TITLE OF REFERRAL: STA 1205- Statistics with Applications with Support (GE Sub-area B4)

BACKGROUND:

The Mathematics and Statistics Department wishes to create a new course, STA 1205— Statistics with Applications with Support. This course is equivalent to the STA 1200 course, but the prerequisites and targeted population are different (the course is for students identified via multiple measures as needing additional support).

RESOURCES CONSULTED:

N/A

DISCUSSION:

This is the addition of a course that is equivalent to a course that is already in the curriculum (and is an approved Area B4 course) but is designed for students that require extra support. The differences are significant enough to merit a new course but the course outline and learning outcomes still align with the Area B4 requirements.

RECOMMENDATION:

The GE Committee unanimously recommends approval of GE-005-212 STA 1205- Statistics with Applications with Support (GE Sub-area B4)
