

# Let's Make A Family Tree! 😊

**Theme:** Family

**Curriculum:** Visual and Performing Arts

**Activity:** Let's make a family tree! Depending on how long you want to go back in your family, you can decide that on your own. For the purpose of my example, I went back up to my Grandparents (:

**Age group:** All Ages

**Materials needed:**

- Poster board cut to your preferred size.
- Colorful construction paper to make little cut outs to decorate your tree.
- You will need an older person to print out pictures for your cut outs and tittle name.
- Markers (If you would like to just draw the details out on your own, that will also be perfect!)
- Next, you will need pictures of the family members that you want to include.
- Glue
- Stickers (Optional)

**Developmental Objectives/Domains:**

1. Develop the understanding of what a family is, how it was structured, and know about your family.
2. Understand what it is to put in work to a job that requires work and patience.
3. What a family symbolizes to you and your own family.

**Procedure:**

1. First you must start by getting your family photos together and choosing the best pictures to include in your tree.
2. Next, you will need glue and make sure that your tree is already drawn out with the number of branches that you will include (family members). You will write out a title, the name of each family member, including who they are.  
(ex: mother, father, brother, sister, grandpa(mom), grandma(father)).
3. Then you will glue the pictures to your tree as you wish.
4. Have Fun!
