STEM Success

CSU Board of Trustees Chair Rebecca Eisen came to Cal Poly Pomona to talk about the CSU’s Graduation Initiative and get a closer look at the campus’ academic programs and sites.

Eisen’s first day on campus included a van tour of Spadra Farm and Campus South, the former Lanterman property, and a one-on-one meeting with President Soraya M. Coley. She also heard from the deans of the colleges of engineering and science, as well as students and Professor Steve Alas, director of the Science Educational Enhancement Services program, about efforts to maintain the success of STEM students.
Coastal Resource: Jeremy Claisse
*Polycentric*

The oil rigs scattered along the southern California coast are not known for their aesthetic beauty. But hidden below the surface, the mass of pipes, girders and industrial functionality harbor something unexpected — stunning reefs teeming with fish and other ocean wildlife. The platforms support thriving underwater ecosystems.
