

# RESPeCT Summer Institute Professional Development Leader Guide (PDLG)

Grade Level	3	Day	5	STeLLA Strategy	Science Content Storyline Lens (SCSL) Strategy A: Identify One Main Learning Goal	Subject Matter Focus	Forces
Focus Questions	<ul style="list-style-type: none"> <li>• What is the Science Content Storyline Lens (SCSL)?</li> <li>• Why is one main learning goal essential for science content storyline coherence?</li> <li>• What makes something start to move?</li> <li>• How can we draw the forces pushing or pulling an object when we can't see them?</li> </ul>						
Main Learning Goals	<p>Participants will understand the following:</p> <ul style="list-style-type: none"> <li>• Research from the TIMSS Video Study of Science Teaching emphasizes the importance of creating science content storylines that support students in making links between classroom activities and science ideas.</li> <li>• The SCS Lens and strategies empower teachers to think in new ways about planning and teaching science lessons.</li> <li>• Identifying and focusing on one main learning goal in a lesson is an important strategy for creating a coherent science content storyline.</li> <li>• A <i>force</i> is a push or pull that involves an interaction between two objects and causes a change in an object's motion.</li> <li>• Arrows can be used to represent the forces acting on an object. Arrows begin at the center of an object and point in the direction of the respective forces.</li> <li>• A <i>net force</i> is the sum of all of the forces acting on an object.</li> <li>• A change in an object's motion in the same direction as the net force is called <i>acceleration</i>.</li> <li>• Weight refers to the pull of gravity on an object toward Earth's center.</li> <li>• When one object is resting on another object, the object underneath exerts an upward force called the <i>normal force</i>. This force keeps the two touching objects separated from each other.</li> </ul>						
Preparation		Materials			Videos		
<b>Daily Setup Tasks</b> <ul style="list-style-type: none"> <li>• Check that video clips are correctly linked to PowerPoint (PPT) slides.</li> <li>• Set up PowerPoint.</li> <li>• Make sure video clips play correctly with good sound.</li> <li>• Arrange furniture and food.</li> <li>• Arrange participant materials.</li> <li>• Put up posters and charts.</li> </ul> <b>Planning and Preparation Tasks</b> <ul style="list-style-type: none"> <li>• Study the PDLG, PowerPoint slides (PPTs), video clips, and handouts. Make changes to PPTs if needed.</li> </ul>		<b>Posters and Charts</b> <ul style="list-style-type: none"> <li>• STeLLA Framework and Strategies poster</li> <li>• Day-5 Agenda (chart)</li> <li>• Norms for Working Together (chart)</li> <li>• Day-5 Focus Questions (chart)</li> <li>• Effective Science Teaching chart (from day 1)</li> <li>• Strategy charts from days 1–4 (STL strategies 1–6)</li> <li>• Parking Lot poster</li> </ul> <b>Handouts in RESPeCT PD Binder Front Pocket</b> <ul style="list-style-type: none"> <li>• Z-fold summary chart: Science Content Storyline Lens Strategies (blank)</li> </ul>			<ul style="list-style-type: none"> <li>• Video clips from one Forces lesson: <ul style="list-style-type: none"> <li>• <a href="#">Video Clip 5.1</a>: Torres classroom (beginning of lesson); 5.1_mspcp_gr.3.forces_torres_L2_c1-2</li> <li>• <a href="#">Video Clip 5.2</a>: Torres classroom (during lesson); 5.2_mspcp_gr.3.forces_torres_L2_c3</li> <li>• <a href="#">Video Clip 5.3</a>: Torres classroom (end of lesson); 5.3_mspcp_gr.3.forces_torres_L2_c4</li> </ul> </li> </ul>		

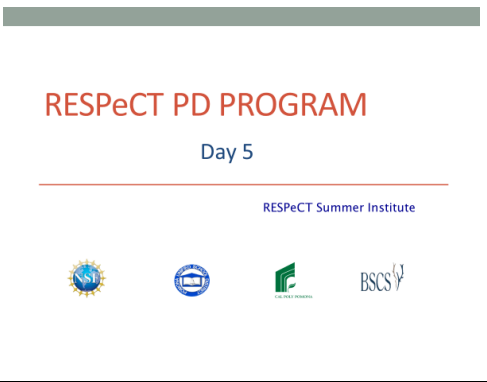

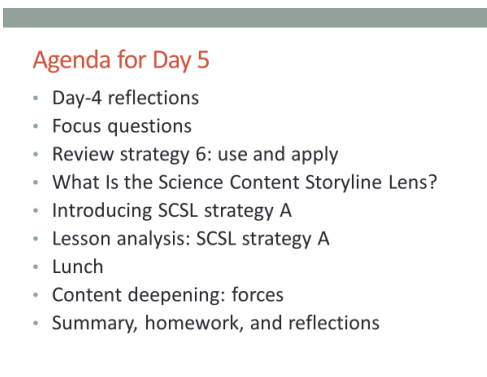

<ul style="list-style-type: none"> <li>• Review the reflections from day 4 and create a summary slide.</li> <li>• Watch video clips and anticipate participant responses.</li> <li>• Prepare charts for the day's agenda and focus questions.</li> <li>• Review the activities for Forces lessons 1a/b and 2a/b in the lesson plans binder.</li> <li>• Content deepening: <ul style="list-style-type: none"> <li>• Read sections 4 (Net Forces) and 5 (Tracking Changes in Motion with Cartoons) in the content background document.</li> </ul> </li> </ul>	<p><b>Handouts in RESPeCT PD Binder, Day 5</b></p> <ul style="list-style-type: none"> <li>• 5.1 Analysis Guide A: Identifying One Main Learning Goal (2 copies)</li> <li>• 5.2 Practice Identifying One Main Learning Goal</li> <li>• 5.3 Transcript for Video Clip 5.1</li> <li>• 5.4 Transcript for Video Clip 5.2</li> <li>• 5.5 Transcript for Video Clip 5.3</li> <li>• 5.6 Tree Map (from Forces lesson 1a)</li> <li>• 5.7 What Are the Forces? ## DAY 5 SESSION OUTLINE

