MAT 325 Assignment 0

This is an email assignment. Please send an email to arrosin@gmail.com from an email address that you check frequently and at which you wish to receive class related emails. The subject line of the email must be exactly 325 intro. In the email you must

1. Attach a recent photo to help me learn everyone’s names. If you have a cat and wish to include the cat in the photo with you, I applaud this decision.

2. Answer the following questions:
   (a) What is your name? If you have a nickname or something you prefer to be called, also let me know this.
   (b) What is your major? If it is mathematics, are you pure or applied/stats?
   (c) Two interesting things about you. While you don’t need to write a paragraph here (but please feel free to!) please give some detail. (Basically I’m just trying to get a better sense of you all as people. As long as it’s not wildly inappropriate, anything is fine.) Your answer must be at least three sentences long. Please refrain from telling me you’re not interesting; I won’t believe you anyway. (If you’re having a really tough time thinking of things, consider hobbies, an interesting vacation, books you really care about, plans for after graduation, etc. Again, I don’t actually care if what you say is interesting; I am just trying to get to know you guys.)
   (d) (optional) Do you have any questions for me?

3. Please read the syllabus. To verify that you have read the homework rules, please list two requirements for your homework here. (You do not have to list them word for word, just show that you know what two of them are.)

4. Let me know whether you have taken MAT 310 (or an equivalent proofs course).
