literature are based on fact or a logical, unambiguous extension of fact. Oral reports of literature and senior projects are required.

AGRICULTURAL EDUCATION

Flint Freeman, Coordinator, Agricultural Education
 Flint Freeman, Graduate Coordinator, M.S. in Agriculture, Agricultural Science Option

The primary function of the Agricultural Education Program is the preparation of teachers of agricultural education for the public secondary schools of California. Specialized preprofessional and professional courses are offered for undergraduate and graduate (fifth year) students. Technological, scientific, and broad general education course work for agriculture teaching candidates is offered throughout the College of Agriculture and other Colleges including the College of Education and Integrative Studies.

Students with an interest in becoming agriculture teachers are advised to enroll in the agricultural science major and obtain a B.S. degree, or they may complete a B.S. degree in one of the other approved majors in the College of Agriculture. Agricultural Science majors and all students who wish teacher certification are required to show competency in four areas of agriculture. This can be accomplished by completing the subject matter program in agriculture or receiving a passing score on the SSAT in Agriculture.

In addition to coursework in four areas of agriculture, students who plan to teach agriculture must have two years of practical experience in agriculture and must complete an Agricultural Specialist Credential. The Agricultural Specialist Credential requires a minimum of 45 additional units beyond the B.S. degree. Some of the graduate work may be applied towards a Master of Science in Agriculture, Agricultural Science option.

Enrollment in a Single Subjects Credential program is required in order to qualify for student teaching. Candidates for the Single Subjects teaching credential who are not agricultural science majors are advised to wisely use the electives available in their major in order to complete required teaching credential courses which are not normally specified in their undergraduate major. Because of the wide range of variables involved, all candidates for teaching certification are urged to consult the Agricultural Education Program as early as possible in their college careers.

For students wishing to obtain a Master of Science in Agriculture, such a degree has been approved with an option in Agricultural Science.

CORE COURSES FOR MAJOR

Required of all students. A 2.0 cumulative GPA is required in core courses including option courses for the major in order to receive a degree in the major. Students interested in teaching should see the Teacher Preparation section for additional secondary education requirements.

GENERAL EDUCATION COURSES

(Required of all students)

A total of 68 quarter units of General Education courses are required for all majors in the College of Agriculture. A new GE program will be adopted beginning fall 2001 with full implementation targeted for fall 2002. Unless specific courses are stated below, see the list of approved courses under General Education Requirements, Areas A through E, in this catalog.

Area A:

| | | | |
|-----------------------|------|-----|-----|
| 1. Freshman English 1 | .ENG | 104 | (4) |
| 2. Public Speaking | .COM | 100 | (4) |

- 2. EthicsPHL 204 (4)
- 3. Elementary SpanishFL 151 (4)
- 4. Select one course from approved list (4)

Area 4:

- 1. Introduction to American GovernmentPLS 201 (4)
and United States HistoryHST 202 (4)
- 2. Global Resources for FoodIA 101 (4)
or United States HistoryHST 201 (4)
- 3. Culture, People, and DressAMM 108 (4)
- 4. Select one course from approved list (4)

Area E:

- General PsychologyPSY 201 (4)

SINGLE SUBJECTS TEACHING CREDENTIAL

Subject Matter Program

Those qualifying for a credential through course work rather than the SSAT must complete the following:

- 18 units in Animal and/or Veterinary Science
- 18 units in Agricultural Mechanics, Agricultural Engineering, or Landscape Irrigation.
- 8 units in Agricultural Business Management and/or Farm Management/ Agricultural Economics
- 26 units in a combination of courses in Agronomy, Plant Science, Soils, and Ornamental Horticulture, and Agricultural Biology.

Students who are Agricultural Science majors automatically meet this requirement as a part of their degree requirements.

Others should consult with the Agricultural Education Coordinator. In addition to a B.S. in Agriculture, students preparing to student teach must complete requirements for the Single Subjects Credential. The courses to be taken are required of all teaching credential candidates regardless of subject matter area.

A minimum of 45 graduate credit units are required for the Single Subject Credential. A complete listing of these courses may be obtained from the Teacher Education Department.

AGRICULTURAL SPECIALIST CREDENTIAL

In addition to a B.S. in Agriculture, students preparing to teach agriculture must complete the requirements for the single subjects credential and the requirements for the Agricultural Specialist Credential. The courses include:

- Introduction to Agricultural Education ProgramsAGS 300 (3)
- Special StudyAGS 400 (2)
- Agriculture Skills and FacilitiesAGS 420/420A (3)
- Program Planning and DevelopmentAGS 430 (3)
- Teaching Methods in AgricultureAGS 440 (4)
- Early Field Experience in AGS. EdAGS 441 (4)
- Youth and Adult Leadership ProgramsAGS 505/505A (3)

Students are also required to have a concentration of 27 units, including 9 upper division, in one area of agriculture. This is generally completed as an undergraduate. A minimum of two years of verified work

experience in agriculture is also required. A total of 45 graduate credit units are required for the Agricultural Specialist Credential.

Students may complete the requirements for both the Single Subject and the Agricultural Specialist Credentials concurrently. A limited number of courses may be taken at the undergraduate level. Students should consult with the Agricultural Education program coordinator prior to enrolling in any courses to be used for credentialing purposes.

Courses in Related Agriculture

AGS 250 Development of Competitive Agricultural Activities (2)

The philosophy and development of competitive activities for students of agriculture. Selection of contest officials, development of contest patterns, scoring of placing cards, and publications of results. Use of the California Curricular Code. Practical application of this class will occur with the operation of Agriculture Field Day. 2 lectures.

AGS 299/299A/299L Special Topics for Lower Division Students (1-4)

Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units with a maximum of 4 units per quarter. Instruction is by lecture, laboratory, activity, or a combination. Prerequisite: permission of instructor.

AGS 300 Introduction to Agricultural Education Programs (3)

Overview of agriculture programs including goals and purposes. Qualifications essential to success in agricultural education. Programs of studies to meet requirements for instruction in agriculture. 3 lecture discussions.

AGS 400 Special Study for Upper Division Students (1-2)

Individual or group investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

AGS 420/420A Agriculture Skills and Facilities (2/1)

Development, operation, and management of agriculture facilities. Skills necessary for classroom, laboratory, and school farm instruction in agricultural education will be demonstrated. Emphasis will be on facility management and individual skills development and assessments. 2 lectures, 1 activity. Concurrent enrollment required.

AGS 430 Program Planning and Development (3)

Study of career opportunities in agriculture. Program development in such areas as the Future Farmers of America, and other youth groups. Supervised practice including cooperative work experience in agriculture. Development of up-to-date approaches in an integrated program. Operating policies and procedures. 3 lectures/problem-solving.

AGS 440/440A Procedures in Agricultural Education (2/2)

Approaches to the learning process and development of daily and unit plans as well as the utilization of resources. Class demonstration in teaching procedures with emphasis being given to J.I.T., micro-teaching, and the development of pedagogical skills including development analysis and evaluation. 2 lectures, 2 activity periods. Concurrent enrollment required.

AGS 441 Field Experiences in Agricultural Education (4)

An overview of Agricultural Education in the public schools. Professional type experience new to the student so that a valuable contribution toward career development results. Supervised, focused

observation/participation at the secondary school level. Written reports necessary.

AGS 450/450A Field Practices and Supervision (1/2)

Organization and implementation of an instructional program in agricultural education. Field application of Future Farmers of America, supervised practice, and classroom instruction. 1 lecture, 2 activity. Concurrent enrollment required.

AGS 461, 462 Senior Project (2) (2)

Selection and completion of a project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report. Minimum 120 hours total.

AGS 499/499A/499L Special Topics for Upper Division Students (1-4)

Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units with a maximum of 4 units per quarter. Instruction is by lecture, laboratory, or a combination of both. Graduate courses are listed in the graduate section of this catalog. Prerequisite: permission of instructor.

AGRICULTURAL ENGINEERING

Eudell Vis, Chair
Ramesh Kumar

Cal Poly Pomona offers a strong emphasis in landscape irrigation design and water management. This department is at the forefront in the application of new technology in automated irrigation systems and innovative methods of irrigation water management. Refer to the Landscape Irrigation Science degree for curriculum requirements.

The courses in this section are core, support, or elective courses for the Landscape Irrigation major and other related programs.

COURSE DESCRIPTIONS

AE 124/124L Landscape Construction (2/1)

Theory and application of hardscape materials used in the landscaping industry. Techniques and safety using common tools in the construction of decks, enclosed wooden structures, and concrete surfaces. Uses of lighting, masonry, irrigation, plumbing equipment, and plastics. 2 lectures/problem-solving and 1 three-hour laboratory. Concurrent enrollment required.

AE 200 Special Study for Lower Division Students (1-2)

Individual or group investigation, research, studies or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

AE 210/210L Engineering Analysis of Agricultural Machines (2/1)

A functional analysis of soil working tools, planting equipment, pest control equipment, and harvesting equipment. Study of tractor and mechanical power as used in agricultural operations. 2 lectures/problem-solving, 1 three-hour laboratory. Concurrent enrollment required.

AE 231/231L Introduction to Rose Float (1/1)

Creative use of construction, flower and plant materials to develop an art form to match the chosen theme of a floral festival. Use of various tools and equipment to achieve the desired aesthetic and functional perceptions. 1 lecture presentation, 1-three-hour laboratory. Can be repeated for a maximum of 4 units of letter grade and additional 2 units of credit/no credit. Concurrent enrollment required.

AE 232/232L General Surveying (2/1)

Measurement of distances, elevations, angles, and directions. Contours, maps, plane table mapping, earth yardage for land forming, cuts and fills, road curves, and aerial photogrammetry. Care of surveying equipment, note taking and calculations. 2 lectures/problem-solving; and 1 three-hour laboratory. Prerequisite: MAT 105. Concurrent enrollment required.

AE 234 Processing Equipment and Procedures for Agricultural Products (3)

Introduction to pumps, fans, sizing, sorting and materials handling equipment; the application of psychrometrics to drying systems for agricultural products. 3 lectures/problem-solving. Prerequisites: MAT 105.

AE 240/240L Agricultural Irrigation Methods (3/1)

Principles and practices of irrigation. Irrigation design engineering. Pumps, wells, water conveyance and measurement. Surface, sub-surface, drip and sprinkler irrigation. Science of plant-soil-water relationships. Water requirements of crops. Leaching and drainage problems. 3 lectures/problem-solving. 1 three-hour laboratory. Prerequisite: SS 231/231L, consent of instructor. Concurrent enrollment required.

AE 299 Special Topics for Lower Division Students (1-4)

Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units with a maximum of 4 units per quarter. Instruction is by lecture, laboratory, or a combination. Prerequisite: permission of instructor.

AE 301/301L Facilities Maintenance Technology (3/1)

Application of basic science to the operation and maintenance of electrical and mechanical equipment; refrigeration, heating, cooking, dish-washing, cleaning, etc. Energy use and cost are included. 3 lectures/problem-solving, 1 three-hour laboratory. Concurrent enrollment required.

AE 330 Strength of Biological Materials (3)

Resistance to mashing and resulting damage to such products as fruits, vegetables, grain, and eggs. Absorption of loads applied to these biological materials and how the loads are transmitted to container walls and floors. 3 lectures/problem-solving. Prerequisite: ME 219, and MAT 216.

AE 332/332L Food Engineering (3/1)

Food engineering for the conversion of raw products into foods. Engineering principles include material and energy balance, thermodynamics, fluid flow, heat and mass transfer. 3 lectures/problem-solving, 1 three-hour laboratory. Prerequisites: PHY 121, CHM 121. Concurrent enrollment required.

AE 350/350L Instruments and Controls (2/1)

Fundamentals of instruments and their operation characteristics with respect to damping, range, and accuracy. Electric, electronic, and fluidic controls for sensing and controlling devices. 2 lectures/problem-solving, 1 three-hour laboratory. Prerequisites: MAT 216, PHY 133. Concurrent enrollment required.

AE/AMM 381/381L Apparel Production I (3/1)

Introduction to apparel manufacturing from cut order planning through general warehousing and distribution. Emphasis on understanding the relationship of each manufacturing process for apparel production, manufacturing line design, work measurement techniques, and the role of quality control. 3 lectures/problem-solving, 3 hours laboratory. Prerequisite: IME 239 and AMM 301.

AE 400 Special Study for Upper Division Students (1-2)

Individual or group investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

AE 410 Human Engineering (2)

Human factors in the design of agricultural equipment and facilities. Effect of noise, vibrations, temperature, humidity, etc. on human

performance and ability to operate equipment. Design of locations of controls and sensing equipment with respect to body dimensions. 2 lectures/problem-solving. Prerequisite: junior, senior standing, or consent of instructor.

AE 411 Hydraulic Systems (3)

Hydraulic system components used in agricultural machines and facilities. Design of hydraulic systems for powering, sensing and controlling machine functions. 3 lectures/problem-solving. Prerequisite: MAT 216.

AE 415 Farm Power and Machinery Design (4)

Design of agricultural machinery and components such as agricultural v-belts, chains, couplings, drawbar, axle and shaft. Horsepower requirements of agricultural equipment and engine selection and testing. 4 lecture/problems. Prerequisites: AE 210/210L, ME 215, ME 219.

AE 420/420L Agricultural Environments and Structures (2/1)

Design of building walls, floor, and members to withstand forces of wind, snow, and product storage. Optimum building environments are designed for animals, greenhouse plants, and fruit and vegetable storage. 2 lectures/problem-solving and 1 three-hour laboratory. Prerequisites: AE 332/332L, ME 219. Concurrent enrollment required.

AE 440/440L Irrigation Engineering (3/1)

Operating characteristics of different systems of irrigation; sprinkler, drip, flooding, etc. Calculation of water requirements for crops and soils. Engineering design of water application rates, soil absorption rates and automatic equipment. 3 lectures/problem-solving. 1 three-hour laboratory. Prerequisite: ME 311. Concurrent enrollment required.

AE 441/441L Erosion Control and Drainage Engineering (3/1)

Analysis of hydrological events which impact on land drainage problems, erosion and floods. Engineering design for reducing erosion due to water, wind and other artificial and natural causes. Engineering design for reducing excessive water in the soil to improve crop production. Flood routing analysis and design of erosion control and drainage structures. 3 lecture/problems, 1 three-hour laboratory. Prerequisite: ME 311. Concurrent enrollment required.

AE 450 Instrumentation and Automation in Food Operations (4)

Instrumentation for measurement of mechanical and visco-elastic properties of food products, temperature, humidity, flow, and pressure. Computer operated controls. Introduction to machine vision, robotics simulation modeling. Prerequisite: AE 332.

AE 461 Senior Project (2)

Students will select an engineering problem in their area of interest. Project will be completed under appropriate faculty supervision and will culminate in a written engineering report.

AE 464 Agricultural Engineering Design (4)

Design of structures, machines, and processes common in agriculture, water, and food-related fields. Design procedures based on theory and accepted engineering practices for specific problems. Students will be expected to go through the entire design procedure for a given problem. 4 lectures/problem-solving. Prerequisite: senior standing.

AE/AMM 481/481L Apparel Production II (3/1)

Computer simulation of manufacturing systems to analyze quick response modular manufacturing systems, bundle systems, and UPS. Definitions, principles of simulation, and applications in apparel industry. Instrumentation and tools to evaluate ergonomic factors are studied. Software for utilization in total quality management programs are introduced. 3 lectures/problem-solving, 1 three-hour laboratory. Prerequisite: AE 381.

AE 491 Internship in Agricultural Engineering or Apparel Merchandising (1-4)

Professional level work experience with public agencies or private companies for advanced students. Work experiences are valuable for development of career goals and for application of academic training. Written reports are required. Course may be repeated for a maximum of 12 units.

AE 499/499A/499L Special Topics for Upper Division Students (1-4)

Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units with a maximum of 4 units per quarter. Instruction is by lecture, activity, laboratory, or a combination. Prerequisite: permission of instructor.

AGRONOMY

Daniel Hostetler, Chair, Horticulture/Plant and Soil Science
 Gerald L. Croissant, Coordinator, Agronomy

Daniel G. Hostetler
 Diana Jerkins
 Peggy S. Perry
 David W. Still
 Victor Wegrzyn

Agronomy is the study of the science and technology of crop production for food, forage and fiber. This discipline feeds and clothes a growing world population. Graduates in the Agronomy major can look forward to a wide range of rewarding career opportunities, both domestically and internationally. Students receive excellent training in fundamental principles as well as the more technical and scientific areas. Agronomy students have the freedom to pursue individual interest areas via a 48 unit directed elective package from which they choose their courses from approved department lists.

The Agronomy major is divided into two options: Crop Production and Crop Science.

The Crop Science option is an exciting area, combining agronomy with biotechnology and advanced sciences. Studies in these areas prepare students for entrance into graduate plant science programs throughout the country. Recent graduates from this option are actively employed in careers in plant breeding and genetic engineering, plant pathology, nematology, environmental crop physiology, conservation, and ecology. The Department has excellent rapport with the University of California, Davis where a number of our students pursue graduate studies. Agricultural biotechnology companies actively seek graduates in this option because of their advanced science training combined with sound fundamental agronomic training.

The Crop Production option is designed to give students a practical, yet scientific, background in the production of crops. Courses emphasize current practices employed by commercial agriculture in California and other major agricultural areas. Students in the Crop Production option choose from career tracks in production or a new area in sustainable agriculture. The 48-unit directed elective area contains courses in environmental protection, ecology, toxicology and conservation. This emphasis area is tied closely to programs at the Regenerative Studies Center where students work and live in a sustainable community growing their own food.

Agronomy students at Cal Poly Pomona have the unique opportunity to obtain actual experience with crop plants. The University farm regularly hires students and interns to assist in the maintenance of over 800 acres of vegetable, field, forage, and cereal crops as well as native range and irrigated pastures. Enterprising students are allowed to conduct individual or group crop projects, many involving several acres of land. These projects provide valuable training in all phases of crop and farm management and at the same time, allow students to share in the profits.

Employment possibilities are numerous and varied. In addition to commercial crop production, students are prepared to work as consultants to growers, the seed industry, crop processing and marketing, the agricultural chemical industry, as well as numerous other careers. Excellent opportunities also exist at the county, state and federal levels with agricultural commissioners, California Department of Food and Agriculture, and the United States Department of Agriculture.

Agronomy Minor

The Agronomy minor is designed for students majoring in another discipline that has close ties to plant growth, production and nutrition. It is a valuable addition for those majoring in Botany, Horticulture, Soil Science, Food Marketing and Agribusiness, Animal and Veterinary Science, Agricultural Biology, Agricultural Science, Nutrition and Consumer Sciences, Agricultural Engineering and Landscape Irrigation Science.

CORE COURSES FOR MAJOR

Required of all students. A 2.0 cumulative GPA is required in core courses including option courses for the major in order to receive a degree in the major.

GENERAL EDUCATION COURSES

A total of 68 quarter units of General Education courses are required for all majors in the College of Agriculture. A new GE program will be adopted beginning fall 2001 with full implementation targeted for fall 2002. Unless specific courses are stated below, see the list of approved courses under General Education Requirements, Areas A through E, in this catalog.

