What is CPP WE?
Cal Poly Pomona Women in Engineering (CPP WE) is dedicated to engaging ALL women within the College of Engineering. CPP WE promotes a close community for female engineering students by providing activities to connect students and faculty. CPP WE seeks to create an environment in which women can thrive in the classroom and in their careers.

BECOME AN AMBASSADOR TODAY!

What is an ambassador?
Any female engineering student can be an ambassador! If you sign up, you will have the opportunity to connect with faculty members, fellow students, and engage in engineering outreach with K-12 students.

Ambassadors will receive an email invitation to these events:
- Ambassador Meetings
- Social events (CPP Letter Painting, making binary necklaces, etc.)
- K-12 outreach events (Introduce a Girl to Engineering)

How to become an ambassador
Signing up simply adds you to our email list, and the form can be found at:
- WE Welcome Lunch
- College of Engineering Club Fair
- WE Chats & Talks
- College of Engineering Website: http://www.cpp.edu/~engineering/diversity/cppwe/ambassadors.shtml

CPP WE is always interested in new ideas, email us at: cpp_we@cpp.edu
CPP WE thanks Dr. Ontiveros for the time, effort, and dedication that she has provided to the Women in Engineering program. In 2012, she organized the official establishment of our program and since then WE has grown significantly. With her support, WE was able to partner with Edison International who contributes funding and provides networking opportunities. Dr. Ontiveros has made her presence known at our events by speaking and inspiring female students to continue striving for their dreams. Although Dr. Ontiveros is moving on to Interim Associate Vice President of Faculty Affairs, she will continue to work closely with CPP WE.

“...and welcoming new beginnings!...”

Dr. Joseph Rencis

With the start of a new academic year comes the start of a new dean here at the College of Engineering. We are excited to welcome Dr. Joseph Rencis who served as engineering dean at Tennessee Tech University. He has focused his career to improve the engineering education across the country. CPP WE looks forward to his participation in our events and the thoughts he has to expand our outreach program.

“For me, leading the College of Engineering at Cal Poly Pomona is a dream job.”

-Dr. Joseph Rencis
WE Activities!

WE CHATS
- During an informal lunch, the students are provided the opportunity to connect with female faculty from their respective departments to learn about career paths, challenges, successes, and receive advice on how to become a well-rounded engineer.

WE TALKS
- Alumnae are invited to speak with the female student engineers about their journey through college, offering an insightful perspective as an engineer in the industry.

WE OUTREACH EVENTS
- Participate in various K-12 outreach opportunities to inspire the next generation to pursue STEM careers and lead the future of engineering. Engaging their minds by conducting engineering activities to help students understand engineering.

WE AMBASSADOR EVENTS
- Enjoy interactive community engagement days for ambassadors to make lasting friendships and memories.

Dr. Lisa Wang, WE Faculty Coordinator

The Fall 2017 quarter welcomes back Dr. Lisa Wang, as she prepares to serve her 2nd year as our WE Faculty Coordinator. Dr. Wang is a civil engineering professor, chair for the Graduate Studies Committee Department, and director of the Structural Analysis Laboratory. She received her PhD in Civil Engineering with an emphasis in Structural and Earthquake Engineering from the University of California, Irvine, and is a registered professional engineer. Dr. Wang’s research interests include linear and nonlinear structural analysis, seismic analysis, and design of liquid storage structures.

“I look forward to working toward developing and implementing strategies to recruit, retain, and build a community of women within the college.”

Dr. Jessica Perez, New CoE Faculty

It is with great pleasure that we introduce a new addition to the Engineering faculty, Dr. Jessica Perez. She will be lecturing ETT 210 and EGR 100 courses. She is a lifelong bronco, having earned her bachelor’s degree in Geology from Cal Poly Pomona where her interest for engineering sparked. She earned her Master’s degree in Geotechnical Engineering from UC Berkeley, and her PhD in Engineering Education from Claremont Graduate University this past spring.

She offers empowering advice to female Engineering students, and is passionate about helping underrepresented students persist in their studies. We are excited to welcome you and look forward to seeing your impact on the College of Engineering!

“It’s not about blending. If I walk into any room, I’m not going to blend in no matter what. I’m confident with who I am, because if I don’t bring a different perspective to the table, nothing changes. It’s about being yourself.”
Scholarships

PROJECT LEAD THE WAY (PLTW)

Cal Poly Pomona College of Engineering is an Affiliate with Project Lead The Way (PLTW) and will be awarding scholarships to students who have participated in the PLTW curriculum in high school. The scholarship program will award up to 20 scholarships at $2,000 each for the 2017 - 2018 school year. The scholarship closes November 10, 2017 and more information can be found here: https://csupomona.academicworks.com/opportunities/7902
