

BIOGRAPHY OF RICK ZIEBELL

Rick A. Ziebell, serves as a Technical Fellow and is the V.P. of Technology for R.D. Abbott Company the North American distribution and technical service representative for Dow Silicones Dowsil™ and XIAMETER™ brands as well as DuPont Liveo™ brands Medical Silicone Elastomers (both previously Dow Corning). As a Graduate of Chemical Engineering and Materials Engineering from California Polytechnic University, his academic work also includes Application Studies in Polymer Technology with Dow Corning. His work has earned him patentee status in chemical application and use patents in silicone technology. He is an author of over 50 technical papers, presentation, and peer reviewed articles. With more than thirty-five years' experience he works to help train and educate those in the rubber industry by teaching rubber subjects from basic to advance in affiliation with universities and societies focusing on science and technology.

At RDAbbott, Mr. Ziebell leads a highly technical organization that's focused on elastomer technology. Our team of engineers, chemists and elastomer experts have very diverse technical knowledge and extensive hands-on experience with rubber formulation and fabrication.

Applied Curiosity is at the root of nearly every business decision and strategic action we take at RDAbbott. It's how we approach every technical inquiry, every sales opportunity, and it's modeled in our genuine desire to serve our customers efficiently and effectively.
