Carol P. Richardson, Dean
Sharon Hilles, Associate Dean
Daniel K. Lewis, Associate Dean

The College of Letters, Arts, and Social Sciences advances knowledge and learning in established academic disciplines in the humanities, social sciences, and performing arts. It provides introductory and advanced course work in more than 20 degree and certificate programs.

The College also provides courses that substantially make up the General Education curriculum required of all students. These courses provide a foundation of knowledge of the cultural, social, political, ethical, and economic worlds. The College provides curricular support of the University’s considerable teacher-education function. In all its programs, the College of Letters, Arts, and Social Sciences serves the goals of the University to provide for the intellectual, personal, and professional development of each person and for the enrichment of the communities it serves outside the University. In pursuit of these objectives, Bachelor’s degree programs and minors are offered in the performing arts, humanities, behavioral and social sciences, and kinesiology. Master’s degrees are offered in economics, English, history, psychology, public administration, and kinesiology. Through its curriculum, research activities, art performances, and other human activity, the College of Letters, Arts, and Social Sciences promotes activity integral to processes of inquiry, creativiy, learning, and teaching.

In accord with the mission of a comprehensive polytechnic university “preparing students for life, leadership, and careers in a changing, multicultural world,” the College of Letters, Arts, and Social Sciences seeks to equip students with lifelong learning skills enabling them more effectively to challenge problems of extraordinary social, technical, and human complexity. These skills include creative and critical thinking, methods of both quantitative and qualitative inquiry, the application of theory to practice, learning through performance-based activities in the humanities, arts and social sciences, and the integration of mind and body in health and wellness activity. In furthering its mission of promoting learning and teaching as broad-based, ongoing, and shared processes, the College of Letters, Arts, and Social Sciences supports initiatives that further the professional development of faculty and staff, that engage students and faculty in active collaboration in the pursuit and dissemination of knowledge, and that integrate the arts, sciences, and technologies. The College thus advances collegiality not only among the various segments of the University, but also with the local and global communities it serves. It promotes access of underrepresented student populations to its programs, resources, and services.

The College of Letters, Arts, and Social Sciences offers 11 Bachelor of Arts degrees, 6 Bachelor of Science degrees, 22 minors, 3 Certificates of Proficiency, 3 Master of Science degrees, two Master of Arts degrees, and a Master of Public Administration. The College offers a Digital Media Minor that enables students to learn and use multimedia technology to demonstrate their acquisition of knowledge in an array of courses in social sciences, humanities, and the arts. With other colleges in the University, the College of Letters, Arts, and Social Sciences participates in continuing education in support of the concept of lifelong learning. To promote increased multicultural understanding, the College encourages students to investigate opportunities for overseas study through the International Center. For further information about these programs, please contact the individual department.

CLASS
Minor in Digital Social Sciences, Humanities, and Arts (Digital Media)
Minor in International Studies
Minor in Nonviolence Studies
Minor in Science, Technology, and Society
Major in Science, Technology, and Society

The Science, Technology, and Society (STS) Major is an interdisciplinary program which integrates knowledge in the natural sciences and in technology as well as in history, philosophy, sociology, economics, political science, geography, and anthropology. Students are capable of earning a Bachelor of Arts in Science, Technology, and Society. The STS Major prepares students for jobs that require scientific and technological literacy as well as a broad perspective on science and technology and an ability to write and argue from this perspective. Such jobs include those in law or business which are engaged with aspects of science and technology, in science and technology public policy making or analysis, in science and technology public interest advocacy, and in science journalism.

A full description of the Major is in the “University Programs” section of this catalog.

Minor in Science, Technology, and Society

The Science, Technology, and Society (STS) Minor is an interdisciplinary program which integrates knowledge in the natural sciences and in technology as well as in the humanities and social sciences. The STS Minor provides science and technology majors with a sense of how science and technology exists in a broader human context. (By contrast the Major opens opportunities for writing- and argument-intensive science- and technology-related careers (such as those in science- and technology-related law and public policy) which are alternative to careers as scientists and technologists.)

A full description of the Minor is in the “University Programs” section of this catalog.

Minor in Digital Social Sciences, Humanities, and Arts (Digital Media)

The Digital Media minor provides fundamentals for students with little or no knowledge of digital media. It is designed to encourage students with significant background to tailor a program that will deepen their learning experience.

Interdisciplinary Minor in International Studies

The interdisciplinary International Studies minor was created for Cal Poly Pomona students in any major who want to complement their major degree studies with a self-structured course of study that will enhance their understanding of the world in which they will be working. The minor requires that students participate in at least one program of study outside the United States and that they either demonstrate or gain proficiency in a language other than English equivalent to at least one year of university-level study. Coursework selected for the minor, along with the overseas experience and language acquisition, should help the student gain an appreciation for the history, culture, and social systems in another part of the world.

The minor works closely with the Cal Poly Pomona International Center which offers a wide range of international study programs ranging from intensive courses over a few weeks during a school break to quarter-, semester- and year-long programs at overseas locations. The coursework required includes an introductory course designed in part to help prepare students for the overseas experience and a capstone seminar designed to help students evaluate the overseas experience when they return to campus. The additional coursework is drawn from the many offerings that various departments across campus already provide to their students. Each student will develop an agreement with an International Study Minor adviser about which courses will best serve the student’s interests and needs.

A full description of this minor is included in the “University Programs” section of this catalog.

Interdisciplinary Minor in Nonviolence Studies

The interdisciplinary Minor in Nonviolence Studies provides students an opportunity to learn about philosophical, cultural and literary traditions of nonviolence and the histories of nonviolent change. The minor imparts a systematic understanding of nonviolence as a core human virtue, a positive force that is grounded in courage, compassion and conciliation, and is key to creating a peaceful and sustainable future for humanity.

This understanding is especially critical given the many-faceted problems of violence and war. Students taking this minor will feel inspired to become innovators working toward promoting human dignity, advancing social justice and nurturing ecological harmony. At the same time, they will also gain the ability to develop and apply nonviolent methods for resolving conflicts.

Designed to serve as a complimentary emphasis to any major, this interdisciplinary minor will provide students additional career options such as business sector jobs in human resources, industrial and labor relations and conflict management; and public sector positions in community service agencies, correctional institutions, and government departments. Other career paths exist working in the non-profit sector including international agencies, and in non-governmental organizations (NGOs). Moreover, the minor will well serve the professional needs of the future school teachers.

Scholarships and Awards
Several Awards are available to students interested in pursuing this Minor. For details contact the Ahimsa Center at (909) 869-3868, or (909) 869-3808 or e-mail to tsethia@csupomona.edu.

**ANTHROPOLOGY**

www.class.csupomona.edu/ga

One of the three majors offered in the Department of Geography and Anthropology is Anthropology. For other programs in the department see Geography, and Social Sciences.

Dorothy D. Wills, Chair, Geography and Anthropology Department  
Mark W. Allen, Anthropology Coordinator

Mark W. Allen  
David G. Lord  
Dorothy D. Wills

Anthropology is the scientific study of the peoples of the world, past and present, in the broadest possible sense: their total cultural and biological heritage. The goal of anthropology is a complete understanding of the human species, from its origins several million years ago to the present, including all of its current cultural and biological diversity. Students majoring in Anthropology in the department of Geography and Anthropology enroll in one of two subplans: General Anthropology or Cultural Resource Management. Through a common integrated core of courses selected from all four of the major anthropological subfields (Sociocultural Anthropology, Biological Anthropology, Archaeology, and Linguistics), each of the two subplans provides students with a broad-based understanding of the diverse subject matter of anthropology. Each subplan then diverges to provide additional training aimed toward better serving the individual needs of students with different specialty interests and career goals. Students completing this program receive a Bachelor of Science degree.

