

Cal Poly Pomona 2022 -23 Impaction Proposal

Types of Impaction

1. Academic Level (or Campus) Impaction

- A campus receives more eligible applicants at the first-time freshman or transfer student level than can accommodate. Thus, the campus itself is then called "impacted."

2. Program Impaction

- A campus looks at each of its programs' capacity, and the number of students currently enrolled and determines how many more students the program can accommodate. When a program continually gets more eligible applicants than it can accommodate, the campus will ask for the program to be called "impacted."

3. Full Impaction

- A campus that is fully impacted on *all* levels and for *all* majors. Each individual program at a campus must then determine its capacity and how many new students it can accept. Examples of Fully Impacted campuses include Fullerton, SLO, and SDSU.

Summary

- **Unimpacting Music, Physics, Biotechnology, & Environmental Biology**
 - Capacity in all four majors to accommodate all CSU eligible undergraduate students (local and out of local).
 - 100% of all freshmen are admissible for all four programs due to space.
 - Nearly all transfers students are being admitted to these four programs and we expect to increase admits with the removal of required supplemental coursework.
- **Impacting Psychology (FTF and UDT) and Sociology (UDT only)**
 - Nearly all out of local undergraduate students are denied to Psychology (90% transfers and almost 70% freshmen).
 - Over 75% of CSU eligible out of local transfers are denied to Sociology.
 - Will improve ethnic and academic diversity of admitted students.
 - Will increase Associate Degree for Transfer (ADT) admits through priority admission consideration.
