

Construction Site

Theme:

Creating a Construction Zone

Curriculum Area:

Mathematics

Activity:

Children will build structures utilized for their car and people figurines. Having the children go more in depth of what it takes to create them would broaden their ideas of creating structures

Age of Children:

4 – 5 Years Old Preschool Age

Materials Needed:

- Caution Tape
- Wood blocks
- Cardboard Pieces
- Blank blueprints
- Construction Books
- Pictures of structures
- Cones
- Cardboard Blocks
- Toilet Paper Rolls
- Colored Pencils
- Ruler/Tape Measure

Developmental Objectives:

Children will choose the materials of their choice and design their buildings

Procedure:

- The children will step into the construction zone that is taped off with caution tape
- They will each take a blank blueprint and a color pencil to design their building
- Then they will take the materials of their choice to build their designed structure
- The children may create and build more than one design and utilize more than one structure