Area A:

1. Select one course..... (4)
2. Select 1 course..... (4)
3. Select 1 course..... (4)

Area B:

1. Select 1 course..... (4)
2. College Chemistry.....CHM 121 (3)
College Chemistry Lab.....CHM 121L (1)
3. Basic Biology.....BIO 115/115L (5)
4. Select 1 course (upper division)..... (4)

Area C:

1. Select 1 course..... (4)
2. Select 1 course..... (4)
3. Select 1 course..... (4)
4. Select 1 course..... (4)

Area D:

1. Introduction to American Government.....PLS 201 (4)
and United States History.....HST 202 (4)
2. Select 1 course..... (4)
3. Select 1 course..... (4)
4. Select 1 course..... (4)

Area E:

- Select 1 course..... (4)

AGRONOMY MINOR

| | |
|-------------------------------|----|
| Units Required | 24 |
| Upper Division Units Required | 12 |

Required Courses (all students)

| | | |
|-------------------------|---------|-----|
| Plants and Civilization | AGR 311 | (4) |
|-------------------------|---------|-----|

Select 16 units from the following:

| | | |
|------------------------------|--------------|-----|
| Agronomic Practices AGR | 120/120L | (4) |
| Field Crops Systems | AGR 220/220L | (4) |
| Pasture and Forage Systems | AGR 223/223L | (4) |
| Vegetable Crop Systems | AGR 226/226L | (4) |
| Crop-Animal Systems | AGR 229/229L | (5) |
| Crop Quality and Utilization | AGR 322/322L | (4) |
| Weeds and Weed Control | AGR 330/330L | (4) |
| Seed Production | AGR 331/331L | (4) |

Select 4 units from the following:

| | | |
|---|--------------|-----|
| Crop Ecology | AGR 401 | (4) |
| Plant Breeding | AGR 404/404L | (4) |
| Crop Diseases | AGR 421/421L | (4) |
| Environmentally Sustainable Agriculture | AGR 437/437L | (4) |

COURSE DESCRIPTIONS

All courses offered in Agronomy may be taken on a CR/NC basis except by majors.

AGR 120/120L Agronomic Practices (2/2)

Practical application of primary and secondary crop production cultural practices with a relationship to field conditions. Sequence and necessity of operations from soil preparation through harvesting. Analysis of equipment efficiency to crop culture. 2 lectures, 2 three-hour laboratories. Corequisites: AGR 120/120L.

AGR 200 Special Study for Lower Division Students (1-2)

Individual or group investigation, research, studies or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

AGR 220/220L Field Crop Systems (3/1)

Production and management of the major California field crops such as cereals, cotton, field beans, sugar beets and potatoes. Characteristics of the major varieties in relation to applicable cultural practices, cost of production, harvesting, marketing, grading and processing. 3 lectures, 1 three-hour laboratory. Corequisites: AGR 220/220L

AGR 222 Culinary Produce Technology (4)

Integration of principles of culture, procurement, identification, and quality of standard and gourmet vegetables, fruits, and herbs, for restaurant and culinary uses. Onsite studies/discussion. Organic vs. standard produce. Case studies. 4 lectures/problem-solving.

AGR 223/223L Pasture and Forage Systems (3/1)

Establishment, management, and composition of irrigated and rangeland pastures adapted to Southwestern conditions. Identification, botanical characteristics, and livestock utilization of major pasture species. 3 lectures, 1 three-hour laboratory. Corequisites: AGR 223/223L.

AGR 226/226L Vegetable Crop Systems (3/1)

Cultural practices, varieties, economics of production of major warm and cool season vegetables. Application of production techniques on college-operated acreage. 3 lectures, 1 three-hour laboratory. Corequisites: AGR 226/226L

AGR 229/229L Crop-Animal Systems (3/2)

Production, management and utilization of principal feed crop species in the Southwest. Identification, botanical characteristics, and nutrient value of major feed crops. Poisonous plants and toxicology. Animal health as affected by crops and crop contaminants. Ecology of pasture and range systems. 3 lectures, 2 three-hour laboratories. Prerequisite: BIO 110 or BIO 115/115L. Corequisites: AGR 229/229L.

AGR 299/299L/299A Special Topics for Lower Division Students (1-4)/(1-4)/(1-4)

Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units, with a maximum of 4 units per quarter. Instruction is by lecture, laboratory, activity, or a combination. Corequisites: AGR 299L/299A individually or in combination. Prerequisite: permission of instructor.

AGR 311 Plants and Civilization (4)

A critical review of science, technology and the environment as related to plant domestication and current world food and fiber production. Societal implications associated with the biological and technical innovations in world cropping systems will be discussed. Students will evaluate and discuss issues in an open classroom forum. Oral and written reports. 4 lectures/problem-solving. Prerequisites: ENG 104 and satisfactory completion of Category IIa, b and c.

AGR 322/322L Crop Quality and Utilization (3/1)

Grades, quality factors, and processing of cereal, fiber, and forage crops. Market and nutritional values. Optimum harvesting and storage conditions to preserve quality and facilitate utilization. 3 lecture, 1 three-hour laboratory. Corequisites: AGR 322/322L.

AGR 330/330L Weeds and Weed Control (3/1)

Recognition and control of weeds occurring in crop and range lands, ornamental plantings, and non-cropped situations. Classification of weeds. Cultural, chemical, and biological control practices. Laws and regulations. 3 lectures, 1 three-hour laboratory. Prerequisite: BIO 115/115L or BOT 124/124L. Corequisites: AGR 330/330L.

AGR 331/331L Seed Production (3/1)

California field, vegetable and flower seed production. Location and methods of growing, harvesting, storing. Economic outlook for principal kinds. Certified seed production. Seed laws. 3 lectures, 1 three-hour laboratory. Corequisites: AGR 331/331L.

AGR 351/351L Post Harvest Physiology of Fruit and Vegetables (3/1)

Issues affecting the quality of fruit, vegetable and floral commodities from the point of harvest, transportation through marketing channels, and to the consumer. Topics will include storage, ripening, and processing of these fresh commodities. Major pathological organisms affecting quality will be discussed. 3 lectures, 1 three-hour laboratory. Prerequisite: BIO 115/115L. Corequisite: AGR 351/351L.

AGR 400 Special Study for Upper Division Students (1-2)

Individual or group investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

AGR 401 Crop Ecology (4)

The environmental, physiological, and production factors in the growth of horticultural and agronomic plants in a managed setting. 4 lectures. Prerequisite: SS 231/231L, senior standing.

AGR 404/404L Plant Breeding (3/1)

Principles and techniques of improving agronomic and horticultural crop species. Application of field plot design and statistics to experimentation in crop improvement. 3 lecture. 1 three-hour laboratory. Prerequisite: BIO 115/115L. Corequisite: AGR 404/404L.

AGR 421/421L Crop Diseases (3/1)

Methods of recognizing and controlling diseases of commercial vegetable and field crops. Chemical and cultural control methods that are presently being utilized in California. 3 lectures, 1 three-hour laboratory. Prerequisite: BOT 323/323L. Corequisites: AGR 421/421L.

AGR 437/437L Environmentally Sustainable Agriculture (3/1)

An examination of environmental problems which will impact the sustainability of the American agricultural system into the future. Studies on waste management, nitrogen and pest management, soil conservation and health, land conservancy, food distribution, and governmental policies affecting plant and animal agriculture. 3 lectures, 1 three-hour laboratory. Corequisite: AGR 437/437L.

AGR 441, 442 Internship in Agronomy (1-4) (1-4)

On-the-job experience with public and private agencies for advanced students. Professional type experience new to the student so that a valuable contribution toward career development results. One unit credit for each 100 hours of experience. Written reports necessary. Approval required before enrolling. Prerequisite: junior standing.

AGR 461, 462 Senior Project (2) (2)

Selection and completion of a project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report. Minimum 120 hours total time. Prerequisite: Student must take GWT before enrollment in AGR 461.

AGR 499/499L/499A Special Topics for Upper Division Students (1-4)/(1-4)/(1-4)

Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units with a maximum of 4 units per quarter. Instruction is by lecture, laboratory, activity, or a combination. Corequisites: AGR 499/499L/499A individually or in combination. Prerequisite: permission of instructor.

HPS 463 Undergraduate Seminar (2)

Critical review of contemporary research in the field of Agronomy. The student will analyze, criticize and advocate by inductive and deductive methods that inferences in contemporary literature are based on fact or logical, unambiguous extension of fact. Oral reports of contemporary literature and senior projects are required. Prerequisite: AGR 462

ANIMAL AND VETERINARY SCIENCES

Edward S. Fonda, Chair

Leo B. Abenes
Wayne R. Bidlack
Robert E. Bray
Melinda J. Burrill
Edward A. Cogger
David L. Fernandez
Louis A. Foster

Gerald E. Hackett, Jr.
Calvin N. Kobluk
Cedric Y. Matsushima
G. Duane Sharp
John E. Trei
Steven J. Wickler
Adolph A. Wysocki

A four-year curriculum leading to a Bachelor of Science degree in Animal Science with options in preveterinary science/graduate school, animal industries/business management, equine sciences and animal health science is offered by the department.

Courses offered by the department are designed to fulfill career needs for men and women in the science and business phases of the animal industry.

Specialized laboratories are provided for meat, wool, poultry, eggs, feed processing and animal production. The department maintains 330 acres of range land and 100 acres of irrigated pasture. Livestock includes a purebred breeding herd of Aberdeen-Angus and Polled Herefords, and commercial feeder cattle; the Kellogg Arabian horses; flocks of purebred Rambouillet and Suffolk sheep, a herd of commercial breeds of swine.

A Master of Science degree in Agriculture with an option in animal science is offered. Specializations available within the degree are animal nutrition, animal breeding, meat science, and animal physiology.

Location of the university provides rich opportunities for students to obtain specialized and practical educational experience in production, management, feeding, marketing and processing. Cooperation of prominent local breeders, feeders, producers, marketing organizations and related animal industries offers additional opportunity for field study. Facilities for student-owned and operated livestock projects are made available by the Cal Poly Pomona Foundation. For the student interested in meat science and processing, specialized courses are available. A student may develop a program emphasizing meat science by consulting with the appropriate departmental advisor.

The Preveterinary Science/Graduate School option meets requirements for admission to schools of veterinary medicine, related medical technical fields, and for graduate study in animal nutrition, meat science, animal breeding and animal physiology.

The Equine Sciences option is designed to prepare students for employment as managers of equine enterprises and related agribusiness opportunities in the equine industry. The option combines course work in equine production, nutrition, breeding, genetics and diseases with studies in the management aspects of an equine enterprise.

The Animal Industries/Business Management option stresses preparation for management positions in the production and marketing of animal agribusiness products. Particular emphasis is given to animal industries needing animal specialists as part of their management and marketing team. This option is also useful for students planning to teach agriculture at the secondary level or to serve in developing countries.

The Animal Health Science option prepares graduates to become veterinary technologists in an AVMA accredited program. Graduates are

eligible to sit for state and national animal health accreditation agencies and licensing agency exams. Graduates with this option can pursue careers as veterinary assistants in public and private facilities or as veterinary technologists in public health organizations and research institutions. This program is run jointly with Mount San Antonio College which is on the semester system and, therefore, has a different academic calendar.

PHYSIOLOGY MINOR

Non-majors may elect to minor in Animal Science by completing a minimum of 32 units, 9 of which must be upper division.

The Physiology minor is an interdisciplinary program which can be elected by students majoring in any field. Its purpose is to improve the training and advising of students in order to facilitate their pursuit of careers in biomedical fields utilizing a knowledge of Physiology. It is particularly appropriate for students majoring in Animal Science.

A full description of the minor is provided in the University Programs"section of this catalog.

QUANTITATIVE RESEARCH MINOR

The Quantitative Research minor is an interdisciplinary program which can be taken by students majoring in any field other than Mathematics. Its purpose is to prepare students to conduct quantitative analyses in their chosen discipline. Students acquire practical experience using statistics, principles of experimental design, survey and data analysis techniques. This minor is particularly suited for students majoring in Animal Science. A full description of this minor is included in the University Programs section of this catalog.

CORE COURSES FOR MAJOR

Required of all students. A 2.0 cumulative GPA is required in core courses including option courses for the major in order to receive a degree in the major.

| | | | |
|--|-----|----------|-----|
| Orientation to the College of Agriculture | AG | 100 | (4) |
| Agriculture and the Modern World | AG | 101 | (4) |
| Agricultural Issues and Ethics | AG | 401 | (4) |
| Introduction to Animal Nutrition | AVS | 100 | (4) |

| Unrestricted Electives | | | (19) |

Students are required to take 23 units of unrestricted electives. Courses should be taken in consultation with the option coordinator and faculty advisor.

#Animal health science students are expected to enroll in the equivalent course at Mount San Antonio College. Contact Jean Hoffman, RVT at (909) 594-5611, Extension 4544. Please note that Mount San Antonio College is on the semester system; therefore, its academic calendar is quite different.

GENERAL EDUCATION

Required for all students in all options. A total of 68 quarter units of General Education courses are required for all majors in the College of Agriculture. A new GE program will be adopted beginning fall 2001 with full implementation targeted for fall 2002. Unless specific courses are stated below, see the list of approved courses under General Education Requirements, Areas A through E, in this catalog.

Area A:

| | | | |
|--------------------------|-----|-----|-----|
| 1. Freshman English I | ENG | 104 | (4) |
| 2. Advocacy and Argument | COM | 204 | (4) |
| 3. Freshman English II | ENG | 105 | (4) |

Area B:

| | | | |
|---------------------------------|-----|-----|-----|
| 1. Statistics with Applications | STA | 120 | (4) |
|---------------------------------|-----|-----|-----|

| | | | |
|----------------------|-----|----------|-----|
| 2. Basic Biology | BIO | 115/115L | (5) |
| 3. College Chemistry | CHM | 121/121L | (4) |
| 4. Select one course | | | (4) |

Area C:

| | | | |
|----------------------|--|--|-----|
| 1. Select one course | | | (4) |
| 2. Select one course | | | (4) |
| 3. Select one course | | | (4) |
| 4. Select one course | | | (4) |

Area D:

| | | | |
|----------------------|--|--|-----|
| 1. Select one course | | | (4) |
| 2. Select one course | | | (4) |
| 3. Select one course | | | (4) |

COURSE DESCRIPTIONS

CR/NC courses noted with a +

AVS 100 Introduction to Animal Nutrition (3)

An introductory course discussing the fundamentals of animal nutrition, the composition of feeds, feeding standards and their application to livestock production. 3 lectures.

AVS 101/101L Feeds and Feeding (1/1)

A practical, applied course which provides instruction in the use of the nutritional values of feedstuffs and the nutritional requirements of animals in the formulation of least-cost, balanced rations for domestic farm animals. 1 lecture, 1 three-hour laboratory. Concurrent enrollment required. Prerequisite: AVS 100 or instructor approval.

AVS 104 Careers in Animal Health Sciences (1)

An introductory course to familiarize students with employment opportunities in the Animal Health Sciences. Emphasis placed on the diversity of careers, training, experience required, the responsibilities of professionals in animal health care, animal nursing care, and management of animal teaching and research facilities. 1 lecture.

AVS 111 Animal Agricultural Science (4)

A study of basic physiological, economic, environmental and nutritional considerations impacting both the producer and consumer; the course deals with the role, production, and use of animal products to resolve problems associated with world population and food production. 4 lectures.

AVS 122/122L Swine Management Science (3/1)

A study of the swine industry emphasizing the importance of breeds, selection, evaluation, nutrition, breeding principles, disease control, equipment, and facilities to ensure scientifically-based management decisions. 3 lectures, 1 three-hour laboratory. Concurrent enrollment required.

AVS 123/123L Sheep Management Science (3/1)

A study of the sheep industry emphasizing the importance of breeds, selection, evaluation, nutrition, breeding principles, disease control, equipment and facilities to ensure scientifically-based management decisions. 3 lectures, 1 three-hour laboratory. Concurrent enrollment required.

AVS 124/124A Basic Equitation (1/2)

The fundamentals of the art of equitation. The anatomy of the horse as it pertains to riding. Equipment utilized in training and riding, care of the horse and safety precautions emphasized. 1 lecture, 2 two-hour activities. Concurrent enrollment required.

AVS 125/125L Equine Management Science (3/1)

A study of the horse industry emphasizing the importance of breeds, selection, evaluation, nutrition, breeding principles, disease control, equipment, and facilities to ensure scientifically-based management decisions. 3 lectures, 1 three-hour laboratory. Concurrent enrollment required.

AVS 126/126L Poultry Management Science (3/1)

A study of the poultry industry including breeds and breeding systems, incubation, nutrition, disease control, equipment, and facilities. Poultry biology also examined. This course emphasizes knowledge required for scientifically-based management decisions. Discussion and lecture formats will be used. 3 lectures, 1 three-hour laboratory. Concurrent enrollment required.

AVS 128 Companion Animal Care (4)

A survey course to familiarize students with the routine problems encountered, and the responsibilities involved in owning companion animals for recreational purposes. 4 lectures.

AVS 128L Companion Animal Care Lab (1)

An experiential course designed to provide instruction in basic and skilled nursing techniques in companion animal medical care. Classes will be held in on and off campus veterinary or animal facilities as is appropriate. This course is intended for lower division students in the AVS Animal Health Sciences Option. Prerequisite: Concurrent enrollment in AVS128, enrollment in the AHS Option.

AVS 129/129L Animal Handling and Restraint (2/2)

Instruction in the general concepts of restraint and handling of wild and domestic animals. Emphasis will be placed on both physical and chemical restraint. Discussion will also include the tools of restraint, handler safety and emergency animal medical problems that might occur during restraint. 2 lectures, 2 three-hour laboratories. (AGAN 51 at Mt. SAC).

AVS 131/131L Beef Cattle Management Science (3/1)

A study of the beef cattle industry emphasizing the importance of breeds, selection, evaluation, nutrition, breeding principles, disease control, equipment, and facilities to ensure scientifically-based management decisions. 3 lectures, 1 three-hour laboratory. Concurrent enrollment required.

AVS 132/132L Light Horse Halter and Performance Evaluation (1/1)

Visual evaluation of various breeds of light horses at the halter and under saddle. Intensive training for intercollegiate horse judging competition. 1 lecture, 1 three-hour laboratory. Concurrent enrollment required.

AVS 150/150L Dairy Cattle Management Science (3/1)

A study of the dairy cattle industry emphasizing the importance of breeds, selection, evaluation, nutrition, breeding systems, disease control, equipment, and facilities to ensure scientifically-based management decisions. 3 lectures, 1 three-hour laboratory. Concurrent enrollment required.

+AVS 200 Special Study for Lower Division Students (1-2)

Individual or group investigation, research, studies or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter. Graded only on a CR/NC basis.

AVS 201 Animal Diseases (3)

Study of factors contributing to animal diseases and their control. 3 lectures.

AVS 204 Genetics of Domestic Animals (3)

An introductory course dealing with the basic genetics of all species of livestock and common companion animals. Emphasis will be placed on inherited abnormalities, traits of economic importance, conventional methods of dealing with these traits, and technologies of the future. 3 lectures. Prerequisites: AVS 111, BIO 115/115L.

AVS 205/205L Clinical Laboratory Practices (2/2)

An advanced laboratory course providing instruction in hematology, clinical pathology, microbiology, urinalysis and necropsy procedures used to diagnose health problems in veterinary clinics and diagnostic laboratories. 2 lectures and 2 three-hour laboratories. Prerequisites: BIO 115/115L, CHM 121/121L. (AGHE 62A/62B at Mt. SAC).

AVS 207/207L Clinical Biochemistry and Pharmacology (2/2)

The use of clinical chemical procedures, the classification and action of pharmaceuticals, and the dispensing of medications will be studied. Includes conversion and calculation of drugs, prescription writing and routes of administration. 2 lectures, 2 three-hour laboratories. Prerequisites: CHM 201/ 250. (AGHE 64 at Mt. SAC).

AVS 208/208L Veterinary Radiology (1/2)

Instruction in the use of radiological equipment and the development and interpretation of X-rays as used in veterinary clinics. 1 lecture and 2 three-hour laboratories. Prerequisites: BIO 115/115L. AVS 350/350L or similar anatomy and physiology. (AGHE 65 at Mt. SAC).

AVS 209/209L Anesthesiology and Surgery for Veterinary Assistants (2/2)

Instruction in surgical receiving, surgical procedures, anesthetic nursing, incubation, induction and monitoring, including instrumentation and equipment operation and care. 2 lectures, 2 three-hour laboratories. Prerequisite: AVS 205/205L and Basic Anatomy. (AGHE 61 at Mt. SAC).

AVS 211 Drugs and Society (4)

An introductory course that identifies and explains the action of different drugs. The compounds discussed include over-the-counter drugs, prescription drugs, social drugs and drugs of abuse. Major emphasis on human pharmacology with some discussion of domestic animals. No prerequisites. Meets General Education Area E requirements. 4 lectures.

