

Daily Reflections—Day 1
Genetics

Name: _____

What are your first reactions to the STeLLA claim that it's important to plan and analyze science teaching through the Student Thinking and Science Content Storyline Lenses? What was convincing or not so convincing for you and why?

What questions do you have about trait-variation patterns among individuals of a species?

Provide feedback about today's session and the program so far (likes, dislikes, questions, concerns, and suggestions).
