

CAL POLY POMONA
SUSTAINABILITY
COURSE GUIDE

Overview of the Sustainability Department

At the Cal Poly Pomona Office of Sustainability, we hope to educate students, faculty, and staff about the various ways of embracing sustainability in their daily lives by incorporating them into the University's planning and policies, academics, operations, student activities, and community engagement.

To accomplish this, the department strives to:

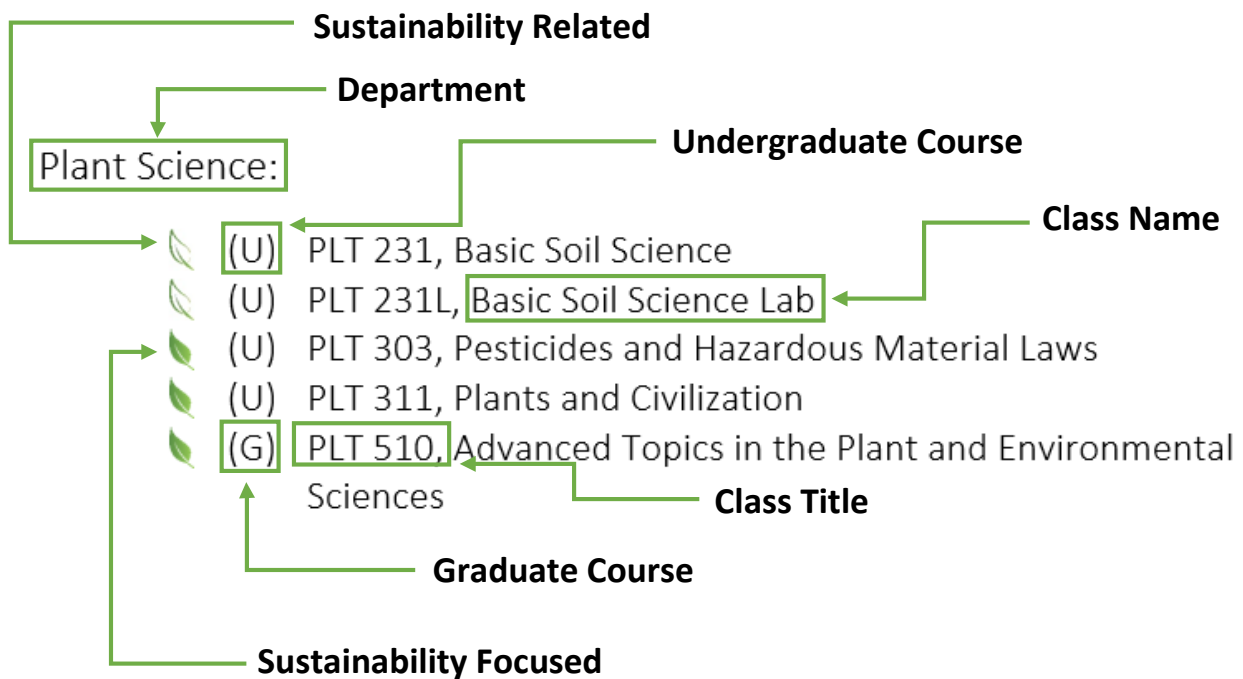

- Engage students, faculty, and staff in an ongoing dialogue, inquiry, and discovery of sustainable practices by way of curriculum, degree programs, and scholarly research.
- Integrate sustainable practices into all aspects of university planning and operations, with a focus on both present and future implications.
- Design, build, and operate a campus environment that minimizes its ecological footprint, thus contributing to the goal of climate neutrality.
- Participate in research initiatives and outreach activities that educate our communities, nourish our natural ecosystems, and enrich our cultural experiences.