AVS 224A Intermediate Equitation (2)

An activity riding class allowing students to develop proficiency in the riding skills they have been exposed to in prior experience. 2 two-hour activity periods.

AVS 234 Farrier Science (2)

Understanding the fundamentals of horseshoeing, anatomy and physiology of the horses foot, pastern and leg. Caring for the horses feet and legs, principles of horseshoeing and introduction to corrective shoeing. 2 lectures.

AVS 235L Farrier Science (2)

Fundamentals of horseshoeing, anatomy and physiology of the horses foot, pastern and leg. Trimming feet, fitting, milling shoes, principles of horseshoeing, an introduction to corrective shoeing. 2 three-hour laboratories. Prerequisite: AVS 234 or concurrent enrollment in AVS 234.

AVS 240/240L Principles of Market Animal and Carcass Evaluation (2/1)

A study of the relationship between live meat animal evaluation and carcass evaluation. Visual appraisal techniques used in the quality and yield grading of live meat-type animals compared to the grading parameters used for carcass evaluation. Incorporates the effect of selection and management on body composition and live animal and carcass value. 2 lectures, 1 three-hour laboratory. Concurrent enrollment required.

AVS 241L Introductory Livestock Evaluation (2)

Instruction in selection of beef cattle, sheep, swine, and horses according to utility, type and breed. 2 three-hour laboratories.

+AVS 244 Work Experience in Animal Health Sciences (2)

Practical experience working in public or private clinics or laboratories where application of animal health sciences or research takes place. Experiences should be useful in preparation for state board exams in veterinary technology and/or AAALAC exams for certification in laboratory animal care. This course is intended for lower division students in the AVS Animal Health Sciences Option.

AVS 266/266L Laboratory Animal Health Care and Therapeutic Techniques (3/1)

Specific instruction for feeding, caring for, and therapeutic techniques according to The Guide for laboratory animals under confinement conditions will be studied. Will include techniques (parenteral and oral) for administration of medications or treatment. 3 lectures, 1 three-hour laboratory. Prerequisites: AVS 100, AVS 101/101L. (AGHE 79 at Mt. SAC).

AVS 299/299A/299L Special Topics for Lower Division Students (1-4)

Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units, with a maximum of 4 units per quarter. Prerequisite: permission of instructor. Instruction is by lecture, laboratory, activity, or a combination.

AVS 300 Animal Issues in Science and Society (4)

This course addresses global issues and ethics relating to animal use in science and society. These issues include the use of animals for food, research and companionship. The impacts of livestock production on environment such as global warming, soil erosion, forestry and rangeland resources, water resources and livestock-wildlife interactions will be considered. 4 lectures. Prerequisite: GE Area B, subareas 1, 2 and 3.

AVS 302/302L Animal Parasitology (3/1)

The study of animal parasites and their relationship to clinical and subclinical parasitic diseases of livestock, companion animals, laboratory animals and wildlife. Emphasis will be placed on zoonotic parasites and parasites most commonly found in North America. 3 lectures, 1 three-hour laboratory. Concurrent enrollment required.

AVS 303/303L Applied Animal Feeding (3/1)

A study of the nutritional requirements for maintenance, growth, fattening, reproduction and lactation of domestic animals. The use of computerized formulation of rations to satisfy nutritional requirements. 3 lectures, 1 three-hour laboratory. Concurrent enrollment required. Prerequisite: AVS 101/101L.

AVS 304 Avian Health Care and Management (3)

Consideration of the etiology, symptomatology, and control of infectious, nutritional, and parasitic diseases of poultry. 3 lectures.

AVS 310 Veterinary Medical Law and Language (3)

Instruction in the application of the rules, guidelines, and regulation of federal, state, county, municipal and local governments, report writing and accounting procedures used in the operation of animal health care. Documentation requirements, licensing requirements and task appropriation by level of supervisors. 3 lectures. Prerequisite: AVS 104.

AVS 311 The Animal Industries and Society (4)

The course deals with the science and industry of animal production and the role and use of food animals and animal products to resolve problems associated with humanity. 4 lectures. Prerequisite: GE Area B, Subareas 1, 2 and 3.

AVS 327/327L Meat Science and Industry (3/1)

Introduction to processing and utilization of fresh and value-added red meat products. Discussions on identity standards, factors affecting sensory, nutritional, and shelf-life qualities, food safety and inspection, and grading of red meats. 3 lectures, 1 three-hour laboratory. Concurrent enrollment required.

AVS 328/328A Seafood and Poultry Processing Technology (3/1)

Introduction to the processing, marketing and utilization of fresh and value-added seafood and poultry products for the supermarket and food service industries. Examination of classification and standards to identify, marketing channels and forms, grading systems, factors affecting quality, food safety and public health considerations, and processing methods for the respective product types. 3 Lectures, 1 two-hour activity. Concurrent enrollment required.

AVS 335L Horsemanship (2)

Theory and practice of basic training principles and methods. Handling, training, grooming of the young foal and yearling. Instruction in long line

training and ground driving. 2 three-hour laboratories. Prerequisite: AVS 125/125L.

AVS 341L Livestock Evaluation (3)

Intensive visual evaluation of breeding and market swine, sheep and beef cattle in preparation for intercollegiate livestock judging competition. Extensive training in the preparation and delivery of oral reasons. 3 three-hour laboratories. Prerequisite: AVS 241L.

AVS 345 Equine Genetics and Breeding Principles (3)

Principles of inheritance for qualitative and quantitative traits. Inheritance of color in the horse. Genetically caused abnormalities; methods of detection of carrier animals. Mare and stallion selection; pedigrees and other types of performance information and their use. 3 lectures. Prerequisites: BIO 115/115L, AVS 125/125L.

AVS 350/350L Anatomy and Physiology of Domestic Animals (4/1)

An integrated approach to the structure and function of animal systems. Topics to be discussed include the cell, the muscular-skeletal system, the nervous system, the cardio-vascular system, the respiratory system, and the excretory system. 4 lectures, 1 three-hour laboratory. Prerequisites: BIO 115/115L, one quarter of Chemistry. Concurrent enrollment required.

AVS 355 Equine Nutrition (3)

Anatomy of the digestive tract of the horse as it affects feeding practices. Nutrient requirements for maintenance, work, pregnancy, and lactation in the horse. Interpreting National Research Council Nutrient Requirements for Horses. Assessing recent advances in horse nutrition. 3 lectures. Prerequisites: AVS 101/101L, AVS 125/125L.

AVS 365/365L Equine Herd Health Care and Management (3/1)

A study of the etiology, symptomatology, and control of infectious, nutritional and parasitic diseases of horses. 3 lectures, 1 three-hour laboratory. Prerequisite: AVS 125/125L. Concurrent enrollment required.

AVS 369/369L Laboratory Animal Management, Rules and Regulations (3/1)

Instruction in the specific concepts of laboratory management according to The Guide will be the basis of study. An emphasis will be placed on supervisory management of laboratory animal facilities and accreditation requirements. 3 lectures, 1 three-hour laboratory. Prerequisite: AVS 266/266L.

+AVS 400 Special Study for Upper Division Students (1-2)

Individual or group investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter. Graded only on a CR/NC basis.

AVS 402 Animal Nutrition (3)

Metabolism of proteins, carbohydrates, fats, minerals, and vitamins. Relationship of proper nutrition to livestock production. 3 lectures. Prerequisites: CHM 201, 250, or CHM 314, 317L or instructor approval.

AVS 403 Ruminant Nutrition (3)

Implications of recent findings in ruminant nutrition. The physicochemical processes of digestion and absorption. Metabolism and the importance of rumen microflora. Normal metabolism and abnormal metabolic disorders. Modes of action of feed additives. 3 lectures. Prerequisite: CHM 201, 250L, or CHM 314, 317L or instructor approval.

AVS 404/404A Animal Breeding (3/1)

Introduction to the basic principles of applied quantitative genetics and their use in the improvement of livestock. Methods of heritability estimation, selection, and systems of mating. 3 lectures, 1 two-hour recitation. Prerequisite: BIO 303 or AVS 204.

AVS 405/405L Immunological Procedures in Animal Production (3/1)

The application of immunology to disease control in farm animals; the use of immunological techniques in animal research; and potential as a tool in livestock production. 3 lectures, 1 three-hour laboratory. Prerequisite: AVS 350/350L. Concurrent enrollment required.

AVS 407/407L Critical Care, Advanced Surgical Assisting and Anesthesiology (2/2)

Instruction in the specific concepts of intensive care veterinary nursing, surgical assisting in advanced and/or specialized surgical techniques and advanced anesthesia techniques will be mastered. 2 lectures, 2 three-hour laboratories. Prerequisites: AVS 208/208L, 209/209L.

AVS 412 Mammalian Endocrinology (4)

A general course surveying the glands of internal secretion and their role in development, growth, metabolic regulation, lactation, and reproduction of animals. 4 lectures. Prerequisite: AVS 350/350L or equivalent.

AVS 414/414L Physiology of Reproduction and Lactation (3/1)

A study of the physiological processes of reproduction from gametogenesis to parturition. The reproductive cycles of the food animals and the physiology of milk secretion including factors affecting milk production will be discussed. 3 lecture discussions, 1 three-hour laboratory. Prerequisite: AVS 350/350L or equivalent. Concurrent enrollment required.

AVS 415/415L Applied Reproductive Management of Domestic Animals (3/1)

Fundamentals and techniques used in the manipulation of gametes in the reproductive management of birds, cattle, horses, sheep and swine. Applied physiological aspects of reproductive management, semen cryopreservation, artificial insemination and embryo micromanipulation techniques used in the livestock industry will be evaluated. 3 lectures; 1 three-hour laboratory. Concurrent enrollment required. Prerequisite: AVS 414/414L.

AVS 424L Nutritive Analysis (2)

Laboratory course involving the principles and practices in quantitative analysis of feedstuffs. 2 three-hour laboratories. Prerequisites: instructor approval.

AVS 427/427L Meat Processing and Technology (3/1)

Manufacturing of processed meats, and meat products as related to processing operations, sanitation, product formulation, quality control, and smokehouse operations. 3 lectures, 1 three-hour laboratory. Prerequisite: AVS 327/327L. Concurrent enrollment required.

AVS 430/430L Biotechnology Applications in Animal Science (3/1)

A study of the principles and applications of biotechnology in Animal Science. Discussion of the implications of genetic engineering, gene transfer, transgenic animals, embryo transfer and embryo manipulation for livestock improvement; present and future importance to the agriculture industry, human and veterinary medicine, ethical issues,

patent law and strategies for future problem-solving. 3 lectures, 1 three-hour laboratory. Concurrent enrollment required. Prerequisites: AVS 111, Management Science Courses, AVS 350/350L, BIO 303 or AVS 204 or AVS 345.

AVS 431 Avian Physiology (3)

Detailed consideration of the physiology of avian species with emphasis on birds of economic importance to man. 3 lectures.

AVS 432/432A Advanced Animal Breeding (3/1)

Introduction to the theoretical development and principles of quantitative genetics including selection theory and heritability, breed, strain and line formation. 3 lectures, 1 two-hour recitation.

AVS 434 Equine Reproduction (3)

Distance learning course that provides in-depth knowledge of the reproductive physiology, anatomy and endocrinology of the mare and stallion. Emphasis on structure/function relationships as they are applied to improving equine reproductive management and efficiency. 3 lectures.

AVS 435 Equine Exercise Physiology (3)

The basic and applied physiology of the exercising horse. Discussion of muscular respiratory, cardiovascular, nutritional and osmo-regulatory physiology. Includes gait analysis, lameness and pharmacology. 3 lectures. Prerequisite: AVS 350/350L.

AVS 436 Biochemical Adaptations in Animals (3)

A view of how the biochemistry of animals has adapted to the environment. Topics include adaptations to exercise, high altitude, diving, hibernation, desiccation, temperature, lactation. Students are expected to present seminars. 3 lectures. Prerequisites: BIO 115/115L and junior standing.

+AVS 441 Internship in Animal Science (1-16)

On-the-job training in animal science, providing collegiate level experiences in animal production, agribusiness and related areas. Experiences may be useful for preparation of senior projects. Total credit limited to 16 units. Graded only on a CR/NC basis. Prerequisite: permission of coordinator required in advance.

+AVS 442 Externship in Animal Health Sciences I (2)

Practical experience working in public or private clinics or laboratories where application of animal health sciences or research takes place. Experiences should be useful in preparation for state board exams in veterinary technology and/or AAALAC exams for certification in laboratory animal care. This course is intended for upperdivision students in the AVS Animal Health Sciences Option. Graded only on a CR/NC basis. Prerequisite: AVS244

+AVS 443 Externship in Animal Health Sciences II (2)

Practical experience working in public or private clinics or laboratories where application of animal health sciences or research takes place. Experiences should be useful in preparation for state board exams in veterinary technology and/or AAALAC exams for certification in laboratory animal care. This course is intended for upper division students in the AVS Animal Health Sciences Option. Graded only on a CR/NC basis. Prerequisite: AVS 442 or concurrent enrollment.

AVS 461, 462 Senior Project (2) (2)

Selection and completion of a project under minimum supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report. Minimum 120 hours total time.

AVS 463 Undergraduate Seminar (2)

New methods and developments, practices, and procedures in the field. 2 lectures. Prerequisite: senior standing.

AVS 464/464A Livestock Management Systems Problem-Solving Methodologies (3/2)

A systems approach to integrated livestock management. Students utilize their previous learning experience to resolve management problems inherent in the livestock industry using systems-based problem-solving methodologies. 3 lectures, 2 two-hour recitations. Prerequisite: senior standing or consent of instructor. Concurrent enrollment required.

AVS 472/472L Feed Manufacturing Technology (3/1)

An integration of prior course work to the feed industry including plant design, plant management, materials handling and storage, manufacturing operations, speciality feeds, computer applications, quality assurance, sanitation and pest management, safety, energy requirements, and environmental concerns. 3 lectures/problem-solving, 1 three-hour laboratory. Concurrent enrollment required. Prerequisites: AVS 303/303L or AVS 402/402A or AVS 403.

AVS 499/499A/499L Special Topics for Upper Division Students (1-4)/(1-4)/(1-4)

Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units with a maximum of 4 units per quarter. Instruction is by lecture, laboratory, activity, or a combination. Prerequisite: permission of instructor.

Graduate courses are listed in the "Graduate Studies" section of the catalog.

APPAREL MERCHANDISING AND MANAGEMENT

Betty K. Tracy, Program Director

Jean A. Gipe
Cynthia L. Regan

California's apparel industry is considered a trend-setting influence in the domestic and international fashion markets. California is the largest apparel manufacturing state in the United States and in combination with the fashion retailing industry provides a substantial number of jobs. Los Angeles is the leading national center for apparel and fashion, and careers in the Los Angeles area are many and varied. The United States apparel industry is moving into a new era of high technology — systems for innovative manufacturing and retailing processes are used to meet the needs of a globally competitive marketplace.

Apparel and fashion industry careers require varying skills and abilities. People with a creative flair do well in product development and promotion whereas people with analytical skills excel in production, market research and retail.

The Bachelor of Science in Apparel Merchandising and Management has two options: Apparel Production and Fashion Retailing. These options, similar at the freshman, sophomore and beginning junior levels, diverge in the balance of upper division coursework into one of two areas of specialization. The common core of courses for the two options provides graduates with a broad based interdisciplinary educational background in apparel and fashion products as well as manufacturing and retailing processes. Graduates will have experience in all areas of the apparel chain including product development, production, wholesale sales, distribution, retail buying, selling, and promotion. Through a combination of coursework and internship, graduates will be prepared for supervisory, managerial and executive level career paths.

The apparel curriculum is a combination of theory and application in both the classroom and on-the-job internships. An Apparel Industry Advisory Board works closely with the apparel faculty in keeping the curriculum current and providing internship opportunities.

Students are actively involved in the apparel industry and utilize actual manufacturing and retailing facilities for first hand knowledge. The Apparel Production option is endorsed by the American Apparel and Footwear Association.

Students work closely with their faculty advisors on career counseling, scheduling and internship placement. They may also participate in the student organization, the Apparel Merchandising and Management Association, as well as many professional organizations and events.

The Apparel Merchandising and Management major also offers a joint minor in Fashion Merchandising with the International Business and Marketing Department.

For more information, contact the Apparel Program Director in Building 45 Room 104 at (909) 869-3377.

Any student who meets the CSU entrance requirements will be eligible to enter this program. A student who successfully completes the required units as described will be eligible for graduation.

CORE COURSES

Required of all students. A 2.0 cumulative GPA is required in core courses including option courses for the major in order to receive a degree in the major.

| | | | |
|---|--------|----------|-------|
| Orientation to College | AG | 100 | (1) |
| Fashion Industry | AMM | 101 | (4) |
| Culture, People, and Dress | AMM | 108 | (4) |

FASHION RETAILING

Option Courses:

| | | | |
|--|-----|----------|-------|
| Apparel Merchandise Buying II | AMM | 350 | (4) |
| Fashion Retailing I | AMM | 374 | (3) |
| Visual Merchandise/Store Design II | AMM | 470/470A | (2/1) |
| Fashion Retailing II | AMM | 474/474A | (2/1) |
| Fashion Retailing Simulation | AMM | 478/478A | (2/2) |
| Industrial Costs and Controls | IME | 239 | (3) |
| Principles of Marketing Management | IBM | 301 | (4) |
| Marketing Strategy | IBM | 302 | (4) |

Support Courses:

| | | | |
|---|-----|-----|-----|
| Introduction to Microcomputers | CIS | 101 | (4) |
| Foreign Language (Spanish or Chinese) | | | (4) |

Restricted Electives: select 23 units from the approved list (23)

GENERAL EDUCATION

A total of 68 quarter units of General Education courses are required for all majors in the College of Agriculture. A new GE program will be adopted beginning fall 2001 with full implementation targeted for fall 2002. Unless specific courses are stated below, see the list of approved courses under General Education Requirements, Areas A through E, in this catalog.

Area A

- 1. Freshman EnglishENG 104 (4)
- 2. Select one course from approved list (4)
- 3. Select one course from approved list (4)

Area B

- 1. Introduction to StatisticsSTA 120 (4)
- 2. Select one course from approved listCHM or PHY (4)
- 3. Select one course from approved list (4)
- 4. Select one upper division course from approved list (4)

Area C

- 1. Fine and Performing Art—any Art course from list (4)
- 2. Philosophy and History—any course from list (4)
- 3. Foreign Language—Spanish or Chinese (4)
- 4. Select one upper division course from approved list (4)

Area D

- 1. Introduction to American GovernmentPLS 201 (4)
and United States HistoryHST 202 (4)
- 2. Agriculture and the Modern WorldAG 101 (4)
- 3. Select one course from approved list (4)
- 4. Select one upper division course from approved list (4)

Area E

- Any course from list (4)

Fashion Merchandising Minor

This interdisciplinary minor is designed for students other than AMM majors who seek additional study in the fashion industry. The minor provides students with a background in both fashion as well as business to better prepare them to seek employment in fashion related fields. The minor in Fashion Merchandising is administered jointly by the Department of International Business and Marketing and the Apparel Merchandising and Management program in the College of Agriculture.

The attainment of a minor in Fashion Merchandising is accomplished by appropriate selection, timely scheduling, and satisfactory completion of specifically designated courses and electives totaling a minimum of 36 quarter units as outlined below:

| | | |
|--|-----------|-----|
| Fashion Industry | AMM 101 | (4) |
| Apparel Design Analysis | AMM 210 | (4) |

COURSE DESCRIPTIONS

AMM 101 Fashion Industry (4)

History, development and scope of domestic and international fashion industry, investigation of processes and career opportunities in fashion design, production, wholesaling, retailing and promotion. Oral and written findings on current topics relevant to the fashion industry. 4 lectures/problem-solving.

AMM 108 Culture, People, and Dress (4)

Study of the interrelatedness of socio-psychological, economic and political/religious influences on dress in historical perspective. Cross-cultural analysis and interpretation of Western and non-Western clothing behavior through written analysis papers. 4 lectures.

