## I. EXECUTIVE SUMMARY

California State Polytechnic University, Pomona (CPP) engaged Keyser Marston Associates, Inc. (KMA) to assess potential demand for faculty and staff housing, commercial, retail and hotel development at the historic Lanterman Developmental Center (Site) in the City of Pomona (City). The following analysis reflects a first phase of the market study that includes the collection and evaluation of market area trends. A second phase that includes stakeholder interviews and a survey of CPP employees will provide the feedback required to prepare granular projections of demand by land use type.

As part of this analysis, KMA evaluated current and historic market conditions in the City, the 10-mile Market Area (Market Area) and Los Angeles County (County). KMA also looked at market dynamics in the surrounding region, including the Inland Empire, due to their proximity and subsequent influence on potential demand for uses at the Site. Given that CPP is historically a commuter campus, KMA determined that a 10-Mile Market Area was appropriate in order to better understand the characteristics of the rental and for-sale housing available to students, faculty and staff, as well as prevailing trends in both the housing and the commercial market.

### 10-Mile Market Area/20 Minute Driving Distance<sup>1</sup>

<sup>1</sup> KMA uses the 10-Mile Market Area to compare data throughout this report, noting that this radius is roughly equivalent to a 20 minute driving distance.

The key tasks for this analysis included:

- Review of relevant studies prepared for or by CPP, including demographic, market, financial or planning analyses;
- Discussions with university officials and local real estate brokers;
- Review of university enrollment and employment demographics and projections provided by CPP;
- Evaluation of regional and local demographic and socio-economic data;
- Review of existing employment and business patterns identifying key industries;
- Evaluation of residential and commercial market conditions for uses including retail, office, industrial and hotel;
- Review of comparable mixed-use, market rate projects in the Market Area.

A selection of comparable mixed-use and residential projects in the Market Area is included in **Appendix 1**. All other supporting market data is in **Appendices 2 – 9**.

The key takeaways from KMA's market analysis follow, along with a matrix providing a high-level summary of findings and market opportunities on **Page 6**:

### Socio-Economic Overview

---

- Market Area population growth is slowing but household formation rates are still growing at a steady rate, pointing to a demographic shift towards smaller household sizes with fewer children.
- Market Area household sizes of 3.12 are still larger than in the County (2.75), contributing to higher household incomes of \$102,400 as compared to \$91,400 in the County.

- A significant share of job growth Countywide through 2032 is in Healthcare and Social Assistance, Accommodation and Food Service, and the Professional, Scientific and Tech sectors, which together account for over ¼ of all jobs in the Market Area.

## Retail Overview

---

- Rent growth in the retail market has slowed reflecting regional market trends in the post-pandemic economy as retail tenants adjust to changing consumer habits.
- A surplus-leakage analysis identified demand for up to 200,000 SF of retail space in a 3-mile Market Area. Stronger demand will coincide with areas that have high levels of housing development, traffic and ease of access.
- Over 100,000 SF of retail space is under construction in the Market Area which will absorb a portion of any unmet demand.
- Area brokers believe that retail on the Site could succeed if positioned as a convenient, student-serving center with restaurant and food options, outdoor space, and walkable design. These design elements are consistent with broader trends in commercial real estate, with a focus on experiential retail. In addition, residential density would directly support retail viability.

## Office Overview

---

- Market indicators for office space are modest, and low vacancy rates of 5.5% are largely due to a shrinking inventory as total space is declining and new construction is limited.
- Most new space is in the form of medical offices and continued gains in the Healthcare sector indicate potential for future medical office demand.
- Opportunity may exist for smaller, professional and medical office space as part of a mixed-use development in the near to mid-term.
- Area brokers see potential to leverage CPP's engineering and tech programs to attract AI or software firms, noting that freeway visibility and access are strong advantages for the Site.

## Residential Overview

---

- An analysis of CPP employee points of origin reveals that only ¼ of all employees live within 10 miles of campus and nearly 45% of employees live more than 20 miles from campus, indicating significant distances are being traveled to work.
- Home values in the City and surrounding region have been increasing at a faster pace than in the County since 2021. The median home price in the City increased 98% in the last 10 years and is now \$692,000; however, it is still less than the County average of \$907,000.
- A tight rental market is illustrated by the fact that over the last 10 years Market Area rents have increased by 48% and vacancy rates have not risen above 5.0%.
- Population and household growth rates indicate support for over 5,000 new residential units through 2040 in the Market Area, inclusive of any units that are currently under construction (1,100 rental units as of Q3 2025) or in the preliminary planning stages (1,250 units as of Q3 2025).
- The Market Area has traditionally been dominated by single-family housing types, but an increase in new construction of townhome and condominium-style development in recent years indicates demand for more varied housing types. At the same time, the share of renter-occupied housing units in the City has increased from 20% to 26% concurrent with the rise in housing costs.
- The Site's location on the eastern edge of Los Angeles County provides the potential for more affordable housing than other parts of the County and would provide an opportunity for a large share of CPP employees to reduce their work commute.

## Industrial Overview

---

- Asking rents have declined in the last two years after experiencing historic annual growth of 10% during the pandemic; vacancy rates remain low at 4.9%.
- High levels of demand are shown for industrial flex space which makes up less than 5% of total industrial space in the submarket and commands the highest asking rents among all space types.

- Area brokers believe the Site is well positioned for light industrial or logistics uses given its location and freeway access. The market for R&D is limited, but some potential likely exists for CPP to attract R&D or engineering-based users through University-led partnerships.

## LODGING

---

- Submarket occupancy levels have nearly recovered following a 25% decline during the COVID-19 pandemic and YOY revenue growth has been healthy in recent years.
- Demand levels are projected to fully recover over the next five years, partially driven by the strength of local industries and business travel demand for higher quality, select-service hotels.
- The majority of new development is occurring near the Ontario airport where four hotels are currently under construction and are likely to capture a significant portion of the projected demand for the submarket area. Consequently, opportunities at the Site are likely modest.

