H. David Caffey, Associate Dean

The College of Letters, Arts, and Social Sciences advances knowledge and learning in established academic disciplines in the humanities, social sciences, and performing arts. It provides introductory and advanced course work in more than 20 degree and certificate programs.

The College also provides courses that substantially make up the General Education curriculum required of all students. These courses provide a foundation of knowledge of the cultural, social, political, ethical, and economic worlds. The College provides curricular support of the University's considerable teacher-education function. In all its programs, the College of Letters, Arts, and Social Sciences serves the goals of the University to provide for the intellectual, personal, and professional development of each person and for the enrichment of the communities it serves outside the University. In pursuit of these objectives, Bachelor's degree programs and minors are offered in the performing arts, humanities, behavioral and social sciences, and kinesiology. Master's degrees are offered in economics, English, history, psychology, public administration, and kinesiology. Through its curriculum, research activities, arts performances, and other humane activity, the College of Letters, Arts, and Social Sciences promotes activity integral to processes of inquiry, creativity, learning, and teaching.

In accord with the mission of a comprehensive polytechnic university "preparing students for life, leadership, and careers in a changing, multicultural world," the College of Letters, Arts, and Social Sciences seeks to equip students with lifelong learning skills enabling them more effectively to challenge problems of extraordinary social, technical, and human complexity. These skills include creative and critical thinking, methods of both quantitative and qualitative inquiry, the application of theory to practice, learning through performance-based activities in the humanities, arts and social sciences, and the integration of mind and body in health and wellness activity. In furthering its mission of promoting learning and teaching as broad-based, ongoing, and shared processes, the College of Letters, Arts, and Social Sciences supports initiatives that further the professional development of faculty and staff, that engage students and faculty in active collaboration in the pursuit and dissemination of knowledge, and that integrate the arts, sciences, and technologies. The College thus advances collegiality not only among the various segments of the University, but also with the local and global communities it serves. It promotes access of underrepresented student populations to its programs, resources, and services.

The College of Letters, Arts, and Social Sciences offers 11 Bachelor of Arts degrees, 6 Bachelor of Science degrees, 21 minors, 3 Certificates of Proficiency, 3 Master of Science degrees, two Master of Arts degrees, and a Master of Public Administration. With other colleges in the University, the College of Letters, Arts, and Social Sciences participates in continuing education in support of the concept of lifelong learning. ## ANTHROPOLOGY

<<http://www.class.csupomona.edu/ga>>

One of the three majors offered in the Department of Geography and Anthropology is Anthropology. For other programs in the department see Geography, and Social Sciences.

Richard S. Hyslop, Chair, Geography and Anthropology Department  
Harold F. Turnbull, Anthropology Coordinator

Dorothy D. Wills

Anthropology is the scientific study of the peoples of the world, past and present, in the broadest possible sense: their total cultural and biological heritage. The goal of anthropology is a complete understanding of the human species, from its origins several million years ago to the present, including all of its current cultural and biological diversity. Students majoring in Anthropology in the department of Geography and Anthropology enroll in one of three options: General Anthropology, Cultural Resource Management, or Computer-Based Anthropology. Through a common integrated core of courses selected from all four of the major anthropological subfields (Sociocultural Anthropology, Biological Anthropology, Archaeology, and Linguistics), each of the three options provides students with a broad-based understanding of the diverse subject matter of anthropology. Each option then diverges to provide additional training aimed toward better serving the individual needs of students with different specialty interests and career goals.

### General Anthropology

The General Anthropology Option adds advanced coursework in each of the major subfields to the common core, providing students with a traditionally broad and generalized "four-field" anthropology degree. This option is particularly suitable for students intending to go on to graduate studies in anthropology or a related field at an institution which prefers or requires broad-based undergraduate training in anthropology, or for students who intend to pursue a career in social, governmental, or international service, primary or secondary education, or law.

### Cultural Resource Management

Cultural Resource Management (CRM), an applied approach to anthropology, involves the identification, evaluation, and preservation of various kinds of cultural resources, as mandated by both Federal and State legislation and by scientific standards pertaining to the civil planning process. The main objective of the CRM Option is to produce professionals who are competent in the methods and techniques appropriate for filling positions in cultural resource management and related fields, and to provide the theoretical background required for designing research projects and collecting and analyzing resultant data.

