UNIVERSITY PROGRAMS

INTERDISCIPLINARY GENERAL EDUCATION (IGE)

James Manley, Director
Dick Johnson, Associate Director
Nancy Ware, Associate Director

The IGE (Interdisciplinary General Education) Program is a team-taught, thematically integrated sequence of courses that meets many general education requirements in a stimulating intellectual environment. These requirements, which apply to all California State University campuses, help to broaden skills and understanding in areas beyond the major (such as social science, literature, composition). Usually these requirements are fulfilled by taking separate courses.

The Interdisciplinary General Education Program addresses the need for an integrated approach to curriculum, teaching, and scholarship and the creation of an extended learning community.

FIRST YEAR (F,W,Sp)

IGE 120 Consciousness and Community (4)

First knowings, origin of consciousness, myth, symbol, performance, and ceremony; prehistory and patterns of living, making of meaning; university experience. 4 lecture discussions. Prerequisite: EPT score of 147 or better. Activity fee may be required.

IGE 121 Rationalism and Revelation: The Ancient World (4)

The nature of tragedy; the ways of warriors, prophets, tyrants, philosophers, and citizens; ethics, convictions, and the sacred. 4 lecture discussions. Prerequisite: IGE 120. Activity fee may be required.

IGE 122 Authority and Faith: The Medieval and Renaissance Worlds (4)

Visions of hell, politics, social order, and redemption; constructions of the sacred and secular selves; journey of the soul; private lives and public spaces. 4 lecture discussions. Prerequisite: IGE 121. Activity fee may be required.

SECOND YEAR (F,W,Sp)

IGE 220 Ways of Knowing: Culture and Contact (4)

Explorations of the multiple ways of constructing knowledge (science, art, the sacred as ways of knowing); knowledge as historically grounded in the era of the New World colonial conquest (national artistic cultures, scientific revolution, indigenous sacred articulations of space and time, perceptions of Self and Other). 4 lecture discussions. Prerequisite: IGE 122. Activity fee may be required.

IGE 221 Ways of Coexisting: Reform and Revolution (4)

Explorations of urban and global issues (social space; domination, resistance, and revolution; traditional/transitional cultures). Inquiries are historically grounded in the Enlightenment era (rise of individual rights, spirit of revolution, restructuring social, conceptual, and scientific structures). 4 lecture discussions. Prerequisite: IGE 220. Activity fee may be required.

IGE 222 Ways of Doing: The Industrial Age (4)

Explorations of technology and human purpose; science and scientists; divergent thinking, gender, genius, and anomalies; emergent ethical frameworks; inquiries are historically grounded in the Industrial Age; individual and collective ideologies; romanticism and realism. 4 lecture discussions. Prerequisite: IGE 221. Activity fee may be required.

THIRD YEAR (F,W)

IGE 223 Ways of Living: The Contemporary World (4)

Explorations of environmental epistemology, ethics, aesthetics, and biographies; communities and cultures which offer life-enhancing practices; environmental education and responsibility; inquiries are historically grounded in the modern and postmodern worlds; global thinking and doing. 4 lecture discussions. Prerequisite: IGE 222. Activity fee may be required.

IGE 224 Connections Seminar: Exploration and Personal Expression (4)

Research and presentation of an interdisciplinary project which extends and synthesizes themes from the IGE experience. 4 lecture discussions. Prerequisite: IGE 223

INTERNATIONAL PROGRAMS

Dr. Jean Aigner, Director, International Programs

These course designations serve Cal Poly Pomona students participating in Cal Poly Pomona Exchange Programs or in CSU International Programs (IP) overseas as vehicles for residence credit and are administered by the International Center.

IPC 198 Foreign Study Topics: (Course Title) (1-6)

Study undertaken in a foreign university under the auspices of The California State University International Programs or Cal Poly Pomona Exchange Programs.

IPC 398 Foreign Study Topics: (Course Title) (1-6)

Study undertaken in a foreign university under the auspices of The California State University International Programs or Cal Poly Pomona Exchange Programs.

IPC 598 Foreign Study Topics: (Course Title) (1-6)

Graduate study undertaken in a foreign university under auspices of The California State University International Programs or Cal Poly Pomona Exchange Programs. Maximum credit 9 units.