AMM 160/160L Introduction to Textile Science (3/1)

Introductory study of the chemical and physical properties of textile fibers, dyes and finishes; fabric geometry including yarn and fabric structure; methodologies for evaluating textile properties and performance; textile products as represented by technologies of diverse cultures. 3 lectures, 1 three-hour laboratory.

AMM 200 Special Study for Lower Division Students (1-2)

Individual or group investigation, research, studies or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

AMM 210 Apparel Design Analysis (4)

Analyze designs for profitable lines based on aesthetic, functional and structural design factors. Use of art principles as applied to clothing design and human body forms as they relate to target customers. Written and oral projects. 4 lecture discussions.

AMM 230 Fashion Promotion (4)

Principles and techniques of fashion writing, advertising, publicity and special events to promote and increase sales in wholesaling and retailing of apparel and related products. Written analysis and presentation. 4 lectures/problem-solving.

AMM 250 Apparel Merchandise Buying I (4)

Apparel and fashion buying in the retail and wholesale environment. Role of buyer and planner in merchandising and manufacturing management. Sourcing, pricing, and calculating apparel profitability. Written and oral projects. 4 lectures/problem-solving.

AMM 299/299A/299L Special Topics for Lower Division Students (1-4)

Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units, with a maximum of 4 units per quarter. Instruction is by lecture, laboratory, activity, or a combination. Prerequisite: permission of instructor.

AMM 301/301A Apparel Product Analysis (2/2)

Analysis and comparison of techniques and equipment used to produce apparel products. Manufacturing terms and construction methods using industrial equipment. Written and oral projects. Concurrent enrollment required. 2 lectures/problem-solving, 2 two-hour activities. Prerequisite: all lower division AMM courses or equivalent.

AMM 310/310A Apparel Product Development I (2/1)

Planning, developing, and presenting apparel product lines. Analysis of goals, merchandising strategies and product line constraints. Interrelationship of fashion information between fashion services,

apparel suppliers, retailers and consumers to developing apparel products. Application of CAD technology. Written and oral projects. 2 lectures/problem solving, 1 two-hour activity. Concurrent enrollment required. Prerequisite: all lower division AMM courses or equivalent.

AMM 314/314A Apparel Product Development II (2/2)

Principles and methods of developing apparel designs and specifications. Uses of CAD in executing product lines. Analysis of garment specifications for sizing and construction based on intended performance. Analysis of color and fabric development for quality and cost of product lines. Written and oral analysis projects. Concurrent enrollment required. 2 lectures/problem solving, 2 two-hour activities. Prerequisite AMM 310.

AMM 350 Apparel Merchandise Buying II (4)

Intensive study of apparel buying processes, strategic planning, assortment development and purchase order management. Written analysis of competitive positioning, market share strategy and sales forecasting. 4 lecture/problem-solving hours. Prerequisite: AMM 250 or equivalent.

AMM 370/370A Visual Merchandising/Store Design I (2/1)

Understanding of design principles and color theory as they relate to display areas and interior design of stores. Analysis of their use in merchandising of goods and customer appeal. Drawing of floor plans, color boards and models. Written and oral projects. Concurrent enrollment required. 2 lectures/problem-solving, 1 two-hour activity. Prerequisite: all lower division AMM courses or consent of instructor.

AMM 374 Fashion Retailing I (3)

A study of international fashion retailing including types of stores, historical periods in store design, cultural differences in consumers, and retail practices unique to various countries. Written and oral projects. 3 lectures/problem solving. Prerequisite: AMM 101 or consent of the instructor.

AMM/AE 381/381L Apparel Production I (3/1)

Introduction to apparel manufacturing from cut order planning through general warehousing and distribution. Emphasis on understanding the relationship of each manufacturing process for apparel production, manufacturing line design, work measurement techniques, and quality control. 3 lectures/problem-solving, 3 hours laboratory. Prerequisite: IME 239 and AMM 301/301A.

AMM 400 Special Study for Upper Division Students (1-2)

Individual or group investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

AMM 410/410A Apparel Product Development III (2/2)

Development of apparel product prototypes, samples and duplicates. Uses of PDS technology in development of first pattern. Fit standards and verification. Criteria for evaluation of apparel product prototypes, samples and duplicates. Written and oral student projects and presentations. Concurrent enrollment required. 2 lecture/problem-solving, 2 two-hour activities. Prerequisite: AMM 314/314A.

AMM 414/414A Apparel Product Development IV (2/2)

Principles of production pattern-making, grading and marker-making. Evaluate patterns for construction methods and fabric performance. Criteria for selection of marker systems. Synthesize marker creation, efficiency, parameters, and material utilization. Spreading, cutting and final costing determinations. Written and oral analysis projects.

Concurrent enrollment required. 2 lectures/problem solving, 2 two-hour activities. Prerequisite AMM 410/410A.

AMM 418/418A Apparel Product Development Simulation (2/2)

Comprehend process of problem solving with principles, procedures and practices in producing an apparel line. Use of statistics in quality management for revising apparel product lines to meet consumer needs. Written and oral projects. Concurrent enrollment required. 2 lectures, 2 two-hour. Prerequisite: AMM 414/414A

AMM 442 Internship (1-8)

New, on-the-job professional experience related to apparel production or fashion retailing. A valuable contribution toward career goals based on completed coursework. Periodic analytical reports required. Prerequisite: prior consent of faculty coordinator.

AMM 460/460L Advanced Textile Science (3/1)

Theoretical analysis of textile structures. Assessment of current research and development in textiles. Evaluation of chemical and physical properties of fibers, fabrics, dyes and finishes. 3 lectures, 1 three-hour laboratory. Prerequisite: AMM 160/160L.

AMM 470/470A Visual Merchandising/Store Design II (2/1)

The study of space and lighting principles in store design and product display. Guidelines and codes regulating the use of space and lighting. The application of lighting to attract target customers, provide a positive visual environment and sell merchandise. Written and oral projects. Concurrent enrollment required. 2 lectures/problem solving, 1 two hour activity. Prerequisite: AMM 370/370A.

AMM 474/474A Fashion Retailing II (2/1)

Use of case studies for overview and discussion from a management perspective, including topics such as buying, promotion, quality control, design and product analysis. A study of trends and forecasting of apparel and retail design. Written and oral projects. Concurrent enrollment required. 2 lectures/problem-solving, 1 two-hour activity. Prerequisite: all lower division AMM courses and AMM 374 or equivalent.

AMM 478/478A Fashion Retailing Simulation (2/2)

Design and develop displays, department and store layouts using principles and techniques of visual merchandising. Develop a buying plan, identify vendors, and schedule promotions. Analyze existing sites and critique case studies. Written and oral projects. Concurrent enrollment required. 2 lectures/problem-solving, 2 two-hour activities. Prerequisite: AMM 474/474A.

AMM/AE 481/481L Apparel Production II (3/1)

Computer simulation or on-site evaluation of manufacturing systems to analyze quick response modular manufacturing systems, bundle systems, and UPS. Instrumentation and tools to evaluate ergonomic factors are studied. Software for utilization in total quality management programs are introduced. 3 lectures/problem-solving, 1 three-hour laboratory. Prerequisite: AMM/AE 381/381L.

AMM 499/499A/499L Special Topics for Upper Division Students (1-4)

Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units, with a maximum of 4 units per quarter. Prerequisite: permission of instructor. Instruction is by lecture, laboratory, activity, or a combination. Prerequisite: permission of instructor.

FOOD MARKETING and AGRIBUSINESS MANAGEMENT

This major is offered in the Food Marketing and Agribusiness Management/Agricultural Education Department. Two career tracks are offered within the major: International Agribusiness, and Food Marketing and Management.

Arthur F. Parker, Chair

Edison I. Cabacungan
William C. Hughes
Marvin L. Klein
James M. Weidman

The Food Marketing and Agribusiness Management major teaches the application of business concepts to the agricultural industry. Because of the wide selection of course offerings, a broad range of occupational choices is available to the graduate. These include the banking and finance area, food and fiber processing, sales and marketing positions, federal, state and county government units, agricultural communications, farm and ranch management, commodity and produce brokerage, international trade, packing house management and supermarket management. The core is designed to provide students with an understanding of the basic functions of business and the application of theory and practice to the agribusiness industry. The directed electives and career tracks allow the student to design a curriculum that is more closely in tune with the student's career goals. The two career tracks allow students to tailor course work to their particular interests.

The International Agribusiness track includes courses within the university to prepare students for employment in some aspect of international trade, with more emphasis given to the international marketing area. The Food Marketing and Management track is directed more towards the domestic agribusiness industry. Within this track, students can generally emphasize some aspect of marketing or management with courses in both agriculture and business. Interested students can even direct their course work towards a specific technical area such as management of crop or animal enterprise. As a supplement to classroom and laboratory meetings, field trips are taken to distribution centers, production areas, and other related industries within agriculture. Frequent visits by guest speakers from leading agricultural firms further ensure that students gain practical, current knowledge. In addition to business management, sales, and sales-promotional training, students may elect studies in specified production fields to gain valuable production techniques and experience necessary for job competency. As a senior, the student is encouraged to take part-time employment in a related agricultural industry of interest and to work closely with management people in the development of the senior feasibility study.

CORE COURSES FOR MAJOR

Required of all students. A 2.0 cumulative GPA is required in core courses including option courses for the major in order to receive a degree in the major.

| | | | |
|---|------|-----|-----|
| Orientation to the College of Agriculture | .AG | 100 | (1) |
| Agriculture and the Modern World | .AG | 101 | (4) |
| Introduction to Microcomputing | .CIS | 101 | (4) |
| Global Resources for Food | .IA | 101 | (4) |
| Managing Agribusiness Organizations | .FMA | 201 | (3) |
| Food and Agribusiness Marketing | .FMA | 304 | (4) |

GENERAL EDUCATION COURSES

A total of 68 quarter units of General Education courses are required for all majors in the College of Agriculture. A new GE program will be adopted beginning fall 2001 with full implementation targeted for fall 2002. Unless specific courses are stated below, see the list of approved courses under General Education Requirements, Areas A through E, in this catalog.

Area A:

| | | | |
|-----------------------|------|-----|-----|
| 1. Freshman English I | .ENG | 104 | (4) |
| 2. Public Speaking | .COM | 100 | (4) |
| 3. Critical Thinking | .PHL | 202 | (4) |

Area B:

| | | | |
|---|------|-----|-----|
| 1. Statistics with Applications | .STA | 120 | (4) |
| 2. Select one course from approved list | | | (4) |
| 3. Select one course from approved list | | | (4) |
| 4. Select one course from approved list | | | (4) |

Area C:

| | | | |
|---|--|--|-----|
| 1. Select one course from approved list | | | (4) |
| 2. Select one course from approved list | | | (4) |
| 3. Select one course from approved list | | | (4) |
| 4. Select one course from approved list | | | (4) |

Area D:

| | | | |
|--|------|-----|-----|
| 1. Introduction to American Government and United States History | .PLS | 201 | (4) |
| | .HST | 202 | (4) |
| 2. Principles of Economics | .EC | 201 | (4) |
| 3. Select one course from approved list | | | (4) |
| 4. Select one course from approved list | | | (4) |

Area E:

| | | | |
|--------------------------------------|--|--|-----|
| Select one course from approved list | | | (4) |
|--------------------------------------|--|--|-----|

AGRICULTURAL BUSINESS MANAGEMENT MINOR

| | | | |
|---|-----|-----|-----|
| Accounting for Agribusiness | FMA | 324 | (4) |
| Financial Analysis for Agribusiness I | FMA | 326 | (4) |

INTERNATIONAL AGRICULTURAL BUSINESS MANAGEMENT MINOR

| | | | |
|---|-----|---------|-------|
| Global Resources for Food | IA | 101 | (4) |
| California and World Agriculture | FMA | 300 | (3) |
| International Food and Agribusiness Marketing | FMA | 330 | (3) |
| Agricultural Policy in Developing Nations | IA | 362 | (4) |
| Food and Agricultural Marketing Applications | FMA | 405 | (4) |
| Assessing International Agrimarketing Opportunities | FMA | 431 | (4) |
| Internships in Agricultural Business Management | FMA | 441/442 | (2-3) |
| Select two courses* | | | (6-8) |
| Total Units | | 30-33 | |

- *1. College of Agriculture majors can take either
 - a. Two FMA courses or
 - b. Two internationally-oriented College of Business courses or
 - c. One of each
- 2. Non-College of Agriculture majors must take two non-FMA College of Agriculture courses to provide technical expertise.

COURSE DESCRIPTIONS

All Departmental offerings may be taken on a CR/NC basis except for majors in the department.

FMA 200 Special Study for Lower Division Students (1-2)

Individual or group investigation, research, studies or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

FMA 201 Managing Agribusiness Organizations (3)

A comprehensive overview of management fundamentals emphasizing the study of management and business organizations in the contemporary food and agricultural system. Includes various

management theories, approaches and techniques and how they might be applied to organizations within the food and agricultural system. The conflict between organizational and personal values will also be covered. 3 lectures.

FMA 225 Sales and Advertising Management (4)

Industry-sponsored agricultural advertising programs; tools of publicity, merchandising and public relations. Detailed examination of local types of advertising media, and rates for short, seasonal promotions. Advertising provisions of marketing orders. Seminar type discussions and guest speakers. 4 lecture discussions.

FMA 299/299A/299L Special Topics for Lower Division Students (1-4)

Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units, with a maximum of 4 units per quarter. Instruction is by lecture, laboratory, activity, or a combination.

FMA 300 California and World Agriculture (3)

Discussion and analyses of contemporary issues of the food and agricultural system in California and the world. Overview of principles and issues such as the resource base, environmental and health consequences of production and marketing, international trade and free trade agreements, and designing an economically and environmentally sustainable food and agricultural system for California and the world. 3 lecture discussions. Prerequisite: EC 201 or consent of instructor.

FMA 304 Food and Agribusiness Marketing (4)

Economic aspects of marketing agricultural products. Problems and alternative solutions of various marketing institutions. Current trends and developments in California product marketing. 4 lectures. Prerequisite: EC 201 or permission of the instructor.

FMA 305 Agricultural Commodity Marketing and Futures Trading (3)

Principles of marketing agricultural commodities. Understanding the operation of commodity markets, developing marketing strategies and learning the mechanics of futures trading. Application for specific commodities. 3 lectures.

FMA 306 Wholesaling and Retailing of Food Products (4)

Principles and practices of distributing food products from producer to consumer; buying, assembling, transporting, handling, receiving and merchandising. Functions of wholesalers and intermediate handlers, chain stores, food brokers, jobbers. Operating costs of retail stores; site selection; scheduling; management of store personnel; pricing, inventory control. 4 lectures.

FMA 310 Seminar in Food and Agribusiness Management (3)

Seminar on special problems encountered in food and agribusiness management with an emphasis on the food consumer. Economic, social, cultural and demographic factors influencing consumer behavior and consumption patterns covered. Market surveillance techniques used by managers will also be discussed. 3 lecture discussions. Prerequisite: Junior status or food/agribusiness industry experience.

FMA 311 Applied Economics for Agribusiness (4)

Intermediate micro-economic theory applied to production and marketing problems in agriculture. 4 lectures/problem-solving. Prerequisite: EC 201 or consent of instructor.

FMA 313 Politics of Food and Agriculture (3)

The political framework affecting the food and agricultural system.

Federal and state laws and regulations impacting agribusiness. Contemporary development and economic analysis of public programs and policies. Current policies and programs as well as alternate policies evaluated. Seminar discussions. Policy case studies. 3 lecture discussions. Prerequisite: EC 201 or consent of instructor.

FMA 324 Accounting for Agribusiness (4)

Emphasis on the practical applications of accounting information for managers of food marketing and agribusiness management. Analysis of accounting data and its meaning for management and financial decisions. Includes the basics of recording transactions as well as accounting for assets, liabilities, owner's equity and net income, and the interpretation of this information. 4 lectures/problem-solving.

FMA 326 Financial Analysis for Agribusiness I (4)

Techniques of financial analysis. To include capital budgeting, sources of loans for agribusiness, analysis of financial statements, credit instruments, risk and insurance for agriculture, farm credit system. 4 lectures/problem-solving. Prerequisite: FMA 324.

FMA 327 Financial Analysis for Agribusiness II (3)

Continuation of FMA 326. Financial forecasting, leverage and growth, further topics in the time value of money, working capital management, financing operations. 3 lectures. Prerequisite: FMA 326.

FMA 328 Agribusiness Enterprise Management (4)

Criteria for decision making involving food and agribusiness enterprises. Case studies used. Budgeting processes, credit use, and feasibility analysis. Source of economic information. Introduction to simulation of management process. Seminar discussions and feasibility study prepared. 4 lectures.

FMA 329 Equine Enterprise Management (3)

Equine enterprise analysis with emphasis on capital acquisition, leasing, land acquisition, legal problems and labor problems. 3 lectures. Prerequisites: FMA 328, AVS 125/125L.

FMA 331 Apparel Importing and Exporting (4)

Fundamentals of apparel importing and exporting. Analysis, planning and implementation of strategies for global marketing of apparel. Management practices and issues facing firms that are involved in the importing and exporting of apparel. 4 lecture discussions. Prerequisite: Course in micro-economics or marketing would be desirable but not required.

FMA 350/LIS 350 Water and Civilization (4)

Water and its relationship to civilization from ancient history to modern developments. Survey of global water resources and current issues of distribution, relationship to economic development, and the environment. Analysis of state and regional water supplies, water districts. Determination of water requirements for agriculture in arid and humid regions.

FMA/IA 360 Agricultural Cooperatives (4)

Structure, management and organization of the Agricultural Cooperative with emphasis upon current management practice. Includes comparison of cooperative with other business forms, ideals, history, and progress of the cooperative movement, problems in establishing a new cooperative, financing and membership problems. 4 lecture discussions.

FMA 375 Data Management for Agribusiness (4)

Principles and procedures involved in analysis of agricultural data for

management. Includes single two-sample hypothesis testing for means and proportions. Chi-square, simple and multiple regression and correlation. Microcomputer applications. 4 lectures/problem-solving. Prerequisite: STA 120 or equivalent.

FMA 376 Operations Management for Agribusiness (4)

Application of statistical and other quantitative techniques employed in agricultural economic and operations analysis. Areas covered include statistical forecasting, resource allocation, break-even analysis, project management, inventory control, total quality management (TQM), and quality control. 4 lectures/problem-solving. Prerequisite: FMA 375.

FMA 400 Special Study for Upper Division Students (1-2)

Individual or group investigation, research, studies or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

FMA 402 Agribusiness Personnel Management (4)

Management-employee relations and theory; employee motivation; union and management relations; recruitment and selection; performance appraisal; communications; individual and group incentive systems; employee counseling; labor legislation; wage determination and salary systems; employment and unemployment. Case studies analyzed. Seminar discussions held, role playing emphasized, guest speakers. 4 lectures.

FMA 405 Food and Agricultural Marketing Applications (4)

An application of theories, principles and procedures involved in developing a marketing strategy. Students will work as a team to develop a marketing plan for an agricultural product. Topics covered will include all aspects of food and fiber market strategy planning such as identifying a target market, analyzing market opportunities, developing a marketing mix, and completing a budget for the plan. Course requirement: Current NAMA membership. 4 lecture discussions.

FMA 406 Real Property Appraisal and Acquisition (4)

Principles, methods and techniques of appraising agricultural real property for loans, purchase and sale, tax assessments, condemnations, and other purposes. 3 lecture discussions.

FMA 410 Issues in California and World Agriculture (3)

Discussion and analyses of contemporary issues of the food and agricultural system in California and the world. Overview of principles and issues such as the resource base, environmental and health consequences of production and marketing, international trade and free trade agreements, and designing an economically and environmentally sustainable food and agricultural system for California and the world. 3 lecture discussions. Prerequisites: IA 101, FMA 304, FMA 311, FMA 313.

FMA 429 Equine Investment Management (3)

In-depth analysis of equine investments. Emphasis on capital acquisition, equine tax law, limited partnerships, joint ventures, and stallion or mare syndications. 3 lectures.