The CRM Option provides its graduates with the training and experience necessary to (1) conduct analysis of sociocultural, ethnohistoric, and archaeological data to assist the public and private sectors in implementing environmental protection and historic preservation legislation; (2) assess the scientific importance of ethnohistoric and archaeological resources; (3) be familiar with existing cultural resource data-keeping facilities; and (4) be competent in appropriate anthropological techniques of field and laboratory analysis, as well as procedures employed in archival and museum collections preparation.

### Computer-Based Anthropology

The Computer-Based Anthropology Option (CBA) is designed to take advantage of the fact that computers are now used extensively in all of anthropology's major subfields, for tasks ranging from initial data collection in the field, to on-line resource searching, statistical analysis, population modeling, or the development of elaborate cultural, archaeological, or linguistic databases serving a variety of purposes. In addition, the internet is rapidly proving an invaluable research tool, both with respect to information access and to the anthropological investigation of the internet as a kind of "culture" in and of itself. The CBA Option offers the breadth of the General Anthropology Option with a focus on computer approaches to "doing anthropology." It is particularly suitable for students who wish to develop expertise with computers in addition to receiving broad-based anthropological training, or who plan to attend graduate school at an institution that expects computer proficiency. It is also particularly suitable for students intending to seek employment in one of the numerous occupations where computer proficiency as well as anthropological training is appropriate.

Training in anthropology provides a unique understanding of human beings and human issues that is highly appropriate for many different kinds of careers. Employment opportunities open to anthropologists are almost as diverse as the subject matter of the discipline itself. Recent graduates with bachelor's degrees in anthropology have taken positions in areas as varied as advertising, journalism, radio and television, public relations, purchasing, sales, travel and tourism, government service, business management, personnel service, police work, military intelligence, science writing, community and international development, and marketing. With additional training beyond the bachelor's degree, anthropologists are qualified for and find employment in various health-assistance or legal-assistance occupations, primary or secondary teaching, and medical or dental technology.

Anthropologists who continue their education through graduate school, and receive a master's degree or doctorate in anthropology or a related field at another institution, qualify for professional careers in such areas as higher education, public administration, counseling, environmental health, public health, library science, museum science, city management, city planning, government service, business administration, international business, or social or environmental research. Some anthropology graduates move on to law school or medical or veterinary school, and pursue a career in one of these areas. Due to the broad-based training that a degree in anthropology provides, anthropology graduates typically find their degree to be an ideal launching platform for career opportunities in innumerable occupational areas.

The department offers courses leading to the degree of Bachelor of Arts in the Behavioral Sciences. The curriculum for this degree is primarily composed of courses in psychology and sociology.

Instruction in the major is intended to provide a background for understanding human behavior, in both individual and collective aspects, as well as from multicultural perspectives. The interdisciplinary orientation and offerings allow students to select a major curriculum in concert with faculty advisors which best supports their aspirations for post-college employment or advanced education. A minimum number of required courses has been established, in order that a high degree of flexibility can be achieved in personal curriculum planning, with approved electives selected through consultation with faculty advisors. The introductory courses in psychology and sociology are prerequisite to most of the upper division offerings.

Behavioral Science majors may minor in Criminal Justice and Corrections or in any minor degree program offered by another department.

Students majoring in psychology or behavioral science who have a GPA of at least 3.0 overall have the opportunity to join Psi Chi, the National Honor Society in Psychology. Students majoring in sociology or behavioral science who have a GPA of at least 3.0 overall have the opportunity to join Alpha Kappa Delta (AKD), the National Honor Society in Sociology. For additional information contact the department office.

### CRIMINAL JUSTICE AND CORRECTIONS MINOR

The Criminal Justice and Corrections minor (also a certificate program) is a multidisciplinary grouping of courses which have been specifically selected to fulfill the needs of students presently working in or planning for careers in law enforcement or corrections. Special advisement for students in any major who are interested in criminal justice or corrections may be obtained from the department's Criminal Justice coordinator. Detailed information is available from the department office.