**General Anthropology**

The General Anthropology Subplan adds advanced coursework in each of the major subfields to the common core, providing students with a traditionally broad and generalized “four-field” anthropology degree. This subplan is particularly suitable for students intending to go on to graduate studies in anthropology or a related field at an institution which prefers or requires broad-based undergraduate training in anthropology, or for students who intend to pursue a career in social, governmental, or international service, primary or secondary education, or law.

**Cultural Resource Management**

Cultural Resource Management (CRM), an applied approach to anthropology, involves the identification, evaluation, and preservation of various kinds of cultural resources, as mandated by both Federal and State legislation and by scientific standards pertaining to the civil planning process. The main objective of the CRM Subplan is to produce professionals who are competent in the methods and techniques appropriate for filling positions in cultural resource management and related fields, and to provide the theoretical background required for designing research projects and collecting and analyzing resultant data.

The CRM Subplan provides its graduates with the training and experience necessary to (1) conduct analysis of sociocultural, ethnographic, and archaeological data to assist the public and private sectors in implementing environmental protection and historic preservation legislation; (2) assess the scientific importance of ethnographic and archaeological resources; (3) be familiar with existing cultural resource data-keeping facilities; and (4) be competent in appropriate anthropological techniques of field and laboratory analysis, as well as procedures employed in archival and museum collections preparation.

Training in anthropology provides a unique understanding of human beings and human issues that is highly appropriate for many different kinds of careers. Employment opportunities open to anthropologists are almost as diverse as the subject matter of the discipline itself. Recent graduates with bachelor’s degrees in anthropology have taken positions in areas as varied as advertising, journalism, radio and television, public relations, purchasing, sales, travel and tourism, government service, business management, personnel service, police work, military intelligence, science writing, community and international development, and marketing. With additional training beyond the bachelor’s degree, anthropologists are qualified for and find employment in various health-assistance or legal-assistance occupations, primary or secondary teaching, and medical or dental technology.

Anthropologists who continue their education through graduate school, and receive a master’s degree or doctorate in anthropology or a related field at another institution, qualify for professional careers in such areas as higher education, public administration, counseling, environmental health, public health, library science, museum science, city management, city planning, government service, business administration, international business, or social or environmental research. Some anthropology graduates move on to law school or medical or veterinary school, and pursue a career in one of these areas. Due to the broad-based training that a degree in anthropology provides, anthropology graduates typically find their degree to be an ideal launching platform for career opportunities in innumerable occupational areas.

**REQUIRED CORE COURSES**

Required of all students. A 2.0 cumulative GPA is required in core courses, including subplan courses, in order to receive a degree in the major.

ANTHROPOLOGY COURSE DESCRIPTIONS

ANT 101 Introduction to Biological Anthropology (4)
Human biology and behavior. The evolution of the human species as an
adaptive biological process. Human ecology in evolutionary perspective.
Human growth, development and diversity. The evolution and behavior
of non-human primates. The course includes a CDROM "virtual lab"
component. 4 hours lecture discussion.

ANT 102 Introduction to Cultural Anthropology (4)
The nature of culture and cultural phenomena; comparative social
organization; religion and value systems of non-literate and folk peoples;
cultural and psychological processes in the development of personality.
Course fulfills GE Sub-area D3 for non-majors. 4 hours lecture
discussion.

ANT 103 Introduction to Archaeology and Prehistory (4)
Basic methods of archaeological reconstruction and interpretation.
Survey of human cultural and technological development from the first
appearance of humans to the beginning of the urban lifeways and the
formation of world civilizations. 4 hours lecture/problem solving.

ANT 104 Introduction to Linguistic Anthropology (4)
Origins and development of oral and written language; speech anatomy,
language, and the brain. Overview of the structure of language:
phonetics, phonology, syntax, semantics, and pragmatics. Variation in
language; history and classification of the world's languages. Critical
use of language (reading and writing). Course fulfills GE Sub-area C3. 4
hours lecture/problem solving.

ANT 112 World Cultures via the Internet (4)
Introduction to anthropology and world cultures. Guided exploration of
the peoples of the world through the medium of the internet. Emphasis
on web sites demonstrating key anthropological principles. Cultural
diversity, culture structure and function, cultural relativity, environmental
adaptation. Course fulfills GE Sub-area C2. 4 hours lecture.

ANT 200 Special Study for Lower Division Students (1-2)
Individual or group investigation, research, studies or surveys of selected
problems. Total credit limited to 4 units, with a minimum of 2 units per
quarter. Prerequisite: permission of instructor.

ANT 201 Human Nature/Human Affairs: A Biocultural View (4)
Integrated exploration of both cultural and biological factors affecting
critical cultural/ethical issues such as intelligence, aggression and
territoriality, sexism, racism, and altruism. Relationship of these issues
to individual and cultural systems from a comparative perspective.
Course fulfills GE Area E. 4 hours lecture discussion.

ANT 299/299A/299L Special Topics for Lower Division Students (1-4)
Group study of a selected topic, the title to be specified in advance. Total
credit limited to 8 units, with a maximum of 4 units per quarter.
Instruction is by lecture and activity or laboratory. Prerequisite:
permission of instructor. Corequisites may be required.

ANT 320 Native Peoples of California (4)
Analysis of social, linguistic, ideological and technological diversity
among indigenous peoples of California. Emphasis on a broad
appreciation of native California lifestyles through a detailed study of
representative societies, as well as historical transformations caused by
European and Euro-American contact. Course fulfills GE Synthesis D4. 4
hours lecture/discussion. Prerequisites: All lower division GE courses in
Area A and Sub-areas D1, D2, D3.
ANT 321 Native Peoples of North America (4)
Survey of peoples and societies of North America; in-depth analysis of diverse ecological, economic, social, political, and ideological adaptations and distinct lifeways of selected Native American societies. An increasingly complex society needs individuals to inform, interpret, and explain to the public the problems of that society. The communication major prepares students to fill positions in the mass media, business, government, and education.

Students select one of three subplans to complete the major—Journalism, Public Relations, and Organizational Communication.

The Organizational Communication Subplan should be chosen by students who wish to emphasize interpersonal and intercultural communication in preparation for careers in public relations, advertising, and human resource management which require skills and knowledge in the use of written, oral, visual, and multimedia communication.

The Department offers minors in Journalism, Public Relations, and Organizational Communication.

The Communication Department sponsors the weekly student newspaper, *The Poly Post*, the on-line *thePolyPost.com*, and the Department magazine, *Impressions*. The Department also supports an annual special event, *Com Day*, which is a professional communication conference organized and produced by students.

The department serves students of all colleges and schools and develops professional proficiencies to meet the needs of the undergraduate economics majors. A curriculum leading to the master of science degree in economics is also offered in the department. Requirements for this degree may be found in the graduate listings.

The curriculum in economics, while offering a broad background of general education and traditional undergraduate courses, lends itself to considerable flexibility. Students consult with a faculty advisor to select courses suitable for a program relevant to personal goals. Seven possible areas of emphasis in economics are: international, environmental and resource, quantitative, economic history, urban, business and government, and economics and finance.

The undergraduate major in economics has three objectives: first, to prepare economic analysts for positions in business, industry, agriculture, and government; second, to prepare students for research or management trainee positions in fields such as public administration, labor unions, industry, finance, and insurance; third, to furnish undergraduate preparation for students who may wish to pursue graduate work in the field of economics.