FMA 431 Assessing International Agrimarketing Opportunities (4)

Comparative agribusiness systems and methods to assess international agribusiness trade and foreign investment opportunities. Analyzes the international forces with which the international agribusiness firm must contend and potential responses. Includes integration of foreign food and agricultural marketing, natural

resource and production policies with impact on private sector responses. Term project on a product and country required. 4 lecture discussions. Prerequisites: IA 101, FMA 300 or IA 362 or equivalents.

FMA 441, 442 Internship in Food Marketing and Agribusiness (1-4) (1-4)

On-the-job training in agricultural business management providing collegiate level experience in food distribution, agricultural management. One unit credit for each 120 hours of experience and training. No more than 6 units of credit can be earned. Useful for preparation of senior project. Application to coordinator required during the quarter prior to the internship.

FMA/IA 450 Agricultural Water Resource Management (4)

Water resource management applied to current issues. Water delivery systems in the U.S. and California, survey of water rights, water pollution, water conservation, food and agricultural system water use, and efficient water management. Includes water problems in developing nations. 4 lecture discussions.

FMA 461, 462 Senior Project (2)

Selection and completion of a project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report. Must be taken in sequence, not concurrently. Prerequisites: FMA 311, 324, 326, 375.

FMA 463 Undergraduate Seminar (2)

New methods and developments, practices, and procedures in the field. 1 meeting. Prerequisite: senior project completed.

FMA 490 Senior Feasibility Study (3)

Selection and completion of a major feasibility study under faculty supervision. Prerequisites: FMA 311, 324, 376.

FMA 491 Senior Seminar I (2)

The first course in the capstone series for majors. Panel discussions and debates on current topics. Also includes career-related activities involving interviews with industry representatives and resume writing. 2 seminars. Prerequisite: FMA 490.

FMA 492 Senior Seminar II (2)

The second course in the capstone series for majors. Includes debates on current topics, case studies monitored by faculty in various specialties as well as industry representatives. Students will give videotaped presentation. 2 seminars. Prerequisite: FMA 491.

FMA 499/499A/499L Special Topics for Upper Division Students (1-4)/(1-4)/(1-4)

Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units, with a maximum of 4 units per quarter. Instruction is by lecture, laboratory, activity, or a combination of lecture and laboratory or activity. Prerequisite: permission of instructor.

FMA 575 Statistics for Agriculture (4)

A summary of statistical tools and techniques used in agriculture. Includes hypothesis testing, Chi Square, ANOVA, correlation, as well as simple and multiple regression. Application of computer to selected statistical techniques. Review of statistical literature from various fields of agriculture. Open to graduate students only. 4 lectures/problem-solving. Prerequisite: STA 120 or equivalent.

FOODS AND NUTRITION

The Foods and Nutrition major offered in the Department of Food, Nutrition and Consumer Sciences has four options. These are: Dietetics, Foods in Business, Food Science and Consumer Science. The Food, Nutrition and Consumer Sciences Department also provides a program which meets the subject matter requirements for the Single Subject Teaching Credential in Home Economics and Designated Subjects Credential in Adult and Vocational Education. See the program requirements following those of Foods and Nutrition.

Anahid T. Crecelius, Chair
 Mark S. Meskin, Graduate Coordinator, Didactic Program Director
 Kara Caldwell-Freeman, Dietetic Internship Director

Nenita B. Cabacungan Martin F. Sancho
 Marie A. Caudill Ruby Trow
 Bonnita Farmer

A Bachelor of Science degree with a major in foods and nutrition prepares students for challenging and rewarding careers and provides a strong academic background for graduate study and research. Foods and nutrition majors select a career track to acquire basic knowledge in the field and gain experience in technological skills, problem-solving, communication skills, interpersonal relations, and organizational and leadership competencies as applied to the areas of dietetics, business, industry, food science, and consumer science.

High school students planning to major in foods and nutrition are advised to build a background in foods, chemistry, mathematics, and biology. Community college students should concentrate on chemistry (including organic), biology (including microbiology), foods, nutrition, statistics, communication skills, and general education.

The curriculum, facilities, and faculty reflect the Food, Nutrition and Consumer Sciences Department's commitment to a strong, up-to-date, science-based undergraduate program that provides the types of skills and knowledge needed by graduates to meet professional goals. Career options offered within the major are the following:

Dietetics Option

This career option is an Approved American Dietetic Association Didactic Program in Dietetics. Students pursuing career goals in the dietetic field qualify for post-graduate internships, pre-professional practice programs, and/or graduate programs which can lead to membership in the American Dietetic Association (ADA). The department offers a post-baccalaureate Dietetic Internship Program which is accredited by the American Dietetic Association. A minimum GPA of 2.8 overall and 3.0 in major courses is required for application to the Cal Poly Dietetic internship. Upon completion of a dietetic internship or pre-professional practice program, graduates are eligible to take the registration examination to become registered dietitians. Students requesting transcript evaluation by the ADA will be required to pay an extra transcript fee of \$20 if registered as students at Cal Poly Pomona or \$25 if not currently enrolled. A physiology minor may be included in this career option with a few additional courses.

Dietitians are members of the professional health care team and serve as facilitators who translate scientific knowledge into practical applications so that consumers can make informed decisions about their diet.

Dietitians are employed in acute and long-term care facilities, community and government agencies, schools, the private sector, or self-

employed. Administrative dietitians supervise and coordinate large feeding operations in hospitals, extended care facilities, restaurants, colleges, schools, and businesses.

Business Option

The business option prepares students for careers in: recipe and product development, product evaluation, food styling, marketing and sales, quality control, sensory evaluation, safety and sanitation and media presentation and promotion and market research. A marketing minor may be included in this career option with a few additional courses.

Students choosing this option not only acquire technical expertise but also develop communication and interpersonal skills. Internships with food and equipment businesses give students on-the-job training.

Food Science Option

The food science option offers the required background for the technical jobs in the wide employment spectrum of the food industry. Students electing this option are, therefore, prepared for food technology positions including, but not limited to, processing, chemical and microbiological quality assurance, new product development, safety and sanitation, labeling requirements, water and energy conservation, integrated technical management, nutrient analysis of foods and beverages, and government inspection.

This option, which also leads to a minor in chemistry, with a few additional courses, integrates food science with the physical and biological sciences and enables students to advance in the food industry along the lines of production, research or management.

Consumer Science Option

The Consumer Science option prepares students to interface between industry and the consumer. They will interpret and disseminate technical information to consumers and will be a conduit from the consumer to industry. Consumer scientists are employed by schools, government agencies, business and industry.

Consumer scientists educate individuals and families about their rights, responsibilities and protection as consumers, thus enabling them to make informed decisions about the quality of goods and services in the local and global economy. Consumer scientists also research consumer needs and priorities to inform industry in the appropriate product development and technology.

CORE COURSES FOR MAJOR

Required of all students. A 2.0 cumulative GPA is required in core courses including option core courses for the major in order to receive a degree in the major.

| | | | |
|---|-----|----------|-----|
| Orientation to the College of Agriculture | .AG | 100 | (1) |
| Introduction to the Professions | .FN | 100 | (1) |
| Introduction to Foods | .FN | 121/121L | (4) |
| Nutrition | .FN | 235 | (3) |

#Required for Food Science Option

Choose the following electives from approved departmental lists:

| | |
|---|--------|
| Directed Electives for Dietetics | (8) |
| Unrestricted Electives for Business | (15) |
| Directed Electives for Food Science | (7) |
| Unrestricted Electives for Food Science | (8-10) |
| Unrestricted Electives for Consumer Science | (6) |

GENERAL EDUCATION COURSES

Required of all students. A total of 68 quarter units of General Education courses are required for all majors in the College of Agriculture. A new GE program will be adopted beginning fall 2001 with full implementation targeted for fall 2002. Unless specific courses are stated below, see the list of approved courses under General Education Requirements, Areas A through E, in this catalog.

Area A:

| | | | |
|--------------------------|------|-----|-----|
| 1. Freshman English I | .ENG | 104 | (4) |
| 2. Advocacy and Argument | .COM | 204 | (4) |
| 3. Freshman English II | .ENG | 105 | (4) |

Area B:

| | | | |
|---|------|----------|-----|
| 1. Statistics with Applications | .STA | 120 | (4) |
| 2. College Chemistry | .CHM | 121/121L | (4) |
| 3. Basic Biology | .BIO | 115/115L | (5) |
| 4. Select one course from approved list | | | (4) |

Area C:

| | | | |
|---|--|--|-----|
| 1. Select one course from approved list | | | (4) |
| 2. Select one course from approved list | | | (4) |
| 3. Select one course from approved list | | | (4) |
| 4. Select one course from approved list | | | (4) |

Area D:

| | | | |
|--|------|-----|-----|
| 1. Introduction to American Government and United States History | .PLS | 201 | (4) |
| | .HST | 202 | (4) |
| 2. Agriculture and the Modern World | .AG | 101 | (4) |
| 3. Select one course from approved list | | | (4) |
| 4. Select one course from approved list | | | (4) |

Area E:

| | | | |
|--------------------|------|-----|-----|
| General Psychology | .PSY | 201 | (4) |
|--------------------|------|-----|-----|

FOODS AND NUTRITION MINOR

The purpose of the minor in Foods and Nutrition is to help students understand the role that nutrients play in maintaining good health.

| | | | |
|--|------|----------|---------|
| Introduction to Foods | .FN | 121/121L | (4) |
| Food Safety and Current Issues | .FN | 325 | (4) |

| One upper division FN class | | | (3-4) |
| Total units required | | | (38-39) |

COURSE DESCRIPTIONS

All courses offered by the department may be taken on a CR/NC basis except for major.

FN 100 Introduction to the Profession (1)

Orientation to careers in Dietetics, Food Science, Foods In Business, and Consumer Science. Introduction to professional associations, publications and legislation pertinent to the professions discussed. Required of all FNCS students. 1 lecture discussion.

FN 121/121L Introduction to Foods (2/2)

Scientific principles and techniques of food. Study of food categories, elements of food sanitation, legislation and consumer choices. 2 lectures, 2 three-hour laboratories. Concurrent enrollment required.

FN 200 Special Study for Lower Division Students (1-2)

Individual or group investigation, research studies or surveys of selected problems for lower division students. Total credit limited to 4 units, with a maximum of 2 units per quarter.

FN/KIN 203 Health, Nutrition and the Integrated Being (4)

Investigation of specific areas of the integrated being dealing with nutrition, stress, drugs, sexuality, major health problems and death and dying. Understanding their effect on the integrated being and the development of behaviors and actions that will promote optimum physical and mental health. Meets General Education Area E requirement. Team- taught. 4 lecture discussions.

FN 205 Contemporary Nutrition (4)

Concepts of nutrition related to macro-nutrients, micro-nutrients, and energy metabolism. Food intake and its relationship to health. Use of the scientific method to assess the reliability of nutrition information. Computer analysis and written evaluation for individual dietary intake. 4 lectures/problem-solving. For students not majoring in Foods and Nutrition.

FN 228 Food and Culture (4)

Interrelationship of food availability, historical developments, socio-economic institutions, political, religious, and other influences on food patterns. In-depth study of a selected culture group. Oral presentation and discussion of group projects. 4 lectures. Meets General Education Area D3 requirement.

FN 235 Nutrition (3)

Role of carbohydrates, lipids, proteins, minerals, vitamins and water, in human nutrition. Dietary standards and recommended allowances. Computation of nutritional needs and written dietary analysis. Oral report of selected nutrients. 3 lectures/problem-solving. Prerequisite: CHM 201, 250 or equivalent. Pre-or co-requisite: ZOO 235/235L.

FN 236L Nutrition Laboratory (1)

Introduction to techniques and experiments used in nutrient analysis in foods and nutritional assessment in living organisms. 1 three-hour laboratory. Prerequisites: CHM 201, 250 or equivalent. To be taken concurrently with FN 235.

FN 263 Introduction of Research Methods (2)

Introduction to research in food, nutrition, food science and consumer sciences, including identification of current research, literature searches, appropriate data collection procedures analysis and interpretation. Development of proposal which states problem, hypothesis, procedure/method and data analysis.

FN 299/299A/299L Special Topics (1-4)

Group study of a selected topic, the title to be specified in advance for lower division students. Total credit limited to 4 units. Instruction is by lecture, laboratory, activity, or a combination. Prerequisite: permission of instructor.

FN 305 Nutrition, Science and Health (4)

Integrative approach to nutrition, health and fitness based on physiological and chemical principles. Role of diet and other influences that affect wellness and prevention of degenerative disease. Nutritional self-assessment. Written critiques of current controversies and other assigned topics. 4 lecture discussions. Prerequisite: Completion of Sub-areas B1, B2, and B3 of General Education or consent of instructor. For students not majoring in Foods and Nutrition.

FN 321/321L Experimental Food Science (2/2)

Experimental approach to solve food processing problems. Recent developments in food ingredient uses and food processing techniques. Individual guided projects involving problem identification, literature search, project design, data collection, critical analysis of data, oral and written presentation of findings. 2 lectures/problem-solving, 2 three-hour laboratories. Prerequisites: FN 121/121L, CHM 201, CHM 250, STA 120. Concurrent enrollment required.

FN 325 Food Safety and Current Issues (4)

Scientific analysis of current national and global issues in the production, processing, distribution and consumption of foods as related to health, safety, and consumer protection. 4 lecture discussions.

FN 328/328L Culture and Meal Patterns (2/2)

Relation of environment, technology, religion, social institutions and other factors influencing culture and patterns. Selected cultures, countries and regions. Management of meals. Individual oral reports and group projects. 2 lectures/problem-solving, 2 three-hour laboratories. Concurrent enrollment required. Prerequisite: FN 121/121L or equivalent; junior standing.

FN 335 Nutrition of the Life Cycle (4)

Nutritional needs of pregnancy, lactation, childhood, adolescence, adulthood and the aged. Planning and computation of normal diets for all phases of the life cycle. Reading and reporting of current developments

in nutrition. 4 lectures/problem-solving. Prerequisite: FN 305 or FN 235/236L, ZOO 235/235L and CHM 201, 250 or equivalent.

FN 343 Nutrient-Drug Interactions (2)

Basic principles of absorption, distribution, biotransformation and excretion of drugs. Introduction to the biochemical and physiological effects of drugs and their mechanisms of action. Effect of drugs on nutritional status. Nutritional effects on drug absorption, metabolism, action and potency. 2 lecture discussions.

FN 345/345A Nutrition Education (2/1)

Principles of learning and evaluation applied to nutrition. Development of instructional systems, including objectives, learning activities and strategies in various settings. Identifications and analysis of current problems inherent in such applications. Discussion and critique of student reports. 2 lectures/problem-solving, 1 two-hour activity. Concurrent enrollment required. Prerequisites: FN 305 or FN 235/236L, FN 328/328L and PSY 201, or consent of instructor.

FN 346/346L Community Nutrition (2/1)

Goals and trends in community nutrition. Dietary methodology. National nutrition status surveys. Role of public and private agencies in community nutrition programs. Analytical tools. Grantsmanship, public policy and legislation, 2 lectures, 1 three-hour laboratory. Concurrent enrollment required. Prerequisites: FN 235/236L or FN 305, FN 335, FN 345/345A or consent of instructor.

FN 357/357L Foodservice Systems Management I (3/1)

Introduction to foodservice management through a systems approach perspective. Development of goals, objectives, policies and procedures for foodservice facilities. Beginning of facility planning project. 3 lectures, 1 three-hour laboratory. Concurrent enrollment required.

FN 358/358L Foodservice Systems Management II (2/2)

Management of foodservice facilities using menu as a basis for determining recipes, specifications, receiving and storage standards. Purchasing for the foodservice industry. Continuation of facility planning project. 3 lectures, 2 three-hour laboratories. Concurrent enrollment required. Prerequisite: FN 121/121L and FN 357/357L.

FN 359/359L Foodservice Systems Management III (2/2)

Production planning, quantity food production, distribution and service, and equipment and layout in foodservice facilities. Principles and practices in planning, preparing and serving food. Completion of facility planning project. 2 lectures, 2 three-hour laboratories. Concurrent enrollment required. Prerequisite: FN 358/358L.

FN 400 Special Study for Upper Division Students (1-2)

Individual or group investigation, research studies, or surveys of selected problems for upper division students. Total credits limited to 4 units, with a maximum of 2 units per quarter.

FST 418/418A Sensory Evaluation of Foods (2/2)

Methods of sensory evaluation of food products. Includes difference and preference testing, applications in food research and development, consumer testing. Statistical analysis of results. 2 lectures, 2 two-hour activities. Concurrent enrollment required. Prerequisite: FN 121/121L, STA 120, computer competency or consent of instructor.

FST 420/420L Food Chemistry (2/2)

Chemical characteristics of food and its main components. Chemical

changes during food processing and storage. Functions of food additives and other ingredients. 2 lectures, 2 three-hour laboratories. Prerequisite: CHM 201, CHM 250, FN 321/321L. Concurrent enrollment required.

FN 421/421L Recipe Development and Food Presentation (2/2)

Sources of recipes, testing procedures and recipe writing for conventional and microwave food preparation. Development of recipe brochure, including photography. 2 lectures, 2 three-hour laboratories. Concurrent enrollment required. Prerequisite: FN 121/121L or equivalent.

FN 433 Advanced Nutrition I (4)

Macronutrients and their metabolism with an emphasis on regulation, structure, digestion, absorption, transport, distribution, and disease states. Written analysis of current research. 4 lectures/ problem-solving. Prerequisites: CHM 321/321L, FN 235, FN 236L, ZOO 235/235L, BIO 300 or 303.

FN 434 Advanced Nutrition II (4)

Integration and regulation of metabolism. Hormonal effects. Water soluble vitamins as regulatory nutrients. Dietary reference intakes and recommended dietary allowances. Written analysis and critique of current research. 4 lectures/ problem solving. Prerequisite: FN 433

FN 435 Advanced Nutrition III (3)

Fat soluble vitamins and minerals as regulatory nutrients. Sources, absorption, transport and storage. Functions and mechanisms of action. Interactions with other nutrients. Metabolism and excretion. Dietary reference intakes and recommended dietary allowances. Written analysis and critique of current research. 3 lectures/ problem solving. Prerequisite: FN 434

FN 441, 442 Internship in Foods and Nutrition (1-4) (1-4)

On-the-job training in foods and nutrition, providing professional level experiences in food service, community nutrition, research, and quality control. Experiences may be useful for preparation of senior projects. Total credit for each course is limited to four units. Prerequisite: permission of coordinator required in advance.

FN 443/443L Diet Therapy I (3/1)

Relationship between diet and health; emphasis on specific dietary requirements. Nutrients care process, nutrition support, gastrointestinal tract diseases, liver disease, metabolic stress, the anemias. Nutrition assessment, charting and documentation, standard hospital diets, calculations for parenteral nutrition, and case-study discussions. 3 lectures, 1 three-hour laboratory. Prerequisite: FN 335, FN 433. Concurrent enrollment required.

FN 444/444L Diet Therapy II (3/1)

Diabetes, renal disease, cardiovascular disease, cancer, food allergy and intolerance, diseases of the nervous system, and various metabolic disorders. Exchange lists for planning diabetic diets, developing nutritional care plans for specific disease/disorders, nutrition counseling. Development of critical problem-solving skills. Prerequisite: FN 443/443L.

FN/IA 445 Nutrition/International Development (4)

Issues in international and national food policy formulation and implementation as well as impacts on development are discussed. Concerns about food and nutrient distribution and availability, malnutrition and its impact on human health and productivity. 4 lecture discussions.

FN 461 Research Methods I (2)

Methods of defining problems and scientific investigations, assessing needs, data gathering and locating resources. Critical thinking involved in the writing of proposals and investigation of integrated issues through written reports based on library research. 2 lectures. Prerequisites: ENG 104, 105, or COM 204; senior standing.

FN 462 Research Methods II (2)

Independent study with approval of advisor. Project may be experimental design, survey research, content analysis, community service, or development of information/technology base. A written report will be submitted. Prerequisite: FN 461

FN 463 Undergraduate Investigations and Seminar (4)

Individual investigations and group studies of foods and nutrition issues. Oral presentations and written reports. 4 seminar-discussions. Prerequisites: COM 204, ENG 105 and senior standing.

