

Its always good to have the Career Center come out and educate our members! Thank you, Derick Prince, for coming to our Thursday meeting and presenting a crucial LinkedIn workshop to help our students efficiently utilize the app to maximize and benefit from our connections. Derick had a wealth of information beginning with Elevator pitches, who uses LinkedIn, why should you use LinkedIn, and how to effectively connect with others, and ended it off with some interesting facts. One interesting fact is the number of viewers that will look through your profile by having a simple profile photo which can help you out a ton when a recruiter comes across your profile! All the talk about a company and all those interested in the conversation can be found on LinkedIn which can help someone find out more about a particular industry they may be curious about. Don't be afraid and connect with your school peers for starters and expand LinkedIn's potential to your liking!
