

Question

Which of these sequences is not geometric?
(There may be more than one right answer.)

A. $\frac{1}{2}, \frac{3}{4}, \frac{9}{8}, \frac{27}{16}, \dots$

B. $b_1 = \frac{1}{2}, b_{n+1} = \frac{3}{2}b_n$

C. $a_n = \frac{2}{5^n}$

D.
