

Daily Reflections—Day 3
Variation in Traits

Name: _____

What new idea or insight did you have today related to strategy 4 (analyzing and interpreting data and observations) and strategy 5 (constructing explanations and arguments)?

What ideas do strategies 4 and 5 give you about things to try or change in your science teaching?

Answer one of these questions: (1) What important science idea are you taking away from our content deepening work today? Remember to state the idea in a complete sentence. (2) What question do you have about trait variation, survival of individuals, the impact of different environments, or changes in populations over time (i.e., something you're unclear or wonder about)?