The minor in economics serves other departments of the university by providing their students with a well-defined and generally recognized set of courses. For many majors the minor will enhance their employability upon graduation. It will also provide a structure for those seeking basic understanding of economic theory and its application. For others it will facilitate their graduate work.

Quantitative Research Minor
The Quantitative Research Minor is an interdisciplinary program which can be taken by students majoring in any field other than Mathematics. Its purpose is to prepare students to conduct quantitative analysis in their chosen discipline. Students acquire practical experience using statistics, principles of experimental design, survey and data analysis techniques. This minor is particularly suited for students majoring in Economics. A full description of this minor is included in the "University Programs" section of this catalog.

ENGLISH AND FOREIGN LANGUAGES

www.class.csupomona.edu/efl

Liliane Fucaloro, Chair

The English and Foreign Languages Departments offers programs in English and Spanish. In the Bachelor of Arts in English program, students may choose from two subplans: Literature and Language or English Education. Students in all programs are encouraged not only to improve verbal skills, but also to develop a fuller understanding of themselves and their culture.

Graduates are prepared to enter advanced-degree work in English, American Studies, or related areas. Additional opportunities exist in law, business management, journalism, and other fields welcoming those with a liberal education and communication skills.

The Literature and Language subplan offers intensive study in the language and literature of both Britain and the United States. The curriculum for the Literature and Language subplan is patterned as follows: in the freshman year courses in composition and in the methods of reading literature; in the sophomore year a broad survey of English and American literature and world literature; in the junior year a study of linguistics and the principal genres; and in the senior year relatively intensive work in individual authors or small groups of authors.

The second subplan, English Education, also offers intensive study of language and literature. Students are given thorough preparation for entrance into a secondary credential program in English. Students may also choose to minor in English.

In addition, the department lists elementary and intermediate sequences in French, German, and Spanish language and culture, and elementary sequences in Latin and Mandarin Chinese language and culture. Courses in English composition and literature serve the general university community. These include study in English as a second language and in the literature-language aspects of Asian-American, African-American, Latino, and Native American Studies.

The major in Spanish and the minor in Spanish language and culture prepares students to communicate in Spanish, to appreciate more fully the cultural heritage of the Southwest, and to communicate more effectively with increasing Hispanic populations. Employment possibilities in students’ major fields will be appropriately enhanced. The Department also offers a minor in French and in TESL (Teaching English as a Second Language). These minors are open to all majors, including English.

In addition, the Department offers certificate programs in German and Spanish. Certificate programs require completion of a minimum of 16 units of coursework at the 200-level or above. The graduate program in English is listed separately.

The Rho Xi Chapter of Sigma Tau Delta, the national English honor society, is open to upper division English majors if they have completed two or more English courses beyond freshman composition with a 3.0 average and if they rank in the upper one-third of their class overall.

Graduate students in English are admitted if they have completed 12 or more units of graduate English with a 3.5 or better GPA. For additional information, contact Dr. Anne Simpson, Professor in the Department of English and Foreign Languages.

A 2.0 cumulative GPA is required in core courses, including subplan courses, in order to receive a degree in the major.

SPANISH MAJOR

The major provides a broad curricular base that encourages students to develop and enhance their communicative skills—both oral and written—in Spanish, the fourth most widely spoken language in the world and the second in the Southwest. By gaining insight into and appreciation of the cultures of the Spanish-speaking world, students will develop a fuller understanding of themselves and their own culture.

The Bachelor of Arts in Spanish prepares students to enter a wide variety of careers. The State of California’s recent foreign language requirements for high school graduation and for admission into the CSU will increase the demand for teachers of Spanish in the public schools. The major will prepare students to enter teacher-preparation programs as well as advanced-degree graduate programs. In addition, the Spanish major would benefit careers in international business, management, the media, law enforcement, tourism, publishing, interpreting, translation, public relations, advertising, and social sciences. The federal government seeks out Spanish-speaking graduates for employment in civil service and diplomatic areas.

Preparation for the Spanish Major

One year of elementary college-level Spanish (SPN 151, 152 and 153) or the equivalent (two years of high school Spanish, etc.) is required for admission into the major. In addition, all majors must pass a written and oral proficiency test upon entrance to the program and another at the beginning of the junior year.

REQUIRED CORE COURSES

For Cal Poly Pomona students following curriculum year 2001-02 or 2002-03, the total units required for General Education is 68. Students following subsequent curriculum years, should consult the catalog website www.csupomona.edu/~academic/catalog/ for current information regarding this unit requirement. A 2.0 cumulative GPA is required in core courses in order to receive a degree in this major.

GEOGRAPHY
www.class.csupomona.edu/ga

One of the three majors offered in the Department of Geography and Anthropology is Geography. For other programs in the department see Anthropology, and Social Sciences.

Dorothy D. Wills, Chair, Geography and Anthropology
Sara A. Garver, Geography Coordinator

Kristen Conway-Gomez  Lin Wu
Richard S. Hyslop   Terence Young
Michael Reibel

The Geography degree program, which is housed in the Department of Geography and Anthropology, is designed to provide an understanding of humankind’s cultural and physical environments by examining the dynamic systems (both natural and human) through which these diverse settings are changed or sustained. Students majoring or minorin Geography analyze social and environmental change as they affect local areas and regions and compare solutions which have been attempted in various parts of the world. Attention is given to the relationships between population use of resources and environmental and social impacts in rural and urban settings.

 Majors may choose any of three subplans: the traditional Geography Subplan, which blends physical, cultural and regional geography courses with field work; the Environmental Geography Subplan, which equips graduates for careers as environmental analysts, managers and policy makers, and the Geographic Information Systems (GIS) Subplan, which prepares students for careers in the rapidly expanding field of spatial data systems for land use management, local government and environmental protection. The GIS subplan emphasizes technical skills such as air photo interpretation, computer cartography and geographic information systems (GIS) software and techniques. Students completing this program receive a Bachelor of Science Degree.

Training in this major provides a broad and suitable background for careers requiring an understanding of peoples, groups, and their cultural and regional institutions. Careers specifically related to this program include government employment in various capacities, secondary school teaching, and positions in international or multicultural capacities in business and management. Preparation for graduate training in this discipline is also offered to majors.

REQUIRED CORE COURSES
Required of all students. A 2.0 cumulative GPA is required in core courses, including subplan courses, in order to receive a degree in the major.

COURSE DESCRIPTIONS

GEO 100 World Regional Geography (4)
The world's major regions and the ways people live in them. Includes the regions' physical and cultural characteristics, their similarities and differences, levels of development, geopolitics, and population dynamics. Emphasis on current major issues and their geographic contexts and impacts. Course fulfills GE Sub-area D3. 4 lecture/discussions.

GEO 101 Physical Geography (4)
Basic principles of physical geography. Significance of earth-related distribution patterns with reference to their effect on human activities. Course fulfills GE Sub-area B1. 4 lecture discussions.

GEO 102 Human Geography (4)
Basic principles of cultural geography. Significance of people-related distribution patterns with reference to their effect on human activities. Course fulfills GE Sub-area D3. 4 lecture discussions.

GEO 200 Special Study for Lower Division Students (1–2)
Individual or group investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter. Prerequisites: permission of instructor.

GEO 222/222A Introduction to Cartology (3/1)
Introduction to the fundamentals of cartographic principles, processes, and technology, with emphasis on map scale, projection, symbolization, and design. Reference and thematic map reading, aerial photo and satellite image interpretation. Basic mapping skills using GIS. 3 hours lecture/problem solving, 2 hours activity. Corequisite: GEO 222/222A.

GEO 240/240A Introduction to Geographic Information Systems (3/1)
Concepts in the framework of geographic information systems. Basic techniques for the computer processing of geographical systems analysis and modeling. 3 hours lecture/problem-solving, 2 hours activity.

