

Theme: Plant Structure Activity

Curriculum Area: Science(2C)

Activity: In this activity, students will complete a wordsearch that has the words that identify the structure of a plant. During this activity, students will be able to identify the parts that make up a plant such as the stem, root etc. They will use a pencil, highlighter or pen to cross off or circle all the words that create a plant.

Age of Children: Kindergarten

Materials Needed:

- Printer to print worksheet out
- Pencil, pen or highlighter

Developmental Objectives/Domains: By participating in this activity, children will:

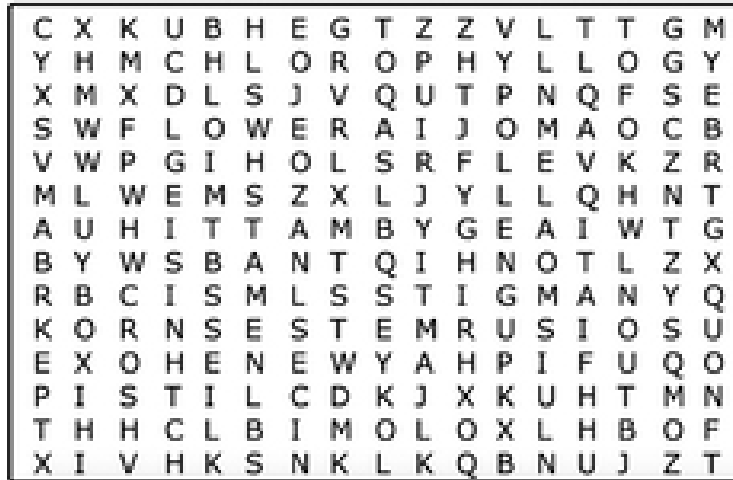

1. Develop skills in looking for words that correlate with what they are learning.
2. Understand the variety of words that correlate with the structure of a plant
3. Enhance their knowledge on the difference between plants and what makes a plant up.
They will also learn about what a plant needs in order to grow.

Procedure:

1. Print out worksheet below
2. Look at the words that correlate with the structure of a plant that are listed below
3. Begin to skim through the word search to find each word one by one
4. If you can't find a work skip it and come back to it once you've found the rest

- Use highlighter or other writing utensil to circle words once you've found them in the word search
- Once you circle the word, cross it off the list so you know you are finished.

PARTS OF A PLANT

Chlorophyll

Ovary

Pollen

Stamen

Flower

Petal

Root

Stem

Leaf

Pistil

Seed

Stigma

7.