	Retail	Office	Residential	Industrial	Lodging
<b>Opportunity</b>	-Modest	-Modest	-Very Strong	-Strong	-Limited
<b>Demand Drivers</b>	<ul style="list-style-type: none"> <li>-Household growth</li> <li>-Healthy household incomes</li> <li>-Robust Job growth</li> <li>-New residential development</li> </ul>	<ul style="list-style-type: none"> <li>-Limited new and proposed development</li> <li>-Low vacancies</li> <li>-Medical business growth</li> </ul>	<ul style="list-style-type: none"> <li>-Population growth</li> <li>-Low vacancies</li> <li>-Rising costs in coastal markets</li> <li>-Proximity to job centers in LA and Orange Counties</li> </ul>	<ul style="list-style-type: none"> <li>-Low vacancies</li> <li>-Growth in e-commerce/logistics</li> <li>-Proximity to ports and major population centers</li> <li>-Highway access</li> </ul>	<ul style="list-style-type: none"> <li>-Business Travel</li> <li>-Strength of local Logistics and Warehousing industry</li> <li>-Highway access</li> </ul>

## II. FACULTY & STAFF DEMOGRAPHICS

KMA analyzed current and historic demographic data for faculty and staff to identify key factors and trends that may influence demand for housing. These factors include employment status (full-time or part-time), age, marital status, and place of origin, among other characteristics.

### Key Data Points

- As of AY '25/26 CPP has **1,202 staff members** and **1,446 faculty members** for a total of 2,648 employees (Chart 1.1):
  - 82% of staff and faculty are employed full-time and 18% are employed part-time (Chart 1.2).
  - A majority of CPP employees (43%) earn a gross salary of \$60,000 - \$84,000 per year, while 14% earn a gross salary of less than \$60,000 per year (Chart 1.3).
  - More than half of all employees (56%) are between the ages of 35 and 54 (Chart 1.4).
  - More than 1/3 of all employees are partnered or heads of their household.<sup>2</sup>
  - Employee salaries and household sizes will have an influence on employee preferences for both the type and affordability level of housing.
- Over the last ten years employee growth averaged 2.5% year-over-year (YOY), for a total increase of 560 employees during this time period (Chart 1.5).
- Over the next ten years CPP is projecting an average employment growth rate of 3.1%/year (Chart 1.5).
- An analysis of employee points of origin reveals that only ¼ of all employees live within 10 miles of campus. Nearly 45% of employees live more than 20 miles from campus, and 2.2% live in other parts of the state or out of state.

---

<sup>2</sup> 21% of respondents did not provide this data to CPP so the actual share of partnered or head of household employees may be higher.

**Chart. 1.1 Faculty & Staff Headcount**

**Chart 1.2 Faculty & Staff Employment Status, 2025**

**Chart 1.3 Faculty & Staff Salary Distribution (monthly)**

**Chart 1.4 Faculty & Staff Age Distribution**

**Chart 1.5 Faculty & Staff Headcount, Historic & Projected**

**CPP's enrollment numbers are projected to steadily increase over the next 10 years**

- Due to student over-enrollment in 2021 caused by the school's quarter-to-semester conversion, CPP intentionally reduced their enrollment numbers which resulted in an overall decline in the Full Time Equivalent (FTE) student population between 2020 – 2023.
- As of 2024, enrollment was up 4.1% over the previous year representing a total increase of 900 FTE students, exceeding the historic average annual growth rate of 3.0%. **This likely has positive implications for faculty and staff employment growth going forward** (Chart 1.6 and 1.7).

**Chart 1.6 Student Headcount, Historic & Projected**

**Chart 1.7 Student Full-Time Equivalent (FTE), CPP vs. All CSU's**

## Faculty & Staff Place of Origin

- An analysis of employee origin by zip code reveals that 1/4 of all employees live within 10 miles of CPP, and approximately 1/3 live between 10 – 20 miles of campus. Only 8% of employees live in the City of Pomona (Table 1.2).
  - Assuming CPP annual growth projections of 3.1% through 2035, this suggests that up to 520 additional employees may be looking for housing in or near the Market Area over the next 10 years<sup>3</sup>.
  - Nearly 45% of all employees live more than 20 miles from campus. Additionally, 2.20% of employees (58) live in another part of the state or out of state, and likely would not contribute to any demand for housing near campus.

**Table 1.1**

<b>Top Cities of Origin</b> All Employees	
	%
1. Pomona	8%
2. Claremont	5%
3. Rancho Cucamonga	4%
4. Chino Hills	4%
5. Upland	4%
6. Ontario	4%
7. Chino	3%
8. West Covina	3%
9. Diamond Bar	2%
10. Covina	2%

**Chart 1.8**

<sup>3</sup> Assumes that roughly the same percentage of future employees (56%) will live within 20 miles of the CPP campus.

### III. MARKET ANALYSIS

#### A. SOCIO-ECONOMIC CHARACTERISTICS

KMA evaluated the socio-economic characteristics of the Market Area and City and compared these with the characteristics of Los Angeles County (County) for regional context.<sup>4</sup> A summary of findings is below and supporting data can be found in Appendix 2, Table 1.