Since Behavioral Science is an interdisciplinary major drawn from Psychology and Sociology, students may not double major in Behavioral Science and either of these other two majors.

### PRAXIS PREPARATION

The Behavioral Science major does not enable a student to enter directly into teacher training. First, students must prove competence in a public school teaching area. In order to receive a valid secondary teaching

credential in California Public Schools one has to have majored in a teachable subject, e.g., math, science, history, etc. They also may qualify by taking a national examination, called the Praxis, which proves their subject matter proficiency.

The Behavioral Science major offers sufficient elective units which enable the student to prepare for a subject matter Praxis. The majority of students in this major find the Social Sciences the area most compatible with their major subject.

The graduate who has successfully passed the Praxis exam can then enter training toward the California State Secondary Credential to teach in the eighth through the twelfth grades.

### QUANTITATIVE RESEARCH MINOR

An increasingly complex society needs individuals to inform, interpret, and explain to the public the problems of that society. The communication major prepares students to fill positions in the mass media, business, government, and education.

Students select one of three options to complete the major—Journalism, Public Relations, and Communication Studies.

The Communication Studies Option should be chosen by students who wish to emphasize interpersonal and intercultural communication in preparation for careers in business/industry or in preparation for graduate or professional school.

The Journalism Option is designed for students planning careers in editorial and supervisory assignments with newspapers, magazines, industrial publications, and broadcast media.

The Public Relations Option should be chosen by students planning careers in public relations, advertising, and human resource management which require skills and knowledge in the use of written, oral, visual, and multimedia communication.

The Department offers minors in Journalism, Public Relations, and Communication Studies.

The Communication Department sponsors the weekly student newspaper, *The Poly Post*, the on-line *Digital Post*, and the Department magazine, *Impressions*. The Department also supports an annual special event, Com Day, which is a professional conference organized and produced by students.

The department serves students of all colleges and schools and develops vocational proficiencies to meet the needs of the undergraduate economics majors. A curriculum leading to the master of science degree in economics is also offered in the department. Requirements for this degree may be found in the graduate listings.

The curriculum in economics, while offering a broad background of general education and traditional undergraduate courses, lends itself to considerable flexibility. Students consult with a faculty advisor to select courses suitable for a program relevant to personal goals. Seven possible areas of concentration in economics are: international, environmental and resource, quantitative, economic history, urban, business and government, and economics and finance.

The undergraduate major in economics has three objectives: first, to prepare economic analysts for positions in business, industry, agriculture, and government; second, to prepare students for research or management trainee positions in fields such as public administration, labor unions, industry, finance, and insurance; third, to furnish undergraduate preparation for students who may wish to pursue graduate work in the field of economics.

The minor in economics serves other departments of the university by providing their students with a well-defined and generally recognized set of courses. For many majors the minor will enhance their employability upon graduation. It will also provide a structure for those seeking basic understanding of economic theory and its application. For others it will facilitate their graduate work.

### Quantitative Research Minor

The Quantitative Research Minor is an interdisciplinary program which can be taken by students majoring in any field other than Mathematics. Its purpose is to prepare students to conduct quantitative analysis in their chosen discipline. Students acquire practical experience using statistics, principles of experimental design, survey and data analysis techniques. This minor is particularly suited for students majoring in Economics. A full description of this minor is included in the "University Programs" section of this catalog.

The program in English and Foreign Languages encourages students not only to improve verbal skills, but also to develop a fuller understanding of themselves and their culture. The program offers courses leading to the Bachelor of Arts in English. Within this major, two emphasis areas are offered.

The first, Literature and Language, offers intensive study in the language and literature of both Britain and the United States. Graduates are prepared to enter advanced-degree work in English, American Studies, or related areas. Additional opportunities exist in law, business

management, journalism, and other fields welcoming those with a liberal education and communication skills.

The curriculum for the Literature and Language emphasis is patterned as follows: in the freshman year courses in composition and in the methods of reading literature; in the sophomore year a broad survey of English and American literature and world literature; in the junior year a study of linguistics and the principal genres; and in the senior year relatively intensive work in individual authors or small groups of authors.