GENERAL EDUCATION - TRACK A

Vinita Dhingra, Coordinator

GEN 101 Communication and Critical Thinking I (4)

Study and practice of methods of inquiry and forms of written and oral communication in the disciplines and fields of modern knowledge. Selected examples from the humanities, arts, natural sciences, social sciences, and professions. Introduction to the university as a place of cultural actions and knowledge. Frequent papers and oral presentations. Emphasis on self-reflection and exposition. 4 discussion/problem-solving.

GEN 102 Communication and Critical Thinking II (4)

This course should build on what students have explored in GEN 101 and continue the study and practice of forms of written and oral communication in the various disciplines. Students will explore the different methods of research, critical thinking, analysis and persuasion as they extend beyond the university and apply to issues of public importance and current events. 4 discussion/problem-solving. Prerequisite: GEN 101.

GEN 103 Communication and Critical Thinking (4)

Capstone for GEN 101 and 102, Communication and Critical Thinking. Frequent papers and oral presentations. Integrates content knowledge and process knowledge. 4 discussion/problem-solving. Prerequisites: GEN 101 and 102.

GEN 104 The Human Conscience and Spirit (4)

A cross-cultural, multidisciplinary examination of significant recurrent themes from a variety of historical, literary, philosophical, and religious sources that exemplify alternative human responses to common life experiences and ways of resolving fundamental spiritual and moral issues. 4 lectures/problem-solving.

GEN 105 Political Authority and Change (4)

The study of political authority and change in the context of world cultures. Emphasis is given to institutions, cultural perspectives, the individual in relation to authority, social movements, and political authority at the global level. 4 lectures/problem-solving. Prerequisites: GEN 101, 102, 103.

GEN 106 Creativity, Technology, and Society (4)

An examination of the moral, aesthetic, and social dimensions of human invention. Selected cultural and historical examples. Emphasis on historical, philosophical, and literary methods of inquiry and analysis. 4 lectures/problem-solving. Prerequisites: GEN 101, 102, and 103.

GEN 107/107A World Cultures IV: Fine and Performing Arts - Intention, Process and Product (4)

Multidisciplinary exploration, on a global scale, of the fine and performing arts drawn from the disciplines of architecture, art, dance, landscape architecture, music and theatre. Emphasis on interdisciplinary dialog on artistic intention, process and product. Instruction is by lecture, activity, or a combination of both.

GEN 108 Consumers, Producers, and Economic Institutions (4)

An interdisciplinary introduction to the concepts and the empirical and normative theories of economic practices, institutions, and outcomes. An analysis of economic and social problems from economic, historical, and philosophical points of view. 4 lectures/problem-solving. Prerequisites: GEN 101, 102, 103.

GEN 109 Readings in Human Behavior and Nature (4)

A multidisciplinary examination of the complex "nature" of the human animal. Guided exploration of the literature pertaining to the biological, social, and environmental factors underlying human behavior. An evolutionary, cross-cultural, and cross-species investigation into the uniqueness of humankind. 4 lectures/problem-solving. Prerequisites: GEN 101, 102, 103.

GEN 110 The Individual in a Diverse Society (4)

Introduces social theory relevant to the challenge and promise of diverse societies, identifies one disciplinary approach (varies from section to section) to contemporary issues of diversity, and engages students in experiential group activities designed to heighten awareness of individual diversity in society. 4 lectures/problem-solving.

NATIONAL STUDENT EXCHANGE

Laraine Turk, Coordinator

These course designations serve Cal Poly Pomona students participating in the National Student Exchange Consortium at various universities and colleges in the United States as vehicles for Cal Poly Pomona residence maintenance.

NSE 198 National Student Exchange Study Topics: (Course Title) (1-15)

Study undertaken at a member campus of the National Student Exchange Consortium.

NSE 398 National Student Exchange Study Topics: (Course Title) (1-15)

Study undertaken at a member campus of the National Student Exchange Consortium.

LIBRARY

Harold B. Schleifer, Director

The Library's Bibliographic Instruction Program is designed to introduce students to the basic courses and library research strategies needed to a specific course or assignment. The presentations illustrate how to define information needs, investigate appropriate sources, and evaluate sources for relevance, reliability, and objectivity. For Library instruction: Call the Reference/Instruction/Collections Services office at extension 3076.