##### Slower Population Growth and Smaller Household Sizes

- In the last 15 years households in the Market Area grew by 8.5% but the population increased by only 0.08%. This is due to a shift in household composition, as the average household size declined by 7.7% during this period (Table A.1 and A.2).
- The County's population decreased during this time period, driven by demographic shifts including increased out-migration and a decrease in the birth rate.
- Small household sizes mirror regional and statewide trends, as the share of one-person households is increasing and the share of households with children is decreasing.<sup>5</sup>

Table A.1

##### Population & Household Growth: 2010 - 2025

	2010	2025	% Change 2010-2025
<b>10-Mile Market Area</b>			
Population	1,231,270	1,232,215	0.08%
Households	357,045	387,436	8.5%
<b>Los Angeles County</b>			
Population	9,818,596	9,712,112	-1.08%
Households	3,241,200	3,452,309	6.5%

<sup>5</sup> USC Lusk Institute, State of Los Angeles County Housing and Neighborhoods (SOLACHAN) 2025.

Table A.2

**Average Persons  
per Household**

	2010	2025	% Change
10-Mile Market Area	3.38	3.12	-7.69%
Los Angeles County	2.98	2.75	-7.72%

- Moderate population growth of 7.5% is forecasted for the County through 2050 in the wake of population growth disruptions related to the COVID-10 pandemic.<sup>6</sup>

### Aging Population and Fewer Households with Children

- Consistent with trends Countywide, the Market Area median age has increased by 4.3 years since 2010 (Table A.3).
- The number of children in Market Area households is decreasing; only 16% of the population is under the age of 15 compared to 17.2% five years ago (Chart A.1).

Chart A.1. Median Age Distribution for Market Area and County, 2025

<sup>6</sup> SCAG 2024 Demographics and Growth Forecast Technical Report.

Table A.3

Median Age			
	2010	2025	% Change
10-Mile Market Area	34.6	38.9	4.3%
Los Angeles County	34.8	38.4	3.6%

### Healthy Household Incomes

- Market Area household incomes of \$102,400 are higher than County household incomes of \$91,400, partially due to the Market Area's larger household sizes (Table A.4).
- 32% of households in the Market Area earn an annual household income of \$150,000 or more. Countywide, approximately 28% of households earn less than \$49,999 per year compared to only 22% in the Market Area (Table A.5, Chart A.2).

Table A.4

Income Levels		
	Per Capita	Household
10-Mile Market Area	\$41,504	\$102,372
Los Angeles County	\$47,409	\$91,439

Chart A.2 Household Income Distribution for Market Area and County, 2025

Table A.5

Household Income Distribution:					
	< \$25,000	\$25,000-\$49,999	\$50,000-\$99,999	\$100,000-\$149,999	\$150,000+
<b>10-Mile Market Area</b>	10%	12%	27%	19%	32%
<b>Los Angeles County</b>	14%	14%	26%	30%	30%

- Market Area Education levels indicate a lower share of college graduates than in the County and a greater share of residents whose highest level of education is a high school degree (Chart A.3, Table A.6).

Chart A.3 Educational Attainment Levels for Market Area and County, 2025

Table A.6

Educational Attainment Levels				
	No HS Degree	HS Degree	Some College	College Grad
<b>10-Mile Market Area</b>	15%	24%	27%	34%
<b>Los Angeles County</b>	17%	21%	23%	38%

## B. EMPLOYMENT & BUSINESSES

KMA analyzed Market Area, City and County employment growth trends and concentrations by industry. A summary of findings is below and supporting data can be found in Appendix 2 – Tables 2 through 3.

### Job Growth in Key Market Area Industries

- Moderate employment growth is projected for the City (0.26%) and County (0.29%) through 2050 (Table B.1).<sup>7</sup>
- A significant share of job growth through 2032<sup>8</sup> is in Healthcare and Social Assistance (+177,000 jobs), Accommodation and Food Service (+51,500 jobs), and Professional, Scientific and Tech (+44,100 jobs) (Table B.2).
  - Employment in those three high growth sectors accounts for over ¼ of all jobs in the Market Area, pointing towards a positive outlook for area employment.

Table B.1

#### Employment Projections: 2019-2050

	2019	2050	Change	
			Total	Percent
<b>City of Pomona</b>	56,800	61,100	4,300	0.26%
<b>Los Angeles County</b>	5,031,000	5,461,000	430,000	0.29%

<sup>8</sup> California Economic Development Division, Los Angeles-Long Beach-Glendale Metropolitan Statistical Area (MSA).

Table B.2

### Industry Employment Projections, Los Angeles-Long Beach-Glendale MSA 2022-2032

	Estimated Employment 2022	Projected Employment 2032	% Change 2022-2032	# Change
<b>Agriculture, Mining, Utilities</b>	1,650	1,510	-8.5%	(140)
<b>Construction</b>	150,390	162,960	8.4%	12,570
<b>Manufacturing</b>	320,600	302,880	-5.5%	(17,720)
<b>Trade &amp; Transportation</b>	825,220	859,010	4.1%	33,790
Wholesale Trade	201,270	197,330	-2.0%	(3,940)
Retail Trade	405,250	414,280	2.2%	9,030
Transportation & Warehousing	206,860	235,710	13.9%	28,850
<b>Information</b>	232,380	246,690	6.2%	14,310
<b>Finance &amp; Insurance</b>	122,570	121,670	-0.7%	(900)
<b>Real Estate &amp; Rental, Leasing</b>	88,180	91,940	4.3%	3,760
<b>Professional, Scientific, Tech</b>	308,630	352,770	14.3%	44,140
<b>Mgmt of Companies Enterprises</b>	61,220	60,900	-0.5%	(320)
<b>Admin. Support, Waste Mgmt.</b>	281,230	312,120	11.0%	30,890
<b>Educational Svs</b>	130,440	145,810	11.8%	15,370
<b>Healthcare &amp; Social Assist.</b>	751,160	928,200	23.6%	177,040
<b>Arts, Entertainment &amp; Rec</b>	90,440	105,610	16.8%	15,170
<b>Accommodation &amp; Food Svs</b>	418,400	469,950	12.3%	51,550
<b>Other Services</b>	163,740	175,960	7.5%	12,220
<b>Total</b>	<b>3,946,250</b>	<b>4,337,980</b>	<b>7.0%</b>	<b>391,730</b>

- Prevailing Market Area industries include **Retail Trade (14.3%)**, **Health Care & Social Assistance (12.3%)**, **Manufacturing (9.9%)**, **Accommodation & Food Services (9.9%)**,

and **Educational Services (9.5%)**. Together these sectors account for more than half of Market Area employment (Chart B.1).

