

# Toy Car

Think about the forces acting on the toy car in each frame and complete the table.

	What's Going On	Object Experiencing Force	Object(s) Causing Force	Contact or Non-contact?	Direction of Change in Motion
	A toy car initially at rest begins to move when a hand pushes it from the left.				
	The car rolls over the edge of the table and falls toward the floor.				
	The car strikes the floor.
