- Wireless Keyboard / Mouse (for PC)

Input Selections

HDMI 1	PC
HDMI 2	Wireless Presentation

Display Controls

Wireless Presentation

Setting up a personal laptop for wireless presentation can be done by first connecting your laptop to the **eduroam** Wi-Fi network and following the on-screen prompts when switching the display to HDMI-2.

Quick Step-by-Step:

1. Turn ON the display.
2. Switch input to HDMI-2.
3. Download Mersive Solstice (www.mersive.com/download)
4. *For MAC:* You will need to allow screen sharing permissions for Mersive Solstice in your system settings under *Privacy and Security > Screen Recording*.
5. Search for 1-201 in the app and click on the name.
6. Type the four-digit code shown on the display.
7. *For MAC:* You may be required to finalize the connection through *Screen Mirroring in Control Center* after you're connected in the app depending on your system version.

Using the Logitech Camera in Zoom

The Logitech camera mounted below the TV can be used in Zoom meetings hosted on the computer connected to the **HDMI 1** input.

In Zoom, the audio and video device can all be set to **Logitech Meetup**.