**Chart B.1 Leading Market Area Industries by Employment Share, 2025<sup>9</sup>**

- High rates of employment in sectors that utilize warehouse and industrial spaces such as Manufacturing and Wholesale Trade (17% of all jobs) is tied to local demand for industrial development (discussed in Section G of this report).
- The Market Area's low unemployment rate of 5.1% reflects the strength of the regional labor market.<sup>10</sup>

<sup>9</sup> All Other industries (10%) include industries with a less than 3% share of total employment including Transportation & Warehousing (2.5%), Information (2.2%), Real Estate & Leasing (2.4%), Arts & Entertainment (2.1%), and Utilities (0.3%).

<sup>10</sup> Esri Business Analyst, September 2025.

## C. RETAIL MARKET

KMA evaluated current retail market conditions in the Market Area and the neighboring Inland Empire (IE) region, given the City's proximity to and shared market characteristics with the IE. KMA also conducted a surplus/leakage analysis to identify whether unmet demand exists for certain types of retail development in the Market Area. An overview of the findings is below with underlying data in Appendix 3 – Table 1 through Table 8:

### Regional & Submarket Trends

- Retail rents in the submarket<sup>11</sup> are seeing modest growth of 2.5% YOY. Asking rents of \$2.32/sf/month are relatively low compared with the County but outpace the neighboring Inland Empire region (Chart C.1).<sup>12</sup>
- Retail vacancy rates in the submarket of 6.0% track with the regional average.

Chart C.1. Average Rents and Vacancy Rates (Retail); East San Gabriel Submarket & Inland Empire, 2018 – 2025

Source: Costar

<sup>11</sup> Eastern San Gabriel Submarket includes the City of Pomona.

<sup>12</sup> Costar retail rents Q3 2025 for Eastern San Gabriel Valley and surrounding submarkets.

- Since 2020 the total amount of retail space in the submarket decreased by 230,000 SF, meaning that more retail space has been demolished than built.
  - In the same period, 500,000 SF of net negative absorption was caused by tenants either vacating their space or going out of business. **This is reflective of regional market shifts as big box stores are closing and lease rates remain low in the post-pandemic economy.**<sup>13</sup> Additionally, the shift to E-commerce continues to impact brick and mortar opportunities.
- Demand indicators are healthier for neighborhood centers and strip centers compared with malls and power centers, which indicates that local consumers are driving demand in the submarket (Table C.1).<sup>14</sup>

Table C.1

Rents & Vacancies by Retail Type Submarket			
	Asking Rent/SF/Mo.		Vacancy Rate
Malls	\$	1.93	11.5%
Power Centers	\$	2.36	8.3%
Neighborhood Center	\$	2.44	6.7%
Strip Centers	\$	2.25	5.8%
General Retail	\$	2.25	4.0%
<b>Average</b>	<b>\$</b>	<b>2.25</b>	<b>7.3%</b>

## Market Area – Existing Conditions

- As of Q3 2025, average asking rents in the Market Area are tracking with the submarket average at \$2.43/sf/month. Newer, amenitized Class A space commands a higher lease rate of \$2.90/sf/month.<sup>15</sup>
- There is currently **over 350,000 SF of retail development either proposed or under construction in the Market Area**<sup>16</sup> which will likely absorb a portion of any unmet demand Major retail projects in the pipeline are shown in Table C.2.

<sup>13</sup> Costar Retail Market Report, Regional/Inland Empire, Q3 2025.

<sup>14</sup> Costar Retail Submarket Report, Eastern San Gabriel Valley (including the City of Pomona); September 30, 2025.

<sup>15</sup> Costar Retail Rates, 10-Mile Market Area. Retrieved October 2025.

<sup>16</sup> Approximately 2/3 of this space is being proposed, only 1/3 of this space is actively under construction at the time of this report.

Table C.2

<b>Major Retail Projects Proposed &amp; Under Development (Q3 2025)</b> 10 Mile Market Area				
Project Name	City	Status	GBA	Est. Completion
Rowland Town Center/Gale Ave	Rowland Heights	Under Construction	96,500	Nov-25
The Commons at Chino Hills/Chino Hills Pkwy	Chino Hills	Under Construction/Partially Complete	41,500	2027
Euclid Ave & Schaefer Ave	Chino	Proposed	23,250	-
7th and Garey Avenue	Pomona	Proposed	36,900	

- KMA surveyed lease rates around the Site<sup>17</sup> and found the **majority of leasable space is in mid-tier, older Class B and Class C space with rents that are comparable to the submarket average** at \$2.50/sf/mo.

### Retail Demand Outlook

- A surplus leakage analysis suggests market support could exist for more than **200,000 SF of retail space in a 3-mile Market Area** in the form of Food Service & Drinking establishments, and **700,000 SF of space in a 5-mile Market Area**, mainly in the categories of Building Equipment and Supply Stores, Clothing Stores, and Sporting Goods and Hobby Stores (Table C.3).<sup>18</sup> This is a current snapshot of existing demand in the Market Area and does not take into account any space that is currently in the development pipeline (more than 300,000 SF as of Q3 2025).