FST 464 Food Science Colloquium (2)

Classroom interaction of students with selected food industry leaders focusing on technical, economic, regulatory, and new product trends as they impact occupational opportunities in the food and beverage industries. Written reports. 2 lectures. Prerequisite: senior standing.

FN 499/499A/499L Special Topics (1-4)

Group study of a selected topic, the title to be specified in advance for upper division students. Total credit limited to 8 units, with a maximum of 4 units per quarter. Instruction is by lecture, laboratory, activity, or a combination of both. Prerequisite: permission of instructor.

FNC 101 Introduction to Family Issues (4)

An introduction to family studies covering issues related to family demographics, types of families, living arrangements, paths to family formation, childbearing patterns, changing roles of family members, economic well-being, child care and future outlook for children. Lecture, discussion, case studies, analysis of data sets, and student project related to a current issue. 4 lectures/problem-solving.

FNC 245 Consumerism: Its Impact and Issues (4)

Analysis of the role of consumption in economic systems. The consumer movement past, present and future viewed as a response to economic and social conditions. Contemporary consumer issues, information sources, legislation and protection. 4 lectures/problem-solving hours.

FNC 263 Introduction of Research Methods (2)

Introduction to research in food, nutrition, food science and consumer sciences, including identification of current research, literature searches, appropriate data collection procedures analysis and interpretation. Development of proposal which states problem, hypothesis, procedure/method and data analysis.

FNC 342 Family and Workplace Resource Management (4)

Study of resource management principles applied to family and workplace issues. Decision-making and problem solving in the management, resource allocation, work/family relationships, communication, health and stress management, crisis and conflict resolution. 4 lectures/problem-solving.

FNC 390/390L Professional Presentation Techniques (2/1)

Techniques and methods used in making professional written and oral presentations and demonstrations for live or video-tape audiences. 2 lectures, 1 three-hour lab.

FNC 422 Family Housing and Environment (4)

The housing market as it relates to the social, economic and political settings. Housing styles, trends, issues and lifestyle decisions. 4 lectures/problem-solving.

FNC 440 Family Financial Behavior (4)

Impact of family financial decisions on lifestyle choices and coping behavior throughout the family life cycle. Emphasis on professional counseling for financial responsibility. Preparation of financial plans and analysis of investment opportunities. 4 lectures/problem-solving.

FN 451 Competency Assessment: Portfolios (4)

Design of prototype measures, planning and constructing performance-based outcomes assessment instruments, competency certification, subject matter standards and framework, applied performance testing, portfolio assessment; research proposal development; measures for program validation and teacher certification. 4 hours lecture/problem-solving.

FNC 453 Workforce Preparation Programs (4)

Development of workforce training programs, foundation of skills and personal qualities for employability, job descriptions for compliance with the Americans with Disabilities Act, analysis of required employment skills, advisory committee planning and participation, program management and evaluation. Outcomes-based competency certification. 4 lectures/problem-solving. Prerequisite: upper division standing.

FNC 454 Curriculum in Family/Workforce Education (3)

Design of individualized, specialized curriculum packages; competency-based education for special needs groups; school learning, experiences and assessments based on SCANS and subject area standards, restructuring and integration of academic and vocational subject areas in life-workplace applications. Required Level I course for the Designated Subject Teaching Credential in Vocational Education. 3 lectures/problem solving.

FNC 455 Family Life and Parenting (3)

Development and implementation of educational programs in family living, parenthood education, and child guidance. Role expectations and elimination of sex stereotyping; special needs of family members including single parents; cultural diversity, societal interactions and reaction to crisis and change. 3 lectures.

SUBJECT MATTER PREPARATION PROGRAM FOR THE SINGLE SUBJECT CREDENTIAL IN HOME ECONOMICS

In partial fulfillment of California teacher preparation credential requirements for a Single Subject Teaching Credential in Home Economics, an applicant must demonstrate subject matter competence in one of two ways: (1) complete a subject matter preparation program that has been approved by the California Commission on Teacher Credentialing (CCTC) or (2) earn a passing score on the Single Subject Assessment Test (SSAT) in Home Economics.

The Food, Nutrition and Consumer Sciences Department offers a course of study (pending CCTC approval) leading to subject matter preparation for the California Home Economics Single Subject Credential. Interested individuals should contact the Home Economics Credential Coordinator and plan a schedule of classes in close consultation with that advisor. Additional information about requirements for teaching credentials is available in this catalog and from the College of Education and Integrative Studies (SEIS).

Core coursework for the pre-credential subject matter preparation program reflects studies that meet standards in the following areas: Child Development, Guidance and Education; Resource Management and Consumer Development; Fashion and Textiles; Nutrition; Food Science, Preparation and Service; Living and Working Environments; Individual and Family Health; and Individual and Family Development, Parenting, and Human Services. Completion of this subject matter preparation program does not fulfill all requirements for a degree. However, by carefully selecting directed and unrestricted electives, these courses can fulfill the track for Consumer Science with a B. S. degree in Foods and Nutrition.

Pre-Credential Subject Matter Preparation Program for the Single Subject Teaching Credential in Home Economics

| Curriculum in Family/Workforce Education | .FNC | 454 | 3 |
| Family Life and Parenting Education | .FNC | 455 | 3 |
| Family as a Social Institution | .SOC | 321 | 4 |
| Human Sexuality | .BIO | 301 | 4 |
| or Human Sexual Behavior | .PSY | 455 | (4) |
| *Child Development with Practicum. | | | 4 |
| *Principles of Clothing Construction. | | | 4 |
| *Interior Design/Home Furnishings | | | 4 |

*Courses not offered at Cal Poly Pomona and must be taken at community or other colleges.

Additional credential preparation courses are required from the College of Education and Integrated Studies as a prerequisite to student teaching. Consult the Teacher Education section of this catalog, the Teacher Education Credential Office, and the Home Economics Credential Coordinator for further information.

DESIGNATED SUBJECTS CREDENTIAL IN ADULT AND VOCATIONAL EDUCATION

Individuals seeking a California Designated Subjects Vocational Teaching Credential will qualify to teach vocational/occupational skills in Adult Vocational Education or in Regional Occupational Programs (ROPs). The Designated Subjects Vocational Teaching Credential is based upon work experience/occupational skills and/or college related work in the vocational area.

Individuals seeking a California Designated Subjects Adult Teaching Credential will be qualified to teach adults. The Designated Subjects Adult Teaching Credential is based upon completion of academic course work. There are a number of possible combinations of work experience and professional preparation which enable potential adult education or vocational teachers to qualify for the California Designated Subjects Teaching Credential. Interested persons should contact the Designated Subjects Credential Coordinator for information and application packets.

SUPPLEMENTARY TEACHING AUTHORIZATIONS

An introductory Home Economics Teaching Authorization may be added to an existing Single Subject or Multiple Subjects Teaching Credential qualifying the individual to teach Home Economics subject areas in grades K-9. Consult with the Home Economics Credential Coordinator or the Teacher Education Credential Office for further information.

FOOD SCIENCE AND TECHNOLOGY

Anahid T. Crecelius, Chair
 Mark S. Meskin, Graduate Coordinator, Didactic Program Director
 Kara Caldwell-Freeman, Dietetic Internship Director

Nenita B. Cabacungan Martin F. Sancho
 Marie A. Caudill Ruby Trow
 Bonnita Farmer

The Food Science and Technology (FST) Bachelor of Science curriculum at Cal Poly Pomona is interdisciplinary. It draws on faculty and courses from all departments within the College of Agriculture, Biology and Chemistry in the College of Science and the Industrial and Manufacturing Engineering department from the College of Engineering. The program has received wide support from industry and private and public universities. It also has an Advisory Board comprised of industry and academic representatives.

Food scientists apply principles of chemistry, microbiology, physics, engineering and other basic and applied sciences to the production, processing, evaluation and packaging of food. They also use their scientific training to develop a variety of tasteful and nutritious foods that meet standards of safety, sanitation and quality and, at the same time, keep in mind convenience and low cost.

Food Scientists have the critical task of insuring the safety of food processing methods and ingredients. They also work on improving shelf life, flavor, color, texture, nutritional value as well as convenience and cost of processed foods.

Type of work performed by food scientists includes research, interpretation, and application of information regarding the basic composition, structure and properties of foods. They study the chemistry of changes occurring during processing and utilization of food products by consumers. Process design for commercial food processing, selection and application of unit operations for the production of processed foods, optimization of processing parameters. Selection and application of microbiological and chemical analyses for food products. Establishment and implementation of Standard Sanitation Operating Procedures (SSOPs), Good Manufacturing Practices (GMPs) and Hazard Analysis Critical Control Point (HACCP) systems in food processing facilities. Monitoring for compliance with government, company and industry standards for quality or safety of food products. Product development and improvement, product formulation, selection and application of ingredients. Food packaging selection and testing. Establishment of quality assurance systems in food processing facilities. Training of plant employees in technical, quality and safety aspects.

Cal Poly Pomona is uniquely positioned for this program because of its 1) accessibility to a vast labor market for graduates, 2) diversified faculty, and 3) excellent agricultural and technological facilities and laboratories.

To support and enhance the program, the College of Agriculture has established the Natural Color Resource Center and the Center for Antimicrobial Research. A Food and Agricultural Products Research and Education Center funded by the food industry is also planned. These centers will provide students and faculty in FST and related disciplines with valuable opportunities for specialized experiences and interdisciplinary collaboration.

The FST program will turn out graduates who are not only technically "trained" but also liberally "educated." The students in this program will develop a broad background in food science and other related sciences by fulfilling the requirements listed in the major. Upon completion of all the established university and departmental requirements the students

will receive a Bachelor of Science degree in Food Science and Technology. The program is designed to meet the Institute of Food Technologists (IFT) undergraduate curriculum minimum standards and guidelines as revised in 1992.

High school students planning to major in Food Science and Technology are advised to build a background in foods, chemistry, mathematics, physics and biology. Community college students should concentrate on chemistry (including organic), biology (including microbiology), foods, nutrition, statistics, communication skills and general education.

Because the food industry serves a basic human need, a career in food science is a wise choice, as it does not generally experience the economic fluctuations of other industries. The growing needs to improve the quality, quantity, variety, and safety of foods, coupled with the growing public demand for healthier, more convenient foods, virtually ensures the stability of employment for food scientists.

Students completing the Food Science and Technology program will be prepared for careers in a variety of areas:

Food industry: quality control, product development, food marketing, food processing, food microbiology, food engineering and food analysis.

University and private laboratories: research, extension, consulting.

Government agencies: Food and Drug Administration (FDA), U.S. Department of Agriculture (USDA), State and local health departments and other agencies.

International agencies: World Health Organization (WHO), Food and Agriculture Organization (FAO), World Bank and nonprofit organizations, International Research Centers.

Graduate school: food science and technology with specialization in food engineering, food chemistry or food microbiology; dairy science; meat science; post-harvest physiology and technology; cereal science; meat science; enology; agricultural and biological engineering; biotechnology; public health; packaging; and toxicology.

The Institute of Food Technologists (IFT) is the main professional group for food scientists with more than 28,000 members. The Institute also has an active Student Association (IFTSA). The Southern California Section of IFT (SCIFTS) provides many opportunities for professional networking at the local level through regular activities.

This degree may lead to a minor in Chemistry, with additional courses such as CHM 301/301A, Fundamentals of Physical Chemistry (3/1) and 5 units of upper division Chemistry courses which are offered in the Research and Development Cluster.

CORE COURSES FOR MAJOR

Core courses include food chemistry, food analysis, food microbiology, unit operations in food processing, food engineering, and food laws and regulations.

| | | | |
|--|-----|----------|-----|
| Introduction to Foods | FN | 121/121L | (4) |
| Nutrition | FN | 235 | (3) |

| Complete minimum of one course from each additional core cluster | | | (14-17) |

MAJOR CORE CLUSTERS

Students will be able to tailor the program to their general interests and career goals by choosing from several major core clusters:

- Plant Science and Technology
- Muscle Food Science and Technology
- Food Processing and Production
- Research and Development
- Quality Assurance

Plant Science and Technology

(Minimum of one course)

| | | | |
|--|-----|----------|-----|
| Culinary Produce | AGR | 222 | (4) |
| Post Harvest Physiology of Fruits & Vegetables | AGR | 351/351L | (4) |
| Plant Products in Food Science | BOT | 310/310A | (4) |

Muscle Food Science and Technology

(Minimum of one course)

| | | | |
|--|-----|-----|-----|
| Meat Science and Industry | AVS | 327 | (4) |
| Seafood and Poultry Technology | AVS | 328 | (4) |
| Meat Processing and Technology | AVS | 427 | (5) |

Food Processing and Production

(Minimum of one course)

| | | | |
|---|-----|----------|-----|
| Instrumentation and Automation in Food Operation | AE | 450 | (4) |
| Processing Equipment and Procedures for Ag Products | AE | 234 | (3) |
| Food Packaging | FST | 319 | (4) |
| Food Safety and Current Issues | FN | 325 | (4) |
| Principles of HACCP | FST | 423 | (4) |
| Work, Measurement and Design | IME | 224/224L | (4) |
| Productions and Operations Management | OM | 331 | (4) |
| or Operations Management for Agribusiness | ABM | 376 | (4) |

Research and Development

(Minimum of one course)

| | | | |
|--|-----|----------|-----|
| Spectroscopic Methods | CHM | 342/342L | (4) |
| Separation Methods | CHM | 343/343L | (4) |
| Introduction to Research Methods | FST | 263 | (2) |
| Sensory Evaluation | FST | 418/418L | (4) |

Quality Assurance

(Minimum of one course)

| | | | |
|--|-----|----------|-----|
| Human Factors Engineering | IE | 225/225L | (4) |
| Quality Assurance | ETP | 375 | (3) |
| Total Quality Management | OM | 401 | (4) |
| Hotel and Restaurant Sanitation and Safety | HRT | 225 | (4) |

SUPPORT AND ELECTIVE COURSES

Required of all students

| | | | |
|-----------------------------|-----|----------|-----|
| General Chemistry | CHM | 122/122L | (4) |
|-----------------------------|-----|----------|-----|

| Physics | PHY | 131/131L | (4) |

GENERAL EDUCATION COURSES

Required of all students. A total of 68 quarter units of General Education courses are required for all majors in the College of Agriculture. A new GE program will be adopted beginning fall 2001 with full implementation targeted for fall 2002. Unless specific courses are stated below, see the list of approved courses under General Education Requirements, Areas A through E, in this catalog.

Area A:

1. Freshman English I ENG 104 (4)
2. Advocacy and Argument COM 204 (4)
3. Freshman English II ENG 105 (4)

Area B:

1. Statistics with Applications STA 120 (4)
2. College Chemistry CHM 121/121L (4)
3. Basic Biology BIO 115/115L (5)
4. Select one course from approved list (4)

Area C:

1. Select one course from approved list (4)
2. Select one course from approved list (4)
3. Select one course from approved list (4)
4. Select one course from approved list (4)

Area D:

1. Introduction to American Government PLS 201 (4)
and United States History HST 202 (4)
2. Agriculture and the Modern World AG 101 (4)
3. Select one course from approved list (4)
4. Select one course from approved list (4)

Area E:

- General Psychology PSY 201 (4)

COURSE DESCRIPTIONS

All courses offered by the department may be taken on a CR/NC basis except for major. Note: FN courses are from the Foods and Nutrition Major.

FN 121/121L Introduction to Foods (2/2)

Scientific principles and techniques of food preparation by conventional and microwave methods. Study of food categories, elements of food, sanitation, legislation and consumer choices. 2 lectures, 2 three-hour laboratories. Concurrent enrollment required.

FN 235 Nutrition (3)

Role of the carbohydrates, lipids, proteins, minerals, vitamins and water in human nutrition. Dietary standards and recommended allowances. Computation of nutritional needs and written dietary analysis. Oral report of selected nutrients. 3 lectures/problem-solving. To be taken concurrently with FN 236L. Prerequisite: CHM 201, 250 or equivalent.

FN 236L Nutrition Laboratory (1)

Introduction to techniques and experiments used in nutrient analysis in foods and nutritional assessment in living organisms. 1 three-hour laboratory. To be taken concurrently with FN 235. Prerequisites: CHM 201, 250 or equivalent.

FNC 263 Introduction of Research Methods (2)

Introduction to research in food, nutrition, food science and consumer sciences, including identification of current research, literature searches, appropriate data collection procedures analysis and interpretation. Development of proposal which states problem, hypothesis, procedure/method and data analysis.

FST 317/317L Unit Operations in Food Processing (3/1)

Principles of food processing including refrigeration, freezing, dehydration, canning and fermentation as they relate to the technology of foods and beverages. Field trips. 3 lectures, 1 three-hour laboratory. Concurrent enrollment required. Prerequisite: MIC 320/320L.

FST 319 Food Packaging (4)

Packaging materials, packages and packaging methods for various processed and prepared foods, product stability and shelf-life extension. 4 lectures. Prerequisite: MIC 320/320L.

FN 321/321L Experimental Food Science (2/2)

Experimental approach to solve food preparation problems. Recent developments in food ingredient uses and food preparation techniques. Individual guided projects involving problem identification, literature search, project design, data collection, critical analysis of data, oral and written presentation of findings. 2 lectures/problem-solving, 2 three-hour laboratories. Concurrent enrollment required. Prerequisites: FN 121/121L, CHM 201, CHM 250, STA 120.

FST 322 Food Laws and Regulations (4)

An examination of the rules and regulations of various governmental agencies with regard to the processing, packaging, labeling and marketing of food products. Sources of information necessary for communication with government on public food policy information. 4 lectures.

FST 418/418A Sensory Evaluation of Foods (2/2)

Methods of sensory evaluation of food products. Includes difference and preference testing, application in food research and development, consumer testing. Statistical analysis of results. 2 lectures, 2 two-hour activities. Concurrent enrollment required. Prerequisites: STA 120, computer competency or consent of instructor.

FST 420/420L Food Chemistry (2/2)

Chemical characteristics of food and its main components. Chemical changes during food processing and storage. Functions of food additives and other ingredients. 2 lectures, 2 three-hour laboratories. Prerequisite: CHM 201, 250. Concurrent enrollment required.

FST 422/422L Food Analysis (3/1)

Principles and application of physical and chemical methods to the separation, characterization and quantitative analysis of food constituents. 3 lectures, 1 three-hour laboratory. Prerequisites: CHM 221/221L and FST 420/420L.

FST 423 Principles of HACCP (4)

Basic principles of the Hazard Analysis Critical Control Point System. Prerequisite programs for implementing HACCP plans. Preliminary steps for HACCP implementation. Regulations that require HACCP systems. Four lecture hours.

FST 441, 442 Internship in Foods and Nutrition (2)

On-the-job training in foods and nutrition, providing professional level experience in food service, community nutrition, research and quality control. Prerequisite: permission of coordinator required in advance.

FN 463 Undergraduate Investigations and Seminar (4)

Individual investigations and group studies of foods and nutrition issues. Oral presentations and written reports. 4 seminar-discussions. Prerequisites: COM 204, ENG 105 and senior standing.

FST 464 Food Science Colloquium (2)

Classroom interaction of students with selected food industry leaders focusing on technical, economic, regulatory and new product trends as they impact occupational opportunities in the food and beverage industries. Written reports. 2 lectures. Prerequisite: senior standing.

HORTICULTURE

Daniel Hostetler, Chair, Horticulture/Plant and Soil Science
 Gregory J. Partida, Jr., Coordinator, Fruit Industries
 Frederick Roth, Coordinator, Ornamental Horticulture

Edwin Barnes III
 Terrance Fujimoto
 Frank D. Gibbons III
 Kent Kurtz
 Peggy S. Perry

Graduates from the Horticulture major can look forward to a wide range of career opportunities. The curriculum is science-based, yet affords men and women the flexibility to enhance their knowledge in specific areas of the horticultural industry. The major is divided into two options: Fruit Industries and Ornamental Horticulture. Specific career track areas include Landscape Management, Park Administration, Nursery Management, Turfgrass Management, and Horticultural Science.

