CPP Science Students Help Fight COVID-19

In Memoriam: Laszlo Szijj

Giving Day 2021 is April 21-22. We need volunteers to serve as Giving Day Ambassadors. It's easy and can be done from the comfort of home. Ambassadors reach out to their networks via email, text messages, and social media and ask them to support the College of Science during Giving Day, April 21 & 22. We're also looking for matching gifts to kick off the event. Please contact [Melissa J. Martinez](#) for more information.

The College of Science is seeking support in the [following three areas](#) because they will have the greatest impact on students and the community.

- [Discovery Through Research](#) - Research is the engine that drives discovery and we're committed to providing research opportunities to our students. These experiences are proven to have an enormous impact on students' growth and career success.
- [Science for All](#) - This initiative provides all students with technology resources and practical experiences to prepare them for a STEM-related career.
- [Scholarships](#) - We believe in the transformational power of education and provide scholarships to alleviate the financial burden of students.

GIVE NOW

Questions? Contact Melissa Martinez at (909) 869-4160 or melissam@cpp.edu.

In addition to our three funding priorities listed above, here are a few ways you can support our students during these challenging times:

- [Participate in Professor for a Day](#) by sharing your experience with students, March 8-12, 2021. [Please register by February 19.](#)
- [Become an online mentor to a current student](#) You can make a profound impact on the lives of students and alumni by sharing your professional expertise and career insight.
- Support the [Broncos Care program](#), which provides [emergency grants](#), and services that include emergency housing, hotel vouchers, meal cards, virtual care coordination, and counseling and psychological services.