Time	Activities	Purpose
8:00–8:25 25 min	<b>Getting Started: Housekeeping, Agenda, Day-4 Reflections, Norms, Focus Questions</b>	<ul style="list-style-type: none"> <li>• Build community by sharing participants' reflections from day 4.</li> <li>• Set the stage for a day of learning.</li> </ul>
8:25–8:40 15 min	<b>Review of Strategy 6: Use and Apply</b>	<ul style="list-style-type: none"> <li>• Review STL strategy 6 (use and apply) and deepen participants' understandings of this strategy and the Variation in Traits lesson content.</li> </ul>
8:40–8:55 15 min	<b>What Is the Science Content Storyline Lens (SCSL)?</b>	<ul style="list-style-type: none"> <li>• Help participants develop strong initial understandings of the Science Content Storyline Lens.</li> </ul>
8:55–10:10 75 min (Includes 10-min break)	<b>Introducing SCSL Strategy A</b>	<ul style="list-style-type: none"> <li>• Clarify and deepen participants' understandings of SCSL strategy A: Identify one main learning goal.</li> <li>• Clarify the distinctions between science ideas, student ideas, and main learning goals.</li> </ul>
10:10–12:00 110 min	<b>Lesson Analysis: SCSL Strategy A</b>	<ul style="list-style-type: none"> <li>• Use lesson analysis of classroom videos to better understand SCSL strategy A.</li> <li>• Deepen participants' science-content knowledge of forces through lesson analysis.</li> </ul>
12:00–12:45 45 min	<b>LUNCH</b>	
12:45–3:10 145 min (Includes 10-min break)	<b>Content Deepening: Forces</b>	<ul style="list-style-type: none"> <li>• Deepen participants' understandings of science ideas about forces and motion by conducting investigations from Forces lessons 1a/b and 2a/b.</li> <li>• Expand participants' science-content knowledge of forces and motion related to teacher learning goals by exploring the concepts of weight/gravity, normal force, net force, and acceleration.</li> </ul>
3:10–3:30 20 min	<b>Wrap-Up: Summary, Homework, and Reflections</b>	<ul style="list-style-type: none"> <li>• Summarize and reflect on key ideas from today's learning, including the Science Content Storyline Lens, STeLLA strategy A, and the Forces science content.</li> </ul>

**DAY 5**

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
<p>8:00–8:25 25 min</p> <p><b>Getting Started</b></p> <p>Slides 1–8</p>	<p><b>Purpose</b></p> <ul style="list-style-type: none"> <li>• Build community by sharing participants’ reflections from day 4.</li> <li>• Set the stage for a day of learning.</li> </ul> <p><b>What Participants Do</b></p> <ul style="list-style-type: none"> <li>• Review the day’s agenda.</li> <li>• Discuss the reflections from day 4.</li> <li>• Review and discuss progress on the RESPeCT program norms.</li> <li>• Read the focus questions for day 5.</li> </ul> <p><b>Posters and Charts</b></p> <ul style="list-style-type: none"> <li>• STeLLA Framework and Strategies poster</li> <li>• Day-5 Agenda (chart)</li> <li>• Norms for Working Together (chart)</li> <li>• Day-5 Focus Questions (chart)</li> </ul>	 <p>RESPeCT PD PROGRAM</p> <p>Day 5</p> <p>RESPeCT Summer Institute</p>  <p>Agenda for Day 5</p> <ul style="list-style-type: none"> <li>• Day-4 reflections</li> <li>• Focus questions</li> <li>• Review strategy 6: use and apply</li> <li>• What Is the Science Content Storyline Lens?</li> <li>• Introducing SCSL strategy A</li> <li>• Lesson analysis: SCSL strategy A</li> <li>• Lunch</li> <li>• Content deepening: forces</li> <li>• Summary, homework, and reflections</li> </ul>	<p><b>Display Slide 1.</b> RESPeCT PD Program (5 min)</p> <p>a. Take care of any housekeeping issues.</p> <p><b>Display Slide 2.</b> Agenda for Day 5 (2 min)</p> <p>a. Talk through the agenda for the day.</p>

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
			<p><b>Display Slide 3.</b> Trends in Reflections (5 min)</p> <p>a. Give participants time to review your feedback on their reflections from day 4 and offer reactions, comments, or follow-up questions.</p>
			<p><b>Display Slide 4.</b> Norms for Working Together: The Basics (5 min)</p> <p>a. Review the norms as a group.</p> <p>b. <b>Ask:</b> “Any comments or suggested changes? How are we doing with applying these norms?”</p>

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process																						
		<p><b>Norms for Working Together: The Heart</b></p> <p><b>Purpose:</b> Build trust and develop a productive study group for all participants.</p> <p><b>The Heart of RESPeCT Lesson Analysis and Content Deepening</b></p> <ul style="list-style-type: none"> <li>• Keep the goal in mind: analysis of teaching to improve student learning.</li> <li>• Share your ideas, uncertainties, confusion, disagreements, questions, and good humor. All points of view are welcome.</li> <li>• Expect and ask questions to deepen everyone’s learning; be constructively challenging.</li> <li>• Listen carefully; seek to understand other participants’ points of view.</li> </ul>	<p><b>Display Slide 5.</b> Norms for Working Together: The Heart (5 min)</p> <p>a. Review these norms as a group.</p> <p>b. <b>Ask:</b> “Any comments or suggested changes? Which of these norms do you think we could get better at applying individually and as a group?”</p> <p>c. <b>Remind participants:</b> “These norms will become increasingly important during the Summer Institute and throughout the academic year as we analyze one another’s classroom videos and learn together.”</p>																						
		<p><b>STeLLA Conceptual Framework</b></p> <p>Learning to analyze science teaching through two lenses</p> <p>allows you to learn and use strategies for more effective science teaching.</p>  <table border="1" data-bbox="932 1003 1226 1252"> <thead> <tr> <th>SCIENCE TEACHING</th> <th>SCIENCE TEACHING</th> </tr> </thead> <tbody> <tr> <td><b>STRATEGIES TO REVEAL, SUPPORT, AND CHALLENGE STUDENT THINKING</b></td> <td><b>STRATEGIES TO CREATE A COHERENT SCIENCE CONTENT STORYLINE</b></td> </tr> <tr> <td>1. Highlight the SCSL strategies on the slide.</p>
SCIENCE TEACHING	SCIENCE TEACHING																								
<b>STRATEGIES TO REVEAL, SUPPORT, AND CHALLENGE STUDENT THINKING</b>	<b>STRATEGIES TO CREATE A COHERENT SCIENCE CONTENT STORYLINE</b>																								
1. Ask questions to elicit student ideas and predictions.	A. Identify one main learning goal.																								
2. Ask questions to probe student ideas and predictions.	B. Set the purpose with a focus question or goal statement.																								
3. Ask questions to challenge student thinking.	C. Select activities that are matched to the learning goal.																								
4. Engage students in analyzing and interpreting data and observations.	D. Select content representations and models matched to the learning goal and engage students in their use.																								
5. Engage students in constructing explanations and arguments.	E. Sequence key science ideas and activities appropriately.																								
6. Engage students in using and applying new science ideas in a variety of ways and contexts.	F. Make explicit links between science ideas and activities.																								
7. Engage students in making connections by synthesizing and summarizing key science ideas.	G. Link science ideas to other science ideas.																								
8. Engage students in communicating in scientific ways.	H. Highlight key science ideas and focus question throughout.																								
	I. Summarize key science ideas.																								

