

## RESPeCT Summer Institute Professional Development Leader Guide (PDLG)

<b>Grade Level</b>	6	<b>Day</b>	2	<b>STeLLA Strategy</b>	STL Strategies 1, 2, 3: Elicit, Probe, and Challenge Questions	<b>Subject Matter Focus</b>	Genetics
<b>Focus Questions</b>	<ul style="list-style-type: none"> <li>• How can lesson analysis help us better understand how elicit, probe, and challenge questions can reveal and challenge student thinking?</li> <li>• How can traits appear and disappear in a family?</li> <li>• How can we represent DNA, genes, and chromosomes to make sense of trait-variation patterns?</li> </ul>						
<b>Main Learning Goals</b>	<p>Participants will understand the following:</p> <ul style="list-style-type: none"> <li>• Student thinking can be made more visible in science classrooms when the teacher asks questions that elicit and probe student ideas and predictions and challenge student thinking.</li> <li>• Lesson analysis allows us to slow down teaching so we can clarify our understandings of the distinct purposes of elicit, probe, and challenge questions and how they can be used effectively in science lessons.</li> <li>• Sexually reproducing organisms have two sets of genes, one set inherited from each parent. Knowing how the two genes interact, and how chromosomes (and the genes they carry) move when egg and sperm are produced and unite to make a new individual allows us to describe inheritance patterns and the likelihood of certain traits appearing among offspring.</li> </ul>						
<b>Preparation</b>				<b>Materials</b>		<b>Videos</b>	
<p><b>Daily Setup Tasks</b></p> <ul style="list-style-type: none"> <li>• Check that video clips are correctly linked to PowerPoint (PPT) slides.</li> <li>• Set up PowerPoint.</li> <li>• Make sure video clips play correctly with good sound.</li> <li>• Arrange furniture and food.</li> <li>• Arrange participant materials.</li> <li>• Put up posters and charts.</li> </ul> <p><b>Planning and Preparation Tasks</b></p> <ul style="list-style-type: none"> <li>• Study the PDLG, PowerPoint slides (PPTs), video clips, and handouts. Make changes to the PPTs, if needed.</li> <li>• Review the reflections from day 1 and create a summary slide.</li> <li>• Cut apart the elicit-question cards from the PD leader master to pass out for practice interviews.</li> </ul>				<p><b>Posters and Charts</b></p> <ul style="list-style-type: none"> <li>• STeLLA Framework and Strategies poster</li> <li>• Day-2 Agenda (chart)</li> <li>• Day-2 Focus Questions (chart)</li> <li>• Norms for Working Together (chart)</li> <li>• Effective Science Teaching chart (from day 1)</li> <li>• Strategy charts from day 1 (STL strategies 1–3)</li> <li>• Common Student Ideas chart</li> <li>• Parking Lot poster</li> </ul> <p><b>Handouts in RESPeCT PD Binder Front Pocket</b></p> <ul style="list-style-type: none"> <li>• Z-fold summary chart: Student Thinking Lens Strategies</li> </ul> <p><b>Handouts in RESPeCT PD Binder, Day 2</b></p> <ul style="list-style-type: none"> <li>• 2.1 Transcript for Video Clip 2.1</li> <li>• 2.2 Transcript for Video Clip 2.2</li> <li>• 2.3 Transcript for Video Clip 2.3</li> <li>• 2.4 Daily Reflections—Day 2</li> </ul>		<p>Video clips from one Genetics lesson:</p> <ul style="list-style-type: none"> <li>• <a href="#">Video Clip 2.1</a>: Tiernan interview, Kawamura classroom (elicit and probe questions); 2.1_stella_GEN_kawamura_pre_tiernan_c1</li> <li>• <a href="#">Video Clip 2.2</a>: Kawamura classroom (probe and challenge questions); 2.2_stella_GEN_kawamura_L2.1_c4</li> <li>• <a href="#">Video Clip 2.3</a>: Kawamura classroom (probe and challenge questions); 2.3_stella_GEN_kawamura_L2.2_c5</li> </ul>	

