

# BIOGRAPHY OF JOHN TIMMERMAN

John Timmerman has had the pleasure of participating in one of the fastest growing elastomer industries with over 30 years in the processing of Silicone Rubber in both high consistency and liquid forms. He started his career in tool design, but became more interested in manufacturing, focusing mainly in the injection molding fields of elastomers.

John's background includes various positions from Engineering Manager at Freudenberg-NOK's silicone unit to one of the key employees to start up JOH Rubber, a Tier one automotive sealing supplier, becoming its President.

His vast experience has taken driven him to work in expanding markets for silicone processing with the LSR injection with such industry giants as ENGEL and Starlim North America. Still with the Starlim Group of Companies, John is currently the Director of its global Elastomer Business Unit and CEO of Poly-Nova Technologies.

He has written several technical papers for SAE, SPI and multiple industry conferences, as well as various industry symposiums and journals.