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
		<p><b>Focus for the Week</b></p> <ul style="list-style-type: none"> <li>• Content area 2: forces</li> <li>• Science Content Storyline Lens <ul style="list-style-type: none"> <li>• Strategies A, B, C, D, F, G, H, and I</li> <li>• Video-based lesson analysis (Forces lessons)</li> </ul> </li> <li>• Forces lesson plans review (last day)</li> <li>• Academic-year schedule (last day) <ul style="list-style-type: none"> <li>• Video recording</li> <li>• Study-group sessions</li> </ul> </li> </ul>	<p><b>Display Slide 7.</b> Focus for the Week (1 min)</p> <p>a. “This week we’ll focus on a new content area: forces. We’ll also examine the Science Content Storyline Lens strategies and the Forces lessons you’ll be teaching in the fall, analyze video clips of those lessons, and deepen your science-content knowledge related to the lesson plans.”</p> <p>b. “On the last day of the RESPeCT PD program, we’ll review the lesson plans and the schedule for the academic year.”</p> <p>c. “You may notice that we skip strategy E: Sequence key science ideas and activities appropriately. This strategy will be addressed during the school year as you teach the STeLLA lesson plans and analyze how they’re sequenced within each lesson and across lessons.”</p>
		<p><b>Today’s Focus Questions</b></p> <ol style="list-style-type: none"> <li>1. What is the Science Content Storyline Lens (SCSL)?</li> <li>2. Why is one main learning goal essential for science content storyline coherence?</li> <li>3. What makes something start to move?</li> <li>4. How can we draw the forces pushing or pulling an object when we can’t see them?</li> </ol>	<p><b>Display Slide 8.</b> Today’s Focus Questions (1 min)</p> <p>a. Introduce the focus questions that will guide today’s session.</p>

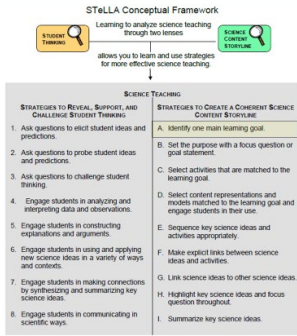

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
<p>8:25–8:40 15 min</p> <p><b>Review of Strategy 6: Use and Apply</b></p> <p>Slides 9–10</p>	<p><b>Purpose</b></p> <ul style="list-style-type: none"> <li>Review STL strategy 6 (use and apply) and deepen participants’ understandings of this strategy and the Variation in Traits lesson content.</li> </ul> <p><b>Content</b></p> <ul style="list-style-type: none"> <li>STL strategy 6 engages students in using and applying new science ideas in a variety of ways and contexts.</li> </ul> <p><b>What Participants Do</b></p> <ul style="list-style-type: none"> <li>Take a multiple-choice quiz to check their understanding of STL strategy 6.</li> <li>Work on a scenario that engages them in using and applying strategy 6 and the Variation in Traits lesson content.</li> </ul> <p><b>Supplies</b></p> <ul style="list-style-type: none"> <li>Science notebooks</li> </ul>	<p><b>Check Your Understanding of Strategy 6</b></p> <p>Jot down your responses to this multiple-choice quiz:</p> <ol style="list-style-type: none"> <li>Use-and-apply tasks are used [before/during/after] new science ideas are introduced.</li> <li>For difficult content ideas, students might need to practice applying new ideas in [one/two/many] different contexts.</li> <li>[True/false]: Use-and-apply questions or activities are used primarily for student assessment at the end of a unit.</li> <li>It’s appropriate for teachers to ask [elicit/probe/challenge] questions during a use-and-apply activity.</li> <li>Teachers should [never/judiciously/always] tell students about science ideas they are missing or stating inaccurately.</li> </ol> <p><b>Use and Apply Your Content Deepening Knowledge</b></p> <p>Climate change is affecting environmental conditions around the globe. How might an overall increase in temperatures or a change in rainfall patterns impact trait variation among the plants and animals living in a particular area?</p> <p>To answer this question, use and apply what you learned last week about trait variation in a population of living things in a particular area.</p>	<p><b>Display Slide 9.</b> Check Your Understanding of Strategy 6 (7 min)</p> <p><b>Note:</b> Display this slide only if it wasn’t used on day 4.</p> <ol style="list-style-type: none"> <li>“To check your understanding of STL strategy 6, jot down your responses to this multiple-choice quiz in your science notebooks.”</li> <li>Have participants discuss their answers either in pairs or as a group. (If time is short, just read the answers aloud.)</li> </ol> <p><b>Answer key:</b></p> <ol style="list-style-type: none"> <li>After</li> <li>Many</li> <li>False</li> <li>Challenge (and probe)</li> <li>Judiciously (defined as “good or discriminating judgment; wise, sensible, or well advised”)</li> </ol> <p><b>Display Slide 10.</b> Use and Apply Your Content Deepening Knowledge (8 min)</p> <ol style="list-style-type: none"> <li><b>Turn and Talk (4 min):</b> “Discuss the use-and-apply question on the slide with a partner, and be ready to share your ideas with the group.”</li> </ol> <p><b>Note:</b> Alternatively, you might want to divide the group in half and have one group consider possible changes in plant traits and the other group consider possible changes in animal traits.</p> <ol style="list-style-type: none"> <li><b>Whole-group share-out (4 min):</b> “What ideas do you have for answering this question?”</li> </ol> <p><b>Note:</b> One of the main learning goals of the</p>

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
			<p>Variations in Traits lesson sequence is recognizing that changing environmental conditions can impact trait variation in a population of living things. Climate change is currently impacting environmental conditions in a variety of ways across the globe. This use-and-apply question specifically relates climate change to an increase in temperatures or a change in rainfall (more or less) in an area.</p> <p><b>Ideal responses:</b> There are many possible responses to the use-and-apply questions, but each should include logical reasoning that suggests a plant or animal would have a greater chance of surviving and passing on its characteristics to the next generation.</p> <p><b>Changes in plant traits:</b></p> <ul style="list-style-type: none"> <li>• Plants with smaller leaves might lose less moisture in higher temperatures than plants with larger leaves, so they might have a greater chance of surviving and producing seeds.</li> <li>• Plants with leaf surfaces that are slightly waxy or hairy might hold moisture better than plants without such protection. Plants with these characteristics might have a greater chance of surviving and reproducing in higher temperatures.</li> </ul> <p><b>Changes in animal traits:</b></p> <ul style="list-style-type: none"> <li>• A population of animals that currently have very thick fur might change over time and grow less fur or shorter fur if overheating caused death among animals with the thickest fur prior to reproducing.</li> <li>• If greater changes in climate cause an area to receive less rainfall, individuals that retain moisture rather than sweating profusely may have a survival advantage.</li> <li>• As in the example of Darwin’s finches, if there is less rainfall, plants may produce seeds with harder shells. Birds with longer beaks might have</li> </ul>

