Open University

Want to take a class without formally enrolling in the master’s program? Open University gives you this option. You can sample the graduate program or take a class for professional development. All courses are available through this program. For more information visit: www.ceu.cpp.edu/courses/openuniv/
About the Program

The Master of Science in Civil Engineering (MSCE) program serves both full- and part-time graduate students, focusing on the application of principles and practices to real-world problems encountered by professional civil engineers. The program also facilitates applied research and prepares students for further graduate studies in a Ph.D. program.

MSCE students may choose from four emphasis areas:

- Structural Engineering
- Geotechnical Engineering
- Transportation Engineering
- Environmental & Water Resources Engineering

Admission Requirements

- BS or equivalent from a civil engineering program accredited by ABET
- Minimum of 3.0 GPA in all undergraduate upper division course work in engineering, mathematics and science

Curriculum

Candidates for the degree of MSCE must satisfy the following requirements:

- Complete 45 quarter units of coursework, which is equivalent to 30 semester units
- Complete either a project or thesis

Each student must meet with his or her academic advisor during the student’s first quarter to develop a written program of study that outlines the specific courses the student will take to complete the MSCE degree.

Detailed curriculum requirements for each emphasis area may be found on the Civil Engineering Department website: www.cpp.edu/ce

How to Apply

Applications are accepted online through the CSU Mentor website:

www.csumentor.edu

- Indicate desired emphasis area in the application

A student may enter the program in any quarter.