The Ornamental Horticulture option provides students with an extensive background in one of California's largest agricultural industries. The state's increasing urbanization has created the need for professionals educated in home landscaping, parks, golf courses, botanical gardens, and general urban beautification. Increased environmental awareness has created numerous job opportunities in the growing area of maintenance and marketing of indoor and outdoor ornamental and edible plants.

The career track in Landscape Management is supported by a beautiful 1,200-acre campus which serves as a fine collection of plant materials and is a living laboratory for students. Landscape Design courses are supported by a fully-equipped Computer Aided Design (CAD) laboratory. Numerous outdoor landscapes at Cal Poly Pomona in different themes provide hands-on training for our students. The Park Administration career track affords students the opportunity to obtain skills for top level management positions in park systems. The courses in Horticulture provide a solid foundation and these are complemented by course work in public administration, relations, and management. The Turfgrass Management career track emphasizes an important part of the horticulture and parks industries. This track is supported by an excellent field laboratory where students conduct research and operate a commercial sod production area.

The Cal Poly Pomona Nursery supports the Nursery Management career track. This commercial nursery has over 40,000 square feet of greenhouse space, outdoor growing grounds and is home to the Raymond Burr Orchid Collection and Jolly Batcheller Conservatory. Students nurture numerous crops for sale at the Nursery which is open to the public. A new and exciting career track in Horticultural Science provides students the opportunity to transfer to respected graduate programs in Horticulture around the country. Exciting careers in plant breeding, genetics, pathology, and physiology await the advanced student.

The Fruit Industries Option provides students with the practical and scientific background in the production, management, processing, and marketing of fresh citrus, avocado, deciduous, and subtropical fruits. Over 100 acres of commercial bearing land on campus support this program. Students are encouraged to gain hands-on experience via internships or on-campus employment. Two emphasis areas in Fruit Industries are orchard management and fruit processing and marketing. These areas encourage students to explore areas of interest within California's large citrus, avocado, and deciduous fruit areas. Cal Poly Pomona has numerous alumni in top positions

throughout the industry. Citriculture was one of the first degree programs offered at Cal Poly Pomona. Graduates of Fruit Industries are in demand throughout the industry.

CORE COURSES FOR MAJOR

Required of all students. A 2.0 cumulative GPA is required in core courses including option courses for the major in order to receive a degree in the major.

| | | | |
|---|-----|----------|-----|
| Orientation to the College of Agriculture | AG | 100 | (1) |
| Agriculture and the Modern World | AG | 101 | (4) |

| College Chemistry Lab | CHM | 122L | (1) |
| Fruit Science Fundamentals | FI | 101/101L | (4) |
| Directed Electives | | | (40) |

Students following the option in Ornamental Horticulture must complete 40 units of directed electives by selecting one of the following five career tracks:*

- Landscape Management
- Turfgrass Management
- Nursery Management
- Park Administration
- Horticulture Science

Fruit Industries Option

| | | | |
|----------------------------|-----|-----|-----|
| Integrated Pest Management | AGB | 231 | (3) |
|----------------------------|-----|-----|-----|

| | | | |
|-----------------------|------|----------|------|
| Plant Physiology | .BOT | 422/422L | (5) |
| College Chemistry | .CHM | 122 | (3) |
| College Chemistry Lab | .CHM | 122L | (1) |
| Plant Propagation | .HOR | 132/132L | (3) |
| Directed Electives | | | (40) |

Students following the option in Fruit Industries must complete 40 units of directed electives by selecting one of the following two career tracks:*

- Orchard Management
- Fruit Processing and Marketing

*Courses for these career tracks are listed on the reverse side of the curriculum sheet available from the Horticulture/Plant and Soil Science Office, Building 2, Room 209. Students are encouraged to work closely with a department advisor when choosing a career track.

GENERAL EDUCATION COURSES

Required of all students. A total of 68 quarter units of General Education courses are required for all majors in the College of Agriculture. A new GE program will be adopted beginning fall 2001 with full implementation targeted for fall 2002. COURSE DESCRIPTIONS - Horticulture

All courses offered by the department may be taken on a CR/NC basis except for majors.

HOR 131/131L Landscape Horticultural Principles and Practices (3/1)

An introduction to the fundamental skills and principles of plant growth in the landscape. Includes planting techniques, pruning, propagation, irrigation, turfgrass maintenance and greenhouse/nursery production techniques. 3 lectures, 1 three-hour laboratory. Concurrent enrollment required.

HOR 132/132L Plant Propagation (2/1)

Methods and principles of plant production including propagation by seed, spore, and cuttings for ornamental and vegetable plants. Basic concepts and scientific methodologies used in topworking and grafting fruit and ornamental plants, types of grafts, selection and maintenance of propagation material. Horticultural equipment and structures related to plant production. Transplanting, canning and shifting of nursery stock. 2 lectures, 1 three-hour laboratory. Concurrent enrollment required.

HOR 200 Special Study for Lower Division Students (1-2)

Individual or group investigations, research, studies or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter. Graded on a CR/NC basis only.

HOR 211/211L Landscape Drafting and Design (3/1)

The fundamentals of drafting and graphic presentation. Methods and procedures for preparation of landscape structure components. 3 lectures, 1 three hours laboratory. Concurrent enrollment required.

HOR 214 History of Garden Art (4)

The relationship of ornamental flora to the human living experience to show the continuity with contemporary gardens, homes, parks, and other art. An introduction to the various styles in landscape art as they developed in different cultures and in preceding ages. 4 lectures.

HOR 223/223L Basic Floral Design (1/2)

Introduction to the theory of the basics of floral design to include principles and elements of design. Color theory, preparation, and care of flowers. The laboratory is for the applied construction of these theories. 1 lecture, 2 three-hour laboratories. Concurrent enrollment required.

HOR 224/224L Nursery Management (3/1)

Legal aspects and economics of operating a commercial retail or wholesale nursery. Federal, state and local regulations. Quality and inventory control, shipping practices, credit management. Site selection, nursery layout, supply purchasing, advertising related to the nursery business. 3 lectures, 1 three-hour laboratory. Prerequisites: HOR 131/131L, 132/132L. Concurrent enrollment required.

HOR 231/231L Plant Materials Fall (3/1)

A study of trees, shrubs, vines, ground covers, and herbaceous plant materials which are of greatest ornamental value in the fall season and which are commonly used in the southern California landscape. Trees

will be emphasized. Approximately 200 plants will be identified and described according to growth habit, cultural requirements, and use in the landscape. 3 hours lecture, 1 three-hour field laboratory. Concurrent enrollment required.

HOR 232/232L Plant Materials Winter (3/1)

A study of trees, shrubs, vines, ground covers, and herbaceous plant materials which are of greatest ornamental value in the winter season and which are commonly used in the southern California landscape. Shrubs and vines will be emphasized. Approximately 200 plants will be identified and described according to growth habit, cultural requirements, and use in the landscape. 3 hours lecture, three-hour field laboratory. Concurrent enrollment required.

HOR 233/233L Plant Materials Spring (3/1)

A study of trees, shrubs, vines, ground covers, and herbaceous plant materials which are of greatest ornamental value in the spring season and which are commonly used in the southern California landscape. Herbaceous plant materials will be emphasized. Approximately 200 plants will be identified and described according to growth habit, cultural requirements, and use in the landscape. 3 hours lecture, 1 three-hour field laboratory. Concurrent enrollment required.

HOR 240/240L Turf Management (3/1)

Considerations in the management of turf, including such specialized areas as golf courses, bowling greens, athletic fields and park lawns. 3 lectures, 1 three-hour laboratory. Prerequisite: SS 231/231L. Concurrent enrollment required.

HOR 299 Special Topics for Lower Division Students (1-4)

Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units, with a maximum of 4 units per quarter. Instruction is by lecture, laboratory, or a combination. Prerequisite: permission of instructor.

HOR 323/323L Greenhouse Management (3/1)

Design and management of different types of greenhouses and plant shelters. Maintenance, heating, cooling, humidification systems and their controls. Mechanization, automatic and semi-automatic fertilization and watering systems. 3 lectures, 1 three-hour laboratory. Prerequisite: BIO 115/115L or BOT 124/124L. Concurrent enrollment required.

HOR 328/328L Arboriculture (2/1)

Care and management of specimen ornamental trees. Cavity repairs, bracing and cabling, pruning. Practice in the use of lines and climbing. Safety practices. 2 lectures, 1 three-hour laboratory. Prerequisites: HOR 131/131L, HOR 231/231L, SS 231/231L, BOT 124/124L. Concurrent enrollment required.

HOR 336/336L Native Plant Materials (2/1)

Native California plants suitable for landscape purposes. Their identification, habits of growth, cultural requirements, and landscape use. 2 lectures, 1 three-hour laboratory. Concurrent enrollment required.

HOR 360/360L Landscape Development and Design (3/1)

Methods and procedures of rendering landscape designs suitable for the residential garden. The arrangement and relationships of the various elements common to aesthetic, functional landscapes will be stressed. 3 lectures, 1 three-hour laboratory.

HOR 400 Special Study for Upper Division Students (1-2)

Individual or group investigation, research, studies or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter. Graded on a CR/NC basis only.

HOR 416/416L Landscape Contracting and Estimating (3/1)

Management of landscape contracting firms. Bonding, insurance, contracts, ownership, licensing and other legal aspects of improvement to real property. Calculation of costs, manpower, and quantities of materials in landscape development. Preparation of specifications and estimates used in bidding. 3 lectures, 1 three-hour laboratory. Prerequisite: HOR 131/131L, 211/211L or permission of instructor. Concurrent enrollment required.

HOR 420/420L Urban Forestry (3/1)

Integrated approach to the management of and issues concerning street and park trees and open space vegetation in a public setting. Inventory practices, risk management, funding and budgeting, political considerations, tree waste management, valuation, tree resource utilization, and effective employment of volunteer assistance. 3 lectures, 1 three-hour laboratory. Prerequisite: HOR 328/328L. Concurrent enrollment required.

HOR 422/422L Advanced Plant Propagation (3/1)

Current topics in plant propagation concerning juvenility, growth regulators, scion/rootstock combinations, and tissue culturing. Emphasis on commercial propagation by cuttings, grafting/budding, tissue culturing, division, layering, and seeding. 3 lectures, 1 three-hour laboratory. Prerequisite: BOT 422/422L. Concurrent enrollment required.

HOR 427/427L Diseases of Ornamental Plants (3/1)

Diagnosis and control of biotic and abiotic diseases and selected insect problems on ornamental plants in interior and exterior landscapes, and under various production conditions. Labs include field trips to production areas. 3 lectures, 1 three-hour laboratory. Prerequisite: BOT 323/323L. Concurrent enrollment required.

HOR 436/436L Golf Course Management (3/1)

Management, supervision, maintenance, and operation of golf courses. A study of the equipment, scheduling, promotion and personnel required and related facilities of public and private courses. 3 lectures, 1 three-hour laboratory. Prerequisite: HOR 240/240L. Concurrent enrollment required.

HOR 435 Specialized Plant Production (3/1)

Controlling production of commercial horticultural crops such as cut flowers, foliage plants, bedding plants and flowering container plants. Use of photoperiod, temperature adjustment, vernalization and chemicals to schedule maturity of a crop. 3 lectures, 1 three-hour laboratory. Prerequisites: HOR 131, 132, 323, and SS 231.

HOR 437/437L Sports Turf and Advanced Turfgrass Science (3/1)

Advances in construction techniques, management philosophy, cultural practices and environmental factors affecting the growth of turfgrass on sports turf facilities and other related turfgrass areas. 3 lectures, 1 three-hour laboratory. Prerequisite: HOR 240/240L. Concurrent enrollment required.

HOR 439/439L Interior Landscape Management and Design (2/1)

Interior landscaping and design in shopping malls, offices, and other interior spaces. Identification of species used, including the proper

installation, maintenance and management. Cultural practices, scheduling, pest management and cost analysis. Operational practices of interior landscaping firms. 2 lectures, 1 three-hour laboratory. Prerequisite: HOR 131/131L. Concurrent enrollment required.

HOR 443/443L Landscape Management Problem-Solving (3/1)

The integration of the technical aspects of landscape management in problem-solving case studies. Aspects of turf management, plant materials, personnel issues, equipment, irrigation, and chemical use will be addressed in determining the proper methodology for maintaining landscaping of parks, streets and institutional grounds. Three lectures, one three-hour laboratory. Prerequisites: HOR 131/131L, 231/231L, HOR 240/240L, SS 231/231L. Concurrent enrollment required.

HOR 461, 462 Senior Project (2) (2)

Selection and completion of a project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report. Minimum 120 hours of total time. HOR 461 grade only.

HOR 499 Special Topics for Upper Division Students (1-4)

Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units, with a maximum of 4 units per quarter. Instruction is by lecture, laboratory, or a combination of both. Prerequisite: permission of instructor.

HPS 463 Undergraduate Seminar (2)

An open forum of senior students in which the latest developments, practices, and procedures are discussed. Each student is responsible for the development and presentation of a topic in his/her chosen field. 2 lectures.

COURSE DESCRIPTIONS – Fruit Industries

All courses in Fruit Industries may be taken on a CR/NC basis except by majors.

FI 101/101L Introduction to Fruit Science (3/1)

Evaluation of the role of subtropical and deciduous fruit and nut crops, citrus and avocados in California horticulture. Historical development, economic importance and cultural practices common to all fruit crops. Site selection, orchard planning, variety and rootstock selection, propagation, fertilization, irrigation, pest and disease control, pruning and training, harvesting and marketing of fruit crops. 3 lectures, 1 three-hour laboratory. Concurrent enrollment required.

FI 200 Special Study for Lower Division Students (1-2)

Individual or group investigation, research, studies or surveys of selected historical or contemporary problems in the production of fruit in California or in other areas of the world. Total credit limited to 4 units, with a maximum of 2 units per quarter.

FI 201/201L Citrus and Avocado Production I (3/1)

Critical evaluation of historical and future trends in the development of the citrus and avocado industry in California. Analytical investigation of citrus and avocado orchard site selection, environmental requirements, variety adaptations, orchard management, cultural requirements, production practices, and economics of producing citrus and avocados. 3 lectures, 1 three-hour laboratory. Concurrent enrollment required.

FI 202/202L Subtropical Fruits (3/1)

Historical significance and contemporary importance of subtropical fruits including the date, fig, macadamia, olive, and other selected fruits for commercial plantings in California and other areas of the United States. Critical evaluation of the climactic and cultural requirements, fruiting and growth habits, and varietal characteristics of the selected fruits from western and non-western societies. 3 lectures, 1 three-hour laboratory. Concurrent enrollment required.

FI 203/203L Pomology (3/1)

Economic importance of California's deciduous fruit and nut orchards. Critical evaluation of the cultural requirements of deciduous fruit and nut orchards in California and other areas of the United States, varieties, seasonal production practices, and tree climactic requirements. 3 lectures, 1 three-hour laboratory. Concurrent enrollment required.

FI 299/299L/299A Special Topics for Lower Division Students (1-4) (1-4)

Group study of contemporary selected topics related to basic concepts and scientific methodologies used in fruit production in western and non-western societies. The title to be specified in advance. Total credit is limited to 8 units, with a maximum of 4 units per quarter. Instruction is by lecture, laboratory, activity, or a combination. Prerequisite: consent of instructor.

FI 302/302L Citrus and Avocado Production II (3/1)

Critical evaluation and comparison of citrus and avocado production practices from commercial citrus regions around the world. Orchard planning and development, nursery practices, tree management, pest and disease control, irrigation and fertilization, pruning, harvesting and marketing. 3 lectures, 1 three-hour laboratory. Prerequisites: FI 201/201L. Concurrent enrollment required.

FI 303/303L Advanced Pomology (3/1)

Critical evaluation of the climactic and cultural requirements of fruit tree orchards, strawberries, kiwifruit, olives and other selected small fruits. The basic concepts and scientific methodologies used in the production, processing, and marketing of raisins and table and wine grapes including the techniques of irrigation, orchard layout, planting, training, pruning, pollination, fruitlet, thinning, pest control, and the use of girdling and plant growth regulators to size fruit in vineyards and orchards. 3 lectures, 1 three-hour laboratory. Prerequisite: FI 203/203L. Concurrent enrollment required.

FI 322/322L Fruit Processing and Handling (3/1)

Evaluation of physical operations involved in fruit and nut harvesting, processing, and packing. Equipment used in harvesting, handling, transporting, grading, sorting, packing and shipping of fruits and nuts. Fruit and nut storage, storage diseases, and techniques used to prolong storage life. 3 lectures, 1 three-hour laboratory. Prerequisite: FI 426/426L. Concurrent enrollment required.

FI 341/341L Orchard Management Practices (1/2)

Practical application of the basic concepts and scientific methodologies used in orchard cultural practices and procedures. Importance of seasonal operations in relation to overall objectives in orchard management. Use of specialized orchard equipment emphasized. 1 lecture, 2 three-hour laboratories. Prerequisites: AE 241/241L and any fruit production course, or consent of instructor. Concurrent enrollment required.

FI 400 Special Study for Upper Division Students (1-2)

Individual or group investigations, research, studies, or survey of selected historical or contemporary problems in the production of fruit in California or in other areas of the world. Total credit limited to 4 units, with a maximum of 2 units per quarter.

FI 425L Advanced Propagation (2)

Advanced propagation will incorporate the propagation techniques and methods used in HOR 132/132L. Students in this course will be required to use the modern techniques and methods learned to complete a propagation project. Projects may include topworking or grafting trees to new varieties, or budding or tipgrafting cuttings in the nursery to selected budwood. 2 three-hour laboratories. Prerequisites: HOR 132/132L.

FI 426/426L Diseases of Fruit Crops (3/1)

Philosophy of disease control and prevention in California's citrus, avocado, and deciduous fruit and nut orchards. Identification of causal agents, economic impact, critical evaluation of the basic concepts and scientific methodologies involved in control and prevention. 3 lectures, 1 three-hour laboratory. Prerequisites: FI 101/101L, FI 201/201L, FI 203/203L, and BOT 323/323L. Concurrent enrollment required.

FI 441 Internship in Orchard Management (12)

On-the-job training in orchard maintenance and cultural practices. One quarter in residence at Pine Tree Ranch in Ventura County or any other orchard property with similar training opportunities. Actual operation of a commercial orchard enterprise under University faculty or staff supervision. Prerequisites: FI 101/101L, FI 201/201L, F1 341/341L or AGR 120/120L recommended; and permission of section coordinator. Letter grade only.

FI 499/499L/499A Special Topics for Upper Division Students (1-4) (1-4)

Group study of contemporary selected topics related to basic concepts and scientific methodologies used in fruit production in western and non-western societies. The title to be specified in advance. Total credit limited to 8 units, with a maximum of 4 units per quarter. Instruction is by lecture, laboratory, activity, or a combination. Prerequisite: consent of instructor.

INTERNATIONAL AGRICULTURE

The Food Marketing and Agribusiness Management/Agricultural Education Department offers a program of courses in International Agriculture. For other programs offered in the Department, see Food Marketing and Agribusiness Management and Agricultural Education.

Edison I. Cabacungan, Chair

William C. Hughes
Marvin L. Klein
Arthur F. Parker
James M. Weidman

COURSE DESCRIPTIONS

Required of all students. A 2.0 cumulative GPA is required in core courses including option courses for the major in order to receive a degree in the major.

All courses offered by the department may be taken on a CR/NC basis except by majors.

IA 101 Global Resources for Food (4)

Resource base for agricultural production on various continents. Potential for increasing food supplies. Role of agriculture in economic development. 4 lectures.

IA International Food and Agribusiness Marketing (3)

Marketing of food, fiber, and horticultural products in foreign markets. Special emphasis on selecting export markets, procedures for establishing contacts, promotion, financing, insuring, shopping tariffs, customs, regulations and other matters related to food and fiber products. Management practices and problems of firms involved in exporting and importing textiles and garments, livestock, fruits, vegetables, grains and other food and fiber products. 3 lectures.