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
			a greater ability to crack the harder shells and would have a survival advantage because they're able to access this food supply. Over time, beak length within this population may increase.
<p>8:40–8:55 15 min</p> <p><b>What Is the Science Content Storyline Lens (SCSL)?</b></p> <p>Slides 11–13</p>	<p><b>Purpose</b></p> <ul style="list-style-type: none"> <li>• Help participants develop strong initial understandings of the Science Content Storyline Lens.</li> </ul> <p><b>Content</b></p> <ul style="list-style-type: none"> <li>• A science content storyline brings coherence within and across science lessons.</li> </ul> <p><b>What Participants Do</b></p> <ul style="list-style-type: none"> <li>• Write about and discuss their typical process of planning science lessons.</li> <li>• Discuss their reading about the definition of a science content storyline.</li> <li>• Review and discuss the TIMSS (Trends in Mathematics and Science Study) research basis for the Science Content Storyline Lens.</li> </ul> <p><b>Posters and Charts</b></p> <ul style="list-style-type: none"> <li>• STeLLA Framework and Strategies poster</li> </ul> <p><b>PD Resources</b></p> <ul style="list-style-type: none"> <li>• STeLLA strategies booklet</li> </ul>	<p><b>Planning Science Lessons: Quick Write</b></p> <p>What is generally your thinking process when you plan your science lessons?</p> <p>Be prepared to share your ideas with the group.</p>	<p><b>Display Slide 11.</b> Planning Science Lessons: Quick Write (6 min)</p> <p><b>Note:</b> This activity is a lead-in for thinking about specific SCSL strategies. When planning science lessons, are participants thinking primarily about (1) SCSL issues, such as learning goals, (2) student misconceptions (an STL issue), which is a great start but doesn't include SCSL strategies, or (3) activities and/or classroom management and timing issues?</p> <p>a. <b>Individuals:</b> Direct participants to take 2–3 minutes to write down the key things they think about when planning science lessons.</p> <p>b. <b>Whole group:</b> Ask participants to share their reflections with the group.</p> <p>c. <b>Tell participants:</b> “The Science Content Storyline Lens strategies should provide some new or additional ways of thinking about planning your science lessons.”</p>

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process																				
		<p style="text-align: center;"><b>Lesson Analysis: Focus Question 1</b></p> <p>What is the Science Content Storyline Lens (SCSL)?</p> <ul style="list-style-type: none"> <li>• What is a science content storyline, and why is it important?</li> <li>• What is challenging about developing a science content storyline?</li> </ul>	<p><b>Display Slide 12.</b> Lesson Analysis: Focus Question 1 (7 min)</p> <p>a. <b>Small groups:</b> Direct half the group to focus on the first bulleted question on the slide, and the other half to focus on the second. Allow groups 2 minutes to think about their assigned questions as they review “Introduction to the Science Content Storyline Lens” in the STeLLA strategies booklet.</p> <p>b. <b>Whole group:</b> Have each group share their ideas and responses for these questions.</p> <p>c. As you listen to participants, make sure that what they’re saying is consistent with the strategies booklet. If you aren’t sure they’re interpreting the text accurately, ask them to identify the specific text they’re drawing from.</p>

			and clarifying this distinction.”
		<p><b>A Main Learning Goal Is ...</b></p> <ul style="list-style-type: none"> <li>• A big science idea that you want students to learn</li> <li>• A big idea that shows the relationship among science ideas</li> <li>• The focus of the lesson (or series of lessons)</li> <li>• Stated in a complete sentence (for planning purposes)</li> <li>• Stated by the teacher, a student, a text, or a multimedia resource</li> <li>• A support for teacher planning</li> </ul>	<p><b>Display Slide 17.</b> A Main Learning Goal Is ... (1 min)</p> <p>a. “This slide lists some key ideas about the definition of a main learning goal.”</p> <p>b. Read through the ideas.</p> <p>c. <b>Emphasize:</b> “Notice the parenthetical reference to ‘lessons’ in the third bullet point. Each lesson should have only one main learning goal, but you might need two or more lessons to help students accomplish a difficult goal. So it’s often necessary to spend more than one lesson on a specific learning goal.”</p>
		<p><b>A Main Learning Goal Is NOT ...</b></p> <ul style="list-style-type: none"> <li>• A topic or phrase</li> <li>• An activity</li> <li>• A question</li> <li>• A performance task or objective</li> <li>• A supporting detail, definition, or fact</li> <li>• A student misconception or idea that isn’t scientifically accurate</li> </ul>	<p><b>Display Slide 18.</b> A Main Learning Goal Is NOT ... (1 min)</p> <p>a. Review what is <b>not</b> considered a main learning goal.</p>

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
		<p><b>Definitions: One Main Learning Goal and Science Ideas</b></p> <ol style="list-style-type: none"> <li>1. Read these sections in the STeLLA strategies booklet: (1) STeLLA Strategy A: Identify One Main Learning Goal, and (2) Student Ideas and Science Ideas Defined.</li> <li>2. Based on these readings, what are the differences between a main learning goal and a science idea?</li> </ol>	<p><b>Display Slide 19.</b> Definitions: One Main Learning Goal and Science Ideas (10 min)</p> <ol style="list-style-type: none"> <li>a. Have participants locate these two readings in the strategies booklet: (1) STeLLA Strategy A: Identify One Main Learning Goal, and (2) Student Ideas and Science Ideas Defined.</li> <li>b. “After you read these sections in the strategies booklet, we’ll discuss the differences between a science idea and a main learning goal.”</li> <li>c. <b>Individuals (3 min):</b> Give participants time to read the specified sections in the strategies booklet.</li> <li>d. <b>Whole group (7 min):</b> Discuss the question on the slide.</li> <li>e. <b>Emphasize:</b> “While you might incorporate several science ideas that support the main learning goal of a lesson, be careful not to plan an ‘all about’ lesson with too many different science ideas that will likely come across to students as a bunch of disconnected facts to be memorized.”</li> </ol>
		<p><b>Practice Identifying Student Ideas and Science Ideas</b></p> <p>Identify any student ideas and science ideas in this list:</p> <ol style="list-style-type: none"> <li>1. Objects in motion slow down when they run out of force.</li> <li>2. <i>Gravity</i> is a force that attracts or pulls objects toward Earth.</li> <li>3. Friction</li> <li>4. If an object isn’t moving, there are no forces acting on it.</li> <li>5. If multiple forces act in the same direction, they can be added together. If multiple forces act in opposite directions, they can be subtracted.</li> <li>6. <i>Friction</i> is a force that pushes or pulls in the opposite direction of an object’s motion.</li> <li>7. What causes a moving object to stop moving?</li> </ol>	<p><b>Display Slide 20.</b> Practice Identifying Student Ideas and Science Ideas (5 min)</p> <ol style="list-style-type: none"> <li>a. “Next, we’ll practice identifying student ideas and science ideas just to make sure you understand the way we’re defining these terms.”</li> </ol> <p><b>Note:</b> As needed, refer participants to the section in the strategies booklet where student ideas are defined (Student Ideas and Science Ideas Defined).</p> <ol style="list-style-type: none"> <li>b. <b>Individuals:</b> “First, identify examples of <b>science</b></li> </ol>