MILITARY SCIENCE

Lieutenant Colonel Kevin Arnold, Professor of Military Science
Captain Randall Millers — Captain Albert Gordon
MSG Robin Harrison — SFC Steven Stahlhuth

MS 101/101L Introduction to ROTC (and to the university) (2/0)

Make your first new peer group at college one committed to performing well and enjoying the experience. Increase self-confidence through team study and activities in basic drill, physical fitness, rappelling, leadership reaction course, first aid, making presentations and basic marksmanship. Learn fundamental concepts of leadership in a profession in both classroom and outdoor laboratory environments. One hour and a required leadership lab, MS101L, plus optional participation in a one hour session for physical fitness. Participation in a weekend exercise is optional, but highly encouraged (and fun!).

MS 102/102L Introduction to Leadership (2/0)

Learn/apply principles of effective leading. Reinforce self-confidence through participation in physically and mentally challenging exercises with upper division ROTC students. Develop communication skills to improve individual performance and group interaction. Relate organizational ethical values to the effectiveness of a leader. One hour and a required leadership lab, MS102L, plus optional participation in a one hour session for physical fitness. Participation in a weekend exercise is optional, but highly encouraged.

MS 103/103L Continuation of MS 102 (2).

MS 201/201L Self/Team Development (2/0)

Learn/apply ethics-based leadership skills that develop individual abilities and contribute to the building of effective teams of people. Develop skills in oral presentations, writing concisely, planning of events, coordination of group efforts, advanced first aid, land navigation and basic military tactics. Learn fundamentals of ROTC is Leadership Development Program. Two hours and a required leadership lab, MS 201L, plus required participation in a two one-hour sessions for physical fitness. Participation in a weekend exercise is optional, but highly encouraged.

MS 202/202L Individual/Team Military Tactics (2)

Introduction to individual and team aspects of military tactics in small unit operations. Includes use of radio communications, making safety assessments, movement techniques, planning for team safety/security and methods of pre-execution checks. Practical exercises with upper division ROTC students. Learn techniques for training others as an aspect of continued leadership development. Two hours and a required leadership lab, MS 202L, plus required participation in two one-hour sessions for physical fitness. Participation in a weekend exercise is optional, but highly encouraged.

MS 203/203L Continuation of MS 202 (2)

MS 101L, 102L, 103L, 201L, 202L and 203L Leadership Laboratory (0)

Open only to (and required of) students in the associated Military Science course. Series, with different roles for students at different levels in the program. Learn and practice basic skills. Gain insight into Advanced Course in order to make an informed decision whether to apply for it. Build self-confidence and team-building leadership skills that can be applied throughout life.

MS 179L Basic Course Physical Fitness (1)

Only open to students in MS 101, 102, 201 and 202. Optional in MS 101, MS 102 and MS 103; required in MS 201, MS 202 and 203. Series, with different roles for students at different levels in the program. Participate in and learn to lead a physical fitness program. Emphasis on the development of an individual fitness program and the role of exercise and fitness in one is life.

MS 210 Camp Challenge (0)

A six-week summer camp conducted at an Army post. The student receives pay. Travel, lodging and most meal costs are defrayed by the Army. The environment is rigorous, and is similar to Army Basic Training. No military obligation incurred. Open only to students who have not taken all six of MS 101, 102, 103, 201, 202 and 203, and who pass a physical examination (paid for by ROTC). Completion of MS 210 qualifies a student for entry into the Advanced Course. Three different cycles offered during the summer, but spaces are limited by the Army. Candidates can apply for a space any time during the school year prior to the summer. Pass/Fail grade only.

The Advanced Course consists of the courses MS 301, 302, 303, 310, 401, 402 and 403

It is open only to students who have completed the Basic Course or earned placement credit for it (various methods). The Advanced Course is designed to qualify a student for a commission as an officer in the United States Army. Students must complete all courses numbered greater than 300, to include MS 310, a five-week Advanced Camp in the summer, usually between the junior and senior years. The courses must be taken in sequence unless otherwise approved by the Professor of Military Science. Students receive $150 per month during the school year.

MS 301/301L Leading Small Organizations I (2)

Series of practical opportunities to lead small groups, receive personal assessments and encouragement, and lead again in situations of increasing complexity. Uses small unit defensive tactics and opportunities to plan and conduct training for lower division students both to develop such skills and as vehicles for practicing leading. Three hours and a required leadership lab, MS 301L, plus required participation in three one-hour sessions for physical fitness. Participation in one weekend exercise is also required, and one or two more weekend exercises may be offered for optional participation.