IA 362 Agricultural Policy in Developing Nations (4)

Review, analysis and discussion of relevant international government agricultural policy affecting development, trade, and food production. History, current status and projections of policy trends. 4 lectures.

IA 400 Special Study for Upper Division Students (1-2)

Individual or group investigation, research, studies or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

IA/FN 445 Nutrition and Global Development (4)

Issues in technology, food policy, nutrition and social welfare in developing societies. Integrates concerns about food and nutrient distribution and availability, malnutrition, scientific principles of nutrient utilization and metabolism, and human productivity and reproduction. Implications for a just and sustainable economic development. 4 lectures.

IA/FMA 450 Agricultural Water Resource Management (4)

Water resource management applied to current issues. Water delivery systems in the United States and California, survey of water rights, water pollution, water conservation, food and agricultural system water use, and efficient water management. Includes water problems in developing nations. 4 lecture discussions.

IA 461, 462 Senior Project (2) (2)

Students select and complete a research project under faculty supervision typical of those they will be required to handle in their field of employment. Research findings and conclusions are presented in a formal report. Prerequisite: senior standing. May not be taken concurrently.

LANDSCAPE IRRIGATION SCIENCE

Eudell Vis, Chair, Agricultural Engineering and Irrigation Science

Ramesh Kumar

The landscape irrigation profession has expanded rapidly and career opportunities are plentiful. The Landscape Irrigation Science major provides a broad background in the interrelationships of water, plants, soils, and the environment, along with the principles of irrigation system design and water management. An effective irrigation system and water management plan can enhance the quality of the landscape and conserve water resources.

This major program will educate individuals who will be involved in the planning, design, operation and management of landscape irrigation and drainage systems for residential and commercial developments, parks, golf courses, public grounds, cemeteries, and other urban and recreational landscaped areas.

Cal Poly Pomona offers a strong emphasis in landscape irrigation design and water management. This department is at the forefront in the application of new technology in automated systems and innovative methods of water management. Refer to the Landscape Irrigation Science degree for curriculum requirements.

A number of courses in the section on course descriptions are core, support, or elective courses for other disciplines.

The curriculum provides a foundation in the basic sciences and in the related fields of horticulture, plant science, soil science, and business management. In addition, an extensive curriculum in irrigation engineering technology, landscape drainage, water management, and diagnosis irrigation problems prepare the student for a wide range of career opportunities. A number of courses are core, support, or elective for other disciplines.

Students in the landscape irrigation science major will have the opportunity to work with the considerable resources on campus that focus on the landscape and on irrigation technology. These include the ornamental horticulture unit, the extensively landscaped campus, and the facilities of the Agricultural Engineering department, including the Center for Turf Irrigation and Landscape Technology.

The department has strong relationships with nearby international corporations that manufacture and market state-of-the-art technologies. Internships and scholarships are available to students majoring in this field.

Admission requirements for this program follow those for the California State University system. The degree program requires 194 quarter units and leads to a Bachelor of Science degree in Landscape Irrigation Science.

CORE COURSES FOR MAJOR

Required of all students. A 2.0 cumulative GPA is required in core courses including option courses for the major in order to receive a degree in the major.

GENERAL EDUCATION COURSES

Required of all students. A total of 68 quarter units of General Education courses are required for all majors in the College of Agriculture. A new GE program will be adopted beginning fall 2001 with full implementation targeted for fall 2002. Unless specific courses are stated below, see the list of approved courses under General Education Requirements, Areas A through E, in this catalog.

Area A:

1. Written Communication (4)
2. Oral Communication (4)
3. Critical Thinking (4)

Area B:

1. TrigonometryMAT 106 (4)
2. College ChemistryCHM 121/121L (4)
3. Basic BiologyBIO 115/115L (5)
4. Select one course (4)

Area C:

1. Select one course (4)
2. Select one course (4)
3. Select one course (4)
4. Select one course (4)

Area D:

1. Introduction to American GovernmentPLS 201 (4)
and United States HistoryHST 202 (4)
2. Select one course (4)
3. Select one course (4)
4. Select one course (4)

Area E:

- Select one course (4)

LANDSCAPE IRRIGATION DESIGN MINOR

Select two of the following four courses:

| | | | |
|---------------------------------|----------|----------|-------|
| Landscape Construction |AE | 124/124L | (2/1) |
| Agricultural Irrigation Methods |AE | 240/240L | (3/1) |
| Principles of Irrigation |LIS | 212 | (4) |
| Landscape Hydraulics |LIS | 221 | (4) |

Select two of the following four courses:

| | | |
|---|--------------|-------|
| Golf Course Irrigation | LIS 322/322L | (3/1) |
| Automatic Irrigation System Controls | LIS 365/365L | (4) |
| Landscape Irrigation Water Management | LIS 440/440L | (3/1) |
| Landscape Irrigation Trouble Shooting | LIS 452/452L | (3) |

Complete all of the following courses:

| | | |
|-----------------------------------|--------------|-----|
| Sprinkler Irrigation | LIS 231 | (4) |
| Computer-Aided Drafting | LIS 241/241L | (4) |
| Drip Irrigation | LIS 340/340L | (3) |
| Landscape Drainage | LIS 341 | (4) |

Total Units. 29-31

COURSE DESCRIPTIONS

LIS 104 Introduction to Landscape Irrigation Design (1)

An introduction to the field of landscape irrigation design, career opportunities and responsibilities. One lecture/problem.

LIS 200 Special Study for Lower Division Students (1-2)

Individual or group investigation, research, studies or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

LIS 212 Principles of Irrigation (4)

Basic soil, water and plant relationships. Irrigation water requirements, irrigation efficiencies, and methods of irrigation applied to plants. Collection of irrigation information needed for planning, design and management. Principles of land drainage and salinity problems are also included. Four lecture/problems. Prerequisite: MAT 106 or equivalent, and SS 231/231L.

LIS 221 Landscape Hydraulics (4)

Principles of hydrostatics, dynamics, problems involving pipe flow and channel flow specifically applied to landscape irrigation and drainage systems. Also includes related problems in water flow, such as storage tanks, water hammer, pumps, and water fountains. 4 lectures/problem-solving. Prerequisites: PHY 121 or MAT 106 or equivalent.

LIS 231 Sprinkler Irrigation (4)

Soil-water plant relations, engineering sprinkler system layout, selection of sprinkler irrigation equipment such as sprinklers, valves, controllers, and specialty devices for efficient water application and to meet codes. Analysis of cost and irrigation management and maintenance are also included. 3 lecture/problems and 1 three-hour laboratory. Prerequisites: MAT 105 or 106 or equivalent.

LIS 241/241L Computer Aided Drafting (3/1)

Application of the personal computer (AUTOCAD) to landscape irrigation design and graphics. 3 lectures/problem-solving, 1 three-hour laboratory. Concurrent enrollment required.

LIS 322/322L Golf Course Irrigation (3/1)

Design and management of sprinkler systems for athletic fields, cemeteries, parks, and golf courses. Emphasis is on the application of irrigation principles to a complex irrigation system. 3 lectures/problem-solving, 1 three-hour laboratory. Prerequisite: LIS 231 or consent of instructor. Concurrent enrollment required.

LIS 340/340L Drip Irrigation (2/1)

Design, operation and maintenance of drip irrigation systems, including determination of plant water requirements, emitter selection and uniformity of water distribution. Lateral, manifold, and mainline design, filtration, fertilization and automation are included. 2 lectures/problem-solving, 1 three-hour laboratory. Prerequisite: AE 240 or LIS 231 or consent of instructor. Concurrent enrollment required.

LIS 341 Landscape Drainage (4)

Drainage problems related to landscaping, such as sizes of storms, and surface runoff. Calculations of storm sizes with different frequencies. Minimizing and prevention of damage due to runoff or erosion. 4 lectures/problem-solving. Prerequisite: LIS 221 or consent of instructor.

LIS 350 Water and Civilization (4)

Water and its relationship to civilization from ancient history to modern developments. Survey of global water resources and current issues of distribution, allocation, and water quality. Analysis of California and regional water supplies. Water agencies. Methods to determine water requirements for agriculture, overview of urban water use, approaches to water management. 4 lectures. Prerequisites: GE Area B, Sub-areas 1, 2, and 3.

LIS 365/365L Automatic Irrigation System Controls (3/1)

Basic electricity, power and energy, circuit types, and wiring practices. Basic electronic principles applied to irrigation and other types of controllers. Circuits for controllers, electric valves, and sensing devices. 3 lectures, 1 three-hour laboratory. Concurrent enrollment required.

LIS 400 Special Study for Upper Division Students (1-2)

Individual or group investigation, research, studies or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

LIS 440/440L Landscape Irrigation Water Management (3/1)

Application of the science of soil-water-plant relations and climactic conditions to develop effective scheduling and management of irrigation water systems for residential, commercial, industrial, park and golf course, etc. Water conservation issues, water policies and codes and other related matters will be discussed. 3 lectures/problem-solving and 1 three-hour laboratory. Prerequisite: AE 240/240L or LIS 231 or LIS 322/322L. Concurrent enrollment required.

LIS 441 Internship in Landscape Irrigation Science (2-4)

Professional level work experience with public agencies or private companies for advanced students. Work experiences are valuable for development of career goals and for application of academic training. Written reports are required. Course may be repeated for a maximum of 12 units.

LIS 452/452L Landscape Irrigation Trouble Shooting (2/1)

Prevention and analysis of problems and failures in landscape irrigation systems, such as irrigation controllers, remote control valves, wiring failures, sprinklers and drip system failures. Other specialty items such as cross connections, pressure regulators, vacuum breakers, pipes, etc., will be included. 2 lectures/problem-solving, 1 three-hour laboratory. Prerequisite: LIS 365/365L. Concurrent enrollment required.

LIS 461, 462 Senior Project (2) (2)

Students will select and complete a landscape irrigation related project under faculty supervision. The project could be either a design, analysis or water management problem.

LIS 463 Undergraduate Seminar (2)

Presentation of the senior project, new methods and development, practices and procedures of the field. Prerequisite: LIS 461 and 462.

SOIL SCIENCE

Daniel Hostetler, Chair, Horticulture/Plant and Soil Science
Gaylord Patten, Coordinator, Soil Science

Edwin Barnes III
Robert J. Tullock
Victor Wegryzn

The soil science major is for those who desire to become guardians of the soil. Soil is one of the natural resources which is basic for life and human existence. As the natural medium for plant growth, it is the source of most of our food and clothing. It provides shelter in the form of bricks and timber products. Mankind also depends upon the soil as a material for supporting and locating buildings, transportation systems, waste disposal sites, outdoor recreational playgrounds, flood control ditches, and underground utility systems.

There are thousands of kinds of soil on earth, each having a unique set of characteristics. Soil science students learn how to determine these characteristics in both the field and laboratory. They learn to relate these characteristics to the genetic history of the soil and to organize and classify this information in a systematic manner. They also learn to determine the location and extent of soils in the field and to show this on a soil map.

The characteristics of a soil determine the degree of suitability for a variety of alternative uses, and the appropriate management practices required to keep the soil permanently productive. Soil quality can be altered by the activities of mankind. If abused, soil productivity declines. If treated properly, a soil will produce indefinitely. Soil scientists prevent soil deterioration while striving to maintain or improve soil productivity for all future generations.

The demand for soil scientists is keeping pace with the human population growth curve and the growing awareness for maintaining a clean and aesthetic environment. A career in soil science is an alternative for anyone who is concerned about the conservation of natural resources and the future wealth of mankind, and has a strong interest in the biological and physical sciences.

The Cal Poly Pomona soil science program enjoys an excellent local, state, and national reputation. This reputation results from a strong curriculum, taught by a well-qualified faculty, supported by laboratory and field facilities which have produced alumni who are professional soil scientists.

Soil scientists have many options for career opportunities. They can work for private industry or governmental agencies; in the laboratory, field, office or classroom; and in either urban or rural areas. They can apply their knowledge to the production of agronomic, horticultural, rangeland, or forestry plants; to the use of soils for urban planning and development; to the manufacturing and marketing of fertilizers and other agricultural materials; or to the administration of natural resource programs. Many graduates pursue advanced training and work in research and education.

About half of the Cal Poly Pomona soil science graduates are employed by a governmental agency. At the federal level they are working for the Bureau of Land Management, Forest Service, Natural Resource, Conservation Service, Environmental Protection Agency, or Agricultural Research Service. Several foreign students are employed by their native country's Department of Agriculture. At the state level in California and elsewhere, they are employed by a State University, Department of Forestry, Department of Water Resources, or Department of Health

Services. At the county or local level, they are working for the Agricultural Commissioner's Office, the Agricultural Extension Office, or the County Arboretum. One alumnus is with the Food and Agricultural Organization of the United Nations.

The soil science graduates with private industry are mainly employed by agricultural chemical companies, soil engineering testing and consulting firms, wholesale horticultural nurseries, food production and processing companies, agricultural management consulting firms, or soil testing laboratories.

Soil Science Minor

The soil science minor is primarily for students majoring in another discipline which is dependent upon soil science. It is a valuable curricular adjunct for those majors stressing plant growth, such as: agronomy, botany, fruit industries, landscape architecture, and ornamental horticulture. The soil science minor will also strengthen the academic background of those majoring in agricultural engineering, civil engineering, agricultural science, anthropology, biology, geology, geography, international agriculture, and urban planning.

CORE COURSES FOR MAJOR

(Required of all students) A 2.0 cumulative GPA is required in core courses including option courses for the major in order to receive a degree in the major.

GENERAL EDUCATION COURSES

Required of all students. A total of 68 quarter units of General Education courses are required for all majors in the College of Agriculture. A new GE program will be adopted beginning fall 2001 with full implementation targeted for fall 2002. Unless specific courses are stated below, see the list of approved courses under General Education Requirements, Areas A through E, in this catalog.

Area A:

- 1. Select one course (4)
- 2. Select one course (4)
- 3. Select one course (4)

Area B:

- 1. Select one course (4)
- 2. College Chemistry CHM 121 (3)
College Chemistry Laboratory CHM 121L (1)
- 3. Basic Biology BIO 115/115L (5)
- 4. Select one course (4)

Area C:

- 1. Select one course (4)
- 2. Select one course (4)
- 3. Select one course (4)
- 4. Select one course (4)

Area D:

- 1. United States History HST 202 (4)
and Introduction to American Government PLS 201 (4)
- 2. Select one course (4)
- 3. Select one course (4)
- 4. Select one course (4)

Area E:

- Select one course (4)

SOIL SCIENCE MINOR

- Minimum Units 20
- Minimum Upper Division Units 9

Required Courses (all students)

- Basic Soil Science SS 231/231L (4)
- Soil Fertility and Fertilizers SS 233/233L (4)

Select 12 units from the following:

- Soil Materials and Management SS 332/332L (4)
- Soil Resource Management and Conservation SS 334/334L (4)
- Soil and Plant Analysis SS 339/339L (3)
- Soil Chemistry SS 431/431L (4)
- Soil Physics SS 432/432L (4)
- Soil Morphology and Survey SS 433/433L (4)

COURSE DESCRIPTIONS

All courses offered in Soil Science may be taken on a CR/NC basis except by majors or by students taking a minor in Soil Science.

SS 200 Special Study for Lower Division Students (1-2)

Individual or group investigation, research, studies or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter. Staff

SS 231/231L Basic Soil Science (3/1)

Basic concepts and scientific methodologies of the living and non-living systems of soils; integrated relationships between soils and climate, plants, animals, geologic materials, land form and time; and the impact of soils on civilization. 3 lectures, 1 three-hour laboratory. Prerequisite: CHM 121/121L. Concurrent enrollment required.

SS 233/233L Soil Fertility and Fertilizers (3/1)

Critical evaluation of concepts, methods and materials for improving the fertility of soils used for the sustained production of all types of commercial plants while preserving environmental quality as influenced by past and present social, political, and economic institutions in Western and non-Western societies. 3 lectures, 1 three-hour laboratory. Prerequisite: SS 231/231L. Concurrent enrollment required.

SS 299/299L/299A Special Topics for Lower Division Students (1-4) (1-4) (1-4)

Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units, with a maximum of 4 units per quarter. Instruction is by lecture, laboratory, activity, or a combination. Prerequisite: permission of instructor. Concurrent enrollment required.

SS 332/332L Soil Materials and Management (3/1)

Comprehensive evaluation of soils, soil materials, and technical and scientific methodologies for managing soils and soil materials for the production of agronomic and horticulture crops on a sustained basis while preserving environmental quality. Presented in an interactive setting. 3 lectures/problem-solving, 1 three-hour laboratory. Prerequisite: SS 231/231L; computer literacy encouraged. Concurrent enrollment required.

SS 334/334L Soil Resource Management and Conservation (4)

An integrated study of principles and methods for managing soil and water resources for multiple uses, sustainable agriculture, environmental quality, and erosion control. Integrated effects of soil, climate, topography, and land use; social, political, and economic relationships. 3 lectures/problem-solving, 1 three-hour laboratory. Prerequisite: SS 231/231L.

SS 339/339L Soil and Plant Analysis (2/1)

Critical evaluation of the basic concepts and scientific methodologies for analyzing the nutrient status of soils and plant tissue as a means for diagnosing alternative fertilizer and amendment treatments as influenced by past and present social, political, and economic institutions in western and non-western societies. 2 lectures, 1 three-hour laboratory. Prerequisites: CHM 122/122L, SS 231/231L. Concurrent enrollment required.

SS 400 Special Study for Upper Division Students (1-2)

Individual or group investigation, research, studies or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

SS 431/431L Soil Chemistry (3/1)

Critical evaluation of the basic concepts and scientific methodologies regarding the chemical composition and reactions of the integrated

solid-liquid-gaseous system in soils and their relationship to soil productivity and environmental quality as influenced by past and present social, political, and economic institutions in western and non-western societies. 3 lectures, 1 three-hour laboratory. Prerequisite: SS 339/339L; CHM 221; or consent of instructor. Concurrent enrollment required.

SS 432/432L Soil Physics (3/1)

Critical examination of the methods of characterizing the physical attributes of soil, including soil particle size distribution and structure, the nature and behavior of clay, the state and movement of water and solutes in both saturated and unsaturated soil conditions, gas and energy exchange between the soil and atmosphere, and the principles of rheology. 3 hours lecture/problem-solving, 1 three-hour laboratory. Prerequisites: PHY 122/122L; SS 231/231L; or consent of instructor. Concurrent enrollment required.

SS 433/433L Soil Morphology and Survey (3/1)

An in-depth examination of soil morphology. Descriptions, characterization, and interpretation of soil profiles, soil bodies, and patterns of soil. Categorization using the morphogenic system of the USDA. Allied aspects of soils including technology transfer, land use planning, ecology, soil surveys and mapping, and pedogenic processes. 3 lecture-discussions, 1 three-hour laboratory. Prerequisites: SS 231/231L; upper division standing. Concurrent enrollment required.

SS 441, 442 Internship in Soil Science (1-4) (1-4)

On-the-job experience with public and private agencies for advanced students. Professional type experience new to the student so that a valuable contribution toward career development results. One unit credit for each 100 hours of experience. Written reports necessary. Courses may be repeated for maximum of 12 units total. Prerequisite: junior standing.

SS 461, 462 Senior Project (2) (2)

An analytical investigation of a soil science research project in an area of special interest to the individual student, working under faculty supervision, culminating in a formal rhetorical, expository report that emphasizes clarity and lucidity of thought based on deductive and inductive reasoning, and the use of graphic skills. Minimum of 120 hours. Must be taken in sequence.

SS 499/499L/499A Special Topics for Upper Division Students (1-4)

Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units with a maximum of 4 units per quarter. Instruction is by lecture, laboratory, activity, or a combination. Prerequisite: permission of instructor. Concurrent enrollment required.

HPS 463 Undergraduate Seminar (2)

Critical reviews of contemporary research in the field of soil science. The student will analyze, criticize and advocate by inductive and deductive methods. Inferences in contemporary literature are based on fact or a logical, unambiguous extension of fact. Oral reports of literature and senior projects are required. Prerequisites: SS 462 and successful completion of the GWT.