The second emphasis, English Education, also offers intensive study of language and literature with a choice of three tracks: Literature, Communication Studies, or Theatre Arts. In each case, students are given thorough preparation for entrance into a secondary credential program in English.

In addition, the department lists elementary and intermediate sequences in French, German, and Spanish language and culture, and elementary sequences in Latin and Mandarin Chinese language and culture. Courses in English composition and literature serve the general university community. These include study in English as a second language and in the literature-language aspects of African-American, Latino, and Native American Studies.

In addition to the major in Spanish, a minor in Spanish language and culture is intended to prepare students to communicate in Spanish, to appreciate more fully the cultural heritage of the Southwest, and to communicate more effectively with increasing Hispanic populations. Employment possibilities in students' major fields will be appropriately enhanced. This minor is open to all majors, including English.

The graduate program in English is listed separately.

The Rho Xi Chapter of Sigma Tau Delta, the national English honor society, is open to upper division English majors if they have completed two or more English courses beyond freshman composition with a 3.0 average and if they rank in the upper one-third of their class overall.

Graduate students in English are admitted if they have completed 12 or more units of graduate English with a 3.5 or better GPA. For additional information, contact Dr. Anne Simpson, Professor in the Department of English and Foreign Languages.

A 2.0 cumulative GPA is required in core courses, including emphasis courses, in order to receive a degree in the major.

**SPANISH MAJOR**

The major provides a broad curricular base that encourages students to develop and enhance their communicative skills--both oral and written--in Spanish, the fourth most widely spoken language in the world and the second in the Southwest. By gaining insight into and appreciation of the cultures of the Spanish-speaking world, students will develop a fuller understanding of themselves and their own culture.

The Bachelor of Arts in Spanish prepares students to enter a wide variety of careers. The State of California's recent foreign language requirements for high school graduation and for admission into the CSU will increase the demand for teachers of Spanish in the public schools. The major will prepare students to enter teacher-preparation programs as well as advanced-degree graduate programs. In addition, the Spanish major would benefit careers in international business, management, the media, law enforcement, tourism, publishing, interpreting, translation, public relations, advertising, and social sciences. The federal government seeks out Spanish-speaking graduates for employment in civil service and diplomatic areas.

**Preparation for the major:**

One year of elementary college-level Spanish (SPN 151, 152 and 153) or the equivalent (two years of high school Spanish, etc.) is required for admission into the major. In addition, all majors must pass a written and oral proficiency test upon entrance to the program and another at the beginning of the junior year.

## GEOGRAPHY

<<http://www.class.csupomona.edu/ga>>

One of the three majors offered in the Department of Geography and Anthropology is Geography. For other programs in the department see Anthropology, and Social Sciences.

Richard S. Hyslop, Chair, Geography and Anthropology  
Lin Wu, Geography Coordinator

Sara A. Garver  
Michael Reibel  
Terence Young

The Geography degree program, which is housed in the Department of Geography and Anthropology, is designed to provide an understanding of humankind's cultural and physical environments by examining the dynamic systems (both natural and human) through which these diverse settings are changed or sustained. Students majoring or minoring in Geography analyze social and environmental change as they affect local areas and regions and compare solutions which have been attempted in various parts of the world. Attention is given to the relationships between population use of resources and environmental and social impacts in rural and urban settings.

Majors may choose any of three options: the traditional Geography Option, which blends physical, cultural and regional geography courses with field work; the Environmental Geography Option, which equips graduates for careers as environmental analysts, managers and policy makers, and the Geographic Information Systems (GIS) Option, which prepares students for careers in the rapidly expanding field of spatial data systems for land use management, local government and environmental protection. The GIS option emphasizes technical skills such as air photo interpretation, computer cartography and geographic information systems (GIS) software and techniques. Students completing this program receive a Bachelor of Science Degree.

Training in this major provides a broad and suitable background for careers requiring an understanding of peoples, groups, and their cultural and regional institutions. Careers specifically related to this program include government employment in various capacities, secondary school teaching, and positions in international or multicultural capacities in business and management. Preparation for graduate training in this discipline is also offered to majors.