MS 302/302L Leading Small Organizations II (2)

Continues methodology of MS 301. Analyze tasks; prepare written or oral guidance for team members to accomplish tasks. Delegate tasks and supervise. Plan for and adapt to the unexpected in organizations under stress. Examine and apply lessons from leadership case studies. Examine importance of ethical decision making in setting a positive climate that enhances team performance. Three hours and a required leadership lab, MS 302L, plus required participation in three one-hour sessions for physical fitness. Participation in one weekend exercise is required; two other weekend exercises optional.

MS 303/303L Continuation of MS 302 (2)

MS 310 ROTC Advanced Camp (0)

A five-week camp conducted at an Army post. Only open to (and required of) students who have completed MS 301 and 302. The student receives pay. Travel, lodging and most meal costs are defrayed by the U.S. Army. The Advanced Camp environment is highly structured and demanding, stressing leadership at small unit levels under varying, challenging conditions. Individual leadership and basic skills performance are evaluated throughout the camp. Although this course is graded on a Pass/Fail basis only, the leadership and skills evaluations at the camp weigh heavily in the subsequent selection process that determines the type commission and job opportunities given to the student upon graduation from ROTC and the university.

MS 401/401L Leadership Challenges and Goal-Setting (2)

Plan, conduct and evaluate activities of the ROTC cadet organization. Articulate goals, put plans into action to attain them. Assess organizational cohesion and develop strategies to improve it. Develop confidence in skills to lead people and manage resources. Learn/apply various Army policies and programs in this effort. Three hours and a required leadership lab, MS 401L, plus required participation in three one-hour sessions for physical fitness. Participation in one weekend exercise is also required, and one or two more weekend exercises may be offered for optional participation.

MS 402/402L Transition to Lieutenant (2)

Continues the methodology from MS 401. Identify and resolve ethical dilemmas. Refine counseling and motivating techniques. Examine aspects of tradition and law as relate to leading as an officer in the Army. Prepare for a future as a successful Army lieutenant. Three hours and a required leadership lab, MS 402L, plus required participation in three one-hour sessions for physical fitness. Participation in one weekend exercise is also required, and one or two more weekend exercises may be offered for optional participation.

MS 403/403L Continuation of MS 402 (2)

MS 301L, 302L, 303L, 401L, 402L and 403L Advanced Course Leadership Laboratories (0)

Open only to students in the associated Military Science course. Series, with different roles for students at different levels in the program. Involves leadership responsibilities for the planning, coordination, execution and evaluation of various training and activities with Basic Course students and for the ROTC program as a whole. Students develop, practice and refine leadership skills by serving and being evaluated in a variety of responsible positions.

MS 179L Advanced Course Physical Fitness (1)

Only offered to (and required of) students in MS 301, 302, 303, 401 402 and 403, of which this program is an integral part. Series, with different roles for students at different levels in the program. Participate in and learn to plan and lead physical fitness programs. Develops the physical fitness required of an officer in the Army. Emphasis on the development of an individual fitness program and the role of exercise and fitness in one is life.

CALPOLY POMONA UNIVERSITY

The CPU designation means that such courses are offered for the entire university community regardless of major or school. Many CPU courses have been specifically designed to meet the requirements of general education or to assist students in career/academic choices. For further information in CPU coursework please contact the Office of Academic Programs, Building 98.

GENERAL EDUCATION COURSES

CPU 201/201A Exercise, Nutrition and Fitness for Modern Society (3/1)

Importance of good nutrition, circulorespiratory and muscular endurance, strength and flexibility for adult health. Role of exercise and nutrition in control/prevention of cardiovascular disease, obesity and stress-related illness. Rationale for and participation in various adult fitness activities. Team-taught. 3 lectures, 2 one-hour activities. Corequisites: CPU 201/201A.

CPU 210/210A Actualized Living (3/1)

Lifelong physiological and socio-psychological aspects of the leisure phenomenon. Experience in assessing student's leisure knowledge and habits coupled with a comprehensive leisure counseling follow through. Includes a one unit component in death and dying. Meets G.E. Category-V-requirement. Team taught. 2 lectures, 1 lecture/discussion, 1 two-hour activity. Corequisites: CPU 210/210A.

EGR 402 Ethics and Engineering Decision-Making (4)

Team-taught. Explores the ethics of engineers: values; ethical theory and practice; moral reasoning; morality in law and codes; professional standards and societies. Case studies. Open to engineering majors, others as space permits. 4 lecture/discussions. Prerequisites: Senior standing, IE 401, and passing score on the GWT.