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
			<p><b>ideas</b> on the slide. If you need help, refer to the document in your lesson plans binders titled Common Student Ideas about Forces and Motion. Then identify examples of <b>student ideas</b> on the slide.”</p> <p>c. <b>Whole group:</b> Discuss participants’ responses and the correct answers (see answer key).</p> <p><b>Answer key:</b></p> <ol style="list-style-type: none"> <li>1. Student idea (common but incorrect)</li> <li>2. Science idea (complete sentence and scientifically accurate)</li> <li>3. Neither a science idea nor a student idea (a topic, not a complete idea)</li> <li>4. Student idea (common but incorrect)</li> <li>5. Science idea (complete sentence and scientifically accurate)</li> <li>6. Science idea (complete sentence and scientifically accurate)</li> <li>7. Neither a science idea nor a student idea (a topic, not a complete idea)</li> </ol>
		<p style="background-color: #d3d3d3; padding: 5px;"><b>Practice Identifying Student Ideas and Science Ideas in a Class Discussion</b></p> <p>Identify <b>one student idea</b> and <b>one science idea</b> in this class discussion:</p> <p>T: What are the forces acting on you when you jump?  S: Gravity.  T: Can you say more? What does gravity do?  S: It makes you move when you jump.  T: Gravity causes you to move up?  S: Uh, I think so.  SN: No. Your feet push on the floor, and that force makes you go up. Gravity pulls you back down.  SN: Yeah! Your pushing on the floor has to be greater than the pull of gravity, or you won't go up. Think about the arrows and how big they are. If gravity is greater, you won't move. If your push is greater you'll move.  T: Why do you come back down?  SN: Because you ran out of the up force, and gravity took over and pulled you back down.</p>	<p><b>Display Slide 21.</b> Practice Identifying Student Ideas and Science Ideas in a Class Discussion (5 min)</p> <p>a. “It’s a little trickier to recognize student ideas and science ideas in class discussions because students sometimes give only one- or two-word answers to teacher questions. But if you link the teacher’s question with a student’s response, you can sometimes find a science idea or a student idea.”</p> <p><b>Note:</b> In the RESPeCT PD program, we encourage students to speak in complete sentences as much as possible.</p>

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
			<p>b. "Let's practice linking the teacher's question with student responses in the sample discussion on the slide."</p> <p>c. <b>Pairs:</b> "Work with a partner to see if you can identify one student idea and one science idea in this discussion."</p> <p>d. <b>Whole-group share-out:</b> Have participants share the ideas they identified in the sample discussion. Then review the answers (see answer key).</p> <p>e. <b>Emphasize:</b> "Here's some food for thought: To make student thinking more visible, why not require students to speak in complete sentences during classroom discussions about science ideas?"</p> <p><b>Answer key:</b></p> <ul style="list-style-type: none"> <li>• <i>Student ideas/misconceptions:</i> <ul style="list-style-type: none"> <li>• Gravity (a word, not an idea)</li> <li>• Gravity makes you move up when you jump.</li> <li>• When you run out of the up force, gravity takes over and pulls you back down.</li> </ul> </li> <li>• <i>Science ideas:</i> <ul style="list-style-type: none"> <li>• The force that pushes you up when you jump comes from your feet pushing on the floor.</li> <li>• When you jump, gravity pulls you back down.</li> <li>• To leave the ground when you jump, the force of your feet pushing on the floor must be greater than the pull of gravity.</li> </ul> </li> </ul>

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
		<p><b>Science Ideas That Support the Main Learning Goal</b></p> <p><b>Main learning goal:</b> When bumps on the surfaces of two objects touch, they push against each other, creating a force called <b>friction</b>. Friction is the reason moving objects on Earth eventually slow down and stop.</p> <p><b>Supporting ideas:</b></p> <ul style="list-style-type: none"> <li>• Most surfaces are uneven or have bumps, even surfaces that seem very smooth.</li> <li>• Two surfaces interact when an object is in motion (e.g., a tire and the road, a shoe and the floor, a soccer ball and the grass). Surfaces also interact in fluids like water and air.</li> <li>• <b>Friction</b> is a force that pushes in the opposite direction of an object's motion.</li> <li>• The surface an object moves over determines how long it will take for the object to stop.</li> <li>• In a world without friction, objects in motion would keep moving forever.</li> </ul>	<p><b>Display Slide 22.</b> Science Ideas That Support the Main Learning Goal (6 min)</p> <p>a. Display <b>only</b> the main learning goal on the slide.</p> <p>b. <b>Pairs:</b> “Work with a partner to come up with two or three science ideas that might support the development of this main learning goal. Use the content background document and the Common Student Ideas chart as resources.”</p> <p>c. <b>Whole group:</b> Have pairs share the supporting science ideas they came up with.</p> <p>d. Next, reveal the list of possible supporting science ideas one by one on the slide and compare them with participants’ ideas.</p> <p>e. <b>Highlight:</b> “Some of these supporting science ideas could also be a lesson’s main learning goal.”</p>
		<p><b>Practice Identifying Main Learning Goals</b></p> <ol style="list-style-type: none"> <li>1. <b>Small groups or pairs:</b> Use the criteria in Analysis Guide A (handout 5.1 in binder) to analyze a list of candidate main learning goals related to forces (handout 5.2: Practice Identifying One Main Learning Goal).</li> <li>2. Select candidates from the list that you think are good main learning goals for the focus of the lesson and record the reasons for your choices on handout 5.2.</li> <li>3. <b>Whole group:</b> Discuss and justify your selections.</li> </ol>	<p><b>Display Slide 23.</b> Practice Identifying Main Learning Goals (10 min)</p> <p>a. 		<p><b>Feel the Normal Force</b></p> <ol style="list-style-type: none"> <li>Is the weight of your fist enough for your hand to crash through the surface of the desk?</li> <li>What is the direction of the force <b>that you can feel</b> from the desk surface against your hand?</li> <li>What is the name for the force the desk is exerting on your hand?</li> <li>What's the direction of the force your muscles exert on your fist?</li> <li>Do these forces add up to zero (net force = 0)?</li> </ol>  <p><small>Photo courtesy of Hector Mirelis</small></p>	<p><b>Display Slide 65.</b> Feel the Normal Force (4 min)</p> <ol style="list-style-type: none"> <li>Ask participants what they felt when their knuckles made contact with the surface of the desk. <p><b>Ideal answer:</b> I could feel a downward force from my arm muscles because of the weight of my hand.</p> </li> <li>Discuss the questions on the slide. <p><b>Ideal responses:</b></p> <ol style="list-style-type: none"> <li>No. The surface stops my knuckles.</li> <li>I can feel an upward force from the desk against my hand.</li> <li>The normal force.</li> <li>Downward toward the surface of the desk.</li> <li>No. The normal force is greater than the force from my muscles.</li> </ol> </li> </ol> <p><b>Note:</b> Participants may think that the forces add</p>

