Co-Project Director

Name: Lisa M. Rotunni
Title: Executive Director
Department: Institutional Research & Academic Resources

Co-Project Director

Name: Kathleen A. Street
Title: Associate Vice President
Department: Enrollment Services

Project Description

Development of a data dashboard to inform campus decision making related to student success goals and the efforts to reduce the achievement gap for underrepresented minority students.

Collaboration across the divisions of Academic Affairs, Instructional & Information Technology and Student Affairs, in consultation with the Graduation Initiative committee, achieved the objectives of providing a flexible drill-down data presentation for targeted student populations with a focus on measuring current and predicting future academic success and balancing the need for detailed analysis and easy access to overview information.

The project is sustainable, building now on in-house experience with the dashboard tools, expanded data structures with historical data and calculated elements, and standardized data definitions and selection criteria.