<ul style="list-style-type: none"> <li>• Watch video clips and anticipate participant responses.</li> <li>• Prepare charts for the day’s agenda and focus questions.</li> <li>• Review the activity for Genetics lesson 2a (lesson plans binder).</li> <li>• On chart paper, create a Common Student Ideas chart (see resources section in lesson plans binder) and post it at the front of the class. Make sure to leave space in the left-hand margin to apply sticker dots. This chart will be used during lesson analysis (slide 19).</li> </ul>	<p><b>PD Leader Masters, Days 1–4</b></p> <ul style="list-style-type: none"> <li>• PD Leader Master: Elicit Question Cards—Genetics (for practice interviews)</li> </ul> <p><b>Supplies</b></p> <ul style="list-style-type: none"> <li>• Science notebooks</li> <li>• Chart paper and markers</li> <li>• Red and blue sticker dots (or pencils)</li> <li>• Sticky notes (for Parking Lot poster)</li> </ul> <p><b>PD Resources</b></p> <ul style="list-style-type: none"> <li>• STeLLA strategies booklet</li> <li>• RESPeCT PD program binder</li> <li>• RESPeCT lesson plans binder</li> </ul> <p><b>Resources in Lesson Plans Binder</b></p> <p><i>Resources section:</i></p> <ul style="list-style-type: none"> <li>• Genetics Content Background Document</li> <li>• Common Student Ideas about Variation and Inheritance of Traits</li> </ul> <p><i>Pretabs section:</i></p> <ul style="list-style-type: none"> <li>• Genetics: Learning Goals for Students and Teachers</li> </ul>	
--	---	--

## DAY 2 SESSION OUTLINE

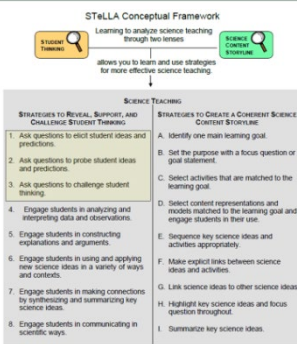

Time	Activities	Purpose
8:00–8:30 30 min	<b>Getting Started: Housekeeping, Day-1 Reflections, Norms, Agenda, Focus Questions, Review STL Strategies</b>	<ul style="list-style-type: none"> <li>• Build community by sharing participants' reflections from day 1 and reviewing/revising the norms.</li> <li>• Set the stage for a day of learning by introducing the focus questions for day 2 and reviewing the purposes and key features of elicit, probe and challenge questions. (These strategies will be the focus of today's lesson analysis work.)</li> </ul>
8:30–9:20 50 min	<b>STL Lesson Analysis: Elicit and Probe Questions</b>	<ul style="list-style-type: none"> <li>• Begin to develop an understanding of the RESPeCT lesson analysis process.</li> <li>• Deepen understandings of elicit and probe questions (STL strategies 1 and 2) and how they reveal student thinking.</li> <li>• Deepen science-content knowledge of genetics through lesson analysis.</li> </ul>
9:20–11:30 130 min (Includes 10-min break)	<b>STL Lesson Analysis: Probe and Challenge Questions</b>	<ul style="list-style-type: none"> <li>• Develop a deeper understanding of the RESPeCT lesson analysis process.</li> <li>• Deepen understandings of probe and challenge questions (STL strategies 2 and 3), how they reveal student thinking, and how they move student thinking forward.</li> <li>• Deepen science-content knowledge of genetics through lesson analysis.</li> <li>• Understand that science-content knowledge is essential for using probe and challenge questions effectively in the classroom.</li> </ul>
11:30–12:00 30 min	<b>Practice Using Elicit and Probe Questions: Interviews</b>	<ul style="list-style-type: none"> <li>• Deepen understandings of elicit and probe questions.</li> <li>• Begin to develop the ability to ask elicit and probe questions effectively.</li> <li>• Appreciate that science-content knowledge is essential for using elicit and probe questions effectively in the classroom.</li> </ul>
12:00–12:45 45 min	<b>LUNCH</b>	
12:45–3:15 150 min (Includes 10-min break)	<b>Content Deepening: Genetics</b>	<ul style="list-style-type: none"> <li>• Deepen participants' understandings of trait variation and inheritance patterns.</li> </ul>
3:15–3:30 15 min	<b>Wrap-Up: Summary, Homework, and Reflections</b>	<ul style="list-style-type: none"> <li>• Summarize and reflect on the day's learning, including progress made in understanding genetics and the relationship between lesson analysis and asking effective elicit, probe, and challenge questions.</li> </ul>