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
		<p style="text-align: center;"><b>Slides</b></p> <hr style="border: 2px solid #808080;"/> <p><b>Feel the Normal Force</b></p> <ol style="list-style-type: none"> <li>1. In what direction did your fist accelerate the moment it makes contact with the desk surface? <ol style="list-style-type: none"> <li>a. My fist didn't accelerate.</li> <li>b. My fist accelerated downward in the direction it was moving before it hit the surface of the desk.</li> <li>c. My fist accelerated upward (negative acceleration). The speed it had before striking the surface would suddenly drop to zero the moment it makes contact with the desk.</li> </ol> </li> <li>2. Do the forces acting on your fist add up to zero?</li> <li>3. What would happen if the desk were made of paper?</li> </ol>	<p>up to zero because the surface of the table stops their hands. To address this misconception advance to the next slide.</p> <p><b>Display Slide 66.</b> Feel the Normal Force (2 min)</p> <p>a. Briefly discuss the questions on the slide.</p> <p><b>Ideal responses:</b></p> <ol style="list-style-type: none"> <li>1. My hand accelerated upward (negative acceleration). The speed it had before striking the desk sudden dropped to zero the moment it made contact with the desk.</li> <li>2. No. The normal force was greater than the force my muscles exerted, so the net force was directed upward. Acceleration was upward, so my hand slowed down very quickly and accelerated in the opposite direction of the initial motion (<math>a = F/m</math>).</li> <li>3. If the desk were made of paper, my fist would accelerate straight through it, since the normal force would be insufficient to stop it.</li> </ol>

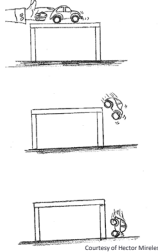

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
		<p style="text-align: center;"><b>Let's Summarize!</b></p> <ul style="list-style-type: none"> <li>• What is a force?</li> <li>• Does an object have to touch another object to exert a force? What is one example?</li> <li>• What's the difference between a force and motion?</li> <li>• If a force acts on an object in a specific direction, will the object move in the direction the force is pushing or pulling it?</li> </ul>	<p><b>Display Slide 67.</b> Let's Summarize! (4 min)</p> <p>a. Discuss the questions on the slide.</p> <p><b>Ideal responses:</b></p> <ul style="list-style-type: none"> <li>• A <i>force</i> is a push or pull that involves an interaction between two objects and causes a change in an object's motion. This is one of our learning goals.</li> <li>• Forces can act on an object without the object touching another object. Example: gravity.</li> <li>• A <i>force</i> is a push or pull on an object that causes a change in the object's motion. A force must act on an object for it to start moving, but once an object is in motion, other forces can act on it while it's moving. These forces can change the object's speed and/or direction. So force and motion are different factors.</li> <li>• The movement of an object depends on the size and direction of the various forces acting on it. Example: If two forces are acting on an object in opposite directions with the equal force, no acceleration occurs.</li> </ul>
		<p style="text-align: center;"><b>Representing Forces: Examples</b></p> <p>Object</p> <p>● → A large force toward the right</p> <p>● → A larger force to the right</p> <p>Object</p> <p>← ● A large force to the left</p> <p>← ● A small force to the left</p> <p>● No change in motion</p>	<p><b>Display Slide 68.</b> Representing Forces: Examples (Less than 1 min)</p> <p>a. Walk participants through the examples on the slide.</p>

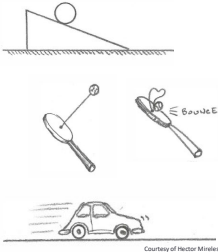

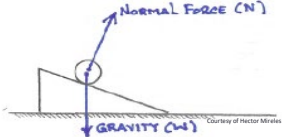

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
		<p style="text-align: center;"><b>Representing Forces</b></p> <ol style="list-style-type: none"> <li>Use a <b>black arrow</b> to represent a <b>force acting on each object</b> in your Weight handout. <ul style="list-style-type: none"> <li>Draw a dot in the middle of the object and start your arrow there.</li> <li>The arrow should point in the direction the force is pushing or pulling the object.</li> <li>The length of the arrow should indicate the strength of the force. The longer the arrow, the greater the force.</li> </ul> </li> <li>Use a <b>red arrow</b> to represent the direction of the <b>change in motion</b> of each object. <ul style="list-style-type: none"> <li>For an increase in speed, point the arrow in the direction of the object's motion.</li> <li>For a decrease in speed, point the arrow in the opposite direction of the object's motion.</li> <li>A dot with no arrow represents no change in motion.</li> </ul> </li> </ol>	<p><b>Display Slide 69.</b> Representing Forces (7 min)</p> <ol style="list-style-type: none"> <li>“Let’s practice using arrows to represent forces acting on different objects.”</li> <li>Have participants locate handout 5.8 (Weight [The Force of Gravity]).</li> <li>“For each object on the handout, use a black arrow to represent a force that’s acting on it. First, draw a dot exactly in the center of the object and start your arrow there. The arrow should point in the direction the force is pushing or pulling the object, and the length of the arrow should indicate the strength of the force. The longer the arrow, the greater the force.”</li> <li>Give participants a few minutes to draw their arrows.</li> <li>“Now I’d like you to use a red arrow to represent the direction of the change in motion that each object experiences. If the speed of the object increases, the arrow should point in the direction of the object’s motion. If the speed decreases, the arrow should point in the opposite direction of the object’s motion. If there is no change in motion, draw a dot but no arrow.”</li> <li>Give participants a few minutes to draw their arrows.</li> <li><b>Whole group:</b> Invite one or two participants to share their representations with the group.</li> </ol>

