

BIOGRAPHY OF RICK FINNIE

Rick Finnie is the owner of M.R. Mold & Engineering, located in Brea, California which will celebrate 37 years in business this year. Rick Finnie was recently presented with the prestigious Mold Builder of the Year award in 2019 by the American Mold Builders Association (AMBA). The award recognizes an individual whose life-long talents and dedication to the mold building industry stands out above the rest. Finnie has been a leader and mentor in the mold building industry for over 40 years. He is truly passionate about the industry and supports the MADE IN THE USA label – continually exemplifying this in his actions.

Finnie's journey began within his father's line of work, which was in tool and cutter grinding. After his father closed his business in 1977, Rick worked for eight years at a leading west coast mold maker where his knowledge of liquid silicone began.

Within the last 37 years, having gained intricate knowledge of the liquid silicone rubber (LSR) industry, M.R. Mold has developed its own cold runner system, universal base and automation which enables the company to provide every option for a project's needs. Rick possesses a unique sense of problem-solving, which is extremely important in dealing with LSR tools.

Today, M.R. Mold & Engineering is known globally for its expertise and experience in high quality LSR plastic and injection molds. The company employs 30+ skilled workers in a 25,000 square foot facility with state-of-the-art machining equipment, including a five-axis Yasda mill and five molding machines.

We believe in American Made!
