

Use Your CPP Degree to Become an Educator with Specialized Training in Sustainability!

Sustainability Education Minor

Attention all majors:

Are you interested in environmental education, creating a just and sustainable future, and fostering connections with nature?

Gain specialized knowledge in elementary/secondary education, outdoor education, informal education (e.g., aquariums, museums, zoos, and botanic gardens), the non-profit educational sector, and related careers.

Careers

- **K-12 Teacher (with credential)**
- **Community Garden or Farm Director**
- **Community Development**
- **Parks and Recreation**
- **Environmental Advocacy (corporate, non-profit, or public)**
- **Sustainability Coordinator**
- **Curriculum Developer**
- **Informal Environmental Educator**
- **Outdoor Educator**

Benefits:

A minor in education makes your resume stand out. You will learn about interconnected global challenges, like climate change, loss of biodiversity, unsustainable use of resources, and inequality, making you a more well-rounded thinker and exemplary job candidate.

Minor course requirements:

Students take three required courses and then choose electives from the following three areas:

- Education (3 units);
- Scientific perspectives on sustainability (6 units)
- Cultural and social perspectives on sustainability (6 units).