Table C.3

<b>Estimated Retail Demand</b> SF of Supportable Development		
<b>Category</b>	<b>Total SF</b>	
	<b>3 Mile Radius</b>	<b>5 Mile Radius</b>
Motor Vehicle & Parts Dealers	NA	NA
Furniture & Home Furnishings Stores	13,001	NA

Miscellaneous Store Retailers	1,237	39,556
Nonstore Retailers	NA	NA
Food Services & Drinking Places	243,504	NA
<b>Total</b>	<b>609,193</b>	<b>716,870</b>

- Retail sales in most categories outpace demand, suggesting that existing retail centers are sizeable enough to draw customers from outside of the region, and retail space is sufficient to meet local demand for those categories.
- Potential demand for Food & Beverage shown by the Surplus Leakage Analysis, combined with the fact that the closest high-quality “experiential” retail centers are located in Chino Hills (Crossroads Entertainment Center, The Shoppes at Chino Hills), Brea (Brea Mall), and Montclair (Montclair Place), **may indicate some opportunity for experiential retail near the Site serving the campus community.**
- More than 300,000 SF of retail in the development pipeline will likely absorb a portion of this unmet demand (Table 3.3).
- Positive household growth and healthy household incomes, as well as low unemployment rates, may create opportunity for some retail development in strategic, well-trafficked locations. **Stronger demand for retail will coincide with areas that have high levels of housing development and population growth.**

### Broker Interviews – Retail Market

KMA contacted several brokers active in the City and San Gabriel Valley market area. The salient points from these conversations are summarized below:

1. **Brokers described the area retail market as stable but softening slightly**, with pricing trending down as interest rates remain high and inventory levels increase.

2. Mixed-use and newer retail product can command up to \$3.50–\$4.00 per square foot NNN, consistent with nearby markets such as Montclair and Ontario. Higher rates are achievable with amenities such as patios, outdoor seating, and communal areas.
3. Vacancy generally ranges from 5–7% in the area, with higher rates (up to 15%) in older corridors such as Mission Boulevard and Downtown Pomona, where leasing remains challenging due to perception and location issues.
4. **Demand is strongest among quick-service restaurants, coffee shops, and neighborhood service tenants (e.g., salons, barbers, repair shops).** National tenants remain cautious, largely due to parking limitations and permit timelines.
5. **Brokers cited slow city permitting processes as a recurring barrier**, with tenant buildouts taking significantly longer than expected. This has made some operators reluctant to commit to new leases.
6. Retail performance improves west and south of CPP, notably near the 57 and 60 corridors and into Chino Hills where newer housing and stronger demographics support higher activity. East of the 57, demand and property conditions weaken, especially south of the I-10.
7. Centers anchored by strong grocers or specialty tenants (e.g., H Mart, Lazy Acres, Whole Foods) are outperforming. **Brokers emphasized the potential for new mixed-use development near CPP, noting residential density would support retail viability.**
8. **The area around the university lacks restaurant and food options for students, faculty and staff.** Smaller grab-and-go and local food concepts could perform well with the right parking ratios and pedestrian connectivity.
9. Brokers agreed that **retail tied to CPP could succeed if positioned as a convenient, student-centered hub** with modern amenities, outdoor space, and walkable design.
10. Overall, brokers see opportunity for neighborhood-serving retail integrated with new housing near the university. **Success will depend on parking availability, city coordination, and residential growth to create a consistent customer base.**

## D. OFFICE MARKET

KMA evaluated current and historic office market conditions in the submarket and the neighboring Inland Empire (IE) region, given the City's proximity to and shared market characteristics with the IE. KMA also estimated potential office demand over the next 15 years. A summary is below, with the supporting data in Appendix 4 – Table 1 through Table 6.

### Regional & Submarket Trends

- **Market indicators for office space in the submarket indicate modest performance.** While vacancies are relatively low at 5.5%, lease rates declined in 2025 after modest growth in recent years of 2.3% YOY and now average \$2.61/sf/mo (Chart D.1 and Table D.1).

Chart D.1. Average Rents and Vacancy (Office) East San Gabriel Submarket & Inland Empire, 2018 – 2025

Source: Costar

Table D.1

### Rents & Vacancies by Office Type Submarket

	Asking Rent/SF/Mo.		Vacancy Rate
4 & 5 Star	\$	3.04	7.9%
3 Star	\$	2.80	6.1%
1 & 2 Star	\$	2.21	4.3%
<b>Average</b>	<b>\$</b>	<b>2.61</b>	<b>5.5%</b>

- **Roughly 1/3 of leasing activity in the region is for medical offices.**<sup>19</sup> Since 2020, approximately 900,000 square feet of medical office space has been added to the region and as of Q3 2025 90% of that space is leased.<sup>20</sup> Most of the non-medical space built since 2020 is in the form of small or mid-sized multi-tenant office buildings.
- In contrast to denser population centers like downtown Los Angeles, **vacancies in the submarket have actually decreased from pre-pandemic levels** from 6.1% in 2019 to 5.5% as of Q3 2025 partially due to a shrinking inventory.
- Total submarket office space has declined by over 13,000 square feet over the last five years; combined with limited new construction, this is likely keeping vacancy rates low.
- The total share of remote workers, which had a dampening effect on office demand in the post-pandemic economy, is starting to trend down from a high of 19.3% in 2021 to 13.9% in 2024.<sup>21</sup>

### Market Area – Existing Conditions

- As of Q3 2025, average asking rents in the Market Area are tracking with the submarket average at \$2.60/sf/month. Medical office space commands a higher lease rate of \$2.78/sf/month.

<sup>19</sup> Costar Office Market Report, Regional/Inland Empire, Q3 2025.

<sup>20</sup> Ibid.

<sup>21</sup> As a percent of total workers (includes hybrid schedule); SCAG American Community Survey 2024 1-Year Estimates, October 2025.