GEO 299/299A/299L Special Topics for Lower Division Students (1–4)
Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units, with a maximum of 4 units per quarter. Prerequisite: permission of instructor. Instruction is by lecture and activity or laboratory. Corequisites may be required.

GEO 303 Climatology (4)
Introduction to the basic elements in the climatic systems. Determinants of climatic variation through time and space. Methods of inquiry, including both qualitative and quantitative methods and computer assisted simulation in climatology. Reciprocal impact of climate and society. Course fulfills GE Synthesis B5. 4 hours lecture/problem solving. Prerequisites: All lower division courses in Area A and Sub-areas B1, B4, or permission of instructor.

GEO 305 Advanced Physical Geography I (4)
In depth investigation of landscapes and flowing water, emphasizing the formation and geographic distribution of mountains, volcanoes, valleys, and deserts, and their shaping by rivers, glaciers, and ocean waves. 4 hours lecture/problem solving. Prerequisite: GEO 101 or permission of instructor.

GEO 307 Advanced Physical Geography II (4)
In depth investigation of the changing physical environment. Emphasizes the changing processes of ocean-atmosphere and its impact on soil systems and terrestrial biomes. The influence of human activity on the changing physical environment is also examined. 4 hours lecture/problem solving. Prerequisite: GEO 101 or permission of instructor.

GEO 308 Biogeography (4)
The geography of organisms, biotic communities and ecosystems. Investigation of ecosystem types, their components, locations, and geographic scope. Particular emphasis on spatial and temporal principles governing the geographic patterns of current and past terrestrial plant and animal species and communities. Prerequisites: GEO 101 and either BIO 110 or BIO 115. 4 lecture/discussions.

GEO 309 Field Geography (4)
Extensive student participation in basic methods of geographic field analysis of small areas, including rural and urban types, and physical and cultural aspects. Theory and practice in field sampling. 4 lectures/problem-solving. Prerequisites: GEO 101 and a Geography major or permission of instructor.

GEO 310 Cultural Geography (4)
An introduction to the breadth, depth and methods of cultural geography through an examination of three themes: human-environment relationships; landscape; and place. The three themes are explored through the scholarship of selected distinguished cultural geographers. Prerequisites: GEO 100 or GEO 102 or permission of instructor. 4 lectures/discussions.

GEO 312 Economic Geography (4)

Introduction to the substance and issues of economic geography. Topics addressed include the distribution and control of resources, the diversity of political/economic systems and the international exchange of labor and goods. 4 lectures/problem-solving. Prerequisite: ENG 104.

GEO 313 Legal and Political Geography (4)

Spatial aspects of political systems and units. Territorial configurations and disputes at all levels, on all continents. 4 lectures/problem-solving. Prerequisite: ENG 104.

GEO 315 Urban Geography (4)

Student analysis and presentation of the problems in the origin and evolution of cities. Includes size, functions, distribution patterns, supporting and tributary areas, and roles within the whole political, social and economic structure of a region; includes suburbs and problems of metropolitan areas. 4 lectures/problem-solving.

GEO 320/320A Rural Geography (3/1)

Spatial analysis of rural environments, including the development and application of theoretical concepts and models to interpret rural communities, their characteristics, and their problems. 3 hours lecture, 2 hours activity.

GEO 330/330A Environmental Geography (3/1)

Explores geographic issues of natural resource availability, environmental consequences of patterns of population distribution, and pollution diffusion. Analysis of spatial patterns of human/environment impacts at regional and local scales. Prerequisite: GEO 101 or consent of instructor.

GEO 335 Historical Geography (4)

Introduction to the subdiscipline's content, issues and methods. Substantive examples of major shifts in the geography of human beings, their geographic knowledge, and their relations with the natural environment are drawn from around the globe and the last five centuries. Prerequisites: GEO 100 or GEO 102 or permission of instructor. 4 lecture/discussions.

GEO 340/340A Business Geographics (3/1)

Introduces students to routing, marketing, customer prospecting, service-area assessment, and retail/service site selection analysis using geographic information systems (GIS). Students will learn the key points of location theory in the spatial economy and data availability/data quality control. 3 hours lecture discussion, two-hour activity.

GEO 345 Tourism in a Globalizing World (4)

The geography of tourism and recreation in selected regions of the world. Aspects of physical and cultural geography that directly affect the tourist industry. 4 seminars. (Also listed as HRT 345)

GEO 350 U.S. and Canada Geography (4)

Student analysis and presentations of topics and problems in the physical, cultural and regional patterns of the United States and Canada with emphasis on the economic geography. 4 lectures/problem-solving.

GEO 351 Geography of California (4)

Location, description, and interplay of California's human and natural resources. The influence of physical features upon the economic activities and sequence of occupation of California. Particular attention to the relationship of current social and environmental problems to their geographical roots. Course fulfills GE Interdisciplinary Synthesis B5 or D4. 4 lecture discussions. Prerequisites: Completion of GE Area A and at least two courses from Sub-areas B1-B4 and at least two courses from Sub-areas D1-D3. Interdisciplinary Synthesis course for GE Sub-areas B5 or D4. 4 lecture/discussion.

GEO 352 Geography of Latin America (4)

Physical, cultural, regional patterns of Mexico, Central America, South America, and the islands of the Caribbean. 4 lecture discussions.

GEO 357 Geography of Asia (4)

Non-Soviet Asia from the Middle East to Japan and southward to Indonesia. Emphasis on environmental, cultural and political patterns and their relevance to current problems. 4 lecture discussions.

GEO 358 Geography of Africa (4)

Physical, cultural, and regional patterns of the nations of Africa. Emphasis within regions on development patterns of the new countries in Africa. 4 lecture discussions.

GEO 359 Europe: Land and People (4)

Student analysis and presentations of issues in the natural environment and the cultural landscape of Europe. Major current trends in social, cultural, economic and political developments in Western and Eastern Europe; relationship between historical and geographical diversity. 4 lectures/problem-solving.

GEO 400 Special Study for Upper Division Students (1-4)

Individual or group investigation, research, studies, or surveys of selected problems. Total credit limited to 8 units, with a maximum of 4 units per quarter. Prerequisite: permission of instructor.

GEO 405/405A Geo-Demographics Using GIS (3/1)

Application of Geographic Information Systems (GIS) techniques for the analysis of spatial and locational patterns of human population, population characteristics and population change. Housing, migration and commuting patterns. Market analysis and site location decision support. Neighborhood segregation and transitions. 3 hours lecture, 2 hours activity. Co-requisites: GEO 405/405A. Prerequisite: GEO 240/240A or equivalent.

GEO 409 Advanced Field Techniques (4)

Guidance and critiquing of student work in the analysis an evaluation of the geographical characteristics of the natural environment and its human use. Includes field mapping, systematic and random sampling of spatial phenomena, and environmental impact reporting. 4 lectures/problem-solving. Prerequisite: GEO 102 or permission of instructor.

GEO 410 Photographic Remote Sensing (4)

Student interpretation of spatial and spectral information from imagery
produced in the photo-sensitive region of the electromagnetic spectrum. Experimentation with multispectral photography of the environment. Radial-line maps and mosaics from air photos and satellite photos. 4 lectures/problem-solving. Prerequisite: GEO 103 or permission of instructor.

**GEO 413 Environmental Law (4)**
Assessment and evaluation of the interplay between the American system of law and the natural system of the environment. Analysis, discussion, and case studies of specific legal issues relating to resources, environmental quality, policy, and regulation, including air, water, and land pollution laws and their application and practice. 4 hours lecture/discussion.