The History Department offers a major in history leading to the bachelor of arts degree as well as basic courses in general education. The History Department also offers a minor in history and a minor in Latin American Studies. Courses are designed to encourage students to seek out relationships between the past and contemporary social, political, and cultural issues, and to provide historical perspective on materials studied in other departments of the university.

Students have a choice of two tracks in the major. The first track offers a flexible curriculum for students wanting a history major with a maximum choice of general education courses and electives. It provides a foundation for those seeking pre-professional training in law, business, civil service, and graduate work leading to a master's degree or doctorate.

The second track is especially suited for students wishing to teach history in middle or high schools. Approved by the California State Commission on Teacher Credentialing, it provides a major in history combined with a pre-credential social science emphasis. Completion of this track successfully meets the state subject matter requirement for the Single Subject Teaching Credential in social science. Students may also meet this requirement by passing an examination adopted by the Commission on Teacher Credentialing.

Please note that subject matter preparation programs for credentialing prospective teachers should not be confused with undergraduate degree programs of colleges and universities. The Commission on Teacher Credentialing sets standards for academic programs that lead to the issuance of credentials. Although an applicant for a teaching credential must have earned a baccalaureate or higher degree from an accredited institution, the degree program does not necessarily fulfill the Commission's standards for the subject matter preparation of teachers. Completing a subject matter program that satisfies the standards enables a candidate to qualify for a fifth-year credential program. Only Track Two satisfies the standards. It specifies in detail the courses which have been approved by the Commission on Teacher Credentialing. Track One is designed for students who have career goals other than teaching at the high school level.

Students qualifying for Single Subject Credentials in other fields (i.e., English, Mathematics, etc.) may obtain a supplemental authorization to teach history or social studies up to the ninth grade by completing the requirements which have been established for such additional authorizations. For further information, see Professor Judith Anderson in the History Department.

The department also offers a curriculum which leads to a Master of Arts degree in History. A description of this program can be found in the "Graduate Studies" section of the catalog.

Students majoring in history have the opportunity of joining the Cal Poly Pomona History Club and the local chapter of Phi Alpha Theta, the International Honor Society in History.

For additional information, please see the Department Chair.

**HISTORY MINOR**

For those who prefer to major in another field, the Minor in History carries some of the advantages of the History Major, yet can often be

accommodated without requiring any additional time at the University. A History Minor, which appears on both the transcript and diploma, is tangible evidence of systematic study of mankind's past, exposure to a wide array of related human activities, and the ability to analyze and communicate the nature of complex phenomena. For prospective employers, it often means a candidate of broader perspectives, greater cultural depth, and superior communication skills. These attainments are an important advantage in virtually all fields of endeavor available to university graduates.

Required of all students:

- History of World Civilization: Ancient Period . . . . . HST 101 (4)
- History of World Civilization: Middle Period . . . . . HST 102 (4)
- History of World Civilization: Modern Period . . . . . HST 103 (4)
- Total units . . . . . (12)

Twenty additional units in History will be selected in consultation with a History Department faculty advisor. Consideration will be given to student interests and vocational goals. Suggested groups of courses include specific world regions (ex. American history, European history, non-Western history), as well as special topics (ex. minorities in American history; modern world history; history of science, technology, and environment; etc.). The minor must include at least 12 upper division units. . . . . (20)

The department offers an undergraduate curriculum divided into two options, pedagogy and sports medicine, which are designed to meet a variety of student needs and interests. Within each option there are three different tracks from which students may choose, depending on their career goals and interests.

The tracks in the pedagogy option include secondary, elementary, and adapted physical education. In addition to obtaining the bachelor's degree, most students who elect the pedagogy option will obtain a California teaching credential which will qualify them to teach physical education in the state's public and private schools at either the elementary or secondary level. Those who elect the adapted physical education track will become qualified to obtain the adapted physical education specialist credential. The department also provides selected coursework which qualifies students with a major other than kinesiology to earn a physical education teaching credential (a supplementary authorization). Students may prepare themselves to coach athletic teams by selecting appropriate courses.

