

## Basic Room Controls

The AV equipment in 5-133 is designed as a **Basic Classroom** with the devices controlled via separate remotes. The computer in the room required a Bronco Username and Password to operate.

For switching inputs an Extron SW4 can be found on the Instructor Station with the corresponding device inputs labelled.

### Input Selections

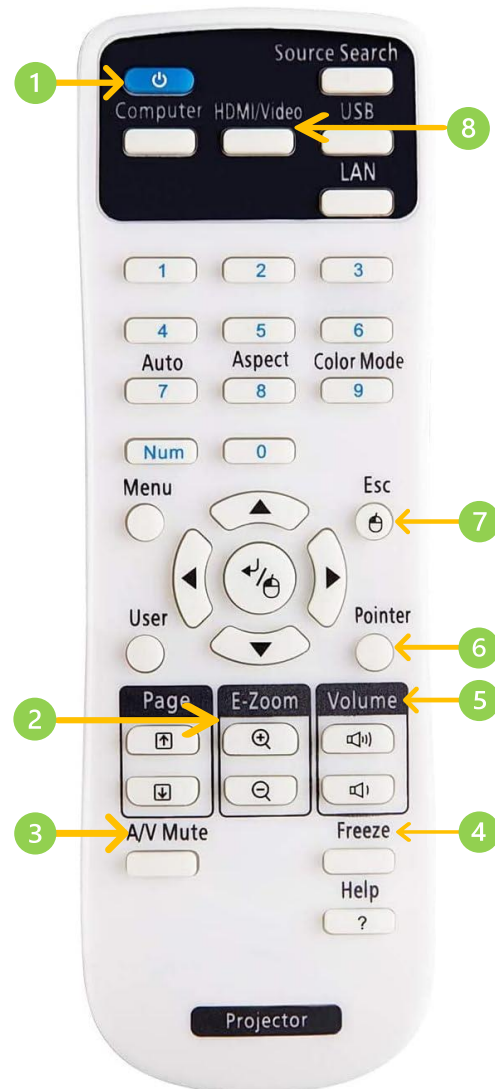

INPUT 1	Instructor Station PC
INPUT 2	Laptop Connection
INPUT 3	Apple TV

## Projecting and Volume Adjustments

The main function of the projector remote is for power, and volume settings. A few other functions like E-Zoom and AV-mute are useful for most classroom situations without hindering instruction.

You will also want to make sure that the projector is first set to HDMI 1 using button 8 (HDMI/Video) to switch to the correct source.

1. Power button
2. E-Zoom +/- buttons (zoom into and out of the image)
3. A/V Mute button (turns off picture and sound)
4. Freeze button (stops video action)
5. Volume up/down buttons (adjust speaker volume)
6. Pointer button (activates on-screen pointer)
7. Esc button (cancels/exits functions and controls wireless mouse functions)
8. HDMI/Video (switches through HDMI sources)

---

## Stream from a Mac to Apple TV

- *Mirror a Mac screen on Apple TV:* On the Mac, do either of the following:
  - *Mac with macOS Big Sur or later:* Click Control Center  in the menu bar, click Screen Mirroring , then choose the name of the Apple TV you want to use.
