

Pre-Occupational Therapy Advising Sheet

Occupational therapy practitioners enable people to live life to its fullest by helping them recover from or prevent injury, illness, or disability. Common occupational therapy interventions include helping children with disabilities to participate fully in school and social situations, helping people recovering from injury to regain skills, and providing supports for older adults experiencing physical and cognitive changes. Successful completion of a master's degree program in occupational therapy is required to practice as an occupational therapist. In the US, optional degrees include a professional doctorate in occupational therapy (OTD) or PhD degree. In addition to the coursework, students complete at least 6 months of supervised clinical internships in a variety of health care and community settings are available to licensed OT's. For licensing, students must graduate from an ACOTE- accredited program, as well as pass the NBCOT certification examination.

Common Pre-Occupational Therapy Prerequisite Courses		
Biology	One semester w/labs are generally recommended at most schools	BIO 1150/L or BIO 1210/L
General Chemistry	One semester w/labs are generally required	CHM 1210/L