The tracks in the sports medicine option are exercise science and allied health and health promotion. The exercise science and allied health track prepares students for advanced degree programs in exercise science or for entrance to professional schools in such areas as physical therapy, physician's assistant, chiropractic, or medicine. The health promotion track is designed for those students interested in planning, conducting, and managing various health promotion activities and programs in a variety of settings such as public and private clubs, corporate programs, health agencies and medical facilities.

In addition to serving its own majors, the department's curriculum provides required and elective courses in kinesiology and health to meet the educational needs of students throughout the University.

The department also offers a curriculum which leads to a Master of Science degree in Kinesiology. A description of this program can be found in the "Graduate Studies" section of the catalog.

### PHYSIOLOGY MINOR

The physiology minor is an interdisciplinary program which can be elected by students majoring in any field. The Philosophy Department has organized its programs to connect the traditional concerns of philosophy with the directions and needs of contemporary society. Philosophy instruction enhances students' knowledge of significant intellectual movements and figures, strengthens students' critical thinking skills, and provides students with a strong background in the humanities and traditional liberal arts. The Department offers both major and minor programs. Emphases within the major are designed to promote interdisciplinary inquiry and to integrate philosophical study with practical endeavors.

The Law and Society Emphasis allows students to concentrate on courses exploring current social and ethical issues. The study of moral and political philosophy, especially, equips students with the tools needed to analyze legal or moral concepts and arguments, and to work toward reasonable solutions to societal problems. This emphasis offers excellent preparation for those planning careers in law, business, education, urban planning, and human services, or those planning graduate work in philosophy.

The Science and Society Emphasis is designed for those who seek to understand the methodological, historical, and philosophical background of contemporary science and technology. This emphasis is especially useful for those planning further study in the physical, cognitive, behavioral, or biological sciences, environmental studies, medicine, biotechnology, computer science, veterinary science, or philosophy.

The Educational and Society Emphasis is designed for students who are planning careers in education, especially at the elementary level. The emphasis includes coursework in critical thinking and ethics, and covers major intellectual debates in the humanities and social and natural sciences. The emphasis constitutes a baccalaureate waiver program that prepares students for entry into a multiple subjects teaching credential program. Admission to such programs is by separate application. Students who plan to seek a multiple subjects teaching credential must have their area competency assessed by the Philosophy Department. Please check with the department office to find out how to complete the assessment process.

The Philosophy Department also offers minors in Philosophy and Religious Studies. The Philosophy minor enables students majoring in other disciplines to gain critical depth into the differing perspectives, assumptions, and values behind their primary discipline. The flexibility of the minor makes it adaptable to a variety of specific vocational and professional interests.

The Religious Studies minor serves students interested in deepening their awareness of the historical and multicultural dimensions of religious traditions as these affect the contemporary world.

The political science program is designed to provide students with the opportunity to acquire the kind of broad and rigorous education needed for life now and in the 21st century. The best career and life preparation is one which produces individuals who are both educated in the finest traditions of learning and equipped to adapt to constant and rapid change.

The department offers courses leading to the degree of Bachelor of Arts in Political Science. Within this major, two options are offered. The first, a general option in political science, offers a selection of coursework spanning the subfields of the discipline. The second, in public administration, also provides broad coverage of the discipline of political science, but devotes special attention to developing the competencies needed by managers in the public sector. Both options provide a large number of units of free electives in order to ensure flexibility and permit students to tailor their curricula to individual interests, needs, and career goals. For students in majors other than political science, the department offers minors in political science and in public administration.

Students majoring in political science who have at GPA of at least 3.0 overall and 3.3 in the major have the opportunity to join Pi Sigma Alpha, the national honorary society in political science. Additional information can be obtained from the Department of Political Science.

Psychology is an academic discipline which attempts to enable its students to better understand human behavior. The Psychology degree program, which is housed in the Department of Behavioral Sciences, is designed to provide a comprehensive undergraduate education in this field, leading to the Bachelor of Arts degree. The student will receive a broad exposure to developmental, social, cognitive, clinical and physiological areas of Psychology, as well as specific training in research methodology and statistics. Original student research is also fostered and encouraged during the undergraduate experience. The program is intended primarily as an excellent foundation for entrance to graduate school in any area of psychology, but also provides a good background in the science of human behavior for students seeking careers in management in public and private sectors, or seeking an undergraduate major in this area for a variety of other reasons.

