Multipurpose Room

6:00pm-7:00pm

9 students

1. Promotion of Student Success Across Multiple identities

- A mixed race cultural center/office because some people need help but don't "belong" to a certain group.
- The awareness will be great with data behind it. This ties into #9.
- Take survey about people identities and then look at success.
- Teach/ inform about other cultures to prevent offensive ignorance.
- Promote opportunities more at cultural centers who represent multiple identities.
- Make sure people of lower socio economic status know what resources they have on campus that can contribute to their success.
- This sounds good. It would be wise to see what the different identities.

2. Student Wellbeing and Renewal

- Better Marketing might be useful here (Social Media).
- In bathrooms, have more signs/products
- Sometimes it feels like housing isn't accommodating for out-of-state/International students. They are the ONLY/Primary housing during the year.
- Key point: make sure that term 'well' is defined
- Inform students of easy ways to keep a wellbeing
- Offer more info/programs on well being
- Promote Health center more!
- Sounds good if wellbeing means healthy food then there aren't many options
- Self-care is incredibly important, especially to college students, this should be very bolded

3. Integrate the Co-curriculum with the Curricular Offerings to Develop Pathways to Prepare for Post-college Endeavors

- Make sure courses are relevant and emphasizes learn by doing
- Internship opportunities, hands on experience, more on campus jobs
- Internships coordinated through campus
- Very similar to #4. Also is this relates to soft skills or more technical skills, lots of students are engineering majors.
- Offer/bring awareness to internships
- Sounds like it will cross paths with my senior project. I suggest listing skills that students need to ensure the skills can be demonstrated within courses.

- Have programs for real-life skills, some people may still lack
- Good

4. Improve Student Career Planning and Readiness

- Good Job
- Imitate more “Learn by Doing” rather than just lectures
- More clear directions online for the different sites: BroncoDirect, My Planner
- If by polytechnic, you mean “Learn by Doing”, then it relates to my senior project
- Emphasizes learn by doing an ensure curriculum is relevant
- The Career Center is great, but it’s hard to find/get internships for specific majors

5. Redesign of Student Transitions Experience for First Year and Transfer Students

- More ways to meet students there aren’t just the halls or a frat/sorority
- This should also include continuous assessment of how effective the rode sign is.
- More support from fellow students to transfer students (hard to make friends)
- Check in on students in this category and take their feedback into account for the future
- Look towards either adaption or creation
- Address issues like political, racisms, etc. To let the abusers know what isn’t okay
- Do some research on what students life is like being in college
- ↑ This, but for all years
- Offer a “friendship service”
- Create online places for away students to connect before moving here
- Have a program to help create study groups and people take similar classes together

6. Promote Inclusive Excellence Across the Campus

- Central area of information to learn about classes
- Cultural centers can play a pivotal role in this
- More club fairs support to transfer students
- I am not sure what ‘Inclusive excellence’ is
- Clubs, classes that are necessary to graduate that teach about inclusion
- Togetherness/cultural awareness programs
- Promote all the different events happening campus a little better
- Try to spread resources to different locations

7. Focus on Collaboration and Engagement Across Campus

- This would be great is students are involved in these celebrations
- There needs to be a master calendar of all activities, IHC, BRIC, club meetings, etc.
- Teamwork makes the dream work
- Talk to Psy/Soc peer mentors and promote each other
- Collaborations help all the parties involved and increase community

- Good Job!
- I would like to see what this looks like

8. Professional and Personal Development for Staff

- I think administrative staff could be nicer and act like they care more...student feel like they get tossed around a lot
- Should include **all** staff (students)
- Feels like new skills to be developed
- This should include student staff. Cut I guess this is similar is 3-\$4
- More approachable staff members
- I think the campus does a good job
- The more we are specialized the better we can perform
- I think this is a good idea

9. Strengthen Use of Assessment

- Feedback and assessment can't change the present but it can improve the future
- Take a picture and show this to academic departments
- Good Job! Good resources.
- There is lots of great data to asses. Especially at campus rec
- Definitely would be interested in seeing actual data rather than survey data.
- Assessments line tests don't always provide accurate opinions maybe ask people directly
- Diversify the research to see any other ideas. Historical research might also be good
- Utilize as much data as possible

10. Focused Resources: Human, Budget, and Community Physical Spaces

- More community activities with incentives
- Something tells me this is a great idea. I cannot explain clearly, but it sounds good!
- Help students physically know WHERE everything is
- Team up with cultural centers
- Cultural centers are great about this
- More community area is in suites
- Have comment and ideas box for front desk so students can make suggestions anytime, not just at meetings

11. Anything Else?

- Make sure you have fun doing this
- Have a way for residents to know where everything is so they can take advantage of resources
