

# PARTNERS IN DISCOVERY

College of Science

## What Lies Beneath

Cal Poly Pomona  
Professor Awarded Grant  
to Study State's Artificial Reefs

In Memoriam: Hector C. Mireles

## Meet Distinguished Alumnus Mario Sorci

The College of Science is seeking support in the following three areas because they will have the greatest impact on students and the community.

- [STEM Success Network](#) - The network includes programs to support the success of our STEM majors, outreach activities for K-12 students, recruitment efforts to diversify the STEM pipeline, and workshops with networking opportunities to prepare students for life after college.
- [Scholarships](#) - We believe in the transformational power of education and provide scholarships to alleviate the financial burden of students.
- [Discovery Through Research](#) - Research is the engine that drives discovery and we're committed to providing research opportunities to our students. These experiences are proven to have an enormous impact on students' growth and career success.

**GIVE NOW**

Questions? Contact Bill Burrows at (909) 869-4160 or [bdburrows@cpp.edu](mailto:bdburrows@cpp.edu)

In addition to our three funding priorities listed above, here are a few ways you can support our students during these challenging times:

- [Participate in Professor for a Day](#), March 6-10, 2023 by sharing your experience with students.
- Attend the annual Science Research Symposium, Friday, April 28, 2023.
- [Become an online mentor to a current student](#). You can make a profound impact on the lives of students and alumni by sharing your professional expertise and career insight.
