Cartoon Summary of Mice in a Lava Environment

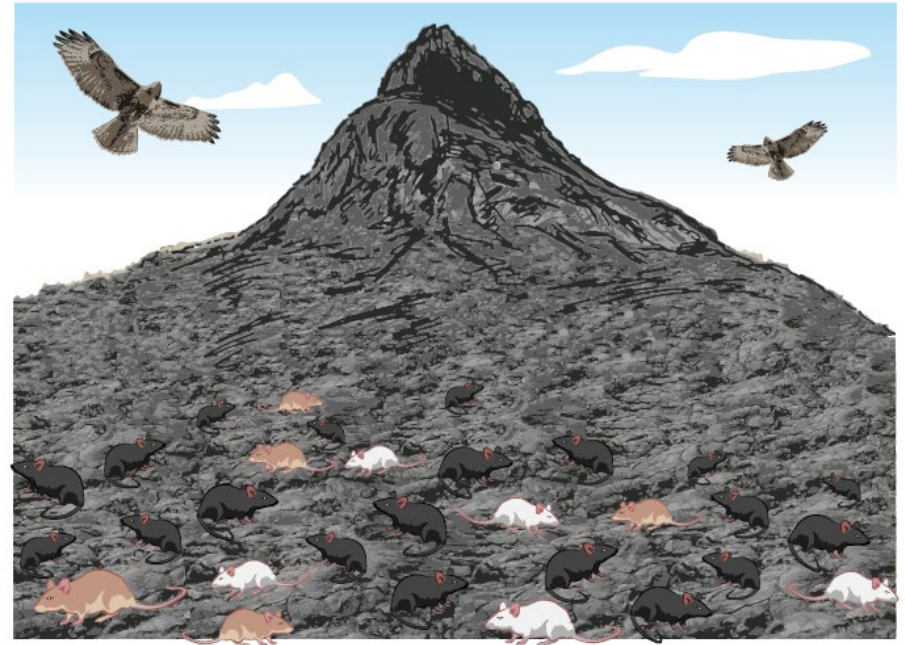

The volcano erupted! The environment has changed. Which mice will survive in the new environment of hardened lava?

Box 1: The fur colors of mice in the new lava environment are _____, _____, and _____.

Box 2: The hawks eat more of the mice that have these fur colors: _____ and _____.

In the picture below, draw an X over **eight mice** that the hawks are most likely to eat in the new environment. Write the fur colors of those mice in the blanks above.

Box 3: Now, **most** of the mice that survived have this fur color: _____.

In the space below, draw **two adult mice** that have this variation of fur color. (You may draw two big circles if you can't draw mice.)

Box 4: When the two mice in box 3 have babies, the babies will have this fur color: _____.
So the next generation of mice will have _____ fur.

In the space below, draw **four baby mice** that have this variation of fur color. (You may draw four small circles if you can't draw baby mice.)
