Title: How I Flip Calculus
Speaker: Tim Hsu, San Jose State University
Date and Time: Wednesday April 12th, 1:00-1:50 PM
Location: 3-2643

Abstract: "Flipping" is a teaching method where "direct instruction" (i.e., lecture) happens outside class and students spend class time *doing* something (e.g., working in groups). We'll discuss the speaker's STEP UP method for preparing a flipped calculus class.

As befits the subject, this talk will itself be (partially) flipped. Attendees will therefore get much more out of the talk by doing two bits of homework (total time under 10 min):

1. Watch a 3-minute video: https://youtu.be/KSkC9KsMD5g

2. Take a short online quiz (approx 5 min): https://goo.gl/forms/vjy3k2bge1hMElHp2