- **There is 37,000 square feet of office space under construction in the Market Area**, consisting of 26,000 square feet of medical office development (1127 Grand Pl, Rowland Heights), and 11,000 square feet of traditional multi-tenant office space (959 Central Ave, Upland).
- KMA surveyed lease rates within two miles of the Site and found that **the majority of leasable space is in mid-tier, older Class B and Class C buildings, with rents trending lower than the submarket average at \$2.27/sf/mo.**
  - There is approximately 93,000 square feet of medical office space in the area, mainly concentrated in Innovation Village, as well as the neighboring City of Diamond Bar along Diamond Bar Boulevard and Golden Springs Drive.<sup>22</sup> Market asking rents average \$2.60/sf/mo.

## Office Demand Outlook

- Office demand projections indicate modest support for office space in the City over the next 15 years of 134,500 square feet (or approximately 4% of the existing inventory).<sup>23</sup> This demand would be filled through existing, proposed, and future office developments.
  - Overall, larger scale office demand can also be driven by factors outside of normal market conditions (employment growth), as companies will sometimes choose locations based on business decisions (e.g. proximity to decision makers' residences) and not market factors. Some demand may also be driven by CPP investments in specific industries.
- Projected employment growth for sectors that typically occupy office space (Professional, Information, Insurance and Finance) is limited through 2032 in the County and the MSA.<sup>24</sup> However, **continued gains in the Healthcare sector indicate some potential for medical office demand in the near future.**
- The relatively low amount of new office construction in the Market Area means that lease rates will likely increase in the near to mid term.

<sup>22</sup> Costar Retail Data as of October 2025.

<sup>23</sup> California Economic Development Department. Employment Projections 2018-2028; ESRI Business Analyst Employment Data (2022) and KMA.

<sup>24</sup> 2022-2032 Industry Employment Projections, Los Angeles-Long Beach-Glendale MSA, California Employment Development Department.

- **Opportunity may exist for smaller, professional and medical office space as part of a mixed – use development in the near to mid-term.** Any new medical or class A office space will also likely compete with existing office in the nearby Innovation Village development.

## Broker Interviews – Office Market

KMA contacted several brokers active in the City and San Gabriel Valley market area. The salient points from these conversations are summarized below:

1. **Brokers described the area office market as recovering after a challenging COVID period.** Demand has improved, particularly for Class A product, while Class B remains stable and Class C continues to struggle, with many sites rezoned for housing.
2. Asking rents range from approximately \$1.75–\$2.65 Full Service Gross (FSG), with higher-end product achieving \$2.45–\$2.75; new Class A buildings in nearby markets like Diamond Bar can reach \$3.15 FSG.
3. Vacancy rates in newer, well-located buildings are typically below 10%, while older properties, especially near Mission Boulevard or south of the I-10 can reach 15%.
4. **The market is dominated by small tenants (1,500–5,000 SF) in professional services, healthcare, and local business uses.** Larger firms tend to locate in Irvine, Long Beach, or Ontario for newer buildings and stronger amenities.
5. The area faces competition from nearby submarkets such as Chino Hills, Diamond Bar, and Walnut. **Brokers cited crime perception and limited high-quality stock as challenges, but noted that freeway visibility and access are strong advantages for the Lanterman site.**
6. Tenants favor low-rise, modern buildings (2–3 stories) with good natural light, package A/C systems, and outdoor or shared amenities. Flexibility and comfort are key drivers of leasing.
7. **Brokers saw potential to leverage CPP’s engineering and tech programs to attract AI or software firms,** but suggested marketing primarily on location and design, with

academic proximity as a secondary appeal.

8. Very little new office has been built in the San Gabriel Valley since the early 2000's. Current rents don't justify new speculative projects, though high-quality, amenitized space could outperform the market.
9. Some tenants prefer ownership, while others seek long-term leases. Brokers suggested CPP could use its land cost advantage to offer competitive lease or ground-lease terms.
10. Overall, brokers view the area as undersupplied but cost-sensitive. A well-designed, visible, and flexible project at the Lanterman site could perform well if tailored to smaller tenants and priced competitively.

## E. RESIDENTIAL MARKET

---

KMA evaluated market conditions and demand factors for housing in the Market Area, the City and the County. A summary of this information is below with supporting data in Appendix 6 and Appendix 7.

### Existing Housing Stock

- An analysis of housing types in the City, both rental and ownership, indicates a housing mix profile that is less dense than the rest of the County, with an orientation towards detached, single-family homes (Chart E.1).<sup>25</sup>
- Between 2010 and 2022, the City's housing stock increased by nearly 8%.<sup>26</sup> The majority of new units built were detached, single-family homes (1,474 units), but **attached single-family housing was the fastest growing housing type in the City** (589 units, 19% increase), indicating increased levels of demand for more varied housing types including townhome and condominium-style development.
- Between 2010 and 2020 the share of renter-occupied housing units increased from 20% to 26%, concurrent with the steep rise in cost for ownership housing (page 31).
- Multifamily housing<sup>27</sup> makes up 30% of the City's housing stock. Approximately 90% of this housing is in the form of low-rise and garden apartments.<sup>28</sup>

## Rental Housing Market

- The 10-Mile Market Area, like the City, has a high share of 2-bedroom or larger units which make up approximately half of the total rental housing stock (Chart E.3).<sup>31</sup>

<sup>30</sup> Includes homes built in the last 2 years (2024-2025) in the 10-Mile Market Area

<sup>31</sup> Costar multifamily market report, East San Gabriel Valley submarket; Costar rental data, submarket and 10-mile Market Area.

