Making the Grand Canyon, Part 1

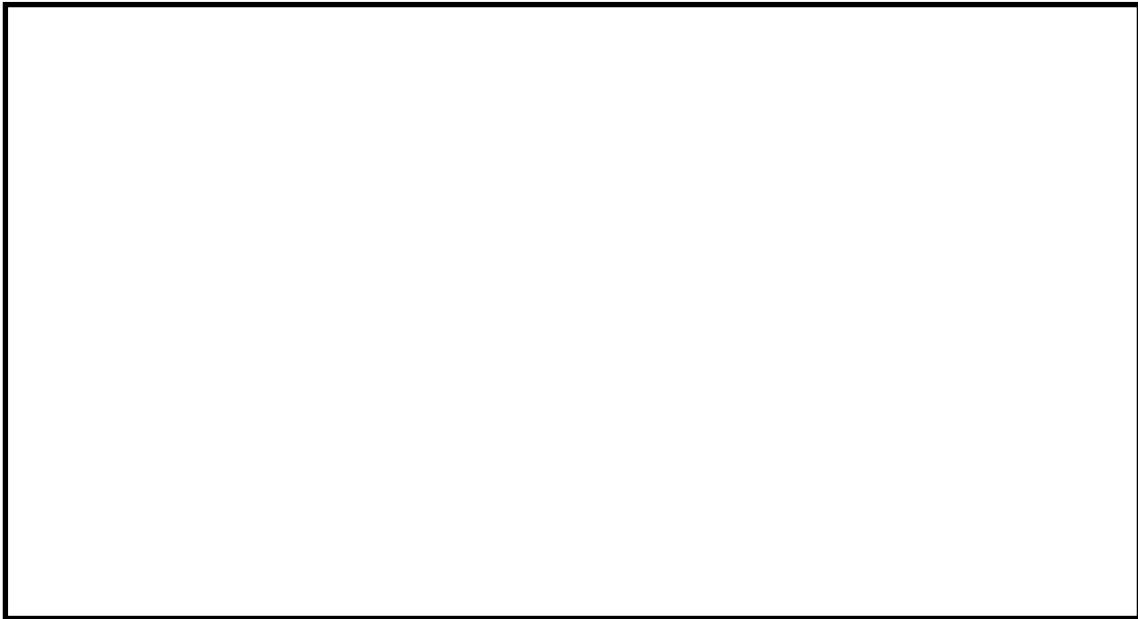

We can't bring the Grand Canyon into our classroom. So we'll use a model to help us learn more about what causes the canyon to change.

Your Observations

Before we start, write down at least two things you observe about the model.

I observe _____

Draw a picture of the model.

Your Predictions

What do you think will happen when it begins to “rain” on our model? Write your ideas below.

Next, we’ll watch what happens to our model when rain falls on it.

Your Observations

Write down at least two things you observed when the rain fell on the model.

I observed _____

Draw a picture of the model after the rain fell on it.
