

College of Engineering
BS, Civil Engineering - All Options
Curriculum Matrix

Course Number	Student Learning Outcomes						
	SLO 1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics	SLO 2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors	SLO 3. An ability to communicate effectively with a range of audiences	SLO 4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts	SLO 5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives	SLO 6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions	SLO 7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies
