Grading

Exams 66%
  Midterm (Monday, May 2) 33%
  Final (Monday, June 6, 1:40–3:40 p.m.) 33%
Homework (approximately 6) and Quizzes 34%

A student’s weighted average percentage is \( \left( \sum w_i \left( \frac{s_i}{m_i} \right) \right) / \left( \sum w_i \right) \), where \( w_i, s_i, m_i \) are the weight, student’s score and maximum score on graded assignment \( i \). Course grades are assigned according to this curve, with the median student usually earning a C+ grade. Graded assignments will be accepted without penalty at any time on or before their due date. Graded assignments that are submitted after their due date will have their score reduced by \( 10(n+1)\% \), where \( n \) is the number of school days properly between the due date and the date submitted.
Unless otherwise specified, graded assignments must be submitted on paper, either printed or legibly handwritten. I will accept assignments (other than exams and quizzes) by e-mail as a submission of record, but must subsequently receive an identical paper submission. If I do not receive a paper submission before I commence grading and must print your e-mail submission, or I receive a modified paper submission, the late penalty will apply as described above. If an e-mail submission is not received or is lost for any reason, it will be treated as if never submitted. To avoid penalties for unreliable mail delivery or aggressive spam filtering, you are advised to make a paper submission on or before the due date, and keep a copy for yourself.

Coverage

The course will cover most of the topics in chapters 1–6 of Ullman and Widom.
