Counting Seeds

1	Generation	0	1	2	3	4
2	Number of plants	*				
3	Number of fruits per plant (This number will be the same each time.)	*				
4	Total number of fruits in this generation (= row 2 x row 3)	1				
5	Number of seeds per fruit (This number will be the same each time.)					
6	Total number of seeds in this generation (= row 4 x row 5)					
7	If all seeds survive, how many will make it to the next generation? (Use this value in row 2 for the next generation.)
