

Fall Colloquium Series

Problems Encountered at a Sabbatical

Prof. Mitsuo Kobayashi
Cal Poly Pomona

Abstract:

Last year, I spent a year at Dartmouth College collecting new problems to solve. In this talk, I will show as many as I can describe in 50 minutes. I also plan to intersperse some photos of the trip.

Keywords: number theory, Bernoulli numbers, Riemann zeta function, Erdos-Moser Equation, primitive abundant numbers.

Wednesday, Nov. 29, 1:05 - 1:50pm in 3-1637