Chart E.3 Rental Housing Stock by Bedroom, Market Area and City

Source: Costar

- In the last 10 years, Market Area rents have increased by 48% and City rents have increased by 40%. Rent growth has slowed in the last year to 1.4% compared with the pandemic and pre-pandemic average of 4.8% YOY.
- Average asking rents in the Market Area of \$2,219/month are 16% higher than rents in the City of \$1,914/month (Table E.3).
- **New multifamily projects in the Market Area command average asking rents of \$2,982, approximately 29% higher than the average for all Market Area units, due to their newer construction and higher level of amenities.<sup>32</sup>**

<sup>32</sup> Costar survey of 4 and 5 star multifamily properties built in last 5 years, 10-Mile Market Area.

**Chart E.4 PSF Rental Rates by Unit Type, City and Market Area**

Source: Costar

- A tight rental market is illustrated by the fact that **vacancy rates have not risen above 5.0% in the City or the greater Market Area since 2015.**<sup>33</sup>

Source: Costar

- Home value appreciation and sales volumes have slowed in LA County in recent years, a trend likely caused by rising mortgage rates, economic uncertainty, and wages that have not kept up with price growth and high inflation rates. Rising mortgage rates and concerns about affordability will continue to impact home sales in the future.
- Demand for housing in the region is being partially driven by in-migration from Los Angeles and Orange Counties where rental rates have become unaffordable for many households. **The Market Area's location on the eastern edge of LA County provides potential for more affordable housing than other parts of the County.**
- To provide context for the potential performance of a new rental residential project on the Site KMA surveyed eight comparable, high quality, recently constructed mixed-use and residential projects in the Market Area. The amenities, unit mix, rents and other salient details for these projects is summarized in the matrix on the following pages, with detailed project data provided in **Appendix 1**.

## F. INDUSTRIAL MARKET

KMA evaluated industrial market trends and lease rates in the Market Area and surrounding region. A summary of this information is below with supporting data in Appendix 5 – Table 1 through Table 7.

### Regional & Submarket Trends

- After averaging more than 10% YOY growth during the pandemic (2020 – 2022), industrial rents in the submarket<sup>38</sup> have started declining. Current asking rents of \$1.23/sf/month are down 6% from their 2023 peak of \$1.31/sf/month (Chart F.1).<sup>39</sup>
- Vacancy rates in the submarket are lower than the regional average at 4.9%.

Chart F.1. Avg Rents & Vacancy (Industrial) East San Gabriel Submarket & Inland Empire, 2018 – 2025

Source: Costar

- **High levels of demand are shown for industrial flex space (including R&D space)** which makes up less than 5% of total industrial space in the submarket and commands the highest asking rents of \$1.52/sf/month with average vacancy rates of 3% (Table F.1).

<sup>38</sup> Eastern San Gabriel Submarket includes the City of Pomona.

<sup>39</sup> Costar industrial rents Q3 2025 for Eastern San Gabriel Valley and surrounding submarkets.

Table F.1

Rents & Vacancies by Space Type			
Submarket			
	Asking Rent/SF/Mo.		Vacancy Rate
Logistics	\$	1.24	6.0%
Specialized Industrial	\$	1.13	1.2%
Flex	\$	1.52	3.0%
<b>Average</b>	<b>\$</b>	<b>1.23</b>	<b>4.9%</b>

Source: Costar

### Market Area – Existing Conditions

- Average asking rents in the Market Area are tracking with the submarket average at \$1.27/sf/month. Warehouse space constitutes the majority of industrial inventory (111MM square feet, or 65% of total space) and commands a lease rate of \$1.31/sf/month.
- **There is more than 380,000 square feet of industrial space under construction in the Market Area**, the majority of which is either warehouse (40%) or manufacturing (42%) space. Another 1.5MM square feet of industrial space is proposed (Table F.2).<sup>40</sup>
  - The majority of current development activity (over 300,000 SF) is taking place in the City of Industry in the vicinity of the Valley Boulevard corridor. Most proposed development is located along the 210 Freeway in Cities of Irwindale, San Dimas, Glendora and La Verne.

Table F.2

Industrial Space Proposed & Under Development (Q3 2025)			
10 Mile Market Area			
Space Type	SF Under Construction	SF Proposed	% of Total
Distribution	129,619	213,603	18%
Warehouse	38,445	739,741	40%
Manufacturing	219,690	584,652	42%
<b>Total</b>	<b>387,754</b>	<b>1,537,996</b>	

Source: Costar

<sup>40</sup> Costar Industrial Market Data; Retrieved October 2025.

- A survey of lease rates in the Market Area found an average lease rate of between \$1.07 and \$1.43/sf/month based on lease type<sup>41</sup>, which is comparable with the submarket average.

## Market Area – R&D Space

- There is 1.6MM SF of Research & Development (“R&D”) space in the Market Area, with a low overall vacancy rate of 4.0%. This space commands a rent premium of \$1.89/sf/month.
- **There is a relative lack of available R&D space in the immediate are around the Site apart from Innovation Way.** The bulk of R&D space in the Market Area is located along the 210-freeway corridor in the Cities of Las Dimas, La Verne, Claremont and Covina.
- As summarized in the Broker Interviews section on page 31, **the market for R&D product in the City is limited given that traditional R&D hubs (Irvine, El Segundo, and San Diego) capture most of the demand**, but brokers see some potential for CPP to attract R&D or engineering-based users through University-led partnerships.

## Industrial Demand Outlook

- Vacancy rates have been rising since their historically low levels during the pandemic. Additionally, broader economic trends such as declining imports to the region due to tariffs and lower projected retail spending will affect industrial space demand in the near to mid-term.
- **E-commerce and commercial logistics tenants continue to be the major drivers of demand for industrial space.** Warehouse space accounts for 40% of new and proposed construction in the Market Area as of Q3 2025.<sup>42</sup>
- The Market Area’s proximity to major population centers in Los Angeles and Orange Counties, and its access to major highways, likely make it an ideal location for logistics space including fulfillment and distribution centers.