**GEO 415 Geography and Emergency Management (4)**
Geographic context of Emergency Management and Policy. Planning for disasters, emergencies, and hazards before crises occur. Theories and practices of emergency management, including comprehensive EMS and all-hazards approach. Specific applications based upon recent and historic disasters. 4 lectures/discussion. Prerequisite: GEO 101 or GEO 102 or permission of instructor.

**GEO 420 Digital Image Processing (4)**
Principles and techniques of remote sensing and using remotely sensed data to examine physical and cultural geographic scenes. Remote sensing applications in urban planning, agriculture, ecosystem management, atmosphere and earth sciences, and geographic information systems. 4 lectures/problem-solving. Prerequisites: GEO 410 and completion of GE requirements in area 2A, 2B, and 2C, or permission of instructor.

**GEO 422 Multimedia Mapping (3)**
Use of cartographic communication principles, processes, and technology. Develop effective multimedia mapping skills with GIS and multimedia technology. Design printed and online two dimensional maps, three dimensional geo-visualizations, and animated presentations of geographical and spatial information. 3 hours lectures/problem-solving. Corequisite: GEO 422. Prerequisites: GEO 240A or consent of instructor.

**GEO 422A Multimedia Mapping Activity (1)**
Develop effective multimedia mapping skills with GIS and multimedia technology. Design printed and online two dimensional maps, three dimensional geo-visualizations, and animated presentations of geographical and spatial information. 2 hour activity. Corequisite: GEO 422. Prerequisites: GEO 240A.

**GEO 430 Geography of Landscape Preservation (4)**
Critical exploration of the origin and meaning of the landscape concept in geography and its contemporary importance in historic preservation. Focus on landscape representation using visualization techniques and on the social and environmental consequences of landscape preservation. Prerequisites: Junior standing or above and ENG 104 or permission of instructor. 4 seminars.

**GEO 435 Parks and Protected Areas (4)**
The geography of world parks, forests, wildernesses, wildlife preserves, recreation areas and other institutionally designated and operated natural spaces. Investigation of the origins, meanings, development, designs, uses, impacts, problems, and policies relating to them. Particular emphasis on cultural and environmental factors supporting the geographic patterns of past and current natural spaces. 4 lecture/discussions. Prerequisites: Junior or senior standing, and ENG 104 or consent of instructor.

**GEO 442/442A Advanced Geographic Information Systems I (3/1)**
First course in a two course project-based sequence. Technical issues in geographic information, including data structures and applied spatial statistics. Progress toward completion of a research project. 3 hours lecture/problem solving, 1 two-hour activity. Prerequisites: GEO 240/240A or consent of instructor. Corequisites: 442A/443A.

**GEO 443/443A Advanced Geographic Information Systems II (3/1)**
New description: Second course in a two course project-based sequence. Technical issues in geographic information, including data structures and applied spatial statistics. Completion of a research project. 3 hours lecture/problem solving, 1 two-hour activity. Prerequisites: GEO 442A/443A or consent of instructor. Corequisites: 443A/444A.

**GEO 444 Ethnic Geography of the United States (4)**
Explores geographic issues of race and ethnicity, the regional geographic distributions of ethnic groups and origins of those distributions, dynamics of change in ethnic geography at various scales, the socio-spatial dynamics of urban ethnic enclaves, and current issues in ethnic geography. Prerequisite: GEO 102. Four units lecture/discussion.

Environmental modeling from a geographic information systems perspective. Technical approaches to model development with GIS. Input data requirements, data sources and processing techniques, interactive results presentation, scaling and spatial dimensions issues, cross-disciplinary applications. 3 hours lecture/problem solving, 2 hours activity. Prerequisite: GEO 240A or consent of instructor.

**GEO 451 Internship in Geographic Information Systems (4)**
On-the-job training in cartography and/or image interpretation for at least 10 hours per week or a minimum of 100 hours per academic quarter. Prerequisites: senior standing and the consent of the internship coordinator.

**GEO/ANT/SSC 461 Senior Colloquium (2)**
Guided capstone experience with discussion meetings. Completion and presentation of a capstone project summarizing student’s learning experiences under faculty supervision. Discussion of problems or issues graduates may encounter in their chosen fields of employment. Summary portfolio and written report required. Prerequisites: senior standing.

**GEO 499 Special Topics for Upper Division Students (1-4)**
Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units, with a maximum of 4 units per quarter. Seminar. Prerequisite: permission of instructor. Corequisites may be required.
The History Department offers a major in history leading to the bachelor of arts degree as well as basic courses in general education. The History Department also offers a minor in history and a minor in Latin American Studies. Courses are designed to encourage students to seek out relationships between the past and contemporary social, political, and cultural issues, and to provide historical perspective on topics studied in other departments of the university.

Students have a choice of a history major without subplan and a History major with a Pre-Credential subplan. The History major without subplan offers a flexible curriculum and a maximum choice of general education courses and electives. It provides a foundation for those seeking pre-professional training in law, business, civil service, and graduate work leading to a master's degree or doctorate.

The History major with a Pre-Credential subplan is especially suited for students wishing to teach history in middle or high schools. Approved by the California State Commission on Teacher Credentialing, it provides a major in history combined with a pre-credential social science emphasis. Completion of this subplan successfully meets the state subject matter requirement for the Single Subject Teaching Credential in social science. Students may also meet this requirement by passing an examination adopted by the Commission on Teacher Credentialing.

Please note that subject matter preparation programs for credentialing prospective teachers should not be confused with undergraduate degree programs of colleges and universities. The Commission on Teacher Credentialing does not set standards for academic programs that lead to the issuance of credentials. Although an applicant for a teaching credential must have earned a baccalaureate or higher degree from an accredited institution, the degree program does not necessarily fulfill the Commission's standards for the subject matter preparation of teachers. Completing a subject matter program that satisfies the standards enables a candidate to qualify for a fifth-year credential program. Only the History major with Pre-Credential subplan satisfies the standards. It specifies in detail the courses which have been approved by the Commission on Teacher Credentialing. The History major without subplan is designed for students who have career goals other than teaching at the high school level.

Students qualifying for Single Subject Credentials in other fields (i.e., English, Mathematics, etc.) may obtain a supplemental authorization to teach history or social studies up to the ninth grade by completing the requirements which have been established for such additional authorizations. For further information, see Professor Judith Anderson in the History Department.

The department also offers a curriculum which leads to a Master of Arts degree in History. A description of this program can be found in the “Graduate Studies” section of the catalog.

Students majoring in history have the opportunity of joining the Cal Poly Pomona History Club and the local chapter of Phi Alpha Theta, the International Honor Society in History.

Please note: All new majors should contact the department office to learn the name of their advisor. Continuing students should see their assigned faculty advisor one or more times per year.

I. HISTORY PLAN

Recommended for students seeking a broad liberal education, pre-professional training in law, business, civil service, or graduate study leading to a career in college teaching, museum or public history, or related fields. Students are urged to take at least one foreign language, especially those who expect to pursue graduate study.

Required Core Courses

Required of all students in the History Major. A 2.0 cumulative GPA is required in core courses in order to receive a degree in the major.

HISTORY MINOR

For those who prefer to major in another field, the Minor in History carries some of the advantages of the History Major, yet can often be accommodated without requiring any additional time at the University. A History Minor, which appears on the transcript, is tangible evidence of systematic study of mankind’s past, exposure to a wide array of related human activities, and the ability to analyze and communicate the nature of complex phenomena. For prospective employers, it often means a candidate of broader perspectives, greater cultural depth, and superior communication skills. These attainments are an important advantage in virtually all fields of endeavor available to university graduates.