**DAY 2**

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
<p>8:00–8:30 30 min</p> <p><b>Getting Started</b></p> <p>Slides 1–8</p>	<p><b>Purpose</b></p> <ul style="list-style-type: none"> <li>• Build community by sharing participants' reflections from day 1 and reviewing/revising the norms.</li> <li>• Set the stage for a day of learning by introducing the focus questions for day 2 and reviewing the purposes and key features of elicit, probe, and challenge questions. (These strategies will be the focus of today's lesson analysis work.)</li> </ul> <p><b>Content</b></p> <ul style="list-style-type: none"> <li>• Norms enable the group to build trust and productivity.</li> <li>• Probe questions seek to understand what students are saying/writing and encourage them to explain their ideas more clearly or fully (<b>not</b> to change their thinking).</li> <li>• Challenge questions seek to engage students in ways that will challenge them to think, reconsider their ideas, change their initial ideas, and move toward more-scientific understandings.</li> </ul>		<p><b>Display Slide 1.</b> RESPeCT PD Program (3 min)</p> <p>a. Take care of any housekeeping issues.</p>
			<p><b>Display Slide 2.</b> Trends in Reflections (5 min)</p> <p>a. Give participants time to review your summary of their reflections from day 1 and offer reactions and comments or ask follow-up questions.</p>

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
	<p><b>What Participants Do</b></p> <ul style="list-style-type: none"> <li>• Discuss the reflections from day 1 and how the group is doing with the norms.</li> <li>• Study a short transcript example from the STeLLA strategies booklet to identify probe and challenge questions.</li> <li>• Review and contrast the purposes and key features of probe and challenge questions.</li> </ul> <p><b>Posters and Charts</b></p> <ul style="list-style-type: none"> <li>• STeLLA Framework and Strategies poster</li> <li>• Norms for Working Together (chart)</li> <li>• Day-2 agenda (chart)</li> <li>• Day-2 focus questions (chart)</li> </ul> <p><b>PD Resources</b></p> <ul style="list-style-type: none"> <li>• STeLLA strategies booklet</li> <li>• Half-page sheet of norms (pasted into science notebooks)</li> </ul>	<p><b>Norms for Working Together: The Basics</b></p> <p><b>Purpose:</b> Build trust and develop a productive study group for all participants.</p> <p><b>The Basics</b></p> <ul style="list-style-type: none"> <li>• Arrive prepared and on time; stay for the duration; return from breaks on time.</li> <li>• Remain attentive, thoughtful, and respectful; engage and be present.</li> <li>• Eliminate interruptions (turn off cell phones, email, and other electronic devices; avoid sidebar conversations).</li> <li>• Make room for everyone to participate (monitor your floor time).</li> </ul>	<p><b>Display Slide 3.</b> Norms for Working Together: The Basics (5 min)</p> <p>a. <b>Provide context:</b> “Since we’ll be working together throughout the Summer Institute and the academic year, we need norms that will enable us to build trust and productivity as a group. Today we’ll start our analysis of other teachers’ classroom videos. In the fall, we’ll analyze videos from each other’s classrooms. For this work to be meaningful, we’ll need to push and challenge each other. This will require mutual respect and a common understanding of our goals.”</p> <p>b. “Do you want to clarify or revise any of these norms?”</p> <p><b>Note:</b> Have participants locate the half-page sheet of norms they pasted into their science notebooks on day 1. Remind them to leave space for revising the norms.</p> <p>c. Encourage participants to ask clarifying questions regarding the meaning of any of the norms and jot notes in their science notebooks.</p> <p>d. Ask participants if they’re willing to live with these norms today, and let them know they’ll have an opportunity to revise them tomorrow. Remind them of this at the end of the session.</p>