ACADEMIC/CAREER GUIDANCE COURSES

CPU 100 Career and Personal Exploration (4)

Systematic development of information about (1) self including values, interests, and skills, (2) environment including career clusters, fields and occupational information, (3) decision-making and (4) career search techniques. Includes vocational testing and use of the computer-based System of Interactive Guidance and Information (SIGI PLUS). Materials fee required.

CPU 101 Introduction to the University (1-3)

This course offers first-time freshmen students an orientation to the university. The class concerns instruction in the structure of the university, scheduling classes, career planning and choice of major, use of the library, co-curricular programs, use of the advisory process, study skills, etc.

CPU 102 Fundamental Principles of Learning Skills (3)

Introduction to and practice in college study techniques and learning skills including: listening, notetaking, memory improvement, and time management. Topics discussed among others: class scheduling, career planning, use of the library and advisory centers, and co-curricular programs. 3 lecture/discussions.

CPU 299/299A/299L Special Topics for Lower Division Students (1-4)

Group study of a selected topic, the title to be specified in advance. Total credit limited to eight units, with a maximum of four units per quarter. Prerequisite: Permission of instructor. Instruction is by lecture, laboratory, or a combination. Corequisites may be required.

CPU 499/499A/499L Special Topics for Upper Division Students (1-4)

Group study of a selected topic, the title to be specified in advance. Total credit limited to eight units, with a maximum of four units per quarter. Prerequisite: Permission of instructor. Instruction is by lecture, laboratory, or a combination. Corequisites may be required.

ENVIRONMENTAL HEALTH SPECIALIST MINOR

The minor provides Biological Sciences majors, Agricultural Biology majors, and other majors with courses which prepare students for careers in the California Department of Health Services as Environmental Health Specialists. Increasing awareness of pollution and other health-related environmental problems has led to a demand for specialists to enforce and administer laws governing water, food, and air contamination, noise, land use planning, occupational health hazards, and animal vectors of disease. Many job opportunities exist in California for individuals trained as Environmental Health Specialists according to the California Department of Health Services.

The California Health and Safety Code outlines the standards for admission to the state internship program to become a registered specialist. The minimum educational qualifications are possession of a bachelor's degree from an approved institution with a minimum of 45 quarter units of basic science. The basic science requirement would be met by most students in Biological Sciences and in Agriculture. Students interested in more information may contact Dr. Richard Kaae or Dr. Lester Young (Horticulture/Plant and Soil Sciences Department), or Dr. John Chan (Biological Sciences Department).

Core courses			Units
Basic Biology	BIO	115/115L	5
General Chemistry	CHM	121/121L	4
General Chemistry	CHM	122/122L	4
Elements of Organic Chemistry	CHM	201	3
Fundamentals of Physics	PHY	102	4
College Algebra	MAT	105	4
Elementary Statistics with Applications	STA	120	4
			28

Required of all students:

Public Administration	PLS	314	4
Introduction to Arthropods	AGB	165	4
or			
Introduction to Entomology	ZOO	426/426L	4
Basic Microbiology	MIC	201/201	5
General Epidemiology	MIC	330	4
			17

Select 3 courses from the following:

Applied Microbiology	MIC	310/310L	5
Water Pollution Biology	BIO	420	3
Radiation Biology	BIO	431/431	5

Air Pollution Problems	CHM	460	3
Public Health Entomology	ZOO	435/435	4
			10-14

Select 3 courses from the following:

Pesticide and Hazardous Material Laws	AGB	301	3
Vertebrate Pest Management	AGB	323/323L	4
Produce Market Quality	AGB	325/325L	4
Urban Pest Management	AGB	342/342L	4
			11-12

