

Submit approved Thesis, Project Report, or Project Abstract to Bronco ScholarWorks by the deadline

All thesis submissions must submit a full report

Your thesis, project report, or project abstract will be included in Cal Poly Pomona's institutional repository Bronco ScholarWorks, which means your work will be more visible and available on the web. Below is a checklist of the steps you will need to take in order to submit your thesis or project to Bronco ScholarWorks.

Submitting a full thesis or project report:

- **Have your committee members sign off on your paper using the Adobe Sign process in addition to having the library reviewers sign off on your paper using Adobe Sign.**
 - There are two Adobe Sign procedures, one to obtain signatures from your committee and one from the library reviewers. These must be completed prior to submitting to Bronco ScholarWorks.
- **Save or Export your document as a PDF.**
 - Please title your file name with the following naming convention: FirstnameLastname_ThesisORProjectYear. (Ex: JohnSmith_Project2023)
- **Submit your Thesis or Project Report to Bronco ScholarWorks using the [Submission Form](#).**
 - Please note: You will upload a copy of your paper that has NOT gone through the Adobe Sign process. Upload your paper to our submission form like it is the first time you are uploading it for signatures. Please view the infographic below for a visual representation.

*****Upload File from your computer to each section. Do Not download the DocuSign version to send to the next step*****

Submitting a Project Abstract:

- **Submit your Project Abstract** to Bronco ScholarWorks using the [Submission Form](#).
 - If submitting a Project Abstract, please attach a copy of your abstract to the submission form.
 - Please note: only students whose committee have approved of submitting only an abstract can do so. This will be verified with the Report of Culminating Experience (RCE). Not submitting properly could delay the signing of the RCE and delay issuance of graduation and degree.

If you have any issues during the electronic submission process, please contact the Bronco ScholarWorks Team at broncoscholar@cpp.edu

Your thesis or project will be made live in Bronco ScholarWorks once we have received notification that your committee members and library reviewers have signed off and Graduate Studies have received these Adobe Sign processes. At this point, you will receive an email confirming your submission is live. Please note that submitting to Bronco ScholarWorks accounts for partial completion of your graduation requirements and being made live in Bronco ScholarWorks does not mean you have been awarded your degree. In order to meet all the requirements please review your graduation checklist. If you would like to file a copyright registration, information is available from the [U.S. Copyright Office](#). More information about copyright, publishing, and author rights can be found through the [Creative Commons](#) organization.