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
		<p><b>Norms for Working Together: The Heart</b></p> <p><b>Purpose:</b> Build trust and develop a productive study group for all participants.</p> <p><b>The Heart of RESPeCT Lesson Analysis and Content Deepening</b></p> <ul style="list-style-type: none"> <li>• Keep the goal in mind: analysis of teaching to improve student learning.</li> <li>• Share your ideas, uncertainties, confusion, disagreements, questions, and good humor. All points of view are welcome.</li> <li>• Expect and ask questions to deepen everyone's learning; be constructively challenging.</li> <li>• Listen carefully; seek to understand other participants' points of view.</li> </ul>	<p><b>Display Slide 4.</b> Norms for Working Together: The Heart (5 min)</p> <ol style="list-style-type: none"> <li>a. "Now let's review the norms at the heart of the RESPeCT PD program."</li> <li>b. "Do you want to clarify or revise any of these norms?"</li> <li>c. "Do you want to add any norms to this list?"</li> <li>d. Ask participants if they're willing to live with these norms today, and announce that they'll have an opportunity to revise them tomorrow.</li> </ol>
		<p><b>Agenda for Day 2</b></p> <ul style="list-style-type: none"> <li>• Day-1 reflections</li> <li>• Focus questions</li> <li>• Review of STL strategies 1–3</li> <li>• STL lesson analysis: elicit and probe questions</li> <li>• STL lesson analysis: probe and challenge questions</li> <li>• Practice using elicit and probe questions</li> <li>• Lunch</li> <li>• Content deepening: genetics</li> <li>• Summary, homework, and reflections</li> </ul>	<p><b>Display Slide 5.</b> Agenda for Day 2 (Less than 1 min)</p> <ol style="list-style-type: none"> <li>a. Talk through the agenda for the day.</li> </ol>

PD Model: Time/Phase	Purpose, Content, and What Participants Do	Slides	Process
		<p><b>Mendel's Ideas</b></p> <ol style="list-style-type: none"> <li>1. Individuals receive trait instructions from their parents. Mendel called these instructions <b>factors</b>. Today we call them <b>genes</b>.</li> <li>2. Genes can have different forms. These different forms provide instructions for variations of a trait; for example, the set of instructions that results in purple flowers is different from the set of instructions that results in white flowers. These different forms of a gene are called <b>alleles</b>.</li> <li>3. Individuals get one variation of a gene (allele) from each parent, which means that each individual has two alleles for each trait.</li> <li>4. Which of the parent's two alleles an individual inherits is a matter of chance.</li> <li>5. If an individual inherits the <b>same</b> allele from each parent—like two alleles for purple flowers—that trait will show up.</li> <li>6. If an individual inherits a <b>different</b> allele from each parent, only one of the traits will show up.</li> <li>7. When an individual inherits two different alleles, the trait that shows up is called a <b>dominant</b> trait. The trait that doesn't show up is called a <b>recessive</b> trait.</li> </ol> <p><b>Reflect: Content Deepening Focus Question 1</b></p> <p>How can traits appear and disappear in a family?</p>	<p><b>Display Slide 47.</b> Mendel's Ideas (10 min)</p> <p><b>Note:</b> This table comes from handout 2.1 in Genetics lesson 2a.</p> <ol style="list-style-type: none"> <li>a. "What similarities or differences do you notice between Mendel's ideas and the key ideas you highlighted in the content background document?"</li> <li>b. Have participants read through the activity in lesson 2a, which explains how this table is used in the lesson.</li> </ol> <p><b>Display Slide 48.</b> Reflect: Content Deepening Focus Question 1 (3 min)</p> <ol style="list-style-type: none"> <li>a. Ask participants to reflect on the first content deepening focus question. <ul style="list-style-type: none"> <li><b>Note:</b> If time allows, have participants answer the question in their science notebooks.</li> </ul> </li> <li>b. "What questions do you still have about how traits can disappear in one generation and reappear in the next?"</li> </ol>