Required of all students:

History of World Civilization: Ancient Period HST 101 (4)
History of World Civilization: Middle Period HST 102 (4)
History of World Civilization: Modern Period HST 103 (4)
Total units ...................................................(12)

Twenty additional units in History will be selected in consultation with a History Department faculty advisor. Consideration will be given to student interests and vocational goals. Suggested groups of courses include specific world regions (ex. American history, European history, non-Western history), as well as special topics (ex. minorities in American history, modern world history, history of science, technology, and environment; etc.). The minor must include at least 12 upper division units ...................................................(20)

Literature of Mexico SPN 351 (4)
Spanish-American Literature SPN 355 (4)
Music of Mexico MU 311 (4)

Twenty-eight units are required for the minor. The Latin American Studies minor may be taken by history majors. Students in the minor are encouraged to have language competency in Spanish or, if possible, Portuguese. For further information on the minor, please see the History Department Chair.

COURSE DESCRIPTIONS

HST 100 The Study and Practice of History (4)
History as a discipline and an academic major. Readings, group discussion, and participation in research colloquia and web-based exercises. 4 lecture/discussion/online assignments.

HST 101 History of World Civilization: The Ancient Period (4)
Origin and development of world civilizations in Southeast Asia, Mediterranean Basin, Inner Asia, India, China, Europe, Polynesia, the Americas and Sub-Saharan Africa. Integrative study of ancient political, economic, and social organizations, technological achievements, and mythological, religious, and artistic expressions. Course fulfills GE Sub-area C2. 4 lecture discussions.

HST 102 History of World Civilization: The Middle Period (4)

HST 103 History of World Civilization: The Modern Period (4)
Rise of sovereign and national states; development of capitalist and industrial economy and scientific and secular culture in Europe; revolution in traditional society, values, and culture. Western Imperialism and revolt of Third World. Course fulfills GE Sub-area D2. 4 lecture discussions.

HST 200 Special Study for Lower Division Students (1-2)
Individual or group investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

HST 201 United States History (4)
History of the United States from earliest settlement to the end of Reconstruction (1877), with emphasis on the political, social, cultural and economic trends and episodes which molded and characterized the early American nation. Course fulfills GE Sub-area D2. 4 lecture discussions.

HST 202 United States History (4)
History of the United States from the end of Reconstruction (1877), to the present. Ethnic and gender diversity and democratization of the United States. Emphasis on political, social, cultural and economic trends which have molded and characterized America as a modern nation and world power. Meets the U.S. History part of U.S. History and Institutions requirement for graduation. Course fulfills GE Sub-area D1 in combination with PLS 201. 4 lecture discussions.
HST 213 Islamic Society and Institutions (4)
Islamic society and institutions from the rise of Islam to the present. Political and economic institutions, religious practices, Islamic sects, theology, law and philosophy, social classes and urban organizations, family structure, gender relations, Islamic reform movements and fundamentalism. 4 lecture discussions.

HST 293 Digital Oral History Methods and Practice (4)
Principles and practice of oral history research, the use of oral history interviews in historical scholarship, and the legal and ethical issues related to each. 4 lecture discussions.

HST 299/299A/299L Special Topics for Lower Division Students (1–4)
Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units, with a maximum of 4 units per quarter. Instruction is by lecture, laboratory, or a combination. Prerequisite: permission of instructor. Corequisites may be required.

HST 300 History Methods (4)
Writing a history research paper; introduction to research and writing techniques through completion of a project under faculty supervision. 4 seminars. Prerequisite: HST 100.

HST 301 Early and Medieval China (4)
China: archeological origins, rise of textual tradition, development of political and economic institutions, philosophical debates, social structures, popular religion, and foreign relations, the annexation of Korea and Vietnam. 4 lecture discussions.

HST 302 China from 900 to 1800 (4)
China from the Song to Qing dynasties. Political, economic, religious, social and intellectual changes. Development of Chinese science and technology. 4 lecture discussions.

HST 303 China since 1800 (4)
Transition from traditional empire to modern republic. Reaction to challenges from the West, reform efforts, new political structures, WW II, postwar era. 4 lecture discussions.

HST 305 Ancient and Medieval India (4)
Tradition and transformation in the political, social and economic history of India beginning with the Indus Valley Civilization and ending with the Mughal Empire. Rise of various religions and philosophies. Artistic and creative trends. India and the outside world. 4 lecture discussions.

HST 306 Modern India (4)
History of Modern India from the end of the Mughal Empire to the present. The pressures of tradition and modernity. The interaction between colonialism and nationalism. Communal separatism versus national integration. Democracy and development, population and poverty in post-independent India. 4 lecture discussions.

HST 307 South Asia (4)
History of South Asian nations: India, Pakistan, Sri Lanka and Bangladesh since the 1940s. Social, political and economic trends: religion and politics, communal and ethnic conflict, women’s movements, challenges to democracy and development. South Asia in global perspective. 4 lecture discussions.

HST 308 Hellenistic Greece and Republican Rome (4)
Comparative cultural aspects of Hellenistic Greece and Republican Rome.

HST 309 Modern Southeast Asia (4)
History of Southeast Asian nations (Myanmar, Cambodia, Laos, Vietnam, Indonesia, Malaysia, Singapore, and the Philippines) from the 17th century to the present. Indian and Chinese influences; Commerce, Christianity and Conquest; Imperialism, Nationalism and Communism; and challenges to development and democracy. 4 lecture discussions.

HST 310 Ancient Mesopotamia (4)
The city-states and kingdoms of Mesopotamia and its environs in the Bronze Age (ca. 3100-1200 B.C.). The origins of cities and the relations between them; the development of writing, law, mathematics, astronomy, and literature. 4 lecture discussions.

HST 311 Ancient Egypt (4)
The society, political and religious institutions of Egypt from the unification of the land to the end of the New Kingdom (3100-1085 B.C.). Cultural conservatism within Egypt and increasing contact with states of the Mediterranean and Africa. 4 lecture discussions.

HST 312 Ancient Israel and Middle Eastern Empires (4)
The ancient Near East from the end of the Egyptian New Kingdom to the end of the Persian Empire (ca. 1100-323 B.C.). The development of monotheism in Israel. Governments and economies of the Near East empires and their legacies. 4 lecture discussions.

HST 313 Middle East: The Rise of Islam (4)

The department offers a variety of coursework in academic and performance aspects of music that leads to a bachelor of arts degree. Courses are offered for the major and minor as well as for students with majors in other disciplines. The minor is designed for students in other disciplines who desire further experience in and knowledge of music. See department office for required course work in the minor.

The major in music provides the foundation for succeeding in music industry, teaching, and performance careers. The student must select one of three areas of study: Music Industry Studies, Music Education, or Performance. Students in the Music Industry Studies sub-plan or Performance emphasis must also choose a sub-area. The Music Industry Studies Sub-plan has sub-areas of Music Production, Music Business and Society, and Technology. Performance Emphasis has sub-areas in guitar, keyboard, selected instruments, voice, or commercial music.

The Philosophy Department has organized its programs to connect the traditional concerns of philosophy with the directions and needs of contemporary society. Philosophy instruction enhances skills which are crucial for success in a wide range of professions, in particular critical thinking skills (analytical and reasoning skills) and verbal skills (skills in writing and oral presentation). The Department offers both major and minor programs.

The Law and Society Option under the Philosophy Major, in addition to providing a solid background in philosophy, includes courses which apply critical thinking skills to moral, social, and political issues in the law, medicine, the environment, and education.

The study of moral and political philosophy, especially, equips students with the tools needed to analyze legal or moral concepts and arguments, and to work toward reasonable solutions to societal problems. This Option offers excellent preparation for those planning careers in law, business, urban planning, and human services.