For this major, the high school student should have a broad background in the natural and social sciences, English and mathematics.

The department offers a Master of Science degree in psychology designed to prepare students for licensure in the field of Marriage and Family Therapy (MFT). Requirements for this program are found in the "Graduate Studies" section of this catalog.

Since Behavioral Science is an interdisciplinary major drawn from Psychology and Sociology, students may not double major in Psychology and Behavioral Science.

Students majoring in psychology or behavioral sciences who have a GPA of at least 3.0 overall have the opportunity to join Psi Chi, the National Honor Society in Psychology. For additional information contact the department office.

## SOCIAL SCIENCES

<<http://www.class.csupomona.edu/ga>>

One of the three majors offered in the department of Geography and Anthropology is Social Sciences. For other programs in the department see Anthropology and Geography.

Richard S. Hyslop, Chair, Department of Geography and Anthropology

Mark Allen	Harold F. Turnbull
Sara A. Garver	Dorothy D. Wills
David G. Lord	Lin Wu
Michael Reibel	Terence Young

The social sciences examine all aspects of human existence, from human origins to the latest election returns. In keeping with that tradition, the Department of Geography and Anthropology offers a flexible program leading to a Bachelor of Science degree in social sciences with opportunities for majors to concentrate in one or more of the social science disciplines: anthropology, economics, geography, history, political science, psychology, and sociology. It also provides future teachers with a pre-credential waiver track.

The department curriculum, multidisciplinary in nature, is especially suitable for students with broad and varied interests who understand that a liberal education is often the best background for many types of careers. An important departmental goal for each student, therefore, is to encourage the development of his or her personal and career objectives while maintaining the breadth of understanding and flexibility necessary to succeed in any of a variety of professions -- from government service, to business, industry, teaching, or international development.

Many graduates with a degree in Social Sciences continue on to graduate school in programs such as anthropology, sociology, psychology, economics, geography, history, law, political science or education. In some instances, postgraduate work is pursued after a few years of employment in an occupational field related to one of these specialized areas. Many students choose the Social Sciences major and then, after graduation, proceed to get a teaching credential. A recent trend noted by the U.S. Department of Labor is that private industry is hiring an increasing number of social science majors as trainees for administrative and executive positions. Research councils and other nonprofit organizations also provide a source of employment for social scientists. Teaching in colleges and universities and in the high schools is projected to remain the major area of employment for social scientists with advanced degrees or credentials.

Because of the interdisciplinary nature of the Department of Geography and Anthropology, students may in some cases select both a major and a minor from within the department. For example, a student may major in Social Sciences and minor in Anthropology. Details on other possible combinations are available from the department office.

## SOCIOLOGY

One of the three majors offered in the Behavioral Sciences Department is Sociology. For other programs in this Department, see Behavioral Science and Psychology.

Gary A. Cretser, Chair

Wayne C. Brown	Fernando Parra

Ruth-Ellen M. Grimes	Valentine M. Villa
Dennis D. Loo	Wayne S. Wooden

The Sociology major, which is housed in the Department of Behavioral Sciences, is designed to provide a substantial foundation in theoretical, methodological, and content areas of sociology, leading to the Bachelor of Arts degree. In addition to a solid introduction to these content areas, students receive specific training in survey research and statistical analysis, and in the many practical applications of sociological theory. The Sociology major has three options: Criminology, Social Work, and General Sociology. The major is an excellent preparation for graduate study in Sociology, or Public Administration, and for professional studies in law, social work, or criminology. It also provides a very good background for entry level positions in management, in both public and private sectors.

For this major, the high school student should have a broad background in college preparation courses in natural and social sciences, English, and mathematics.

The department also offers minors in Psychology, Sociology, and Criminal Justice and Corrections. The Psychology and Sociology minors are not open to students with a major in Behavioral Science, but the Criminal Justice and Corrections minor may be taken by students in any of our majors, except students in the Criminology option. This program is a multidisciplinary grouping of courses which have been specifically selected to fulfill the needs of students presently working in or planning for careers in law enforcement or corrections. Courses required in the minor and certificate program are listed under the Behavioral Science major. Special advisement for students in any major who are interested in Criminal Justice or Corrections may be obtained from the department's Criminal Justice coordinator. Detailed information is available from the department office.