---

<sup>41</sup> NNN (Triple Net) leases average \$1.07/sf/month while MG (Modified Gross) leases average \$1.43/sf/month.

<sup>42</sup> Costar Industrial Market Data, Retrieved October 2025.

## Broker Interviews – Industrial Market

KMA contacted several brokers active in the City and San Gabriel Valley market area. The salient points from these conversations are summarized below:

1. **After two years of recalibration, the San Gabriel Valley (SGV) industrial market is stabilizing and showing renewed activity.** The region currently has the lowest vacancy rate in Greater Los Angeles, and overall conditions are significantly healthier than a year ago.
2. Newer industrial product in the SGV averages around \$1.10 per square foot NNN per month, while the market area averages roughly \$0.95 NNN, reflecting a 15% discount relative to neighboring submarkets.
3. The SGV has a 3.6% direct vacancy and 4.3% overall vacancy, while the market area sits slightly higher at 4.7% direct and 5.6% overall. **Availability rates remain below regional averages, reflecting tight supply and limited new construction.**
4. **Third-party logistics and distribution users dominate demand, while light manufacturing and R&D tenants are limited.** Broker feedback indicated little to no current R&D activity, with most absorption coming from large-scale logistics firms.
5. There is no new industrial development underway in the area, and none expected in the near term. **Brokers cited strict local entitlement policies and the impacts of AB 98 as significant barriers to new construction.** Several owners have withdrawn land from the market due to entitlement uncertainty.
6. The City's industrial moratorium has severely constrained development. Brokers stated that several institutional investors and developers will not pursue projects in the area due to permitting challenges and political risk.
7. **Demand has shifted firmly toward modern distribution and high-clear industrial buildings exceeding 50,000 square feet.** Projects like Majestic Grand Crossing in the City of Industry are viewed as strong indicators of what performs best regionally.
8. The market for R&D product in the area is extremely limited. Traditional R&D hubs such as Irvine, El Segundo, and San Diego capture most of this demand. **While light industrial or hybrid space could perform well near CPP, R&D-specific projects are viewed as**

**high-risk with slow absorption.**

9. Brokers saw some potential for CPP to attract R&D or engineering-based users through partnerships and internships but noted that it would require long-term positioning and competitive pricing to draw tenants from North Orange County or the coastal markets.
10. Overall, brokers view light industrial or logistics uses as the highest and best use for the site. While R&D demand is limited, well-located, high-quality distribution product with freeway access could perform well if entitlement barriers are addressed.

## G. LODGING MARKET

KMA analyzed hotel market conditions in the submarket<sup>43</sup> and the County, including Annual Daily Rates (ADR) and Revenue per Available Room (RevPAR). A summary of findings is below, with the supporting data in Appendix 8 – Table 1 through Table 10.

- Hotel market demand in the submarket is growing at a healthy pace, as **average occupancy levels have nearly recovered following a 25% decline during the COVID-19 pandemic** and subsequent travel shutdowns (Chart H.1).<sup>44</sup>

Chart G.1 Hotel Market Metrics, Los Angeles East Submarket, 2015 – 2025

- While hotel revenue rates in the submarket have historically trailed behind rates in the rest of LA County (Chart H.2), **the submarket experienced the healthiest YOY growth in Q3 2025 compared with all other submarkets in the County**, with ADR growing 3.0% and RevPAR growing 7.7% since Q3 2024.
- Upper and Upper Midscale hotels in the submarket are experiencing very healthy demand, as occupancy is up 16% and RevPAR is up 24% over the last five years.

<sup>43</sup> Los Angeles East Submarket, as defined by Costar and which includes the City of Pomona.

<sup>44</sup> Costar, STR Hospitality Data. Retrieved October 2025.

Chart G.2 Historic RevPAR, Los Angeles East Submarket & LA County, 2015 – 2025

- Demand levels in the submarket are projected to fully recover over the next five years, with rising ADR and healthy occupancy levels leading to a sustained increase in RevPAR (Table H.1)

Table G.1

**Los Angeles East Submarket Projection**  
All Hotels

	Occupancy	ADR	RevPAR
2025	70.9%	\$136	\$96
2026	70.1%	\$142	\$100
2027	71.1%	\$147	\$105
2028	72.7%	\$151	\$110
2029	73.4%	\$154	\$113
% Change	0.9%	3.2%	4.0%

- **The strength of local industries, including logistics and warehousing, will likely help to drive a portion of the demand for higher quality select-service hotels frequently used by business travelers.** This is particularly true as the area dedicated to office space in existing and future industrial/warehousing buildings expands into the future.
- Given existing conditions, KMA estimated hotel demand in the submarket (Appendix 7 – Table 10), showing **potential demand for up to 2,000 hotel rooms in the market area**

**over the next 15 years,**<sup>45</sup> reflecting the potential to capture Upper and Upper Midscale hotel demand from business travel spurred by office space within industrial and warehouse buildings in the region, the planned expansion of the Ontario Convention Center, the development of the Brightline Station in Rancho Cucamonga and continued growth of demand at the Ontario Airport. Much of this demand will likely be satisfied by development near the Airport and Convention Center; consequently, opportunities at the Site are likely modest.

- There are currently four hotels under construction in the Market Area consisting of 494 rooms, representing a 4.6% increase to the existing room inventory of 10,700 rooms. Most of this new development is occurring near the Ontario airport<sup>46</sup>, and will capture a portion of any projected demand for the Upper and Upper Midscale hotels in the Market Area.

---

<sup>45</sup> STR and KMA.

<sup>46</sup> 318 rooms are under construction near the Ontario airport as of Q3 2025, including Home2 Suites by Hilton, Hyatt House, and Hyatt Place.