The Philosophy Major without the Law and Society Option fosters the critical thinking skills involved in careful analysis and reasoning, as well as the synthetic skills involved in attempting to achieve the best broad view possible within a distinct area of inquiry (for example, in the natural sciences or in cognitive science) or in general. Such skills in reasoning and synthesis are crucial in a wide range of professions; in fact, such high level cognitive skills are often precisely what employers value most.

The Philosophy Department also offers minors in Philosophy and Religious Studies. The Philosophy minor enables students majoring in other disciplines to gain critical insight with respect to the perspectives, assumptions, and values underlying their primary discipline. The flexibility of the minor makes it adaptable to a variety of specific vocational and professional interests.

The Religious Studies minor serves students interested in deepening their awareness of the historical and multicultural dimensions of religious traditions as these affect the contemporary world.

The political science program is designed to provide students with the opportunity to acquire the kind of broad and rigorous education needed for life in the 21st century. The best career and life preparation is one which produces individuals who are both educated in the finest traditions of learning and equipped to adapt to constant and rapid change.

The department offers courses leading to the degree of Bachelor of Arts in Political Science. There are eight required courses that all majors much complete which are designed to give students an overview of the discipline and its subfields. Students are then able to select from a large number of units of political science electives in order to ensure flexibility and permit students to tailor their curricula to individual interests, needs, and career goals. For students in majors other than political science, the department offers a minor in political science.

Students majoring in political science who have at GPA of at least 3.0 overall and 3.3 in the major have the opportunity to join Pi Sigma Alpha, the national honorary society in political science. Additional information can be obtained from the Department of Political Science.

The Psychology degree program, which is housed in the Department of Psychology and Sociology, is designed to provide a comprehensive undergraduate education in this field, leading to the Bachelor of Arts degree. The student will receive a broad exposure to developmental, social, cognitive, clinical, and physiological areas of Psychology, as well as specific training in research methodology and statistics. Original student research is also fostered and encouraged during the undergraduate experience. The program is intended primarily as an excellent foundation for entrance to graduate school in any area of psychology, but also provides a good background in the science of human behavior for students seeking careers in management in public and private sectors, or seeking an undergraduate major in this area for a variety of other reasons.

For this major, the high school student should have a broad background in the natural and social sciences, English, and mathematics.

The department offers a Master of Science degree in psychology designed to prepare students for licensure in the field of Marriage and Family Therapy (MFT). Requirements for this program are found in the "Graduate Studies" section of this catalog.

Students majoring in Psychology who have a GPA of at least 3.0 overall have the opportunity to join Psi Chi, the National Honor Society in Psychology. For additional information contact the department office.

CRIMINAL JUSTICE MINOR

The Criminal Justice minor (also a certificate program) is a multidisciplinary grouping of courses that have been specifically selected to fulfill the needs of students presently working in or planning for careers in law enforcement or probation. Special advisement for students in any major who are interested in criminal justice may be obtained from the department’s Criminal Justice coordinator. Detailed information is available from the department office.

PHYSIOLOGY MINOR

The Physiology Minor is an interdisciplinary program that can be elected by students majoring in any field. Its purpose is to improve the training and advising of students in order to facilitate their pursuit of careers in biomedical fields utilizing a knowledge of Physiology. It is particularly appropriate for students majoring in Psychology.

A full description of the minor is located in the "University Programs" section of this catalog.

Examination of historical, cultural, and socioeconomic differences. Students have the opportunity to compare experiences, beliefs and knowledge with other class members. Course fulfills GE Synthesis D4. 4 lecture-discussions. Prerequisites: Completion of GE Areas A and D (sub-areas 1, 2, and 3).

PSY 460/460A Sensation and Perception (3/1)
Methods of perceptual assessment, quantification and analysis. Classical and contemporary psychophysics, methods of scaling subjective magnitude. Activities include data collection, analysis and written reports. 3 lectures/problem-solving. 1 two-hour activity. Prerequisites: PSY 202 or PSY 204 or SOC 204 or BHS 205.
Corequisites: PSY 460 and 460A.

**PSY/SOC 461, 462 Senior Project (2) (2)**
Selection and completion of a project under faculty supervision. Projects typical of problems that graduates must solve in their fields of employment or interest. Formal written report required.

**PSY/SOC 463 Undergraduate Seminar (2)**
Study and discussion of recent developments in behavioral sciences, contrasted with student’s senior project. Prerequisites: PSY/SOC 461, and PSY/SOC 462.

**PSY 490 Leadership and Teams (4)**
Major theoretical approaches in the psychological study of leadership. Interpersonal skills necessary for effective leadership. Lectures, discussions, and experiential activities to assist students in developing themselves as leaders. 4 seminars. Prerequisites: PSY 201 or 202 or MHR 301.

**PSY 498 Senior Seminar (4)**
Contemporary concepts, issues, and studies in the behavioral sciences. 4 seminars. Prerequisites: BHS or PSY major and upper division standing.

**PSY/SOC 499/499A/499L Special Topics for Upper Division Students (1–4)**
Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units, with a maximum of 4 units per quarter. Instruction may be by lecture, activity, laboratory, or a combination. Prerequisite: permission of instructor. Corequisites: PSY/SOC 499 and 499A or 499L (if appropriate).
SOCIAL SCIENCES
www.class.csupomona.edu/ga

One of the three majors offered in the department of Geography and Anthropology is Social Sciences. For other programs in the department see Anthropology and Geography.

Dorothy D. Wills, Chair, Department of Geography and Anthropology

Sara A. Garver Lin Wu
Richard S. Hyslop Terence Young
David G. Lord Kristen Conway-Gomez

The social sciences examine all aspects of human existence, from human origins to the latest election returns. In keeping with that tradition, the Department of Geography and Anthropology offers a flexible program leading to a Bachelor of Science degree in social sciences with opportunities for majors to concentrate in one or more of the social science disciplines: anthropology, economics, geography, history, political science, psychology, and sociology. It also provides future teachers with a pre-credential waiver track.

The department curriculum, multidisciplinary in nature, is especially suitable for students with broad and varied interests who understand that a liberal education is often the best background for many types of careers. An important departmental goal for each student, therefore, is to encourage the development of his or her personal and career objectives while maintaining the breadth of understanding and flexibility necessary to succeed in any of a variety of professions -- from government service, to business, industry, teaching, or international development.

Many graduates with a degree in Social Sciences continue on to graduate school in programs such as anthropology, sociology, psychology, economics, geography, history, law, political science or education. In some instances, postgraduate work is pursued after a few years of employment in an occupational field related to one of these specialized areas. Many students choose the Social Sciences major and then, after graduation, proceed to get a teaching credential. A recent trend noted by the U.S. Department of Labor is that private industry is hiring an increasing number of social science majors as trainees for administrative and executive positions. Research councils and other nonprofit organizations also provide a source of employment for social scientists. Teaching in colleges and universities and in the high schools is projected to remain the major area of employment for social scientists with advanced degrees or credentials.

Because of the interdisciplinary nature of the Department of Geography and Anthropology, students may in some cases select both a major and a minor from within the department. For example, a student may major in Social Sciences and minor in Anthropology. Details on other possible combinations are available from the department office.

COURSE DESCRIPTIONS

**SSC 101 Introduction to Social Sciences (4)**
An analysis of each of the many disciplines comprising the social sciences with particular emphasis on their interrelationships. A study of source materials and library techniques as well as methods employed by social scientists. Course fulfills GE Sub-area D3. 4 lecture discussions.