Since Behavioral Science is an interdisciplinary major drawn from Psychology and Sociology, students may not double major in Sociology and Behavioral Sciences.

Sociology majors are invited to participate in a chapter of Alpha Kappa Delta, the National Honor Society in Sociology.

The Cal Poly Pomona Department of Theatre awards an undergraduate degree in theatre, which emphasizes production, and experience in the "doing" of theatre. At the same time, the Department offers courses in all aspects of the theatre, both artistic and academic. The program stresses concern for students as artists and individuals. Faculty, staff and students work closely together to build a solid foundation of knowledge of both the practical and artistic aspects of theatre for the student.

Four options are offered. The first, the general option enables students to develop a broad theatre curriculum with primary interests in: directing, playwriting, management, or theory and criticism in order to create a course of study that best suits their goals. The second, the acting option, is for the student whose primary interest is in acting for the stage. The third, the design and technical theatre option, is for students with an interest in the theatrical design areas of: scenery, lighting, costumes, makeup or sound; or in the technical areas such as scenic or costume construction, production management, or technical direction. The fourth option is dance for students interested in a general background in theatre with a specific performance interest in dance.

The Department presents a wide variety of productions to give the student a broad spectrum of experiences. Main stage productions range from dramas to musicals, from realism to varied theatrical styles, from premieres of new plays to presentations of classics by Shakespeare, Shaw, Moliere and Tennessee Williams. Students participate on main stage not only as actors and dancers, but also as designers and participants in all the many technical aspects.

In addition to the main stage season, the Department of Theatre also offers an opportunity for experimentation in a program of workshops and projects presented in the smaller "black box" theater, where student involvement is strongly encouraged and supported. All productions draw audiences from the university and the community, and contribute greatly to their cultural climates.

In the classroom, students receive intensive training in acting (a series of at least nine acting courses are offered), voice, directing, stagecraft, makeup, stage lighting, costume and scenic design, playwriting, and theater management.

Coursework also includes theatre history and criticism, dramatic structure and dramatic literature, to provide intellectual and academic skills, which work hand-in-hand with artistic skills.

After completing the theatre major at Cal Poly Pomona, students are prepared for advanced training in graduate schools; to go into teaching in high schools; or to begin their careers or specialized training in professional theatre, television or film.

The theatre minor is designed to acquaint a person interested in pursuing theatre on a limited scale with the basic tools for mounting a production, whether in a school or a community theatre situation. It also accommodates those who wish to begin a specialization in the acting-directing or the technical track. The program is one of both classroom participation and practical experience in the production program. Special advisement for students who are interested in theatre may be obtained from the department chair. Detailed information is available from the departmental office.

The Institute's vision is to reflect a culturally diverse and artistically inclusive student-centered approach to the dance experience at Cal Poly Pomona. "New Dance and Cultures" refers to a humanistic, cross-cultural, interdisciplinary approach to the study of the way art functions in society on a personal, local, national, and global level. "Dance" is defined to include human movement and aesthetic expression, movement based interdisciplinary work, and western and non-western cultural forms.

The Institute supports a variety of campus/community projects, invites innovative collaborations across groups and disciplines, and promotes the development of community engagement projects that reflect the diverse and dynamic cultural climate.

The mission of the Institute is to continue to provide quality dance courses and experiences for the general student population, with an emphasis on common humanistic threads of art and expression found across cultures. By addressing the complexity of contemporary multicultural society through the examination of cultural issues, global perspectives, and personal histories, the Institute is committed to developing student-centered study. The Institute of New Dance and Cultures validates the cultural experience and world view of a broad cross-section of perspectives.

Student choreography and performance are showcased in the student/faculty dance concert. Other opportunities for informal works occur year-round in the Institute's studio and campus wide. Internships, independent study, cross-listed course proposals, community-based projects, and outreach, are some of the ways in which students can explore a variety of learning experiences not traditionally available.