PHYSIOLOGY MINOR

The Physiology Minor can be taken by students from any department in the University but it is particularly appropriate for students with the following majors: Animal Science (AS), Behavioral Science (BHS), Biology (BIO), Biotechnology (BTC), Chemistry (CHM), Electrical and Computer Engineering (ECE Biomedical Engineering), Foods and Nutrition (FN), Kinesiology and Health Promotion (KHP), Microbiology (MIC), and Zoology (ZOO). It is intended to assist students interested in physiology to discover and prepare for careers in: medicine; dentistry; veterinary science; high school teaching; graduate study in general or comparative physiology, kinesiology, exercise physiology or physiological psychology, and; allied health professions such as human and animal nutrition, exercise and health counseling, biomedical engineering, and domestic animal reproduction. It will do this by exposing students to the diversity of disciplines and careers available to people with an understanding of physiology. It will also provide them with a broad basic background and then permit them to tailor a program of advanced courses to suit their general interests and career goals. The program is administered by a steering committee composed of the following individuals: S. Bassin (KHP), D. Clark (ECE), E. Cogger (AVS), A. Crecelius (FN), N. Harkey (BHS), D. Hoyt (ZOO), P. Mobley (CHM), and D. Stiffler (ZOO). Students interested in more information should contact Dr. Daniel Stiffler.

Requirements

(Prerequisites listed in parentheses)

Assumed entry level skills: High school chemistry and algebra

Core (all courses)			Units

Total Units—Advanced Courses. 20

Total Units—Minor 49-51

QUANTITATIVE RESEARCH MINOR

The Quantitative Research Minor may be taken by students having any major in the University other than Mathematics. rIrt is paticularly appropriate for students having majors in the following areas: Operations Management, Marketing Management, Agricultural Business Management, Animal Science, Behavioral Science, Economics, Political Science, Kinesiology, Biological Sciences, Urban and Regional Planning. The minor is intended to prepare students to perform quantitative analyses within their area of interest by providing the working knowledge required in statistics, principles of experimental design, survey and data analysis techniques. This includes learning to understand and use some of the statistical software packages available on computers. Students are expected to complete a project in their major having a significant quantitative component. The project is jointly directed by the Statistics Coordinator and a faculty advisor selected from the student's own department. Through such experience our graduates become more able and prepared to perform quantitative studies in their chosen field of employment. For more information students may contact any of the following reference sources: Dr. D. S. Gill (Statistics Coordinator), Dr. Melinda Burrill (Animal Science), Dr. John Korey (Political Science), Dr. Nancy Harkey (Behavioral Science), Dr. Ralph Miller (Technology and Operations Management), Dr. Vernon Stauble (Marketing Management), Mr. Charles Loggins (Urban and Regional Planning), Dr. David Moriarty (Biological Sciences), Dr. Stephen Bryant (Biological Sciences), Dr. Anne E. Bresnock (Economics), Dr. Wanda Rainbolt (Kinesiology and Health Promotion) or Dr. Arthur Parker (Agricultural Business Management).

Units. 7-12

Applied Methods (Choose one course from each group)

GROUP I

Marketing Research I	IBM	408	4
Real Estate Market Analysis	FRL	483	4
Survey Research	SOC	433/433A	3/1

GROUP II

Project Design and Development	OM	460	4
Experimental Psychology: Research, Design and Methodology	PSY	433/433L	4/1
Design of Experiments	STA	435	4

Units 8-9

Project

Students will do a quantitative research project in their major field of study. 4

Total Units 27-32

TOTAL QUALITY MANAGEMENT MINOR

The Total Quality Management (TQM) Minor may be taken by students having any major in the University. It is particularly appropriate for students having majors in the following areas: Technology and Operations Management, Industrial and Manufacturing Engineering, Management and Human Resources, International Business and Marketing. The Minor is intended to allow students to gain the knowledge and skills necessary for effective application of quality management techniques in manufacturing, service, and not-for-profit organizations. The Total Quality Management Minor will help for the need for graduates, especially from business and engineering, who are trained in the concepts, techniques, tools and methods of analysis used for the continuous improvement of product, service, and process quality. Computer-based approaches are used wherever they are available and appropriate. For more information, students may contact any of the

following faculty members: Dr. Mostafa El Agizy (Operations Management), Dr. Peggy Snyder (Management and Human Resources), and Professor Phil Rosenkrantz (Industrial and Manufacturing Engineering).

Requirements

Prerequisites (12–26 units)

Completion of one of the following prerequisite options is required. In most instances, the prerequisites listed in an option package are part of the existing curriculum for the student in the indicated academic program area.