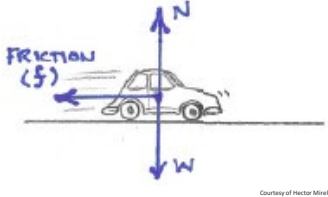

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
			<p>participants should only consider the forces acting on the cart.</p> <p>c. <b>Individuals:</b> Have participants complete the handout.</p> <p>d. <b>Whole group:</b> Briefly discuss the forces acting on the cart.</p>
		<p><b>Forces and Acceleration</b></p> <ul style="list-style-type: none"> <li>• Ball</li> <li>• Paddle Ball (Stretched)</li> <li>• Paddle Ball (Impacting Paddle)</li> <li>• Rolling Toy Car</li> </ul> 	<p><b>Display Slide 76.</b> Forces and Acceleration (Less than 1 min)</p> <p>a. “In the Forces lessons, students will investigate these objects, all of which have different dynamics at different times.”</p> <p>b. “To wrap up our content deepening work today, we’ll use everything we’ve learned so far about forces and motion to make predictions about each of these objects.”</p>
		<p><b>Ball on an Incline</b></p> <p>Predict the acceleration of the ball and justify your answer by adding together the forces acting on the ball (net force).</p> 	<p><b>Display Slide 77.</b> Ball on an Incline (1 min)</p> <p>a. Ask participants to predict the acceleration of the ball and justify their answers by adding together the forces acting on the ball (net force).</p> <p>b. Highlight the downward pull of gravity (weight) on the ball and the upward push of the surface of the ramp against the ball (normal force).</p> <p>c. “We’ll revisit this setup on day 8 of the PD program.”</p>

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
		<p><b>Paddleball</b></p> <ul style="list-style-type: none"> <li>• What's the net force acting on the ball when the string is fully stretched (left) and when it makes contact with the paddle (right)?</li> <li>• What's the direction of the net force? What's the direction of acceleration?</li> </ul> 	<p><b>Display Slide 78.</b> Paddleball (5 min)</p> <ol style="list-style-type: none"> <li>“The motion of a paddleball is complex. Think about the forces acting on it.”</li> <li>“A stretched elastic band exerts great tension (<math>T</math>) on the ball back toward the paddle, and a very small weight (<math>W</math>) or force of gravity is pulling the ball toward the ground.”</li> <li>Ask participants, <ul style="list-style-type: none"> <li>• What's the net force acting on the ball when the elastic is fully stretched?</li> <li>• What's the direction of the net force?</li> <li>• What's the direction of acceleration?</li> </ul> </li> <li>“When the ball crashes against the paddle, the rubber in the ball compresses and creates a large force moving away from the paddle. Weight or gravity is still exerting a force, but it's very small.”</li> <li>Ask participants, <ul style="list-style-type: none"> <li>• What's the net force acting on the ball when it makes contact with the paddle?</li> <li>• What's the direction of the net force?</li> <li>• How about the direction of acceleration?</li> </ul> </li> </ol>

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
		<p><b>Toy Car</b></p> <p>A rolling toy car always seems to slow down. Think about the forces acting on the car and predict the direction of acceleration.</p> 	<p><b>Display Slide 79.</b> Toy Car (4 min)</p> <ol style="list-style-type: none"> <li>“Have you ever noticed that a rolling toy car always seems to slow down? Let’s consider the forces acting on the car.”</li> <li>“Weight or gravity is pulling down on it, normal force is pushing up on it, and friction, which we’ll discuss in our next content deepening session, is acting in the opposite direction of the car’s motion.”</li> <li>“In this diagram, the car is moving to the right, but do any of the forces point to the right?”</li> <li>Discuss the following questions: <ul style="list-style-type: none"> <li>• What is the direction of acceleration?</li> <li>• What would happen if the force of friction were stronger in this diagram?</li> <li>• What would happen to the net force in that scenario?</li> </ul> </li> </ol>
		<p><b>Reflect: Content Deepening Focus Questions</b></p> <ol style="list-style-type: none"> <li>What makes something start to move? <ul style="list-style-type: none"> <li>• Revise your answer to this question based on today’s content deepening work.</li> </ul> </li> <li><b>Group discussion:</b> How can we draw the forces pushing or pulling an object when we can’t see them? <ul style="list-style-type: none"> <li>• Why was it easier for us to draw the forces, rather than just talk about them.</li> <li>• How does the net force predict acceleration?</li> </ul> </li> </ol>	<p><b>Display Slide 80.</b> Reflect: Content Deepening Focus Questions (4 min)</p> <ol style="list-style-type: none"> <li>Revisit the content deepening focus questions on the slide.</li> <li><b>Individuals:</b> Ask participants to revise their answers for the first question based on today’s content deepening work.</li> <li><b>Whole group:</b> Discuss the following questions related to the second focus question: <ul style="list-style-type: none"> <li>• Why was it easier to draw the forces acting on an object than it was to talk about them?</li> <li>• How does the net force predict acceleration?</li> </ul> </li> </ol>

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
		 <p><b>Key Science Ideas</b></p> <ul style="list-style-type: none"> <li>• A <b>force</b> is a push or pull (interaction) between objects that causes a change in an object's motion.</li> <li>• The forces acting on an object are represented with arrows that begin at the center of the object and point in the direction of the respective forces.</li> <li>• <b>Acceleration</b> is a change in an object's motion in the same direction as the <b>net force</b>.</li> <li>• The weight of an object is the force of <b>gravity</b> pulling it toward the center of Earth.</li> <li>• When one object rests on another object, the object underneath exerts an upward force called the <b>normal force</b> that keeps the two touching objects separated from each other.</li> </ul>	<p><b>Display Slide 81.</b> Key Science Ideas (Less than 1 min)</p> <p>a. Review the key science ideas on the slide.</p>
<p>3:10–3:30 20 min</p> <p><b>Wrap-Up: Summary, Homework, and Reflections</b></p> <p>Slides 82–88</p>	<p><b>Purpose</b></p> <ul style="list-style-type: none"> <li>• Summarize and reflect on key ideas from today's learning, including the Science Content Storyline Lens, STeLLA strategy A, and the Forces science content.</li> </ul> <p><b>What Participants Do</b></p> <ul style="list-style-type: none"> <li>• Review today's focus questions.</li> <li>• Share key ideas from today's lesson analysis (SCSL strategy A) and content deepening work.</li> <li>• Copy down the homework assignment for day 6.</li> <li>• Discuss expectations for the extended homework assignment</li> </ul>	 <p><b>Today's Focus Questions</b></p> <ol style="list-style-type: none"> <li>1. What is the Science Content Storyline Lens (SCSL)?</li> <li>2. Why is one main learning goal essential for science content storyline coherence?</li> <li>3. What makes something start to move?</li> <li>4. How can we draw the forces pushing or pulling an object when we can't see them?</li> </ol>	<p><b>Display Slide 82.</b> Today's Focus Questions (Less than 1 min)</p> <p>a. Review the focus questions addressed during today's session.</p>

