PAUL CHIOU HOPES TO BRING COMPUTER ACCESSIBILITY TO THE ONES IN MOST NEED

Joy is the first word that comes to mind when talking with third-year computer science student Paul Chiou. He has an infectious personality combined with a wickedly dry sense of humor. He’s also quadriplegic and spends his day in a wheelchair.

MUSIC AND CYBER SECURITY

Statistics show that over 80 percent of all companies have been successfully hacked. Hackers have effectively damaged, stolen or leaked critical information from vulnerable network systems. It is an all-out war with companies scrambling to secure their organizations.

TEACHING MATH TO THE MOST UNDERSERVED - PRISONERS

The classroom is filled 100 eager students ready to learn about differential equations. As they patiently wait at their desks for the teacher to come in, the students pull out their matching notebooks and pens. Some of these students are pretty advanced in math, while others are learning this material for the first time. They are polite, inquisitive, working to transform their lives, and in jail.