**SSC 200 Special Study for Lower Division Students (1-2)**
Individual or group investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter. Prerequisite: permission of instructor.

**SSC 299/299A/299L Special Topics for Lower Division Students (1-4)**
Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units, with a maximum of 4 units per quarter. Instruction is by lecture and activity or laboratory. Prerequisite: permission of instructor. Corequisites may be required.

**SSC 400 Special Study for Upper Division Students (1–4)**
Individual or group investigation, research, studies, or surveys of selected problems. Total credit limited to 8 units, with a maximum of 4 units per quarter. Prerequisite: permission of instructor.

**SSC 410 The Study of Peace: NMUN Preparation (4)**
Seminar for National Model United Nations (NMUN). Interdisciplinary analysis of peace; inter-group conflict and resolution; and peace institutions, particularly United Nations and related agencies. Simulations of conflict resolution. Uses concepts and methodologies of several social sciences. 4 seminars. Prerequisites: Selection for NMUN and approval of instructor. May be repeated for credit.

**SSC 441 Internship in Social Sciences (1–4)**
Field training which relates academic and practical experience in the student’s area of interest. Partial evaluation from work supervisor required upon completion. May be repeated for a maximum of 8 units. Prerequisite: department approval of student’s application.

**SSC/ANT/GEO 461 Senior Colloquium (2)**
Guided capstone experience with discussion meetings. Completion and presentation of a capstone project summarizing student’s learning experiences under faculty supervision. Discussion of problems or issues graduates may encounter in their chosen fields of employment. Summary portfolio and written report required. Prerequisites: senior standing.

**SSC 499/499A/499L Special Topics for Upper Division Students (1–4)**
Group study of a selected topic, the title to be specified in advance. Total credit limited to 8 units with a maximum of 4 units per quarter. Instruction is by lecture and activity or laboratory. Prerequisite: permission of instructor. Corequisites may be required.
SOCIOLGY

One of the three majors offered in the Psychology and Sociology department is Sociology. For other programs in this department, see Psychology.

The Sociology major, which is housed in the Department of Psychology and Sociology, is designed to provide a substantial foundation in theoretical, methodological, and content areas of sociology, leading to the Bachelor of Arts degree. In addition to a solid introduction to these content areas, students receive specific training in survey research and statistical analysis, and in the many practical applications of sociological theory. The Sociology major has three subplans: Criminology, Social Work, and General Sociology. The major is an excellent preparation for graduate study in Sociology, or Public Administration, and for professional studies in law, social work, or criminology. It also provides a very good background for entry level positions in management, in both public and private sectors.

For this major, the high school student should have a broad background in college preparation courses in natural and social sciences, English, and mathematics.

The department also offers minors in Psychology, Sociology, and Criminal Justice. The Criminal Justice minor may be taken by students in any of our majors, except students in the Criminology subplan. This program is a multidisciplinary grouping of courses which have been specifically selected to fulfill the needs of students presently working in or planning for careers in law enforcement or corrections. Courses required in the minor and certificate program are listed under the Behavioral Science major. Special advisement for students in any major who are interested in criminal justice or probation may be obtained from the department’s Criminal Justice coordinator. Detailed information is available from the department office.

Since Behavioral Science is an interdisciplinary major drawn from Psychology and Sociology, students may not double major in Sociology and Behavioral Sciences.

Sociology majors are invited to participate in a chapter of Alpha Kappa Delta, the National Honor Society in Sociology.

CRIMINAL JUSTICE MINOR

The Criminal Justice minor (also a certificate program) is a multidisciplinary grouping of courses that have been specifically selected to fulfill the needs of students presently working in or planning for careers in law enforcement or probation. Special advisement for students in any major who are interested in criminal justice may be obtained from the department's Criminal Justice coordinator. Detailed information is available from the department office.

Theatre and New Dance

The Cal Poly Pomona Department of Theatre and New Dance awards an undergraduate degree in theatre, which emphasizes production, and experience in the “doing” of theatre. At the same time, the Department offers courses in all aspects of the theatre, both artistic and academic. The program stresses concern for students as artists and individuals. Faculty, staff and students work closely together to build a solid foundation of knowledge of both the practical and artistic aspects of theatre for the student.

Five subplans are offered. The first, the general subplan enables students to develop a broad theatre curriculum with primary interests in: directing, playwriting, management, or theory and criticism in order to create a course of study that best suits their goals. The second, the acting subplan, is for the student whose primary interest is in acting for the stage. The third, the design and technical theatre subplan, is for students with an interest in the theatrical design areas of: scenery, lighting, costumes, makeup or sound, or in the technical areas such as scenic or costume construction, production management, or technical direction. The fourth subplan is Dance for students interested in a general background in dance with a specific performance interest in dance. The fifth subplan is theatre in education and community, for students interested in teaching theatre in secondary schools and working with community-based theatre organizations.

The Department presents a wide variety of productions to give the student a broad spectrum of experiences. Main stage productions range from dramas to musicals, from realism to varied theatrical styles, from premieres of new plays to presentations of classics by Shakespeare, Shaw, Moliere and Tennessee Williams. Students participate on main stage not only as actors and dancers, but also as designers and participants in all the many technical aspects.

In addition to the main stage season, the Department of Theatre and New Dance also offers an opportunity for experimentation in a program of workshops and projects presented in the smaller studio theater, where student involvement is strongly encouraged and supported. All productions draw audiences from the university and the community, and contribute greatly to their cultural climates.

In the classroom, students receive intensive training in acting (a series of at least nine acting courses are offered), voice, movement, directing, stagecraft, makeup, stage lighting, costume and scenic design, playwriting, and theater management.

Coursework also includes theatre history and criticism, dramatic structure and dramatic literature, to provide intellectual and academic skills, which work hand-in-hand with artistic skills.

After completing the theatre major at Cal Poly Pomona, students are prepared for advanced training in graduate schools; to go into teaching in high schools; or to begin their careers or specialized training in professional theatre, television or film.

The theatre minor is designed to acquaint a person interested in pursuing theatre on a limited scale with the basic tools for mounting a production, whether in a school or a community theatre situation. It also accommodates those who wish to begin a specialization in the acting-directing or the technical emphasis. The program is one of both classroom participation and practical experience in the production program. Special advisement for students who are interested in theatre may be obtained from the department chair. Detailed information is available from the departmental office.

The vision of the Dance Minor is to reflect a culturally diverse and artistically inclusive student-centered approach to the dance experience at Cal Poly Pomona. “New Dance” refers to a humanistic, cross-cultural, interdisciplinary approach to the study of the way art functions in society on a personal, local, national, and global level. “Dance” is defined to include human movement and aesthetic expression, movement based interdisciplinary work, and western and non-western cultural forms. New Dance practice is centered around concepts and hybrid explorations that are unique, challenging and innovative. The Dance Minor supports study in dance media, technology and interactive performance.

The New Dance program supports a variety of campus/community projects, invites innovative collaborations across groups and disciplines, and promotes the development of community engagement projects that reflect the diverse and dynamic cultural climate.

The mission of the Dance minor is to provide quality dance courses and experiences for the general student population, with an emphasis on common humanistic threads of art and expression found across cultures. By addressing the complexity of contemporary multicultural society through the examination of cultural issues, global perspectives, and personal histories, the Dance Minor is committed to developing student-centered study. The Dance Minor validates the cultural experience and world view of a broad cross-section of perspectives.

Student choreography and performance are showcased in the student/faculty dance concert. Other opportunities for informal works occur year-round in the studio and campus wide. Internships, independent study, cross-listed course proposals, community-based projects, and outreach, are some of the ways in which students can explore a variety of learning experiences not traditionally available.