OPTION 1: (Business, Engineering Technology, and some Science majors. Also, all majors not included in Options 2 and 3 below)

Elementary Statistics with Applications	STA	120	(4)
Managerial Statistics	TOM	302	(4)
Production and Operations Management I	TOM	301	(4)

OPTION 2: (Engineering, and some Science majors)

Analytic Geometry and Calculus I	MAT	114(	4)
Analytic Geometry and Calculus II	MAT	115	(4)
Analytic Geometry and Calculus 1II	MAT	116	(4)
Calculus of Several Variables I	MAT	214	(3)
Statistical Methods in Engineering and the Physical Sciences	STA	309	(4)
Engineering Probability and Statistics	IME	312	(4)

OPTION 3: (Mathematics majors)

Analytic Geometry and Calculus I	MAT	114	(4)
Analytic Geometry and Calculus II	MAT	115(4)	
Analytic Geometry and Calculus IH	MAT	116	(4)
Calculus of Several Variables I	MAT	214	(3)
Calculus of Several Variables II	MAT	215	(3)
Applied Probability Theory	STA	330	(4)
Applied Statistics	STA	331	(4)

Core Requirements . . . . . (16 units)

(Note: OM majors are required to substitute a course outside their major, with minor advisor approval, for TOM 401.)

Processes and Measurement	IME	280	(4)
Total Quality Management	TOM	401	(4)
Quality Management	TOM	435	(4)
or Quality Control by Statistical Methods	IME	415	(4)
Total Quality Management Implementation	MHR	439	(4)

Directed Elective Courses . . . . . (8 units)

Advanced Managerial Statistics	TOM	380	(4)
Material Requirements Planning	TOM	430	(4)
Production and Inventory Management	TOM	432	(4)
Materials and Inventory Management	TOM	433	(4)
Purchasing Management	TOM	434	(4)
Operations Management in Services	TOM	453	(4)
Just-In-Time Production	TOM	455	(4)
Research Design and Methodology	TOM	460	(4)
First Line Management	MHR	313	(4)
Training and Development	MHR	405	(4)
Advanced Organizational Behavior	MHR	438	(4)
Design of Experiments	IME	435/435L	(3/1)
Fundamentals of Human Factors Engineering/Laboratory	IE	225/225L	(3/1)
Principles of Productivity Engineering	IE	392	(3)
Reliability Concepts and Techniques	IE	419	(3)
Human Engineering in Design/Laboratory	ME	438/448L	(2/1)
Geometric Dimensioning and Tolerancing/Laboratory	MFE	323/323L	(2/1)
Intro to Computer Integrated Manufacturing/Laboratory	MFE	450/450L	(3/1)
Producibility Engineering	MFE	484	(3)
Advanced Human Factors in Engineering Design	EGR	539	(4)
Quality Assurance	ETP	375	(3)
Nondestructive Evaluation I	ETP	437/437L	(1/1)
Nondestructive Evaluation II	ETP	438/438L	(1/1)
Analysis of Variance and Design of Experiments	STA	435	(4)

TOTAL CORE & ELECTIVE UNITS REQUIRED . . . . . (24 units)

ATHLETIC DEPARTMENT

Karen L. Miller, Director of Athletics

Mike Ashman
Dee DeRaleigh
Ron Fremont
Carlos Juarez
Elizabeth Kopp
Ky Kugler
Ann Lebedeff
Thomas O. Marshall
Wendy Nasmyth
Jim Sackett
Glenn Shenker
Paul Thomas
Chris Ward
Rosie Wegrich

The Department of Intercollegiate Athletics offers opportunities for men and women in a wide variety of sports, which include (m) baseball, basketball, cross country, soccer, tennis, track and field and (w) volleyball. The University is a member of the National Collegiate Athletic Association (NCAA), Division II and competes in the California Collegiate Athletic Association (CCAA) conference. These opportunities are open to all qualified students. The University has gained National and International recognition from the performances of its many outstanding athletic teams.

Course Descriptions

KIN 181-195 Competitive Athletics (2)

May be taken by those students who compete on an intercollegiate athletic team and may be repeated for additional credit as long as normal academic progress is maintained.

181 Intercollegiate Basketball (Women)
182 Intercollegiate Baseball
183 Intercollegiate Basketball (Men)
184 Intercollegiate Soccer (Women)
185 Intercollegiate Cross Country (Men)
186 Intercollegiate Soccer (Men)
190 Intercollegiate Tennis (Men)
191 Intercollegiate Track and Field (Men)
192 Intercollegiate Volleyball (Women)
193 Intercollegiate Cross Country (Women)
194 Intercollegiate Tennis (Women)
195 Intercollegiate Track and Field (Women)