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
	<p>(Forces lesson plan review).</p> <ul style="list-style-type: none"> <li>Write reflections on today's learning.</li> </ul> <p><b>Posters and Charts</b></p> <ul style="list-style-type: none"> <li>Effective Science Teaching chart</li> </ul> <p><b>Handouts in PD Binder</b></p> <ul style="list-style-type: none"> <li>5.13 Extended Homework</li> <li>5.14 Daily Reflections—Day 5</li> </ul> <p><b>Supplies</b></p> <ul style="list-style-type: none"> <li>Science notebooks</li> </ul>	<p><b>Summary: Today's Lesson Analysis Work</b></p> <p>Reflect on today's session:</p> <ul style="list-style-type: none"> <li>STL strategy 6: use and apply</li> <li>The Science Content Storyline Lens (SCSL)</li> <li>Science ideas and student ideas</li> <li>SCSL strategy A: identify one main learning goal</li> </ul> <p>Based on our work today, do you have any suggestions for modifying our image of effective science teaching?</p>	<p><b>Display Slide 83.</b> Summary: Today's Lesson Analysis Work (3 min)</p> <p>a. <b>Individual think time (1 min):</b> Ask participants to reflect on the work they accomplished during today's lesson analysis and think about the question on the slide.</p> <p>b. <b>Whole-group share-out (2 min):</b> Invite participants to share their ideas for modifying the image of effective science teaching based on today's work. Revise the chart as needed.</p>
		<p><b>Summary: Today's Content Deepening Work</b></p> <p>Name one main learning goal for today's content deepening work.</p> <p style="text-align: center;">OR</p> <p>Name one supporting science idea you learned about forces today.</p> <p style="text-align: center;">OR</p> <p>Name one common student idea (misconception) about forces.</p>	<p><b>Display Slide 84.</b> Summary: Today's Content Deepening Work (3 min)</p> <p>a. <b>Individual think time (1 min):</b> Present the options on the slide and give participants 1 minute to come up with a statement that summarizes today's content deepening work in one of these areas. Emphasize that they should <i>not</i> refer to the science idea that a force is a push or pull on an object.</p> <p>b. <b>Whole-group round-robin (2 min):</b> Go quickly around the room and have each participant share one summarizing statement. <b>Push for complete sentences!</b></p>

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
		<p><b>Lesson Analysis Homework</b></p> <ol style="list-style-type: none"> <li>Read in the STeLLA strategies booklet: <ul style="list-style-type: none"> <li>SCSL strategy B: Set the purpose with a focus question or goal statement</li> <li>SCSL strategy C: Select activities that are matched to the learning goal</li> <li>SCSL strategy I: Summarize key science ideas</li> <li>STL strategy 7: Engage students in making connections by synthesizing and summarizing key science ideas</li> </ul> </li> <li>Fill in the appropriate columns on your SCSL Z-fold summary charts.</li> </ol>	<p><b>Display Slide 85.</b> Lesson Analysis Homework (2 min)</p> <ol style="list-style-type: none"> <li>Review the homework assignment on the slide and have participants write it in their notebooks.</li> <li>Make sure participants are clear about the reading and writing tasks.</li> </ol>
		<p><b>Content Deepening Homework</b></p> <p>Read sections 4–7 and section 9 in the content background document. Be prepared to discuss these questions next time:</p> <ul style="list-style-type: none"> <li>Does the reading clarify the ideas about forces that were discussed today?</li> <li>What new questions do you have?</li> </ul>	<p><b>Display Slide 86.</b> Content Deepening Homework (2 min)</p> <ol style="list-style-type: none"> <li>Go over the content deepening homework assignment and have participants write it in their notebooks.</li> <li>Make sure participants are clear about this reading assignment.</li> </ol>

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
		<p style="text-align: center;"><b>Extended Homework</b></p> <ul style="list-style-type: none"> <li>• Locate handout 5.13 (Extended Homework) in your PD program binder.</li> <li>• Between now and Friday, read your assigned two-part lesson plan (parts A and B).</li> <li>• Be prepared to share your findings in a study-group conversation on our last day.</li> </ul>	<p><b>Display Slide 87.</b> Extended Homework (3 min)</p> <ol style="list-style-type: none"> <li>a. Go over the information on the slide.</li> <li>b. Have participants review the Extended Homework assignment sheet (handout 5.13), which provides further details about the assignment.</li> <li>c. Remind participants that like the extended homework on the Variation in Traits lessons that they were assigned during week 1, they're responsible for reading parts A and B of their assigned lesson plan.</li> <li>d. Assign a two-part lesson plan to each participant.</li> <li>e. Ask if there are any questions about the assignment.</li> <li>f. <b>Emphasize:</b> The group share-out on the last day of the PD program (day 8) should focus on the assignment-sheet questions (section 2). Participants won't have time to share all the details of each lesson plan.</li> </ol>
		<p style="text-align: center;"><b>Reflections on Today's Session</b></p> <p><b>Reflect on lesson analysis:</b> In what way(s) did our lesson analysis work and/or our study of SCSL strategy A (one main learning goal) stretch your thinking? Give an example to support your response.</p> <p><b>Reflect on content deepening:</b> Describe how our content deepening work today helped you clarify a science-content idea.</p> <p><b>Feedback:</b> Provide feedback about today's session and the program so far (likes, dislikes, questions, concerns, suggestions).</p>	<p><b>Display Slide 88.</b> Reflections on Today's Session (7 min)</p> <ol style="list-style-type: none"> <li>a. Allow <b>at least 5 minutes</b> for participants to think about today's session and write their reflections and feedback on the Daily Reflections sheet (handout 5.14 in PD program binder).</li> </ol>
